# 2019 IEEE 19th International Conference on Software Quality, Reliability and Security Companion (QRS-C) **QRS-C 2019**

## Table of Contents

Message from General Chair .....	xix
Message from Program Chairs .....	xx
Message from Steering Committee Chairs .....	xxi
Organizing Committee .....	xxii
Program Committee .....	xxiv
Steering Committee .....	xxvi
Chairs of Workshops Co-Located with QRS 2019 .....	xxvii
Keynotes .....	xxix
First International Workshop on Data-driven System Quality Assurance Workshop Summary .....	xxxii
Poster Sessions on Creative Lifestyle Computing .....	xxxiv

### Automobile Software Security and Safety

A Method for Constructing Automotive Cybersecurity Tests, a CAN Fuzz Testing Example .....	1
<i>Daniel S. Fowler (Coventry University), Jeremy Bryans (Coventry University), Madeline Cheah (HORIBA MIRA Limited), Paul Wooderson (HORIBA MIRA Limited), and Siraj A. Shaikh (Coventry University)</i>	
Adding Cyberattacks To An Industry-Leading CAN Simulator .....	9
<i>Jake Hayward (Coventry University), Andrew Tomlinson (Coventry University), and Jeremy Bryans (Coventry University)</i>	
Security Vulnerability Metrics for Connected Vehicles .....	17
<i>Lama Moukahal (Queen's University) and Mohammad Zulkernine (Queen's University)</i>	
Highly Available, Self-Defending, and Malicious Fault-Tolerant Systems for Automotive Cybersecurity .....	24
<i>Clifford Liem (Irdeto), Dan Murdock (Irdeto), Andrew Williams (Irdeto), and Martin Soukup (Irdeto)</i>	
Improved Pattern for ISO 26262 ASIL Decomposition with Dependent Requirements .....	28
<i>Christian Lidström (KTH Royal Institute of Technology), Carl Bondesson (Scania AB), Mattias Nyberg (KTH Royal Institute of Technology), and Jonas Westman (Scania AB)</i>	

DDCAN: Delay-Time Deliverable CAN Network .....	36
<i>Ryo Kurachi (Nagoya University), Hiroaki Takada (Nagoya University), Naoki Adachi (AutoNetworks Technologies, Ltd., ), Hiroshi Ueda (AutoNetworks Technologies, Ltd., ), and Yukihiro Miyashita (AutoNetworks Technologies, Ltd.,)</i>	
Integrating Application Security Testing Tools into ALM Tools in the Automotive Industry .....	42
<i>Dennis Kengo Oka (Synopsys), Tommi Makila (Synopsys), and Rikke Kuipers (Synopsys)</i>	

## Automated Intelligent Software Testing

Towards Transparency and Trustworthy: A Used-Car Deposit Platform Based on Blockchain .....	46
<i>Jinyu Zhang (Software Institute, Nanjing University), Honghui Zhao (Nanjing University), Yumeng Yang (Nanjing University), and Jiaqi Yan (Nanjing University)</i>	
Study on Hybrid Collaborative Simulation Testing Method Towards CPS .....	51
<i>Siyu Ma (Institute of Computer Application, China Academy of Engineering Physics), Gao Feng (Institute of Computer Application, China Academy of Engineering Physics), and Yunqiang Yan (Institute of Computer Application, China Academy of Engineering Physics)</i>	
Design of an Automated Test Tool Based on Interface Protocol .....	57
<i>Yusong Chen (Xi'an Institute of Surveying and Mapping), Yang Gao (Xi'an Institute of Surveying and Mapping), Yufeng Zhou (Xi'an Institute of Surveying and Mapping), Menghui Chen (Beijing Keyware Technology CO. Ltd.), and Xingyue Ma (Beijing Keyware Technology CO. Ltd)</i>	
Evaluation of Judicial Imprisonment Term Prediction Model Based on Text Mutation .....	62
<i>Shu Zhang (Nanjing University), Ge Yan (Nanjing University), Yu Li (Nanjing University), and Jia Liu (Nanjing University)</i>	
Quality Driven Judicial Data Governance .....	66
<i>Tieke He (Nanjing University), Shenghao Chen (Nanjing University), Lian Hao (Nanjing University), and Jia Liu (Nanjing University)</i>	
AMDroid: Android Malware Detection Using Function Call Graphs .....	71
<i>Xiuting Ge (Southwest University of Science and Technology), Ya Pan (Southwest University of Science and Technology), Yong Fan (Southwest University of Science and Technology), and Chunrong Fang (Software Institute, Nanjing University)</i>	
A Baseline Evaluation Method Based on Principal Component Analysis for Software Test Case Design .....	78
<i>Wenhong Liu (Beijing Institute of Tracking and Telecommunication Technology), Jiahong Jiang (Beijing Institute of Tracking and Telecommunication Technology), Zhongtian Li (Potevio Information Technology Co., Ltd), Jun Yang (China Aerospace Academy of Systems Science and Engineer), Yakui Song (China Aerospace Academy of Systems Science and Engineer), and Zhaohui Dou (Beijing Institute of Tracking and Telecommunication Technology)</i>	

