Table of Contents

Title	Page Range
Applying Augmented Reality to New or Existing Remote Access Laboratories	6–11
Wattom: Ambient Eco-feedback with Mid-air Input	12–15
A Study of Contactless Human Computer Interaction with Virtual Environments	16–21
Virtual Reality in the Study of the Male Urinary System	22–26
Effectiveness of online experimentation to change conceptual knowledge in non-formal learning	27–30
A framework for interpreting experimental errors in VISIR	31–35
Open Digital Lab for You – Laboratory-based learning scenarios in education, research and qualification	36–41
Dashboard for the VISIR remote lab	42–46
Analytics on the accesses to contents in e-lab remote control laboratories	47–51
A MOOC with an e-lab remotely controlled experiment: student behaviour analysis	52–57
ELSA-SP – Through-the-cloud subscribe-publish scheme for interactive remote experimentation under iLab Shared Architecture and its application to an educational PID control plant	58–62
A WebLab Control Experiment using the Ball and Beam System and Multiobjective Optimization	63–68
PuzzlEx: an Online Experimentation Environment for Control Engineering Labs	69–73
On an IFAC Online Pilot Survey for A First Course On Control	74–79
Integration of new control experiments to online environment	80–84
3D Three-Tank Remote Laboratory Based on Matlab and Websockets	85–89
Toward Solar Energy Harvesting for Small Cell Networks: Technology, Feasibility, and Challenges	90–95
Smart Home Energy Management Supported by Cloud Computing	96–101
Experimental NFT hydroponics system with lower energy consumption	102–106
Extended Reality in IoT Scenarios: Concepts, Applications and Future Trends	107–112
Remote Precipitation Monitoring Using a Microwave Link	113–117
Is a Remote Laboratory a Means to Develop Competences for the 'Working World 4.0'? A Brief Tentative Reality Check of Learning Objectives	118–122
Collaborative development of plasma physics MOOC in the context of a PhD curricular unit	123–127
From laboratory education to laboratory edu-action: evaluation of a redesigned lab course for prospective technology teachers and resulting demands for cyber-physical 'remotification'	128–132
The use of technology in education: Just-In-Time (JiTT) teaching methodology and remote laboratory	133–136
Fostering the Comprehension of the Object-Oriented Programming Paradigm by a Virtual Lab Exercise	137–142
Online Control of Islands Microgrids Connected by Electrical Submarine Cable	143–148
Electronic Automotive Control	149–154
Introductory experiments for a stable plant control	155–160
Learning Objects and Experiments for Active Disturbance Rejection Control	161–166

Title	Page Range
Web Presentation of Quarter Car Model	167–171
Improving the Usability of Interactive Systems by Incorporating Design Thinking into the Engineering Process: Raising Computer Science Students' Awareness of Quality versus Quantity in Ideation	172–176
Agile approach to a CS2-based course using the Jupyter notebook in lab classes	177–182
Improving the use of remote laboratories. The case of VISIR at Universidad Nacional de Rosario	183–188
Automation of Basic Supervision Tasks in a Remote Laboratory – Case Study NetLab	189–192
Teaching Internet of Things in a Collaborative Laboratory Environment	193–198
Online Simulation of Methods to Predict the Remaining Useful Lifetime of Aircraft Components	199–203
Upgraded Plasma Spectroscopy Internet Laboratory	204–207
Remote experimentation in the teaching of physics in Costa Rica: First steps	208–212
Remote monitoring and control of winemaking parameters	214–219
Online experimentation at the GOLEM tokamak	220–225
Interactive Content Objects as GOLDi-Lab Services	229–230
Web-based tool for predicting the Remaining Useful Lifetime of Aircraft Components	231–232
Smartly Water: Interaction with a smart water network	233–234
Interactive Demonstration of an Energy Efficient YOLOv3 Implementation in Reconfigurable Logic	235–236
Immersive Serious Games for Post-Stroke Motor Rehabilitation	237–238
Remote demonstration of the GOLEM tokamak	239–240
Serious Game for reading and spelling skills	242–243
Edge Computing: A Neural Network Implementation on an IoT Device	244–246
Musiquence: a serious game customization system for dementia	247–248
Custom-made exergames for older people: New inputs for multidimensional physical	249–250
Interactive DEMONstration of Medical Simulations using a Virtual Reality approach: Application to the Male Urinary System	251–252
Integral Remote laboratory for Programmable Logic	253–255
Travelling in a virtual city: a physical exercise promoting game	256–257
Industrial IoT Smartbox for the Shop Floor	258–259
PILAR: A Federation of VISIR Systems for Analog Electronics	260–261
Augmenting Shared Spaces in Psychotherapy Contexts	264–265
Importance of speaker specific speech features for emotion recognition	266–267
A Hybrid Application For Real-Time Air Quality Monitoring	270–271
World Pendulum Alliance	272–273
Augmented Reality for Accessible Digital Mental Healthcare	274–275
The Virtual Human Breathing Relaxation System	276–277
Web Interface for River Hydrodynamics Simulation	278–279
A preliminar analysis and comparison of international projects on mobile devices and mHealth Apps for heart failure	280–285
Usability evaluation of an integrative exergaming system for the senior population	286–291
Reh@City v2.0: a comprehensive virtual reality cognitive training system based on personalized and adaptive simulations of activities of daily living	292–297

