The 15th IAPR International Conference on Document Analysis and Recognition (ICDAR 2019)

ICDAR 2019

Table of Contents

Welcome Message from the Honorary Chair ..... **xxxv**
Welcome Message from the General Chairs ..... **xxxvi**
Welcome Message from the Program Chairs ..... **xxxviii**
Organizers ..... **xxxix**
Program Committee Members ..... **xl**
Sponsors ..... **xliv**

Oral Session 1: Handwritten Text Recognition

Training Full-Page Handwritten Text Recognition Models without Annotated Line Breaks 1
Chris Tensmeyer (Adobe Research) and Curtis Wigington (Adobe Research)

Deep Network with Pixel-Level Rectification and Robust Training for Handwriting Recognition 9
Shanyu Xiao (Tsinghua University), Liangrui Peng (Tsinghua University), Reijie Yan (Tsinghua University), and Shengjin Wang (Tsinghua University)

A Scalable Handwritten Text Recognition System 17
R. Reeve Ingle (Google Research), Yasuhisa Fujii (Google Research), Thomas Deselaers (Google Research), Jonathan Baccash (Google Research), and Ashok C. Popat (Google Research)

A Fast and Accurate Fully Convolutional Network for End-to-End Handwritten Chinese Text Segmentation and Recognition 25
Dezhi Peng (South China University of Technology), Lianwen Jin (South China University of Technology), Yaqiang Wu (Lenovo Research), Zhepeng Wang (Lenovo Research), and Mingxiang Cai (Lenovo Research)

Dissecting Multi-line Handwriting for Multi-dimensional Connectionist Classification 31
Martin Schall (Institute for Optical Systems, University of Applied Sciences, Konstanz & Siemens Logistics GmbH, Konstanz), Marc-Peter Schambach (Siemens Logistics GmbH, Konstanz), and Matthias Franz (Institute for Optical Systems, University of Applied Sciences, Konstanz)

Oral Session 2: Document Image Processing

MTRNet: A Generic Scene Text Eraser 39
Osman Tursun (Queensland University of Technology), Rui Zeng (Queensland University of Technology), Simon Denman (Queensland University of Technology), Sabesan Sivapalan (Queensland University of Technology), Sridha Sridharan (Queensland University of Technology), and Clinton Fookes (Queensland University of Technology)

Document Binarization via Multi-resolutional Attention Model with DRD Loss 45
Xujun Peng (Information Sciences Institute, University of Sourthen California), Chao Wang (LinkedMed (Shanghai) Co., Ltd., Spreadtrum Center), and Huaigu Cao (Information Sciences Institute, University of Sourthen California)

Graphical Object Detection in Document Images 51
Ranajit Saha (International Institute of Information Technology, Hyderabad, India), Ajoy Mondal (International Institute of Information Technology, Hyderabad, India), and C V Jawahar (International Institute of Information Technology, Hyderabad, India)

An End-to-End Trainable Framework for Joint Optimization of Document Enhancement and Recognition 59
Anupama Ray (Research Scientist, IBM Research), Manoj Sharma (Scientist, CEERI-CSIR India), Avinash Upadhyay (BSNL), Megh Makwana (CEERI), Santanu Chaudhury (IIT Jodhpur, India), Akkshita Trivedi (CEERI-CSIR), Ajay Singh (CEERI-CSIR), and Anil Saini (CEERI-CSIR)

Learning 2D Morphological Network for Old Document Image Binarization 65
Ranjan Mondal (Indian Statistical Institute, Kolkata), Deepayan Chakraborty (Indian Statistical Institute, Kolkata), and Bhabatosh Chanda (Indian Statistical Institute, Kolkata)

Oral Session 3: Document Understanding

Multimodal Document Image Classification 71
Rajiv Jain (Adobe Research) and Curtis Wigington (Adobe Research)

Decipherment of Historical Manuscript Images 78
Xusen Yin (USC/ISI), Nada Aldarrab (USC/ISI), Beáta Megyesi (Uppsala University), and Kevin Knight (DiDi Labs)

Training Convolutional Autoencoders with Metric Learning 86
Yosuke Onitsuka (Kyushu University), Wataru Ohyama (Saitama Institute of Technology), and Seiichi Uchida (Kyushu University)