Judicial Knowledge Reasoning Based on Representation Learning .....	84
<i>Baogui Chen (Information Center of The Supreme People's Court of The People's Republic of China), Zhuoyang Li (Nanjing University), Siyuan Shen (Nanjing University), Zhipeng Zou (Nanjing University), and Tieke He (Nanjing University)</i>	
A Test Case Design Method Based on Path Depth Coverage .....	89
<i>Yunqiang Yan (Institute of Computer Application China Academy of Engineering Physics), Linbo Wu (Institute of Computer Application China Academy of Engineering Physics), Yanhong Peng (Institute of Computer Application Research Chinese Academy of Engineering Physics), and Changhai Nie (Department of Computer Science and Technology Nanjing University)</i>	

## Cyber Resiliency: Technologies, Economics and Strategy

Security Requirements Analysis – A Vision for an Automated Toolchain .....	97
<i>Michael Atighetchi (Raytheon BBN Technologies), Borislava Simidchieva (Raytheon BBN Technologies), and Katarzyna Olejnik (Raytheon BBN Technologies)</i>	

## Data-Driven System Quality Assurance

Exploring the Dependency Relationships between Software Qualities .....	105
<i>Celia Chen (Occidental College), Michael Shoga (University of Southern California), and Barry Boehm (University of Southern California)</i>	
Detecting Android Security Vulnerabilities Using Machine Learning and System Calls Analysis .....	109
<i>Yasir Malik (New York Institute of Technology), Carlos Renato Salim Campos (New York Institute of Technology), and Fehmi Jaafar (Computer Research Institute of Montreal)</i>	
An Empirical Study of Comparison of Code Metric Aggregation Methods–on Embedded Software .....	114
<i>Zekun Song (Science &amp; Technology on Reliability &amp; Environment Engineering Laboratory, Beihang University), Yichen Wang (Science &amp; Technology on Reliability &amp; Environment Engineering Laboratory, Beihang University), Pengyang Zong (Science &amp; Technology on Reliability &amp; Environment Engineering Laboratory, Beihang University), Zhiwei Ren (AVIC Luoyang Electro Optical Equipment Research Institute), and Di Qi (AVIC Luoyang Electro Optical Equipment Research Institute)</i>	
Influence of Developer Factors on Code Quality: A Data Study .....	120
<i>María José Salamea (Universitat Politècnica de Catalunya) and Carles Farré (Universitat Politècnica de Catalunya)</i>	
Development of Intelligent Virtual Assistant for Software Testing Team .....	126
<i>Iosif Itkin (Exactpro Systems), Andrey Novikov (Higher School of Economics), and Rostislav Yavorskiy (Exactpro Systems)</i>	

A Software Service Supporting Software Quality Forecasting .....	130
<i>Martí Manzano (Universitat Politècnica de Catalunya), Claudia Ayala (Universitat Politècnica de Catalunya), Cristina Gómez (Universitat Politècnica de Catalunya), and Lidia López Cuesta (Universitat Politècnica de Catalunya)</i>	

