## Volume 489

**International Conference of Young Scientists and Students "Topical Problems of Mechanical Engineering 2018"**

**20–23 November 2018, Moscow, Russian Federation**

**Accepted papers received: 20 February 2019**

**Published online: 26 March 2019**

### **Preface**

[International Conference of Young Scientists and Students "Topical Problems of Mechanical Engineering 2018"](#)

[30th International Conference of Young Scientists and Students "Topical Problems of Mechanical Engineering 2018"](#)

[Peer review statement](#)

### **Papers**

[Mathematical model of the impact response of a linear viscoelastic auxetic plate](#)

O Ajenez, Yu A Rossikhin and M V Shitikova.....1

[Microstructure influence on high temperature deformation of low carbon martensitic steel](#)

N V Batanova and V L Danilov.....7

[Acousto-and electroplastic effects in alloy with reversible martensitic transformation](#)

A V Frolova, Y V Tsarenko, V V Rubanik Jr, V V Rubanik and V V Stolyarov.....13

[Aluminum alloy matrix composite wire reinforced by continuous carbon fibers](#)

S N Galyshev, A I Gomzin, R F Gallyamova, A Yu Nazarov, E L Vardanyan, U Sh Shayakhmetov and F F Musin.....18

[The analysis of applicability of the FlowVision software for capillary effect simulation](#)

S N Galyshev, L A Ishbulatov and A A Aksenov.....23

[Composite materials cohesion parameters](#)

K S Kotova and G S Slavcheva.....28

[Influence of the inclusion shape on the effective elastic properties of composites](#)

I V Magnitsky and E S Sergeeva.....36

[Measuring control of construction materials parameters in order to increase reliability of engineering objects](#)

E D Pozdnyakova, E V Maslennikova, A S Komshin and S R Orlova.....42

[Improvement of the machine determining technological capabilities method](#)

A V Sakharov and N A Rodionova.....48

[High nitrogen steel powder formation for additive technologies](#)

A S Zhukov, I V Shakirov, V N Klimov, E A Samodelkin, A D Bykova and M A Markov.....52

[The structure and properties of the coating based on particles of copper and zinc deposited by gas-dynamic spraying](#)

V E Arkhipov, A F Londarsky, G V Moskvitin and M S Pugachev.....57

[Track vehicles self-extrication mechanism](#)

N V Belov, D S Kiper and I S Chabunin.....65

[Small wind-driven power plant operating experience](#)

A A Belsky and V S Dobush.....70

[Aspects of strength calculation for the differential variable speed drive body of a hybrid bicycle](#)

V V Bogdanov, B V Demin and E V Metscheryakova.....76

[On assessment of crack-type defect sizes with using results of modal analysis](#)

A S Chernyatin and I A Razumovsky.....81

[Evaluation of the operational life of direct current motors](#)

O A Filina and A N Tsvetkov.....85

[The study of automotive vehicles technical operation indicators](#)

I N Kiryushin and V N Retyunskikh.....93

[Finite element methods application for calculation of defective composite leaf spring](#)

A M Kokurov and N A Tatus'.....97

[The study on external influence on the phasechronometric profile of asynchronous electric motors](#)

A A Kransutskaya, A B Syritskii, E V Tumakova and D D Boldasov.....103

[Calculation and experimental method for determination of stress state of the NPP coolant input units into NPP vessel elements](#)

V S Kravets and S V Maslov.....108

[Compensation for rigid body displacements in study of local deformations using electronic speckle pattern interferometry](#)

Igor N Odintsev and Taras P Plugatar.....112

[Biaxial elasto-plastic strain-stress state implementation in the case of the simple tension](#)

V V Pashchenko, A V Tsarkov and S V Kheylo.....118

[Features of composite beams bending analysis by energy methods](#)

A N Polilov and N A Tatus'.....123

[Method for determining the composite and real hardness of hardened surfaces considering the effect of retained stresses in the coating](#)

M S Pugachev and N A Voronin.....130

[Stress-strains state calculation of a rod at uniaxial tension with non-local effects](#)

I Y Savelyeva, A V Cherednichenko and A P Shukhtin.....136

[Research of the friction surfaces regular microgeometry parameters effect on the hydro-mechanical characteristics of the «piston-cylinder» tribounit](#)

K Gavrilov, A Doikin, M Izzatulloev and S Surovtsev.....143

[Wear of foundation with a nonuniform coating by rough punch](#)

K E Kazakov.....150

[Effect of fillers on the coefficient of friction of a polyurethane sealing element for a coiled tubing sealing device](#)

A Matsko and V Kopchenkov.....157

[Empirical correlation of heat generation in ball bearings depending on the operational conditions in the supports of aero-engine rotor](#)

N I Petrov and Yu L Lavrentyev.....162

[Modelling of quasistatic rolling of pneumatic tyre in Abaqus program complex](#)

M A Shilov, P V Korolev, L B Maslov and E S Shirokova.....169

[Methodology development of the materials erosion tests](#)

