Modeling in Mechanics and Materials

29–31 March 2019, Suzhou, China

Accepted papers received: 16 April 2019
Published online: 26 September 2019

Preface

Preface

Peer review statement

Papers

Optimal Design of Airbag Landing System without Rebound

X Zhou, S M Zhou and D K Li.....1

Vibration characteristic of moderately thick graphene reinforced composite functionally graded plate based on state-space levy method combined with higher order shear deformation theory

Q.H. Lv, Z.X. Lei and Y. Zhang.....17

A Hamiltonian-based analytical approach for three-dimensional heat conduction of cylinders with specific mixed boundary conditions

D L Rong, Z H Zhou, W Xu, H Y Li, J B Sun and X S Xu.....37

Simulation of a folded airbag inflating underwater with IMM method

Yan Chen, Guo-Ping Chen and Huan He.....45

Low-frequency resonant vibration energy harvester using piezoelectric stacks with force magnification frames

Xiangjian Duan and Dongxing Cao.....54

Diffusion stress analysis of spherical shell electrode

Yun Qiu, Z. X. Zhu and Yang Zhang.....62

Hybrid energy harvesting from the natural wind and magnetic field

Xueping Xu, Qinkai Han and Fulei Chu.....69

Bending analysis of skew ribbed plates with a meshfree method

Xia Qin, Shan Shan Liu and Lin-Xin Peng.....77

Rib layout optimization of stiffened square plates based on a meshfree model and a hybrid genetic algorithm

Linyuan Li and L X Peng.....93

A quad-stable piezoelectric energy harvester for enhancing energy harvesting from rotational motion: Theoretical model and experiments

Xutao Mei, Shengxi Zhou, Zhichun Yang, Tsutomu Kaizuka and Kimihiko Nakano.....106

Vortex-induced vibrational tristable energy harvester: Design and experiments

S Zhou, J Li, J Wang, G Li and Q Wang.....114

Stiffness and damping effects of the rhombic piezoelectric stack transducer with a negative capacitance shunt

B Yan, W Zheng, S Zhou and C Wu.....120

Prediction of the sound insulation of panel structures based on the virtual testing room

Gang Wang, Guofang Li, Zhihua Feng and Junfang Ni.....125

The thermal effect on dynamic characteristics of composite material pipe conveying fluid

Su Cai and Bo Fang.....133

Vibration power flow analysis of pipe perpendicular to plate structures

Jiang-Hai Wu, Hong-Zhen Zhu, Zhi-Yong Yin, Fang An and Ling-Bo Zhou.....140

Nonlinear Dynamical Analysis of a Circular Truss Antenna in Thermal Environments

Ruiqin Wu and Wei Zhang.....150

Nonlinear Responses of a Cantilever Honeycomb Sandwich Plate under Aerodynamic Pressure

Junhua Zhang and Xiaohui Qi.....163

Theoretical and experimental study of bistable symmetric shells built by locally nanostructuring an isotropic plate

Shenghui Yi, Xiaoqiao He and Jian Lu.....175

Investigation of two-degree-of-freedom cylindrical electromagnetic energy harvesters

K Q Fan, Y W Zhang and G Liang.....182

Numerical simulation of overtopping in the earth-filled dam based on material point method

Yong-Sen Yang, Liu-Chao Qiu, Lei Tian, Jing-Jun Li and Yu Han.....190

Detection and analysis of high temperature fatigue fracture surface oxygen diffusion of GH4133B superalloy used in turbine disk of aero-engine

R G Zhao, L Y Deng, Y F Liu, N Ji, C L Ren and X M Li.....196

Vibration suppression of cantilever plate using nonlinear energy sink

G Liu and W Zhang.....202

Vibration of functionally graded Mindlin plate based on a modified strain gradient elasticity theory

Jingnong Jiang and Lifeng Wang.....208

Vibration analysis of a rotating axially functionally graded tapered beam with hollow circular cross-section

Shipeng Dong, Liang Li, Dingguo Zhang and Yang Zhang.....225

Simulation and experimental research on ultrasonic drawing of copper shaped wires

S Liu, T Xie, H Q Cao and X B Shan.....234

270-degree arc-shaped piezoelectric energy converter in uniflow fluid environment

Ying Gong, Xiaobiao Shan, Zhengbao Yang and Tao Xie.....241

Ultra-fine high-carbon steel wire drawing with ultrasonic vibration

Hengqiang Cao, Xiaobiao Shan, Shen Liu, Yongjun Shi and Tao Xie.....250

Design and optimization of a broadband piezoelectric energy harvester

Xiaoqing Ma, Shangqing Zhao and Xiangyu Sun.....255

Analysis of high temperature fatigue lifetime of GH4133B superalloy used in turbine disk of aero-engine

C L Ren, R G Zhao, Y F Liu, N Ji, L Y Deng and X M Li.....262

Airflow energy harvesting through diamagnetically levitated magnet rotor

Qi Gong, Yufeng Su, Kun Zhang and Kedi Wu.....269

Nonlinear transverse vibration of nano-strings based on the differential type of nonlocal theory