## Human and Social Aspects of Software Quality

Using Case Facts to Predict Accusation Based on Deep Learning .....	133
<i>Hui Wang (Nanjing University), Tieke He (Nanjing University), Zhipeng Zou (Nanjing University), Siyuan Shen (Nanjing University), and Yu Li (Nanjing University)</i>	
Design and Implementation of Software Test Laboratory Based on Cloud Platform .....	138
<i>Wu Wen (Guangzhou University), Jiahui Sun (Nanjing Mooctest Information and Technology Co. Ltd), Ya Li (Guangzhou University), Peng Gu (Guangzhou University), and Jianfeng Xu (Nanjing Mooctest Information and Technology Co. Ltd)</i>	
A Deep Learning Method for Judicial Decision Support .....	145
<i>Baogui Chen (Information Center of The Supreme People's Court of The People's Republic of China), Yu Li (Nanjing University), Shu Zhang (Nanjing University), Hao Lian (Nanjing University), and Tieke He (Nanjing University)</i>	
Research on Modeling and Verification Methods for Embedded Software Systems Based on SysML .....	150
<i>Linbo Wu (Institute of Computer Application Research Chinese Academy of Engineering Physics), Yunqiang Yan (Institute of Computer Application Research Chinese Academy of Engineering Physics), Feng Gao (Institute of Computer Application Research Chinese Academy of Engineering Physics), Xiaohong Chen (School of Computer Science and Software Engineering East China Normal University), and Changhai Nie (Department of Computer Science and Technology Nanjing University)</i>	
NONYM!ZER: Mitigation Framework for Browser Fingerprinting .....	158
<i>Amr ElBanna (Information Security Program, School of Communication and Information Technology, Nile University) and Nashwa Abdelbaki (Information Security Program, School of Communication and Information Technology, Nile University)</i>	

## Model Checking and Software Testing and Verification

An Empirical Study of Open Source Flight Control Software Program Model Checking .....	164
<i>Zhiqin Cao (School of Reliability and Systems engineering, Beihang University), Jinyu Yin (School of Reliability and Systems engineering, Beihang University), Yichen Wang (Science and Technology on Reliability and Environmental Engineering Laboratory, Beihang University), Yu Li (School of Reliability and Systems engineering, Beihang University), and Jintao Zhang (China Aerospace Science and Industry Corporation Fourth Research Institute)</i>	

Random Test Generation from Regular Expressions for Graphical User Interface (GUI) Testing .....	170
<i>Onur Kilincceker (University of Paderborn Paderborn, Germany; Mugla Sitki Kocman University Mugla, Turkey), Alper Silistre (International Computer Institute, Ege University, Izmir, Turkey.), Moharram Challenger (University of Antwerp Antwerp, Belgium.), and Fevzi Belli (University of Paderborn, Paderborn, Germany; Izmir Institute of Technology, Izmir, Turkey.)</i>	
Repairing Over-Constrained Models for Combinatorial Robustness Testing .....	177
<i>Konrad Fögen (RWTH Aachen University) and Horst Lichter (RWTH Aachen University)</i>	
Design Fractals: A Graphical Method for Evaluating Binary Covering Arrays .....	185
<i>Caleb King (SAS Institute Inc.), Joseph Morgan (SAS Institute Inc.), and Ryan Lekivetz (SAS Institute Inc.)</i>	
Automation in Hardware-in-the-Loop Units Development and Integration .....	191
<i>Nikolay Brayanov (Department of Microelectronics, Technical University of Sofia) and Arno Eichberger (Institute of Automotive Engineering, Graz University of Technology)</i>	

## Quality Engineering

Raising the Quality of Bug Reports by Predicting Software Defect Indicators .....	198
<i>Anna Gromova (Exactpro Systems), Iosif Itkin (Exactpro Systems), Sergey Pavlov (Exactpro Systems), and Alexander Korovayev (Exactpro Systems)</i>	
Branch Sequence Coverage Criterion for Testing-Based Formal Verification with Symbolic Execution .....	205
<i>Rong Wang (Department of Computer Science, Hosei University) and Shaoying Liu (Department of Computer Science, Hosei University)</i>	
A Fault Localization Method Based on Conditional Probability .....	213
<i>Yonghui Yang (China Academy of Engineering Physics), Fei Deng (China Academy of Engineering Physics), Yunqiang Yan (China Academy of Engineering Physics), and Feng Gao (China Academy of Engineering Physics)</i>	
Using TLA+ to Specify Leader Election of Raft Algorithm with Consideration of Leadership Transfer in Multiple Controllers .....	219
<i>Gao Yu (Inner Mongolia University), Li Hua (Inner Mongolia University), Li Yuanping (Inner Mongolia University), Liu Bowei (Inner Mongolia University), Wang Xianrong (Inner Mongolia University), and Ruan Hongwei (Inner Mongolia University)</i>	
REPD: Source Code Defect Prediction As Anomaly Detection .....	227
<i>Petar Afric (University of Zagreb, Faculty of Electrical Engineering and Computing), Lucija Sikic (University of Zagreb, Faculty of Electrical Engineering and Computing), Adrian Satja Kurdija (University of Zagreb, Faculty of Electrical Engineering and Computing), Goran Delac (University of Zagreb, Faculty of Electrical Engineering and Computing), and Marin Silic (University of Zagreb, Faculty of Electrical Engineering and Computing)</i>	

