**Volume 10936**

Proceedings of SPIE 0277-786X, V. 10936

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Heat Engines: Science and Applications*, edited by Denis V. Seletskiy, Richard I. Epstein, Mansoor Sheik-Bahae, Proceedings of SPIE Vol. 10936 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

---

## LASER COOLING AND RADIATION-BALANCED LASERS IN SEMICONDUCTORS

---

10936 04	<b>Evaluation of CsPbBr<sub>3</sub> nanocrystals for laser cooling</b> [10936-3]
10936 06	<b>Anti-Stokes laser refrigeration of a nanoscale semiconductor gain medium (Invited Paper)</b> [10936-4]

---

## NOVEL PHOTONIC HEAT ENGINES AND ELECTROLUMINESCENT COOLING

---

10936 0A	<b>Observation of local electroluminescent cooling and identifying the remaining challenges (Invited Paper)</b> [10936-9]
10936 0B	<b>Practical efficiency limits of electroluminescent cooling (Invited Paper)</b> [10936-10]

---

## COOLING IN RARE-EARTH-DOPED BULK AND FIBER SYSTEMS I

---

10936 0E	<b>Laser cooling under ambient conditions in Yb<sup>3+</sup>:KYW (Invited Paper)</b> [10936-13]
----------	---

---

## COOLING IN RARE-EARTH-DOPED BULK AND FIBER SYSTEMS II

---

10936 0H	<b>Progress towards optical cryocooling in Mid-IR</b> [10936-16]
10936 0I	<b>Laser refrigeration of optical fibers via optically active composite cladding materials</b> [10936-17]

---

## CHARACTERIZATION METHODS AND NOVEL CONCEPTS IN LASER COOLING

---

10936 0K	<b>A non-destructive method for measuring the absorption coefficient of a doped optical fiber</b> [10936-19]
10936 0L	<b>Laser cooling of optically trapped nanocrystals</b> [10936-20]

10936 0M **Laser cooling of solids: towards biomedical applications** [10936-21]

**POSTER SESSION**

---

10936 0U **Temperature dependence of thermophotonic energy transfer in intracavity structures**  
[10936-29]

10936 0V **Prospects for rapid laser cooling on ED-allowed transitions** [10936-30]