N I Smirnov, A N Yagovkina, M V Prozhega, N N Smirnov and I A Safonov.....176

[Effect of laser hardening modes on the hardening zone geometric parameters and tribological properties of 40Cr steel](#)

D A Starostin, V P Biryukov, D V Klevetov and V F Yudkin.....185

[Numerical analysis of nonlinear forced vibrations of a cylindrical shell with combinational internal resonance in a fractional viscoelastic medium](#)

B Ajarmah and MV Shitikova.....192

[Linear orbital stability analysis of the pendulum-type motions of a Kovalevskaya top with a suspension point vibrating horizontally](#)

M V Belichenko.....200

[Experimental study on active damping of compressor blade forced vibrations using piezoelements](#)

A D Bortnikov.....209

[Nonlinear dynamics of multi-edge trepanning vibration drilling](#)

A M Gousskov and Dinh Duc Tung.....215

[Influence of fractional calculus model parameters on nonlinear forced vibrations of suspension bridges](#)

A L Katembo and M V Shitikova.....220

[Impact response of a nonlinear viscoelastic auxetic plate](#)

A I Krusser, Yu A Rossikhin and M V Shitikova.....226

[Modelling the granular medium dynamics on rough vibrating plane using method of large particles](#)

I P Lyan and G Y Panovko.....234

[Method of engine structural frame vibrations analysis during fan blade-out](#)

V Y Myasnikov and I I Ivanov.....242

[Multiple-degree-of-freedom rotor model with total unbalance and possible contact on stator](#)

A Nikiforov.....250

[Thermographic bench tests of rubber-cord pneumatic spring](#)

A V Pozdeev, D A Chumakov, V V Novikov, I A Golyatkin, K V Chernyshov, A E Gavrilov and A V Leonard.....259

[Force driven nonlinear vibrations of a thin plate with 1:1 internal resonance in a fractional viscoelastic medium](#)

M V Shitikova and V V Kandu.....267

[On self-synchronization of inertial vibration exciters in a chain-type oscillatory system](#)

A E Shokhin, A N Nikiforov and K V Krestnikovskii.....275

[Normal vibrations and the stability of plates with moving borders](#)

T I Zhdan.....280

[Influence of mechanical impact on bone tissue regeneration in porous scaffold](#)

E E Iliyina, L B Maslov and N A Sabaneev.....285

[Distributed control system for mobile medical complexes](#)

Daniil V Khmyachin, Ekaterina A Khmyachina, Maxim V Archipov, Gleb A Shumeiko, Uriu P Panov and Sergei A Ippolitov.....291

[Genetic alphabets, unitary matrixes and quantum-algorithmic genetics](#)

S Petoukhov, E Petukhova and V Svirin.....296

[The inherited information geometric analysis and the genetic sub-alphabets invariant system](#)

I Stepanyan and V Svirin.....301

[On the stability of trajectories in the task of pursuit](#)

M V Andreeva and V E Pavlovsky.....311

[Tensometry of soft biological tissues with manipulation robot](#)

M V Arkhipov, E A Vzhesnevsky, M A Eremushkin, E A Samorukov and L B Kocherevskaya.....316

[3DoF Parallel robot analysis](#)

D V Artemov, V M Masyuk, S Y Orekhov and I V Pchelkina.....322

[Clearance control of vehicle with hydropneumatic suspension and the wheel formula 8×8](#)

D N Demyanov, V S Karabtsev and A I Malinov.....328

[Features of the mathematical model for the control forces calculation of the four-wheeled robot](#)

A V Leonard, S A Tverdohlebov, A E Gavrilov, S A Ustinov and A A Burhanov.....333

[Energetically efficient modes of the walking robots movement at its displacement across an uneven surface](#)

M V Miroshkina, E S Briskin and Y V Kalinin.....341

[Kinematic study of the weeding robot](#)

A S Ovchinnikov, V S Bocharnikov, N S Vorob'yeva and A G Ivanov.....345

[Developing an algorithm to control the accuracy of the milling of aerospace parts with cellular structure by using copying machine-tools with CNC of "SVO" type](#)

O Pas and N Serkov.....351

[On the features of the progressive movement of the solid body, controlled by two propulsion devices](#)

V N Platonov, E S Briskin and N G Sharonov.....356

[Development of automated accuracy control tools for robotic equipment](#)

A A Potapov, A A Fedorov, V M Masyuk and S Y Orekhov.....360

[The algorithm for planning the trajectory of the 3-RPR robot, taking into account the singularity zones based on the method of non-uniform covering](#)

L A Rybak, E V Gaponenko, DI Malyshev and L G Virabyan.....366

[Synthesis planetary-layshaft transmission with single transition shifts](#)

Konstantin B Salamandra.....374

[Manipulator-tripod on mounted parallelogram mechanism](#)

E N Zakharov, I A Nesmiyanov and M E Nikolaev.....380
