FIBRE CONCRETE 2019

17–20 September 2019, Prague, Czech Republic

Accepted papers received: 26 July 2019

Published online: 15 August 2019

Preface

[Preface](#)

[Committees](#)

[Conference Partners](#)

[List of Participants](#)

[Peer review statement](#)

Papers

[Dependence of fracture size effect and projectile penetration on fiber content of FRC](#)

Zdeněk P Bažant, Mohammad Rasoolinejad, Abdullah Dönmez and Wen Luo.....1

[Fibre reinforced concrete with recycled concrete aggregate – inverse design approach](#)

I Broukalová, K Šeps, J Fládr and J. Vodička.....8

[Analytical model for rigid \(steel\) and flexible \(synthetic\) fibre mixing in concrete](#)

K P Juhász.....20

[Appraisal of MC2010 shear resistance approaches coupled with a residual flexural strength prediction model](#)

T D S Valente, J A O Barros, B N Moraes-Neto and Y H Moussa.....30

[Nonlinear modeling of SFRC beam using multilinear softening function obtained by inverse analysis](#)

C A Benedetty, L H Oliveira, L C Almeida and L M Trautwein.....42

[Numerical validation of a simplified inverse analysis method to characterize the tensile properties in strain-softening UHPFRC](#)

E J Mezquida-Alcaraz, J Navarro-Gregori and P Serna-Ros.....49

[Simulation of mixed-mode fracture \(I-II\) on PFRC specimens with various fibre proportions using an embedded cohesive crack model](#)

F Suárez, JC Gálvez, A Enfedaque and MG Alberti.....59

[Material parameters for computer analysis of fibre reinforced concrete structures](#)

R Pukl, D Lehký, M Lipowczan and D Novák.....68

[Application of the design code for steel fibre reinforced concrete into finite element software](#)

L Dlouhý and S Pouillon.....76

[Advanced design methodologies for steel fibre reinforced concrete and new methodology of real time quality control](#)

A Hoekstra.....84

[New UHPFRC bridges in the Czech Republic](#)

J Marek, J Kolísko, P Tej, D Čítek, J Komanec, M Kalný and L Vráblík.....94

[Development of bridge precast beams from high performance concrete in EUROVIA CS](#)

Michal Sýkora, Petr Jedlinský, Jan Komanec and Václav Kvasnička.....103

[Possibility of using SFR-SCC for the production of the LILW disposal container](#)

J Šušteršič, R Ercegovič, F Sinur, B Duhovnik, A Šajna and T T Resnik.....110

[Steel microfibres in fly ash geopolymer for multifunctional conductive composites](#)

C Mizerová, I Kusák, P Rovnaník and P Bayer.....120

[Properties of cement-lime render containing perlite as lightweight aggregate](#)

J Pokorný, M Pavlíková and Z Pavlík.....127

[Improved methodology for determining tensile strength of fibre reinforced concrete](#)

V Křístek, J Vodička, L Musil and H Hanzlová.....133

[Comparison of two UHPFRC premixes blast resistance with the commonly used concrete based on the failure mode prediction](#)

O Janota, E Bonnet and M Foglar.....140

[The impact of various types of steel fibres on the strength parameters and blast resistance of high – performance concrete](#)

P Bibora, M Drdlová, V Prachař and O Sviták.....150

[Material properties of various types of fibre reinforced concrete exposed to elevated temperature](#)

K Horníková and M Foglar.....160

[Influence of internal composition of fiber reinforced cement composites on resistance to near field blast](#)

J Zima and M Foglar.....168

[Modelling the damping effect for structures in reinforced concrete frames](#)

F Tepes-Onea and M Popa.....176

[A testing method for studying the serviceability behavior of reinforced UHPFRC tensile ties](#)

M Khorami, J Navarro-Gregori, P Serna and M A Navarro-Laguarda.....181

[Experimental analysis of crack development of an UHPC wall element under shear loading](#)

V Příbramský, M Kopálová and L Dlouhý.....190

[Analysis of interfacial interaction in UHPFRC-strengthened reinforced concrete beams](#)

C Zanuy, G S D Ulzurrun and I M Díaz.....199

[Macro synthetic fibre reinforced concrete: Influence of the matrix mix design on interfacial bond behavior](#)

C Del Prete, N Buratti, S Manzi and C Mazzotti.....210

[Numerical modelling of failure on brick masonry strengthened with FRCM overlays](#)

João A P P Almeida, Eduardo B Pereira and Joaquim A O Barros.....221

[Behaviour of recycled aggregates RC columns strengthened with CFRP under uniaxial compressive loadings](#)

A R Khan and S Fareed.....231

[Utilisation of date palm fibres in cement-based composites: A feasibility study](#)

Wafa Abdelmajeed Labib.....237

[Experimental verification of functionality of fibre-reinforced concrete submersible piers](#)

J Buchlák, J Matějka, P Ryjáček, P Bílý, J Procházka, J Pollert and J Fabel.....250

[Blast resistance of multi-layered concrete slabs](#)

J Fládr, R Chylík, K Šeps, J Štoller and T Trtík.....258

[Study of boundary conditions for design of new types of fibre concrete energy dissipators in hydraulic structures](#)

P Fošumpaur, T Kašpar, M Králík and M Zukaš.....266

[Air-entrainment as an alternative to polypropylene fibers and its effect on the compressive strength of concrete at high temperatures](#)

J Holan, J Novák and R Štefan.....274

[Utilization of recycled plastic for plastic-based concrete](#)

A Horáková and J Novák.....280

[Bio-active concrete tile](#)

M Husarčíková, P Štemberk, M Petřík and M Frantová.....286

[Mechanisms behind radiation-induced deterioration of concrete](#)

Y Khmurovskaya and P Štemberk.....295

[Mechanical properties of concrete with small fibre for numerical modelling](#)

Z Marcaliková, L Procházka, M Pesata, V Bilek and R Cajka.....304

[Underground ventilated wall based on TRC blocks](#)

J Pazderka, M Nývlt and H Žáková.....314

[FRC origami bridge model](#)

M Salák and M Frantová.....320

[An investigation of the compatibility of different approaches to self-healing concrete: The superabsorbent polymers and microbially induced calcite precipitation](#)

H Schreiberová, J Fládr, T Trtík, R Chylík and P Bílý.....327

[Visualization and analysis of concrete specimens damage after fire and blast experiments](#)

R Štefan and M Foglar.....335

[Methods of lighting of concrete structures for high-speed camera measurement](#)

T Trtík, R Chylík, J Fládr, J Štoller and I Broukalová.....345

[Influence of concrete additives on cement paste shrinkage](#)

M Vích, J Fládr and I Broukalová.....355

[Evaluation of the size effect of waste tyre rubber particles on properties of lightweight rubber concrete](#)

M Záleská, M Pavlíková, D Čítek and Z Pavlík.....364

[Fire temperature influence on the textile reinforced concrete with non-woven polypropylene fabric](#)

J Žák and P Štemberk.....371

[Using of TRC for research of crack evolution and the effect of autogenous healing](#)

H Žáková and J Žák.....378
