2019 ACM/IEEE 22nd International Conference on Model Driven Engineering Languages and Systems Companion (MODELS-C)

MODELS-C 2019

Table of Contents

Preface to the Companion and Organizing Committee xviii
Workshops Organizers xxv

2nd Workshop on Modeling in Automotive Software Engineering: MASE 2019

Message from the MASE 2019 Chair 1
Alessio Bucaioni (Mälardalen University), Juergen Dingel (University Kingston), and Atlee Joanne (University of Waterloo)

Querying Automotive System Models and Safety Artifacts with MMINT and Viatra 2
Alessio Di Sandro (University of Toronto), Sahar Kokaly (University of Toronto), Rick Salay (University of Toronto), and Marsha Chechik (University of Toronto)

Test-Driven Scenario Specification of Automotive Software Components 12
Carsten Wiecher (IDiAL Institute, University of Applied Sciences and Arts Dortmund), Joel Greenyer (Software Engineering Group, Leibniz Universität Hannover), and Jan Korte (Chair for Embedded Systems of the Information Technology (ESIT), Ruhr-University)

Validating Industrial Requirements with a Contract-Based Approach 18
Matthias Bernaerts (University of Antwerp), Bentley Oakes (University of Antwerp), Ken Vanherpen (University of Antwerp), Bjorn Aelvoet (Dana Belgium NV), Hans Vangheluwe (University of Antwerp), and Joachim Denil (University of Antwerp)

Simulation as a Service for Cooperative Vehicles 28
Jörg Christian Kirchhof (RWTH Aachen University), Evgeny Kusmenko (RWTH Aachen University), Bernhard Rumpe (RWTH Aachen University), and Hengwen Zhang (RWTH Aachen University)

Towards Model-Based Generation and Optimization of AUTOSAR Runnable-to-Task Mapping 38
Thomas Wilhelm (Vector Informatik GmbH) and Raphael Weber (Vector Informatik GmbH)

Model-Based Timing Analysis and Deployment Optimization for Heterogeneous Multi-core Systems using Eclipse APP4MC 44
Lukas Krawczyk (Dortmund University of Applied Sciences and Arts), Mahmoud Bazzal (Dortmund University of Applied Sciences and Arts), Ram Prasath Govindarajan (Dortmund University of Applied Sciences and Arts), and Carsten Wolff (Dortmund University of Applied Sciences and Arts)

Security Patterns for Automotive Systems 54
Betty H.C. Cheng (Michigan State University), Bradley Doherty (Michigan State University), Nick Polanco (Michigan State University), and Matthew Pasco (Michigan State University)

6th International Workshop on Multi-Level Modelling: MULTI 2019

Preface to the 6th International Workshop on Multi-Level Modelling (MULTI 2019) 64
João-Paolo Alemeida (Ontology & Conceptual Modeling Research Group (NEMO), Federal University of Espírito Santo (UFES), Brazil), Adrian Rutle (Western Norway University of Applied Sciences), and Manuel Wimmer (Department of Business Informatics -Software Engineering, CDL-MINT Johannes Kepler University Linz, Austria)

DeepTelos for ConceptBase: A Contribution to the MULTI Process Challenge 66
Manfred A. Jeusfeld (University of Skövde)

Coordinate Systems: Level Ascending Ontological Options 78
Chris Partridge (BORO Solutions Ltd, University of Westminster), Andrew Mitchell (BORO Solutions Ltd), Michael Loneragan (QinetiQ Group PLC), Hayden Atkinson (CooperVision Ltd), Sergio de Cesare (University of Westminster), and Mesbah Khan (OntoLedgy Ltd, University of Westminster)

A Foundation for the Composition of Multilevel Domain-Specific Languages 88
Alejandro Rodríguez (Western Norway University of Applied Sciences), Adrian Rutle (Western Norway University of Applied Sciences), Lars Michael Kristensen (Western Norway University of Applied Sciences), and Francisco Durán (Western Norway University of Applied Sciences)

DeepTelos Demonstration 98
Manfred A. Jeusfeld (University of Skövde, Sweden)