B-SEFI: A Binary Level Soft Error Fault Injection Tool .....	235
<i>Ying Wang (Harbin Institute of Technology), Jian Dong (Harbin Institute of Technology), Sen Zhang (Harbin Institute of Technology), and Decheng Zuo (Harbin Institute of Technology)</i>	

## Reliability and Resilience of Complex Systems

Task Decision-Making for UAV Swarms Based on Robustness Evaluation .....	242
<i>Xiaohong Wang (School of Reliability and Systems Engineering, Beihang University, Beijing, China), Yuan Zhang (School of Reliability and Systems Engineering, Beihang University, Beijing, China), Lizhi Wang (Institute of Unmanned System, Beihang University, Beijing, China), Dawei Lu (The 52nd Research Institute, CETHIK Group Co. Ltd, Hangzhou, China), Yusheng Sun (School of Reliability and Systems Engineering, Beihang University, Beijing, China), Jun Yao (School of Reliability and Systems Engineering, Beihang University, Beijing, China), Tielin Ma (Institute of Unmanned System, Beihang University, Beijing, China), and Xiaohui Wang (School of Reliability and Systems Engineering, Beihang University, Beijing, China)</i>	
A Petri Net Modeling Approach for Reliability of PMS with Time Redundancy .....	249
<i>Xiaoyue Wu (College of Systems Engineering, National University of Defense Technology, China) and Haiyue Yu (College of Systems Engineering, National University of Defense Technology, China)</i>	
A Remaining Useful Life Prediction Framework for Multi-Sensor System .....	255
<i>Heng Zhang (School of Aeronautics and Astronautics, Sichuan University), Jing Jiang (School of Aeronautics and Astronautics, Sichuan University), Zhenling Mo (School of Aeronautics and Astronautics, Sichuan University), and Qiang Miao (School of Aeronautics and Astronautics, Sichuan University)</i>	
Bayesian Estimation of Residual Life for Weibull Distributed Products Based on the Fusion of Different Forms of Expert Information .....	260
<i>Qian Zhao (National University of Defense Technology), Xiang Jia (National University of Defense Technology), and Bo Guo (National University of Defense Technology)</i>	

## Software Engineering and Big Data

Some Thoughts on Model-Based Test Optimization .....	268
<i>Pan Liu (Shanghai Business School), Yudong Li (Shanghai Business School), and Zhaojun Li (Western New England University)</i>	
Crowd Intelligence-Based Interactive Creation Platform .....	275
<i>Yi Yang (Institute of Automation, Chinese Academy of Sciences), Jian Wang (Institute of Automation, Chinese Academy of Sciences), Weixing Huang (Institute of Automation, Chinese Academy of Sciences), Guoqing Li (Institute of Automation, Chinese Academy of Sciences), and Lan Huang (AVIC Shanghai Aero Measurement-Controlling Research Institute)</i>	

Law Article Prediction Based on Deep Learning .....	281
<i>Ge Yan (Nanjing University), Yu Li (Nanjing University), Siyuan Shen (Nanjing University), Shu Zhang (Nanjing University), and Jia Liu (Nanjing University)</i>	
Emotion-Based Interactive Art Design .....	285
<i>Yihang Bo (Beijing Film Academy)</i>	
Improving GAN-Based Calligraphy Character Generation using Graph Matching .....	291
<i>Meng Li (Institute of Automation, Chinese Academy of Sciences), Jian Wang (Institute of Automation, Chinese Academy of Sciences), Yi Yang (Institute of Automation, Chinese Academy of Sciences), Weixing Huang (Institute of Automation, Chinese Academy of Sciences), and Wenjuan Du (Institute of Automation, Chinese Academy of Sciences)</i>	
Quality Measurement of Judgment Documents .....	296
<i>Jiawei Liu (Jinling Institute of Technology), Zhenzhen Wang (missing), Ge Yan (Nanjing University), and Hao Lian (Nanjing University)</i>	

