Volume 11021

Proceedings of SPIE 0277-786X, V. 11021

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Unmanned Systems Technology XXI*, edited by Charles M. Shoemaker, Hoa G. Nguyen, Paul L. Muench, Proceedings of SPIE Vol. 11021 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/$18.00.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 PERCEPTION AND NAVIGATION

11021 03 Integration and operation of a sUAS-based multi-modal imaging payload equipped with a novel communication system enabling autonomous platform control [11021-2]

11021 04 Intelligent drone-based surveillance: application to parking lot monitoring and detection [11021-3]

11021 05 Unmanned systems technologies in contested urban environments [11021-4]

SESSION 2 INTELLIGENT ALGORITHMS

11021 06 Games of timing with detection uncertainty and numerical estimates [11021-6]

11021 08 Vision-based deep learning for UAVs collaboration [11021-8]

11021 09 UAV pursuit using reinforcement learning [11021-9]

SESSION 3 CONTROL

11021 0B Design and benchtop validation of an autonomous bicycle with linear electric actuators [11021-11]

11021 0C Linear parameter varying-based control of a riderless bicycle with linear actuators [11021-12]

11021 0D Developing a low-cost autonomous blimp with a reduced number of actuators [11021-13]

SESSION 4 SPECIAL TOPICS

11021 0E Evaluation of 7-degree-of-freedom robotic arm precision and effects of calibration methods [11021-14]

11021 0F A compact End Cryptographic Unit for tactical unmanned systems [11021-15]

11021 0G Solid oxide fuel cell-powered Small Unmanned Aerial Systems (UASs) for extended endurance and long-range missions [11021-16]

11021 0H UAV propagation channel characteristics in SHF band [11021-18]

SESSION 5 MODELING AND SIMULATION

11021 0J Modeling and simulation of leader-follower autonomous vehicles: environment effects [11021-21]

11021 0K Design of unmanned swarm tactics for an urban mission [11021-22]

SESSION 6 SELF-ORGANIZING COLLABORATIVE ROBOTIC TEAMS: JOINT SESSION WITH CONFERENCES 11015 AND 11021

11021 0M Autonomous swarms of high speed maneuvering surface vessels for the central test evaluation improvement program [11021-24]

11021 0N DSOARS: a swarm engineering and verification environment [11021-25]

11021 0O Collective trust estimation in multi-agent systems [11021-26]

POSTER SESSION

11021 0Q A general theory on first passage times with applications to adaptive decision making [11021-28]

11021 0R Stochastic functional central limit theorems with applications to control of uncertain systems [11021-29]

11021 0S Stochastic functional limit theorems with applications to decision making under uncertainty [11021-30]

11021 0T Stochastic functional laws of the iterated logarithm with applications to learning and control [11021-31]