Title	Page Range
Exergames and their benefits in the perception of the Quality of Life and Socialization on institutionalized older adults	298–304
Using a variable buoyancy system for energy savings in an AUV	305–309
Chemiresistive Sensors based on Electrospun Tin Oxide Nanofibers for Detecting NO ₂ at the sub-0.1 ppm level	310–314
Personal electronic systems for citizen measurements of air quality	315–319
An Online Platform For Real-Time Air Quality Monitoring	320–325
Object detection with Raspberry Pi3 and Movidius Neural Network Stick	326–330
A Biomedical Motif for Teaching Applied Deep Learning	332–336
A Matlab Tool for Solving Linear Goal Programming Problems	337–342
Comparison of Deep Learning Architectures on Embedded Devices and Generalized Fixed-point Conversion Algorithm	343–347
Comparison of relaxation techniques in virtual reality for breast cancer patients	348–351
iACTwithpain - Building an online platform for helping Chronic Pain Patients	353–358
Musiquence: a framework to customize music and reminiscence cognitive stimulation activities for the dementia population	359–364
Mixed Reality Games in Engineering Education	365–370
First steps in robotics using Crumble as a friendly platform	371–376
An Adaptive Serious Game of Statistics: project development and mechanisms	377–382
A Serious Game for Post-Stroke Motor Rehabilitation	383–387
Pendulum as an Educational Remote Experiment	388–393
Massive Open Online Labs (MOOLs): An Innovative Solution to Achieving SDGs in the Global South	394–398
A pedagogical platform for metaheuristic optimization	399–404
e-Engineering: Remote Labs in an Electronics and Optics e-Learning for Embedded Systems Course	405–409
Remote experiments with pneumatic circuit using a double rod cylinder	410–414
Augmented Reality as an Advanced Learning Tool for Pneumatic Control	415–418
Concept of remotely controlled digital pneumatic system in accordance with Industry 4.0 approach	419–423
An Electro-pneumatic Prototype to Support the Teaching of Industry 4.0 Concepts	428–433
A Simulation Tool Using AI Technics and Karnaug Maps for Learning and Control Digital Pneumatics	434–438
Air quality monitoring in scholar environments	439–443
Field Assessment of Low-cost Particulate Matter Sensors against Reference Methods	444–448
Measurement of PM ₁₀ and PM _{2.5} from silicon carbide particles with cascade impactor based on Surface Acoustic Waves sensors	449–453
Ga doped ZnO thin films deposited by RF sputtering for NO ₂ sensing	454–457
Evaluation of Co _x Fe _{3-x} O ₄ cobaltites as ethanol sensing material	458–461
Low-Cost sensors for urban air quality monitoring: preliminary laboratory and in-field tests within the TECNAIRE-CM project	462–466
Old Musical Instruments and Music Therapy	467–471
A Telemonitoring Solution Applied to Dynamic CVD Risk Assessment: LookAfterRisk	472–475
Blood pressure measurement	476–480
Few Perspectives and Applications of Music Induced Emotion	481–485
The Use of Music Therapy for Adults' Anxiety Relief	490–493