## Software Engineering and Knowledge Management

An Approach to Test Classification in Big Android Applications .....	300
<i>Thomas Hirsch (Graz University of Technology), Christian Schindler (Graz University of Technology), Matthias Müller (Graz University of Technology), Thomas Schranz (Graz University of Technology), and Wolfgang Slany (Graz University of Technology)</i>	
Complicated Causality Discovering and Presenting Based on Enterprise Knowledge Management .....	309
<i>Zhongzhao Zhang (School of Economics and Management of DLUT Dalian, China) and Yanzhong Dang (School of Economics and Management of DLUT Dalian, China)</i>	
Detect Triangle Attack on Blockchain by Trace Analysis .....	316
<i>Yingying Wang (Credit Card Center, Shanghai Pudong Development Bank, Shanghai, China) and Guoqiang Li (School of Software, Shanghai Jiao Tong University)</i>	
Feature Extraction from Japanese Natural Language Requirements Documents for Software Product Line Engineering .....	322
<i>Kenji Hisazumi (Kyushu University)</i>	
Knowledge Extraction and Integration for Information Gathering in Penetration Testing .....	330
<i>Anis Kothia (Concordia University of Edmonton), Bobby Swar (Concordia University of Edmonton), and Fehmi Jaafar (Computer Research Institute of Montréal)</i>	
Quick Solutions to Production Problems in Manufacturing Enterprises: A Knowledge Perspective .....	336
<i>Yubin Wang (Dalian University of Technology) and Yanzhong Dang (Dalian University of Technology)</i>	
Ranking Online Reviews Based on Consumer Preferences .....	342
<i>Dan Luo (School of Economics and Management, Dalian University of Technology) and Jiangning Wu (School of Economics and Management, Dalian University of Technology)</i>	

Resilience of air Transport Network with the Complementary Effects of High-Speed Rail Network .....	348
<i>Tao Li (Institute of Systems Engineering, Dalian University of Technology) and Lili Rong (Institute of Systems Engineering, Dalian University of Technology)</i>	
Similarity Analysis of Law Documents Based on Word2vec .....	354
<i>Chunyu Xia (Nanjing University), Tieke He (Nanjing University), Wenlong Li (Nanjing University), Zemin Qin (Nanjing University), and Zhipeng Zou (Nanjing University)</i>	
Study on the Automated Unit Testing Solution on the Linux Platform .....	358
<i>Bo Sun (Systems Engineering Research Institute), Yachao Shao (Systems Engineering Research Institute), and Chao Chen (Systems Engineering Research Institute)</i>	

## **System Reliability in Cloud Computing and Big Data**

Automatical Segmentation of Pelvic Organs After Hysterectomy by using Dilated Convolution U-Net++ .....	362
<i>Su Wu (University of Electronic Science and Technology of China, Chengdu, China), Ziheng Wang (Tongji University, Shanghai, China), Chang Liu (University of Electronic Science and Technology of China, Chengdu, China), Chenming Zhu (University of Electronic Science and Technology of China, Chengdu, China), Shaozhi Wu (University of Electronic Science and Technology of China, Chengdu, China), and Kai Xiao (Shanghai Jiao Tong University, Shanghai, China)</i>	
Reliable Automatic Organ Segmentation from CT Images using Deep CNN .....	368
<i>Chang Liu (University of Electronic Science and Technology of China), Shaozhi Wu (University of Electronic Science and Technology of China), Su Wu (wszfrank@uestc.edu.cn), Ziheng Wang (Tongji University), and Kai Xiao (Shanghai Jiao Tong University)</i>	

## **Security, Reliability, and Resilience in Wireless Sensor Networks and Smart Grid**

Improving Wireless Network Security Based On Radio Fingerprinting .....	375
<i>Yun Lin (College of Information and Communication Engineering Harbin Engineering University) and Jie Chang (College of Information and Communication Engineering Harbin Engineering University)</i>	
Search Over Encrypted Cloud Data With Secure Updates .....	380
<i>Selasi Kwame Ocansey (Jiangsu University) and Changda Wang (Jiangsu University)</i>	

An FPGA Design and Implementation of 4G Network Security Algorithm Based on SNOW3G .....	387
<i>Chaopeng Shen (Beijing Institute of Aerospace Systems Engineering, Beijing, China), Xiaotao Yan (Beijing Institute of Aerospace Systems Engineering, Beijing, China), Qiaozhen Liu (Beijing Institute of Aerospace Systems Engineering, Beijing, China), Jian Kang (Beijing Institute of Aerospace Systems Engineering, Beijing, China), Yang Liu (Beijing Institute of Aerospace Systems Engineering, Beijing, China), Xiaogang Zheng (Beijing Institute of Aerospace Systems Engineering, Beijing, China), Xige Zhang (Beijing Institute of Aerospace Systems Engineering, Beijing, China), and Yuanyi Liu (Beijing Institute of Aerospace Systems Engineering, Beijing, China)</i>	