A Multilevel Modelling Approach for Tourism Flows Detection 103
Maria Teresa Rossi (Gran Sasso Science Institute), Martina De Sanctis (Gran Sasso Science Institute), Ludovico Iovino (Gran Sasso Science Institute), and Adrian Rutle (Western Norway University of Applied Sciences)

On the Rules for Inheritance in LML 113
Arne Lange (University of Mannheim) and Colin Atkinson (University of Mannheim)

Multi-level Modeling with DMLA - A Contribution to the MULTI Process Challenge ..119
Ferenc A. Somogyi (Budapest University of Technology and Economics), Gergely Mezei (Budapest University of Technology and Economics), Dániel Urbán (Budapest University of Technology and Economics), Zoltán Theisz (evopro systems engineering Ltd.), Sándor Bácsi (Budapest University of Technology and Economics), and Dániel Palatinszky (Budapest University of Technology and Economics)

Applying Multilevel Modeling to the Development of Geographic Information Systems ..128
Suilen H. Alvarado (Universidade da Coruña), Alejandro Cortiñas (Universidade da Coruña), Miguel R. Luaces (Universidade da Coruña), Oscar Pedreira (Universidade da Coruña), and Angeles S. Places (Universidade da Coruña)

By Multi-layer to Multi-level Modeling ..134
Zoltán Theisz (evopro Systems Engineering Ltd.), Sándor Bácsi (Budapest University of Technology and Economics), Gergely Mezei (Budapest University of Technology and Economics), Ferenc A. Somogyi (Budapest University of Technology and Economics), and Dániel Palatinszky (Budapest University of Technology and Economics)

Preserving Multi-level Semantics in Conventional Two-Level Modeling Techniques ..142
João Paulo A. Almeida (Ontology & Conceptual Modeling Research Group (NEMO), Federal University of Espírito Santo (UFES), Vitória, Brazil), Fernando A. Musso (Ontology & Conceptual Modeling Research Group (NEMO), Federal University of Espírito Santo (UFES), Vitória, Brazil), Victorio A. Carvalho (Federal Institute of Espírito Santo (IFES), Colatina, Brazil), Claudenir M. Fonseca (Conceptual and Cognitive Modeling Research Group (CORE), Free University of Bozen-Bolzano, Bolzano, Italy), and Giancarlo Guizzardi (Conceptual and Cognitive Modeling Research Group (CORE), Free University of Bozen-Bolzano, Bolzano, Italy)

Multilevel Modelling with MultEcore: A Contribution to the MULTI Process Challenge ..152
Alejandro Rodríguez (Western Norway University of Applied Sciences) and Fernando Macías (Western Norway University of Applied Sciences, University of Extremadura)

The MULTI Process Challenge ..164
João Paulo A. Almeida (Federal University of Espírito Santo, Brazil), Adrian Rutle (Western Norway University of Applied Sciences, Bergen, Norway), Manuel Wimmer (Johannes Kepler University Linz, Austria), and Thomas Kühne (Victoria University of Wellington, New Zealand)

1st Workshop on Artificial Intelligence and Model-driven Engineering: MDE Intelligence

Preface to MDE Intelligence 2019: 1st Workshop on Artificial Intelligence and Model-Driven Engineering ..168
Loli Burgueño (Open University of Catalonia & CEA LIST), Alexandru Burdusel (King's College London), Sébastien Gérard (CEA LIST), and Manuel Wimmer (JKU Linz)

On Artificial Intelligence for Simulation and Design Space Exploration in Gas Turbine Design .170
Sebastian Pilarski (McGill University), Martin Staniszewski (Siemens Canada Ltd.), Frederic Villeneuve (Siemens Energy Inc.), and Daniel Varro (McGill University)

Personalized and Automatic Model Repairing using Reinforcement Learning .175
Angela Barriga (Western Norway University of Applied Sciences), Adrian Rutle (Western Norway University of Applied Sciences), and Rogardt Heldal (Western Norway University of Applied Sciences)

Heuristic Inference of Model Transformation Definitions from Type Mappings .182
Christopher Gerking (Paderborn University) and Ingo Budde (Fraunhofer IEM)

Towards Scalable Search-Based Model Engineering with MDEOptimiser Scale .189
Alexandru Burdusel (King's College London) and Steffen Zschaler (King's College London)

