**Volume 10908**

Proceedings of SPIE 0277-786X, V. 10908

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Frontiers in Ultrafast Optics: Biomedical, Scientific, and Industrial Applications XIX*, edited by Peter R. Herman, Michel Meunier, Roberto Osellame, Proceedings of SPIE Vol. 10908 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

---

## ULTRAFAST LASER-MATTER INTERACTION

---

10908 02	<b>X-ray emission during ultrashort pulse laser processing (Invited Paper)</b> [10908-1]
10908 03	<b>Weyl semimetals in circularly-polarized ultrafast laser field</b> [10908-2]
10908 04	<b>Femtosecond laser-based formation of electrically conductive silicon carbide on PDMS</b> [10908-3]

---

## BIOMEDICAL APPLICATIONS OF ULTRAFAST LASERS

---

10908 0A	<b>Application of laser surface nanotexturing for the reduction of peri-implantitis on biomedical grade 5 Ti-6Al-4V dental abutments</b> [10908-9]
----------	--

---

## 3D STRUCTURING OF TRANSPARENT MATERIALS

---

10908 0B	<b>High-resolution femtosecond laser 3D micromachining using low-NA focusing systems (Invited Paper)</b> [10908-10]
----------	---

---

## ADVANCED ULTRAFAST LASERS AND BEAM CONTROLS

---

10908 0J	<b>Complete temporal measurement of ultrashort laser pulses using interferometric GRENOUILLE</b> [10908-18]
----------	--

---

## FS-LASER-BASED INTEGRATED OPTICAL DEVICES

---

10908 0M	<b>Switchable dual wavelength picosecond fiber laser source operating around 780 nm for advanced Raman spectroscopy</b> [10908-21]
10908 0N	<b>Next generation of tailored mode selective transmission gratings for fiber integrated devices</b> [10908-23]
10908 0O	<b>Tuning multichannel filters based on FBG in multicore fibers</b> [10908-24]

---

**ULTRAFAST LASER MICRO/NANOMACHINING**

---

10908 0U      **Characterization of surface plasmons inducing nanoablation on nonmetallic materials excited with intense femtosecond laser pulses (Invited Paper) [10908-30]**

---

**POSTER SESSION**

---

10908 1A      **W-type co-axial chalcogenide optical fiber for coherent mid-IR supercontinuum generation [10908-22]**