## Safety and Security in Cyber-Physical Systems

Re-Configurable Virtual Structures Approach Based Formation Control of Multi-Agents Using Deep Deterministic Policy Gradient Algorithm .....	393
<i>Feilong Wang (School of computer science, Northwestern Polytechnical University), Yuan Yao (School of computer science, Northwestern Polytechnical University), Gang Yang (School of computer science, Northwestern Polytechnical University), Xinshe Zhou (School of computer science, Northwestern Polytechnical University), and Xiao Wu (School of computer science, Northwestern Polytechnical University)</i>	
AADL Vulnerability Modeling and Security Analysis Method .....	399
<i>Yang Cao (School of Computer Science and Engineering, Northwestern Polytechnical University), Yunwei Dong (School of Computer Science and Engineering, Northwestern Polytechnical University), Xiaomin Wei (School of Computer Science and Engineering, Northwestern Polytechnical University), and Xiao Wu (School of Computer Science and Engineering, Northwestern Polytechnical University)</i>	
Synthesizing Probabilistic Monitor for LTL Runtime Verification .....	407
<i>Ge Zhou (NUDT), Wangwei Liu (NUDT), Wei Dong (NUDT), and Rui Li (NUDT)</i>	
A Flexible Cyber Security Experimentation Platform Architecture Based on Docker .....	413
<i>Yongfeng Yin (Beihang University), Yuyan Shao (Beihang University), XueFeng Wang (Beihang University), and Qingran Su (Beihang University)</i>	
Synthesizing Secure Reactive Controller for Unmanned Aerial System .....	421
<i>Wei Lu (National University of Defense Technology), Shaoxian Shu (Hunan Institute of Traffic Engineering), Hao Shi (National University of Defense Technology), Rui Li (National University of Defense Technology), and Wei Dong (National University of Defense Technology)</i>	

## System Testing and Validation

The Need for Unified Testbed Management Across Multiple Teams and Stakeholders in a Large Scale Telecom Integration Context .....	427
<i>Nikolay Tcholtchev (Fraunhofer FOKUS), Steven Ulrich (Fraunhofer FOKUS), Faruk Catal (Fraunhofer FOKUS), Wojciech Konitzer (Fraunhofer FOKUS), Ramon Barakat (Fraunhofer FOKUS), Andreas Hoffmann (Fraunhofer FOKUS), and Ina Schieferdecker (Fraunhofer FOKUS)</i>	

Standards-Based IoT Testing with Open-Source Test Equipment .....	435
<i>Alexander Kaiser (relayr) and Sascha Hackel (Fraunhofer FOKUS)</i>	

## Trustworthy Computing

Security Smells in Smart Contracts .....	442
<i>Mehmet Demir (Ryerson University), Manar Alalfi (Ryerson University), Ozgur Turetken (Ryerson University), and Alexander Ferworn (Ryerson University)</i>	
3aRAM: A 3-Layer AHP-Based Risk Assessment Model and its Implementation for an Industrial IoT Cloud ...	450
<i>Yu-Lun Huang (National Chiao Tung University), Wen-Lin Sun (National Chiao Tung University), and Ying-Han Tang (National Chiao Tung University)</i>	
10 Years of IoT Malware: A Feature-Based Taxonomy .....	458
<i>Benjamin Vignau (Université du Québec A Chicoutimi), Raphael Houry (Université du Québec A Chicoutimi), and Sylvain Hallé (Université du Québec A Chicoutimi)</i>	
Research on Security Detection and Data Analysis for Industrial Internet .....	466
<i>Jun Lin (China Electronic Product Reliability and Environmental Testing Research Institute) and Lan Liu (College of Electronic and Information, Guangdong Polytechnic Normal University)</i>	
DDoS Intrusion Detection Through Machine Learning Ensemble .....	471
<i>Saikat Das (The University of Memphis), Ahmed M. Mahfouz (The University of Memphis), Deepak Venugopal (The University of Memphis), and Sajjan Shiva (The University of Memphis)</i>	

## Testing and Verification of Programmable Chips

Security and Fault Diagnosis-Based Assertion-Based Verification for FPGA .....	478
<i>Shasha Zhang (Xi'an Microelectronic Technology Institute) and Liang Cao (Xi'an Microelectronic Technology Institute)</i>	
Formal Verification Technology for Asynchronous Communication Protocol .....	482
<i>Yayun Hu (Software Engineering and Software Evaluation department, Beijing Institute of Computer Technology and Application Beijing, China) and Dongfang Li (Software Engineering and Software Evaluation department, Beijing Institute of Computer Technology and Application Beijing, China)</i>	
A Noval Method of Security Verification for JTAG Protection Function .....	487
<i>Dongfang Li (Beijing Institute of Computer Technology and Applications Beijing, China), Wei Shen (Beijing Institute of Computer Technology and Applications Beijing, China), and Zhihao Wang (Beijing Institute of Computer Technology and Applications Beijing, China)</i>	