Modeling Deep Reinforcement Learning Based Architectures for Cyber-Physical Systems .196
Nicola Gatto (RWTH Aachen University), Evgeny Kusmenko (RWTH Aachen University), and Bernhard Rumpe (RWTH Aachen University)

Third Workshop on Model-Driven Engineering Tools: MDETools 2019

A Case Study of Model-Driven Engineering for Automated Timetabling .203
Clement Eke (Aston University), Antonio Garcia-Dominguez (Aston University), Jort van Mourik (Aston University), and Ifti Khan (Aston University)

A Model Checkable UML Soccer Player .211
Valentin Besnard (ERIS, ESEO-TECH, Angers, France), Ciprian Teodorov (Lab-STICC UMR CNRS 6285, ENSTA Bretagne, Brest, France), Frédéric Jouault (ERIS, ESEO-TECH, Angers, France), Matthias Brun (ERIS, ESEO-TECH, Angers, France), and Philippe Dhaussy (Lab-STICC UMR CNRS 6285, ENSTA Bretagne, Brest, France)

Solving the RoboSoccer Challenge Problem with UML-RT and Papyrus-RT .221
Majid Babaei (Queen's University), Karim Jahed (Queen's University), and Juergen Dingel (Queen's University)

Usability of Development Tools: A CASE-Study .228
Thomas Weber (fortiss GmbH), Alois Zoitl (Johannes Keppler University, Linz), and Heinrich Hußmann (Ludwig-Maximilians-University, Munich)

Towards Concrete Syntax Based Find for Graphical Domain Specific Languages .236
Elina Kalnina (University of Latvia) and Agris Sostaks (University of Latvia)

Using Behavioural Programming with Solver, Context, and Deep Reinforcement Learning for Playing a Simplified RoboCup-Type Game .243
Achiya Elyasaf (Ben Gurion University of The Negev), Aviran Sadon (Ben Gurion University of The Negev), Gera Weiss (Ben Gurion University of The Negev), and Tom Yaacov (Ben Gurion University of The Negev)

Voice-Driven Modeling: Software Modeling Using Automated Speech Recognition .252
Dana Black (Miami University), Eric J. Rapos (Miami University), and Matthew Stephan (Miami University)

JSOI: A JSON-Based Interchange Format for Efficient Model Management .259
Horacio Hoyos Rodriguez (Kinori Tech) and Beatriz Sanchez Piña (Kinori Tech)

13th Workshop on Models and Evolution: ME 2019

Preface to the 13th Workshop on Models and Evolution (ME2019) .267
Ludovico Iovino (Gran Sasso Science Institute), Alfonso Pierantonio (University of L'Aquila), and Dalila Tamzalit (LS2N Université de Nantes)

Consistency Control for Model Versions in Evolving Model-Driven Software Product Lines .268
Johannes Schröpfer (University of Bayreuth), Felix Schwägerl (University of Bayreuth), and Bernhard Westfechtel (University of Bayreuth)

Multifaceted Consistency Checking of Collaborative Engineering Artifacts .278
Michael Alexander Tröls (Johannes Kepler University), Atif Mashkoor (Johannes Kepler University), and Alexander Egyed (Johannes Kepler University)

An Integrated Model-Based Tool Chain for Managing Variability in Complex System Design .288
Damir Bilic (Mälardalen University), Etienne Brosse (Softeam), Andrey Sadovykh (Softeam), Dragos Truscan (Åbo Akademi University), Hugo Bruneliere (IMT Atlantique), and Uwe Ryssel (pure-systems GmbH)

Inferring Metamodel Relaxations Based on Structural Patterns to Support Model Families .294
Sanaa Alwidian (University of Ottawa) and Daniel Amyot (University of Ottawa)

BESMER: An Approach for Bad Smells Summarization in Systems Models .304
Xin Zhao (University of Alabama) and Jeff Gray (University of Alabama)

International Workshop on Modeling Language Engineering and Execution: MLE

Towards Platform Specific Energy Estimation for Executable Domain-Specific Modeling Languages .314
Thibault Beziers la Fosse (IMT Atlantique), Massimo Tisi (IMT Atlantique), Erwan Bousse (Université de Nantes), Jean-Marie Mottu (Université de Nantes), and Gerson Sunye (Université de Nantes)