P Y Wang, C X Zhu, C Li and S Li.....275

Dynamic characteristics and response research of low-frequency vibration harvester based on diamagnetic levitation

Kedi Wu, Yufeng Su, Kun Zhang and Qi Gong.....286

Flutter Control of a Two-dimensional Airfoil based on Adaptive Dynamic Programming

Su Jia, Jian Qiao Sun and Qian Ding.....291

Experimental investigation of harvesting stochastic vibration energy by a piezoelectric inverted beam with pendulum

J N Pan and W Y Qin.....299

Vibration Suppression of a Cantilevered Piezoelectric Laminated Composite Plate Subjected to Hygrothermal Loads

Yue Jiang, Ning Xue, Shufeng Lu and Xiaojuan Song.....305

Temperature and strain-rate dependent constitutive model for prediction of thermal cycling life

Wenjie Wang and Xu Long.....318

Preparation and mechanical properties of steel fiber reinforced high performance concrete with copper slag as fine aggregate

X M Li, S H Zou, R G Zhao, L Y Deng, N Ji and C L Ren.....325

Dynamics analysis of multi-field coupled piezoelectric energy harvester under random excitation

Xuhui Zhang, Meng Zuo, Houzhi Tan, Zhonghua Wu, Zhengpeng Lai and Hongwei Fan.....334

Influence of Defects on the Mechanical Performances of Super Carbon Nanotube

Xian Shi and Xiaoqiao He.....346

Nonlinear Dynamics and Performance Enhancement of Multi-stable Wideband Energy Harvesting: Theoretical Analysis

C Wang, X Yang and S K Lai.....354

Nonlinear dynamics and parameter control for metamaterial plate with negative Poisson's ratio

S T Zhu, J Li, J Zhou and T T Quan.....361

Establishment of rubber thermo-viscoelastic constitutive model and analysis of temperature field

Hongyan Chu, Yingjie Hong, Qi Chen and Rui Wang.....371

Static and dynamic mechanical properties of impregnated carbon nanotube fiber

Shan-Xiu Wan and Qing-Sheng Yang.....385

Design and Analysis of Shape Memory Polymer Mast Base on Numerical Simulation Method

Shuai Liu and Qing-Sheng Yang.....394

Research on Buckling and Post-buckling Characteristics of Composite Curved Stiffened Fuselage Panel under Hoop Bending load

C Hao, C Y Nan, Z Peng and L Lei.....403

Integrated design of structure and anisotropic material based on the BESO method

X L Yan, Q W Xu, J He, D F Huang and X D Huang.....411

An efficient finite strip procedure for initial post-buckling analysis of composite laminated members

Pusong Ma, Bin He and Haonan Qi.....419

Fatigue Topology Optimization Based on Global Stress Constraint Method

Peng-Fei Su, Hong-Ling Ye, Wei-Wei Wang and Yun-Kang Sui.....447

The phase-change heat conduction analysis during solidification processes by a hybrid generalized FDM

Hui Liu, Jun Lei and Yanjie Xu.....453

Investigation of mechanical properties of additive manufactured graphene-reinforced aluminium composites

Li-Ya Liu and Qing-Sheng Yang.....460

Nonlinear dynamics of rotating blades with variable cross-section

Wei Zhang, Huan Liu and Yan Niu.....470

The lightweight topology optimization of multi-material structures with displacement constraints

Zong-Jie Dai, Hong-Ling Ye, Wei-Wei Wang and Yun-Kang Sui.....480

Modeling and simulation of the structural and electrical characteristics for a polarized piezoelectric sensor actuator

Chong Zhang, Xiaobiao Shan, Gaoliang Peng, Tao Xie and Xin Dong.....486

Design and experimental investigation of a T-shaped piezoelectric energy harvester

Zhengqiu Xie, Siping Zhong, Yang Liu and Wenbin Huang.....496

Atomistic simulation of the nanoindentation behavior of graphene/Al multilayered nanocomposites

Jia-Qi Zhu, Xia Liu and Qing-Sheng Yang.....501

Low-velocity impact response of 3D-printed lattice sandwich panels

Sheng Wang, Yingjie Xu and Weihong Zhang.....509

Numerical prediction of uniaxial tensile properties of 3D braided C/SiC composites

Xinyu Hui, Haibin Wang, Yingjie Xu and Weihong Zhang.....517

Experimental investigation of thermomechanical behaviour of NiTi shape memory alloy under low-velocity impact loading

Xuanchang Ren, Jun Wang, Yingjie Xu, Weihong Zhang and Jihong Zhu.....527

Design and Analysis of Multi-layer Integrated Thermal Protection System based on Ceramic Matrix Composite and Titanium Alloy Lattice Sandwich

Ningxin Xu, Yingjie Xu, Weihong Zhang and Jihong Zhu.....536

Nonlinear breathing vibrations of a circular mesh antenna based on a equivalent model of a composite laminated circular cylindrical shell with membranes