Research on Heterogeneous Cloud Test Platform Based on Elastic Scaling Mechanism .....	493
<i>Shuling Yang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, Beijing 100094, China), Suzhi Cao (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, Beijing 100094, China), Lei Yan (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, Beijing 100094, China), Siyan Pan (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, Beijing 100094, China), Houpeng Wang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, Beijing 100094, China), Jian Zhang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, Beijing 100094, China), and Dandan Cui (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, Beijing 100094, China)</i>	
Software Simulation Error Injection in RAM on RISC-V of PolarFire FPGA .....	499
<i>jiajie dong (University of Chinese Academy of Sciences &amp; Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences), long xi (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, Key Laboratory of Space Utilization, Chinese Academy of Sciences), mengxi yu (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences, Key Laboratory of Space Utilization, Chinese Academy of Sciences), and zeming zhang (Technology and Engineering Center for Space Utilization, Chinese Academy of Sciences)</i>	

## Industry Track

Enhancing Acceptance Test-Driven Development with Model-Based Test Generation .....	503
<i>Rudolf Ramler (Software Competence Center Hagenberg GmbH) and Claus Klammer (Software Competence Center Hagenberg GmbH)</i>	
Quality Metrics for Hybrid Software Development Organizations – A Case Study .....	505
<i>Satya Pradhan (Cisco Systems, USA), Venky Nanniyur (Cisco Systems, USA), Paddu Melanahalli (Cisco Systems, USA), Munir Palla (Cisco Systems, USA), and Sunita Chulani (Cisco Systems, USA)</i>	

## Fast Abstract

Reliable Life Prediction and Evaluation Analysis of Lithium-ion Battery Based on Long-Short Term Memory Model .....	507
<i>Xuejiao Zhao (Beihang University), Lizhi Wang (Beihang University), Xiaohong Wang (Beihang University), Yusheng Sun (Beihang University), Tongmin Jiang (Beihang University), Zhiqiang Li (Beihang University), and Yuan Zhang (Beihang University)</i>	

A Method of Bug Report Quality Detection Based on Vector Space Model .....	510
<i>Song Huang (Command and Control Engineering College, Army Engineering University of PLA), Lele Chen (Command and Control Engineering College, Army Engineering University of PLA), Zhanwei Hui (Command and Control Engineering College, Army Engineering University of PLA), Jialuo Liu (Command and Control Engineering College, Army Engineering University of PLA), Sen Yang (Command and Control Engineering College, Army Engineering University of PLA), and Qiang Chen (Command and Control Engineering College, Army Engineering University of PLA)</i>	
A Survey of the Application of Combinatorial Testing .....	512
<i>Zhao Li (China Three Gorges University), Yuhang Chen (China Three Gorges University), Guoqiang Gong (China Three Gorges University), Dongcheng Li (University of Texas at Dallas), Ke Lv (China Three Gorges University), and Peng Chen (China Three Gorges University)</i>	
Critical Quality Factors for Rapid, Scalable, Agile Development .....	514
<i>Barry Boehm (USC), Doug Rosenberg (Parallel Agile, Inc.), and Neil Siegel (USC)</i>	
Applying Ordered Technique Set for Fault Localization .....	516
<i>Zhao Li (China Three Gorges University), Yi Song (China Three Gorges University), Guoqiang Gong (China Three Gorges University), Dongcheng Li (University of Texas at Dallas), Ke Lv (China Three Gorges University), and Jingsha He (China Three Gorges University)</i>	
An API Development Model for Digital Twins .....	518
<i>Jim Scheibmeir (Colorado State University) and Yashwant Malaiya (Colorado State University)</i>	
A Test Cases Generation Technique Based on an Adversarial Samples Generation Algorithm for Image Classification Deep Neural Networks .....	520
<i>Song Huang (Command and Control Engineering College, Army Engineering University of PLA), Qiang Chen (Command and Control Engineering College, Army Engineering University of PLA), Zhanwei Chen (Command and Control Engineering College, Army Engineering University of PLA), Lele Chen (Command and Control Engineering College, Army Engineering University of PLA), Jialuo Liu (Command and Control Engineering College, Army Engineering University of PLA), and Sen Yang (Command and Control Engineering College, Army Engineering University of PLA)</i>	
Automatic Test Case Generation and Optimization Based on Mutation Testing .....	522
<i>Yunqi Du (Dept of Computer Science and Technology, Southwest University of Science and Technology), Ya Pan (Dept of Computer Science and Technology, Southwest University of Science and Technology), Haiyang Ao (Dept of Computer Science and Technology, Southwest University of Science and Technology), Nimako Ottinah Alexander (Dept of Computer Science and Technology, Southwest University of Science and Technology), and Yong Fan (Dept of Computer Science and Technology, Southwest University of Science and Technology)</i>	