Executable Modelling for Highly Parallel Accelerators .318
Lorenzo Addazi (Mälardalen University), Federico Ciccozzi (Mälardalen University), and Björn Lisper (Mälardalen University)

Engineering Hybrid Graphical-Textual Languages with Sirius and Xtext: Requirements and Challenges .322
Justin Cooper (University of York) and Dimitris Kolovos (University of York)

A Proposal of Features to Support Analysis and Debugging of Declarative Model Transformations with Graphical Syntax by Embedded Visualizations .326
Florian Ege (Ulm University) and Matthias Tichy (Ulm University)

Simulation of Model Execution for Embedded Systems .331
Jörg Christian Kirchhof (RWTH Aachen University), Evgeny Kusmenko (RWTH Aachen University), Jean Meurice (RWTH Aachen University), and Bernhard Rumpe (RWTH Aachen University)

Firmware Synthesis for Ultra-Thin IoT Devices Based on Model Integration .339
Arthur Kühlwein (FZI Research Center for Information Technology), Anton Paule (FZI Research Center for Information Technology), Leon Hielscher (FZI Research Center for Information Technology), Wolfgang Rosenstiel (University of Tübingen), and Oliver Bringmann (University of Tübingen)

On the Challenges of Model Decorations for Capturing Complex Metadata .347
Horacio Hoyos Rodriguez (University of York), Athanasios Zolotas (University of York), Dimitris Kolovos (University of York), and Richard F. Paige (McMaster University)

Converting Executable Floating-Point Models to Executable and Synthesizable Fixed-Point Models .354
Taylor Riché (National Instruments), Jim Nagle (National Instruments), Joyce Xu (National Instruments), and Don Hubbard (National Instruments)

TrueChange (TM) Under the Hood: How We Check the Consistency of Large Models (Almost) Instantly .362
Hugo Lourenço (OutSystems) and Rui Eugénio (OutSystems)

1st International Workshop on View-Oriented Software Engineering: VoSE 2019

Preface to the 1st Workshop on View-Oriented Software Engineering (VoSE) .370
Colin Atkinson (University of Mannheim), Erik Burger (Karlsruhe Institute of Technology), Johannes Meier (Carl von Ossietzky University, Oldenburg), Ralf Reussner (Karlsruhe Institute of Technology), and Andreas Winter (Carl von Ossietzky University, Oldenburg)

Commonalities for Preserving Consistency of Multiple Models .371
Heiko Klare (Karlsruhe Institute of Technology) and Joshua Gleitze (Karlsruhe Institute of Technology)

A Generic Language for Query and Viewtype Generation By-Example .379
Christopher Werner (Technische Universität Dresden), Manuel Wimmer (Johannes Kepler University Linz), and Uwe Aßmann (Technische Universität Dresden)

Towards Modular Combination and Reuse of Languages with Perspectives .387
Hyacinth Ali (McGill University), Gunter Mussbacher (McGill University), and Jörg Kienzle (McGill University)

Intensional View Definition with Constrained Incremental Transformation Rules .395.....
Théo Le Calvar (LERIA - University of Angers), Frédéric Jouault (ERIS team, Groupe ESEO, Angers, France), Fabien Chhel (ERIS team, Groupe ESEO, Angers, France), Frédéric Saubion (LERIA - University of Angers), and Mickael Clavreul (ERIS team, Groupe ESEO, Angers, France)

Fourth International Workshop on Human Factors in Modeling: HuFaMo 2019

Preface to the Fourth International Workshop on Human Factors in Modeling (HuFaMo'19) .403.....
Rodi Jolak (Chalmers | Gothenburg University), Miguel Goulão (Universidade Nova de Lisboa), Silvia Abrahão (Universitat Politècnica de València), Xavier Le Pallec (University of Lille), and Emmanuel Renaux (Institut Mines-Telecom Lille-Douai)

Insights for Improving Diagram Editing Gained from an Empirical Study .405.....
Michael Stegmaier (Ulm University), Alexander Raschke (Ulm University), Matthias Tichy (Ulm University), Eva-Maria Meßner (Ulm University), Sara Hajian (Ulm University), and Anna Feldengut (Ulm University)

