

PROCEEDINGS OF SPIE

Quantum Dots and Nanostructures: Growth, Characterization, and Modeling XVI

**Diana L. Huffaker
Holger Eisele**
Editors

**6–7 February 2019
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 10929

Proceedings of SPIE 0277-786X, V. 10929

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum Dots and Nanostructures: Growth, Characterization, and Modeling XVI*, edited by Diana L. Huffaker, Holger Eisele, Proceedings of SPIE Vol. 10929 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

vii *Conference Committee*

NANOWIRE DEVICES AND CHARACTERIZATION

10929 05 **MBE-grown GaAs/AlGaAs multiple quantum wells on Ge substrate** [10929-4]

QUANTUM DOT DEVICES

10929 0C **MBE-grown InGaAs/GaAs quantum-dots on Ge substrate: An idea towards optoelectronic integration on silicon** [10929-11]

QUANTUM DOTS I

10929 0E **Effect of vertical coupling on the performance of mid-infrared InAs-QDIP** [10929-13]

10929 0F **Auger recombination-induced neutralization and stretched exponential recharging in an InAs quantum dot** [10929-14]

10929 0G **Improvement in operating temperature of InAs/GaAs quantum-dots-based photodetectors by varying position of localized carriers in active region** [10929-15]

QUANTUM DOTS II

10929 0I **Coulomb-induced recombination dynamics in magnetically doped type-IIb quantum dots** [10929-17]

10929 0K **Influence of modulation doping on p-i-p quantum-dots (InAs/GaAs)-based infrared detector performance** [10929-19]

PHYSICS OF NANOSTRUCTURES

10929 0N **Tailoring and controlling fermionic properties in heterogenous quantum-dot colloidal solutions** [10929-22]

COLLOIDAL QUANTUM DOTS

- 10929 0U **Synthesis of ITO nanocrystals in mesoporous silica glasses and application for enhanced down-conversion fluorescence of Er³⁺/Yb³⁺ ions** [10929-29]
- 10929 0V **Evaluation of pH-tuned ZnO down-shifting photoluminescent quantum dots and their influence on single-crystal silicon solar cells** [10929-30]
- 10929 0X **Impact of a time gate to the purity of single photons emitted from colloidal quantum dots** [10929-32]

POSTER SESSION

- 10929 0Z **Analysis of strain relaxation and dark current minimization in In(Ga)As QDIP with In_{0.15}Ga_{0.85}As/GaAs capping** [10929-34]
- 10929 10 **Investigation of carrier-confinement and dark current minimization in In_{0.5}Ga_{0.5}As quantum dot infrared photodetector with the incorporation of In_{0.21}Al_{0.21}Ga_{0.58}As/GaAs capping** [10929-35]
- 10929 11 **Impact of ultra-thin quaternary capping on modulation doped p-i-p quantum dots (InAs/GaAs) based infrared detector** [10929-36]
- 10929 12 **Impact of ternary capping on p-i-p InAs/GaAs quantum-dot infrared photodetectors** [10929-37]