Automatically Capturing and Reproducing Android Application Crashes .....	524
<i>Junmei Sun (Hangzhou Normal University), Kai Yan (Hangzhou Normal University), Xuejiao Liu (Hangzhou Normal University), Min Zhu (Hangzhou Normal University), and Lei Xiao (Engineering Research Center for Software Testing and Evaluation of Fujian Province)</i>	
The Significant Effect of Parameter Tuning on Software Vulnerability Prediction Models .....	526
<i>Patrick Kwaku Kudjo (School of Computer Science and Communication Engineering, Jiangsu University, Zhenjiang, , China), Selasie Brown Aformaley (Department of Information Technology, University of Professional Studies, Accra-Ghana), Solomon Mensah (Department of Computer Science, University of Ghana, Legon), and Jinfu Chen (School of Computer Science and Communication Engineering, Jiangsu University, Zhenjiang, , China)</i>	
Reliability Modeling and Optimization for Large-Scale Network Systems .....	528
<i>Sa Meng (UESTC), Yuanshun Dai (UESTC), Liang Luo (UESTC), and Chang Liu (UESTC)</i>	
A Two-stage Personnel Recommendation Method Directed Towards Mobile Crowdsourcing Testing .....	530
<i>Wenguang Xie (Civil Aviation University of China) and Yuyang Fan (Civil Aviation University of China)</i>	

## Posters

Fault Density, Fault Depth and Fault Multiplicity: The Reward of Discernment .....	532
<i>Besma Khaireddine (University of Tunis El Manar), Aleksandr Zakharchenko (NJIT Newark NJ USA), and Ali Mili (NJIT Newark NJ)</i>	
Runtime-Environment Testing Method for Android Applications .....	534
<i>Song Huang (Army Engineering University of PLA), Sen Yang (Army Engineering University), Zhanwei Hui (Army Engineering University), Yongming Yao (Army Engineering University), Lele Chen (Army Engineering University), Jialuo Liu (Army Engineering University), and Qiang Chen (Army Engineering University)</i>	
Testing Adequacy of Convolutional Neural Network Based on Mutation Testing .....	536
<i>Yi Yao (Command and Control Engineering College Army Engineering University of PLA Nanjing, China), Jiuluo Liu (Command and Control Engineering College Army Engineering University of PLA Nanjing, China), Song Huang (Command and Control Engineering College Army Engineering University of PLA Nanjing, China), Zhanwei Hui (Command and Control Engineering College Army Engineering University of PLA Nanjing, China), Kaishun Wu (Command and Control Engineering College Army Engineering University of PLA Nanjing, China), Lele Chen (Command and Control Engineering College Army Engineering University of PLA Nanjing, China), Sen Yang (Command and Control Engineering College Army Engineering University of PLA Nanjing, China), and Qiang Chen (Command and Control Engineering College Army Engineering University of PLA Nanjing, China)</i>	

Progress of Word Embedding in Code Generation .....	538
<i>Zhao Li (China Three Gorges University), Yi Song (China Three Gorges University), Peng Chen (China Three Gorges University), Dongcheng Li (University of Texas at Dallas), Guoqiang Gong (China Three Gorges University), and Ke Lv (China Three Gorges University)</i>	
Safe Traffic Sign Recognition through Data Augmentation for Autonomous Vehicles Software .....	540
<i>Lisa Jöckel (Fraunhofer Institute for Experimental Software Engineering IESE), Michael Kläs (Fraunhofer Institute for Experimental Software Engineering IESE), and Silverio Martínez-Fernández (Fraunhofer Institute for Experimental Software Engineering IESE)</i>	
A Test Scenario Generation Method for High Requirement Coverage by using KAOS Method .....	542
<i>Toshiyuki Fujikura (dSPACE Japan) and Ryo Kurachi (Nagoya University)</i>	
A Fuzz Testing Service for Assuring Smart Contracts .....	544
<i>Xiupei Mei (City University of Hong Kong), Imran Ashraf (City University of Hong Kong), Bo Jiang (Beihang University), and W.K. Chan (City University of Hong Kong)</i>