UmpleOnline as a Testbed for Modeling Empirical Studies: A Position Paper .413.....
Timothy Lethbridge (University of Ottawa)

Position Paper: Knowledge Sharing and Distances in Collaborative Modeling .415.....
Rodi Jolak (Chalmers University of Technology and Gothenburg University) and Grischa Liebel (Reykjavík University)

First International Workshop on Multi-Paradigm Modelling for Cyber-Physical Systems: MPM4CPS

Preface to the 1st Multi-Paradigm Modeling for Cyber-Physical Systems (MPM4CPS 2019) .417.....
Simon Van Mierlo (University of Antwerp - Flanders Make vzw), Eugene Syriani (Université de Montréal), Dominique Blouin (Télécom Paris), Moussa Amrani (Université de Namur), Julien Deantoni (Université Cote d'Azur - Sophia Antipolis), and Manuel Wimmer (CDL-MINT, Johannes Kepler University Linz)

Towards a Formal Specification of Multi-paradigm Modelling .419.....
Moussa Amrani (University of Namur, Belgium), Dominique Blouin (Télécom Paris Institut Polytechnique de Paris, France), Robert Heinrich (Karlsruhe Institute of Technology), Arend Rensink (University of Twente, Netherland), Hans Vangheluwe (University of Antwerp – Flanders Make Antwerp, Belgium), and Andreas Wortmann (RWTH Aachen University Aachen, Germany)

Blended Modelling - What, Why and How .425.....
Federico Ciccozzi (Mälardalen University), Matthias Tichy (Ulm University), Hans Vangheluwe (University of Antwerp - Flanders Make), and Danny Weyns (KU Leuven - Linneaus University)

Model-Driven Systems Engineering for Virtual Product Design .431
Manuela Dalibor (RWTH Aachen University), Nico Jansen (RWTH Aachen University), Bernhard Rumpe (RWTH Aachen University), Louis Wachtmeister (RWTH Aachen University), and Andreas Wortmann (RWTH Aachen University)

Towards Sketching Interfaces for Multi-paradigm Modeling .437
Simon Van Mierlo (University of Antwerp - Flanders Make vzw), Julien Deantoni (Université Cote d'Azur - Sophia Antipolis), Loli Burgueño (IN3, Open University of Catalonia and Institut LIST, CEA, Université Paris-Saclay), Clark Verbrugge (McGill University), and Hans Vangheluwe (University of Antwerp - Flanders Make vzw)

Challenges for Automation in Adaptive Abstraction .443
Romain Franceschini (University of Corsica), Moharram Challenger (University of Antwerp), Antonio Cicchetti (Mälardalen University), Joachim Denil (University of Antwerp), and Hans Vangheluwe (University of Antwerp)

The Computational Notebook Paradigm for Multi-paradigm Modeling .449
Bentley James Oakes (University of Antwerp), Romain Franceschini (University of Corsica), Simon Van Mierlo (University of Antwerp), and Hans Vangheluwe (University of Antwerp)

5th Flexible MDE Workshop: FlexMDE 2019

Towards Flexible, Rigorous Refinement in Metamodeling .455
Gergely Mezei (Budapest University of Technology and Economics), Zoltán Theisz (evopro Systems Engineering Ltd.), Sándor Bácsi (Budapest University of Technology and Economics), Ferenc A. Somogyi (Budapest University of Technology and Economics), and Dániel Palatinszky (Budapest University of Technology and Economics)

Simplified Specification Languages for Flexible and Agile Modelling .460
Kevin Lano (King's College London), S. Fang (King's College London), H. Alfraihi (Princess Nourah bint Abdulrahman University), and S. Kolahdouz-Rahimi (University of Isfahan)

Modeling Moods .468
Harald Störrle (QAware GmbH)

Flexible Modelling using Conversational Agents .478
Sara Pérez-Soler (Universidad Autónoma de Madrid), Esther Guerra (Universidad Autónoma de Madrid), and Juan de Lara (Universidad Autónoma de Madrid)