A Meaningful Information Extraction System for Interactive Analysis of Documents 92
Julien Maitre (L3i, La Rochelle University), Michel Ménard (L3i, La Rochelle University), Guillaume Chiron (L3i, La Rochelle University), Alain Bouju (L3i, La Rochelle University), and Nicolas Sidère (L3i, La Rochelle University)

Table-of-Contents Generation on Contemporary Documents 100
Bentabet Najah-Imane (Fortia Financial Solutions), Juge Rémi (Fortia Financial Solutions), and Ferradans Sira (Fortia Financial Solutions)

Making Two Vast Historical Manuscript Collections Searchable and Extracting Meaningful Textual Features Through Large-Scale Probabilistic Indexing 108
Alejandro Héctor Toselli (Pattern Recognition and Human Language Research Center (PRHLT) - Universitat Politècnica de València), Verónica Romero (Pattern Recognition and Human Language Research Center (PRHLT) - Universitat Politècnica de València), Joan Andreu Sánchez (Pattern Recognition and Human Language Research Center (PRHLT) - Universitat Politècnica de València), and Enrique Vidal (Pattern Recognition and Human Language Research Center (PRHLT) - Universitat Politècnica de València)

Oral Session 4: Table Analysis

Deep Splitting and Merging for Table Structure Decomposition 114
Chris Tensmeyer (Adobe Research), Vlad I. Morariu (Adobe Research), Brian Price (Adobe Research), Scott Cohen (Adobe Research), and Tony Martinez (Brigham Young University)

Table Detection in Invoice Documents by Graph Neural Networks 122
Pau Riba (Computer Vision Center, Universitat Autònoma de Barcelona), Anjan Dutta (Computer Vision Center, Universitat Autònoma de Barcelona), Lutz Goldmann (omni:us GmbH, Berlin, Germany), Alicia Fornés (Computer Vision Center, Universitat Autònoma de Barcelona), Oriol Ramos (Computer Vision Center, Universitat Autònoma de Barcelona), and Josep Lladós (Computer Vision Center, Universitat Autònoma de Barcelona)

TableNet: Deep Learning Model for End-to-end Table Detection and Tabular Data Extraction from Scanned Document Images 128
Shubham Singh Paliwal (TCS R&D), Vishwanath D (TCS R&D), Rohit Rahul (TCS R&D), Monika Sharma (TCS R&D), and Lovekesh Vig (TCS R&D)

Deep Visual Template-Free Form Parsing 134
Brian Davis (Brigham Young University), Bryan Morse (Brigham Young University), Scott Cohen (Adobe Research), Brian Price (Adobe Research), and Chris Tensmeyer (Adobe Research)

Rethinking Table Recognition using Graph Neural Networks 142
Shah Rukh Qasim (National University of Sciences and Technology (NUST)), Hassan Mahmood (National University of Sciences and Technology (NUST)), and Faisal Shafait (National University of Sciences and Technology (NUST))

Breaking the Code on Broken Tablets: The Learning Challenge for Annotated Cuneiform Script in Normalized 2D and 3D Datasets 148
Hubert Mara (IWR - Heidelberg University) and Bartosz Bogacz (IWR - Heidelberg University)

Poster Session 1

OCR On-the-Go: Robust End-to-End Systems for Reading License Plates & Street Signs 154
Rohit Saluja (IITB-Monash Research Academy), Ayush Maheshwari (Indian Institute of Technology Bombay), Ganesh Ramakrishnan (Indian Institute of Technology Bombay), Parag Chaudhuri (Indian Institute of Technology Bombay), and Mark Carman (Politecnico di Milano, Milan, Italy)

Sub-Word Embeddings for OCR Corrections in Highly Fusional Indic Languages 160
Rohit Saluja (IITB-Monash Research Academy), Mayur Punjabi (Indian Institute of Technology Bombay), Mark Carman (Politecnico di Milano, Milan, Italy), Ganesh Ramakrishnan (Indian Institute of Technology Bombay), and Parag Chaudhuri (Indian Institute of Technology Bombay)

