

PROCEEDINGS OF SPIE

ODS 2019: Industrial Optical Devices and Systems

**Ryuichi Katayama
Yuzuru Takashima**
Editors

**11–12 August 2019
San Diego, California, United States**

Sponsored and Published by
SPIE

Volume 11125

Proceedings of SPIE 0277-786X, V. 11125

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *ODS 2019: Industrial Optical Devices and Systems*, edited by Ryuichi Katayama, Yuzuru Takashima, Proceedings of SPIE Vol. 11125 (SPIE, Bellingham, WA, 2019) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/19/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>
ix	<i>Introduction</i>

OPTICAL DATA STORAGE

11125 05	Analog recording technologies available to optical disc systems [11125-4]
11125 06	Three-dimensional simulation on near-field light generated by semiconductor ring resonator with metal nano-antenna for heat-assisted magnetic recording [11125-5]

HOLOGRAPHY, MEASUREMENT, AND FABRICATION

11125 09	Adaptive optics correction using coherently illuminated diffractive objects [11125-8]
----------	----------------------------------------------------------------------------------------------

NEW CONCEPTS AND IMAGING

11125 0B	Lytelooop data “storage in motion” (Invited Paper) [11125-11]
11125 0C	Head up display with laser scanning unit (Invited Paper) [11125-12]

ADVANCED SENSING

11125 0F	Lensless 3D sensing technology with Fresnel zone aperture based light-field imaging (Invited Paper) [11125-15]
11125 0G	Design considerations for an auto Lidar (Invited Paper) [11125-16]
11125 0J	A variety of range compensating lens designs for active optical systems [11125-24]

POSTER SESSION

11125 0N	Novel method to improve stroke of electrostatically actuated MEMS micromirror [11125-23]
----------	-------------------------------------------------------------------------------------------------