16th Workshop on Model Driven Engineering, Verification and Validation: MoDeVVa 2019

Towards Reasoning About Product Lines with Design Choices .483
Navpreet Kaur (Université de Montréal) and Michalis Famelis (Université de Montréal)

Shall We Test Service-Based Models or Generated Code? 493
Jean-Marie Mottu (LS2N, Université de Nantes, IMT Atlantique), Pascal André (LS2N, Université de Nantes), Maxence Coutant (Université de Nantes), and Tom Le Berre (Université de Nantes)

Using the SCADE Toolchain to Generate Requirements-Based Test Cases for an Adaptive Cruise Control System 503
Adina Aniculaesei (TU Clausthal, Germany), Andreas Vorwald (TU Clausthal, Germany), and Andreas Rausch (TU Clausthal, Germany)

Verification and Validation Approaches for Model-Based Software Engineering 514
Johann Schumann (SGT, Inc, NASA Ames Research Center) and Katerina Goseva-Popstojanova (West Virginia University)

A Catalogue of Scenario Patterns for Validating and Verifying Model Behavior 519
Nisha Desai (University of Bremen) and Martin Gogolla (University of Bremen)

Optimizing Hierarchical, Concurrent State Machines in Umple for Model Checking 524
Opeyemi Adesina (University of the Fraser Valley), Timothy C. Lethbridge (University of Ottawa), and Stéphane Somé (University of Ottawa)

The 14th International Workshop on Models@run.time: Models@run.time

Bridging the Gap between Smart Home Platforms and Machine Learning using Relational Reference Attribute Grammars 533
René Schöne (Technische Universität Dresden), Johannes Mey (Technische Universität Dresden), Boqi Ren (Technische Universität Dresden), and Uwe Aßmann (Technische Universität Dresden)

Towards Self-Explainable Cyber-Physical Systems 543
Mathias Blumreiter (Hamburg University of Technology), Joel Greenyer (Leibniz Universität Hannover), Francisco Javier Chiyah Garcia (Heriot-Watt University), Verena Klös (Technische Universität Berlin), Maike Schwammberger (University of Oldenburg), Christoph Sommer (Paderborn University), Andreas Vogelsang (Technische Universität Berlin), and Andreas Wortmann (RWTH Aachen University)

The 6th International Workshop on Model-Driven Robot Software Engineering: MORSE 2019

A Domain-Specific Language for the Development of Heterogeneous Multi-robot Systems 549
Daneil Steen Losvik (Western Norway University of Applied Sciences) and Adrian Rutle (Western Norway University of Applied Sciences)

A Matlab-Internal DSL for Modelling Hybrid Rigid-Continuum Robots with TMTDyn 559
S.M. Hadi Sadati (King's College London), Steffen Zschaler (King's College London), and Christos Bergeles (King's College London)

A Model-Driven Approach to Automate Tuning of Continuous Controller Parameters .568
Hamza EL Baccouri (Lab-STICC, CNRS, UMR6285 Univ. Bretagne Occidentale), Goulven Guillou (Lab-STICC, CNRS, UMR6285 Univ. Bretagne Occidentale), and Jean-Philippe Babau (Lab-STICC, CNRS, UMR6285 Univ. Bretagne Occidentale)

Design-Time Safety Assessment of Robotic Systems Using Fault Injection Simulation in a Model-Driven Approach .577
Garazi Juez Uriagereka (Tecnalia), Estibaliz Amparan (Tecnalia), Cristina Martinez Martinez (Tecnalia), Jabier Martinez (Tecnalia), Aurelien Ibanez (AKEO PLUS), Matteo Morelli (CEA LIST), Ansgar Radermacher (CEA LIST), and Huascar Espinoza (CEA LIST)

1st international workshop on DevOps: DevOps@MODELS

Preface to the 1st Workshop on DevOps@MODELS .587
Francis Bordeleau (École de Technologie Supérieure (ETS)), Jean-Michel Bruel (Université de Toulouse), Jordi Cabot (ICREA – Open University of Catalonia (OUC)), Juergen Dingel (Queen's University), and Sébastien Mosser (Université du Québec à Montréal (UQAM))