DeepHSV: User-Independent Offline Signature Verification Using Two-Channel CNN 166
Chuang Li (China Financial Certification Authority), Feng Lin (China Financial Certification Authority), Zhiyong Wang (China Financial Certification Authority), Gang Yu (China Minsheng Bank), Liou Yuan (China Minsheng Bank), and Haiqiang Wang (Tencent Media Lab)

Generating Realistic Binarization Data with Generative Adversarial Networks 172
Chris Tensmeyer (Adobe Research), Mike Brodie (Brigham Young University), Daniel Saunders (Brigham Young University), and Tony Martinez (Brigham Young University)

TH-GAN: Generative Adversarial Network Based Transfer Learning for Historical Chinese Character Recognition 178
Junyang Cai (Tsinghua University), Liangrui Peng (Tsinghua University), Yejun Tang (Tsinghua University), Changsong Liu (Tsinghua University), and Pengchao Li (Beijing Institute of Electronics Technology and Application)

Data Augmentation via Adversarial Networks for Optical Character Recognition/Conference Submissions 184
Victor Storchan (J.P.Morgan)

BAGS: An Automatic Homework Grading System using the Pictures Taken by Smart Phones ..... N/A
Xiaoshuo Li (Beijing Boxfish Education Technology Co. Ltd), Tiezhu Yue (Beijing Boxfish Education Technology Co. Ltd), Xuanping Huang (Beijing Boxfish Education Technology Co. Ltd), Zhe Yang (Tsinghua University), and Gang Xu (Tsinghua University)

Detecting Named Entities in Unstructured Bengali Manuscript Images 196
Chandranath Adak (University of Technology Sydney), Bidyut B. Chaudhuri (Indian Statistical Institute, Techno India University), Chin-Teng Lin (University of Technology Sydney), and Michael Blumenstein (University of Technology Sydney)

Target-Directed MixUp for Labeling Tangut Characters 202
Guangwei Zhang (Xi'an Jiaotong University) and Yinliang Zhao (Xi'an Jiaotong University)

DeepText: Detecting Text from the Wild with Multi-ASPP-Assembled DeepLab 208
Qingqing Wang (East China Normal University; University of Technology Sydney), Wenjing Jia (University of Technology Sydney), Xiangjian He (University of Technology Sydney), Yue Lu (East China Normal University), Michael Blumenstein (University of Technology Sydney), Ye Huang (University of Technology Sydney), and Shujing Lyu (East China Normal University)

Transductive Learning for Reading Handwritten Tibetan Manuscripts 214
Sivan Keret (Tel Aviv University), Lior Wolf (Tel Aviv University and Facebook AI Research), Nachum Dershowitz (Tel Aviv University), Eric Werner (Asia-Africa Institute University of Hamburg), Orna Almogi (Asia-Africa Institute University of Hamburg), and Dorji Wangchuk (Asia-Africa Institute University of Hamburg)

Learning Free Line Detection in Manuscripts using Distance Transform Graph 222
Majeed Kassis (The Ben-Gurion University of the Negev) and Jihad El-Sana (The Ben-Gurion University of the Negev)

Segmentation-Free Bangla Offline Handwriting Recognition using Sequential Detection of Characters and Diacritics with a Faster R-CNN 228
Nishatul Majid (Boise State University) and Elisa H. Barney Smith (Boise State University)

Toward Online Handwriting Recognition System Based on Reinforcement Learning Theory ..... N/A
Ramzi Zouari (National School of Engineers of Sfax), Houcine Boubaker (National School of Engineers of Sfax), Haikal El Abed (GIZ GmbH), and Monji Kherallah (Faculty of Sciences of Sfax)

Cascaded Detail-Preserving Networks for Super-Resolution of Document Images 240
Zhichao Fu (East China Normal University), Yu Kong (Videt Tech), Yingbin Zheng (Videt Tech), Hao Ye (Videt Tech), Wenxin Hu (East China Normal University), Jing Yang (East China Normal University), and Liang He (East China Normal University)

Sub-Word Based Mongolian Offline Handwriting Recognition 246
Daoerji Fan (Inner Mongolia University), Guanglai Gao (Inner Mongolia University), and Huijuan Wu (Inner Mongolia University)

EATEN: Entity-Aware Attention for Single Shot Visual Text Extraction 254
He Guo (Baidu Inc.), Xiameng Qin (Baidu Inc.), Jiaming Liu (Baidu Inc.), Junyu Han (Baidu Inc.), Jingtuo Liu (Baidu Inc.), and Errui Ding (Baidu Inc.)