T Liu, W Zhang, Y Zheng and H Liu.....543

Modal analysis of the rotating shell structure based on Absolute Nodal Coordinate Formulation

J C Yu and Q T Wang.....549

Failure analysis of composite tube hinge and optimization design

Bowen Li, Hongling Ye and Yang Zhang.....561

Effect of Shear Flow on Flow Characteristics of The PTC Cylinder

Dahai Zhang, Tianjiao Li, Lei Feng, Wenxiu Huang and Chunning Ji.....569

Periodic solutions and numerical simulations for composite laminated circular cylindrical shell

Y Y Tian, J Li, W Zhang and T T Quan.....579

Effects of microstructural parameters on phase transition temperature of hydrogels in chemo-mechanical coupling fields

Tao Li and Qing-Sheng Yang.....589

Accurate analysis of steady state response of fully clamped orthotropic functionally graded rectangular plates

J H Fan, D L Rong, Z Z Tong, Z Zhao, Z H Zhou and X S Xu.....599

Parameters optimization design of tape spring considering fatigue performance

Xuesong Shi, Hongling Ye and Bowen Li.....612

A rational analytical approach for buckling analysis of orthotropic double-nanoplate-systems

D L Rong, C H Xu, J L Zhang, Z Z Tong, Z H Zhou and X S Xu.....621

Anti-buckling design of cylindrical shells by local surface nanocrystallization

X S Xu, Z Zhao, C W Lim, W Wang, Z B Lian and Z H Zhou.....632

Study on the vibration of functionally graded microcantilevers immersed in fluids under photothermal excitation

S Gu, Y Q Song and Q Zheng.....639

Dynamic modeling and vibration control of a rotating space flexible arm with enhanced active constrained layer damping treatment

Cangzhen Jin, Liang Li, Dingguo Zhang and Yang Zhang.....648

Modelling and simulation for the vibration of a plate with three axes maneuvering

Y H Zhang, G G Liu and S L Chen.....657

Experimental study on underwater fin-shaped piezoelectric energy harvester based on wake galloping

Yicong Wang, Xiaobiao Shan, Ju Feng and Tao Xie.....665

Effect of interference-fit percentage and preload on the mechanical behaviour of single-shear lap composite joint

Peng Zou and Hui Cheng.....672

Sensing characteristic of GPCs induced by sliding of graphene flakes

Zheng Li and Qing-Sheng Yang.....683

Modeling of nonlinear dynamic characteristics and experimental study of piezoelectric energy harvesters with a panel type structure

Jinda Jia, Xiaobiao Shan, Yingxiang Liu and Tao Xie.....693

Study on Drag Torque Characteristics of Corrugated Joint for Spacesuit under Human-Induced Loads

L Y Wang, S M Zhou, K Shang and D K Li.....702

Design and simulation of a novel ancient Chinese bow-type piezoelectric actuator

Limin Cao, Chicheng Ma, Zonghe Guo and Juncheng Ma.....717

Knowledge-guided lightweight method for large complex component based on geometric-stress feature correlation response

Haiyan Hua, Xu Chen and Hua Lin.....725

Modal analysis of the coupled vibration in an aero-turbine compressor blisk considering both aerodynamic and centrifugal load

H B Wang, W Zhang, M H Yao and M M Zhang.....733

Concurrent wind and base vibration energy harvesting with a broadband bistable aeroelastic energy harvester

Liya Zhao.....744

The lightweight topology optimization of plate/shell structures with different mechanical performance constraints

W W Wang, H L Ye and Y K Sui.....752

Harmonic modeling of vibration energy harvesting systems using extended impedance method

Yiming Gao, Bao Zhao, Jiahua Wang and Junrui Liang.....759

The Photoacoustic Effect of Multilayered Graphene Films

Nizi Yang, Shuang Li, Cheng Li and Xueliang Fan.....766

Fracture analysis of cracks terminating at the interface of elastic-piezoelectric bimaterials

X Yu, Z T Yang, C H Xu, Y Xing, Z H Zhou and X S Xu.....774

Fractal characterization of the oxidation structure in ZrB_2-SiC composite after thermal shocks

F Qi, S H Meng, P Wu, H Guo, D Zhao and T Chen.....785

Multi-objective optimal sliding mode control design of active suspension system with MOPSO algorithm

Kunming Gao, Zonghe Guo, Zhichang Qin, Ruixian Li and Yuchen Zhang.....792

Bifurcation and Chaos of Rotating Inextensional Ring

Ligang Wang, Jiaoyang Wang and S F Asokanthan.....801

Reducing the drag of underwater vehicle in the shape of a small boat by using piezoelectric transducers

Lu Zhang, Xiaobiao Shan, Yingxiang Liu, Gaoliang Peng and Tao Xie.....810

Numerical simulation on the seismic performance of post-fire steel concrete frame joint bonded with steel

J Y Wang, X C Yue and Y Z Sun.....819

Investigations on flexural wave propagation of a grillage structure using the multi-reflection method

Yanqiu Li, Runxin Zhou, Liangmei Liu and Tao Chen.....827