Detecting Architectural Issues During the Continuous Integration Pipeline .589
Camilo Mendoza (Universidad de los Andes), Kelly Garcés (Universidad de los Andes), Rubby Casallas (Universidad de los Andes), and José Bocanegra (Universidad de los Andes)

Towards Continuous Delivery for Domain Experts: Using MDE to Integrate Non-Programmers into a Software Delivery Pipeline .598
Holger Nehls (Siemens Healthineers) and Daniel Ratiu (Siemens Corporate Technology)

When DevOps Meets Meta-Learning: A Portfolio to Rule them all .605
Benni Benjamin (Université Côte d'Azur, CNRS, I3S, France), Blay-Fornarino Mireille (Université Côte d'Azur, CNRS, i3s, FRANCE), Mosser Sébastien (Université du Québec à Montréal, Canada), Précisio Frédéric (Université Côte d'Azur, CNRS, i3s, FRANCE), and Jungbluth Günther (Université Côte d'Azur, CNRS, i3s, France)

Towards Model-Based Continuous Deployment of Secure IoT Systems .613
Nicolas Ferry (SINTEF) and Phu H. Nguyen (SINTEF)

A Model-Driven Engineering Framework to Support the Functional Safety Process .619
Bart Meyers (Flanders Make), Klaas Gadeyne (Flanders Make), Bentley Oakes (University of Antwerp), Matthias Bernaerts (University of Antwerp), Hans Vangheluwe (University of Antwerp), and Joachim Denil (University of Antwerp)

Doctoral Symposium

Towards Model-Driven Self-Explanation for Autonomous Decision-Making Systems .624
Owen Reynolds (Aston University)

Automatic Network Configuration for Real-Time, Distributed Industrial Automation Systems .629
Ben Schneider (fortiss GmbH)

User-Centered Performance Engineering of Model Transformations .635
Raffaela Groner (Ulm University, Institute of Software Engineering and Programming Languages)

How to Live with Inconsistencies in Industrial Model-Based Development Practice .642
Robbert Jongeling (Mälardalen University)

Improving MBSE Tools UX with AI-Empowered Software Assistants .648
Maxime Savary-Leblanc (University of Lille)

Improving Solution Reuse in Automotive Embedded Applications using a Pattern Library Based Approach .653
Maged Khalil (Chassis & Safety - Systems & Technology, Continental Teves AG & Co. oHG)

Modeling Adaptive Learning Agents for Domain Knowledge Transfer .660
Moritz Höser (Bauhaus Luftfahrt e. V.)

Automated Suggestions of Security Enhancing Improvements for Software Architectures .666
Sven Merschjohann (Fraunhofer IEM)

Educators Symposium

Use of Personalized Feedback Reports in a Blended Conceptual Modelling Course .672
Daria Bogdanova (KU Leuven) and Monique Snoeck (KU Leuven)

A Study of Modeling Perception in a First-Time Modeling Class .680
Huseyin Ergin (Ball State University), Isaac L. Walling (Ball State University), Kate P. Rader (Ball State University), and D. Joshua Dobbs (Ball State University)

Teaching Software Modelling in an Undergraduate Introduction to Software Engineering .690
Bernd Westphal (Albert-Ludwigs-Universität Freiburg)

Automated Grading of Class Diagrams .700
Weiyi Bian (Trent University), Omar Alam (Trent University), and Jörg Kienzle (McGill University)

An Idealistic Plan for Transforming Media Sources Into Books, Slides and Videos: Position Statement on “Textbooks 10 Years From Now” .710
Martin Gogolla (University of Bremen) and Antonio Vallecillo (University of Málaga)

Teaching Modelling Literacy: An Artificial Intelligence Approach .714
Rijul Saini (McGill University), Gunter Mussbacher (McGill University), Jin L.C. Guo (McGill University), and Jöerg Kienzle (McGill University)

SML4C: Fully Automatic Classification of State Machine Models for Model Inspection in Education .720
Shinpei Ogata (Shinshu University) and Mizue Kayama (Shinshu University)

Poster Papers

A Semantic Model to Fight Social Exclusion .730
Victor-Alejandro Ortiz (Barcelona Supercomputing Center), Montserrat Estañol (Barcelona Supercomputing Center; Universitat Politècnica de Catalunya), Maria-Cristina Marinescu (Barcelona Supercomputing Center), Maria Ribera Sancho (Universitat Politècnica de Catalunya), Ernest Teniente (Universitat Politècnica de Catalunya), and Carmen Rueda (Ajuntament de Barcelona)

Formal Verification and Mathematical Optimization for Autonomous Vehicle Group Controllers .732
Masaki Nakamura (Toyama Prefectural University) and Kazutoshi Sakakibara (Toyama Prefectural University)

Continuous Delivery of Software on IoT Devices .734
Diego Prens (Universidad de los Andes), Iván Alfonso (Universidad de los Andes), Kelly Garcés (Universidad de los Andes), and John Guerra-Gomez (Northeastern University)

Generating Heterogeneous Codes for IoT Systems Based on CAPS .736
Mohammad Sharaf (An-Najah National University, Nablus, Palestine), Mai Abusair (An-Najah National University, Nablus, Palestine), Henry Muccini (University of L'Aquila), Rami Eleiwi (An-Najah National University, Nablus, Palestine), Yara Shana'a (An-Najah National University, Nablus, Palestine), and Ithar Saleh (An-Najah National University, Nablus, Palestine)

Tools and Demos

ARGON: A Model-Driven Infrastructure Provisioning Tool .738
Julio Sandobalin (Escuela Politécnica Nacional), Emilio Insfran (Universitat Politècnica de València), and Silvia Abrahão (Universitat Politècnica de València)

Live-UMLRT: A Tool for Live Modeling of UML-RT Models .743
Mojtaba Bagherzadeh (Queen's University), Karim Jahed (Queen's University), Benoit Combemale (University of Toulouse), and Juergen Dingel (Queen's University)

WAPIml: Towards a Modeling Infrastructure for Web APIs .748
Hamza Ed-douibi (IN3 - UOC, Barcelona, Spain), Javier Luis Cánovas Izquierdo (IN3 - UOC, Barcelona, Spain), Francis Bordeleau (ETS, Montreal, Canada), and Jordi Cabot (ICREA - UOC, Barcelona, Spain)

GDF: A Gamification Design Framework Powered by Model-Driven Engineering .753
Antonio Bucchiarone (Fondazione Bruno Kessler, Trento, Italy), Antonio Cicchetti (IDT Department, Malardalen University, Vasteras, Sweden), and Annapaola Marconi (Fondazione Bruno Kessler, Trento, Italy)

MAPLE-T: A Tool for Process Enactment with Traceability Support .759
Omar Hassane (Concordia University), Sadaf Mustafiz (Ryerson University), Ferhat Khendek (Concordia University), and Maria Toeroe (Ericsson Inc.)

Verifying Deadlock and Nondeterminism in Activity Diagrams .764
Lucas Lima (Departamento de Computação, UFRPE) and Amaury Tavares (Departamento de Computação, UFRPE)

A Model Driven Tool for Requirements and Hardware Engineering 769
Asma Charfi (CEA LIST), Shuai Li (CEA LIST), Thomas Payret (CEA LIST), Patrick Tessier (CEA LIST), Chokri Mraidha (CEA LIST), and Sébastien Gérard (CEA LIST)

Quality Improvement for UML and OCL Models Through Bad Smell and Metrics Definition 774
Khanh-Hoang Doan (University of Bremen) and Martin Gogolla (University of Bremen)

UCAnDoModels: A Context-Based Model Editor for Editing and Debugging UML Class and State-Machine Diagrams 779
Parsa Pourali (University of Waterloo) and Joanne M. Atlee (University of Waterloo)

Semantics of Co-simulation Algorithms with Simulator Contracts 784
Cláudio Gomes (University of Antwerp), Levi Lúcio (fortiss, Germany), and Hans Vangheluwe (University of Antwerp)

Meta Model Application for Consistency Management of Models for Avionic Systems Design 790
Jef Stegen (Siemens Industry Software), Stefan Dutre (Siemens Industry Software), Joe Zhensheng Guo (Siemens CT), Marc Zeller (Siemens CT), and Stefan Rothbauer (Siemens CT)

Author Index 797