Can One Deep Learning Model Learn Script-Independent Multilingual Word-Spotting? 260
Mohammed Al-Rawi (Computer Vision Center), Ernest Valveny (Computer Vision Center), and Dimosthenis Karatzas (Computer Vision Center)

Semi-Synthetic Data Augmentation of Scanned Historical Documents 268
Romain Karpinski (Télécom Nancy) and Abdel Belaïd (Université de Lorraine - LORIA)

Attention After Attention: Reading Text in the Wild with Cross Attention 274
Yunlong Huang (South China University of Technology), Canjie Luo (South China University of Technology), Lianwen Jin (South China University of Technology), Qingxiang Lin (South China University of Technology), and Weiying Zhou (South China University of Technology)

A Teacher-Student Learning Based Born-Again Training Approach to Improving Scene Text Detection Accuracy 281
Zhuoyao Zhong (South China University of Technology), Lei Sun (Microsoft Research Asia), and Qiang Huo (Microsoft Research Asia)

Versatile Layout Understanding via Conjugate Graph 287
animesh Prasad (National University of Singapore), Hervé Déjean (Naver Labs Europe), and Jean-Luc Meunier (Naver Labs Europe)

Efficient, Lexicon-Free OCR using Deep Learning 295
Marcin Namysl (Fraunhofer IAIS) and Iuliu Konya (Fraunhofer IAIS)

Fast Distributional Smoothing for Regularization in CTC Applied to Text Recognition 302
Ryohei Tanaka (Toshiba Digital Solutions Corporation), Soichiro Ono (Toshiba Digital Solutions Corporation), and Akio Furuhata (Toshiba Digital Solutions Corporation)

Oracle Character Recognition by Nearest Neighbor Classification with Deep Metric Learning 309
Yi-Kang Zhang (National Laboratory of Pattern Recognition, Institute of Automation, Chinese Academy of Sciences; School of Artificial Intelligence, University of Chinese Academy of Sciences), Heng Zhang (National Laboratory of Pattern Recognition, Institute of Automation, Chinese Academy of Sciences), Yong-Ge Liu (Anyang Normal University, Henan, P.R. China; Key Laboratory of Oracle Bone Inscriptions Information Processing, Ministry of Education), Qing Yang (National Laboratory of Pattern Recognition, Institute of Automation, Chinese Academy of Sciences), and Cheng-Lin Liu (National Laboratory of Pattern Recognition, Institute of Automation, Chinese Academy of Sciences; School of Artificial Intelligence, University of Chinese Academy of Sciences, Beijing; CAS Center for Excellence of Brain Science and Intelligence Technology, Beijing)

Template-Instance Loss for Offline Handwritten Chinese Character Recognition 315
Yao Xiao (Institute of Artificial Intelligence, Shanghai Em-Data Technology Co., Ltd.), Dan Meng (Institute of Artificial Intelligence, Shanghai Em-Data Technology Co., Ltd.), Cewu Lu (Shanghai Jiao Tong University), and Chi-Keung Tang (Hong Kong University of Science and Technology)

Urdu-Text: A Dataset and Benchmark for Urdu Text Detection and Recognition in Natural Scenes 323
Asghar Ali (University of New South Wales) and Mark Pickering (University of New South Wales)

Attend, Copy, Parse End-to-end Information Extraction from Documents 329
Rasmus Berg Palm (Tradeshift), Florian Laws (Tradeshift), and Ole Winther (Technical University of Denmark)

Aiding Intra-Text Representations with Visual Context for Multimodal Named Entity Recognition 337
Omer Arshad (University of Insubria, Varese, Italy), Ignazio Gallo (University of Insubria, Varese, Italy), Shah Nawaz (University of Insubria, Varese, Italy), and Alessandro Calefati (University of Insubria, Varese, Italy)

WiSe — Slide Segmentation in the Wild 343
Monica Haurilet (Karlsruhe Institute of Technology), Alina Roitberg (Karlsruhe Institute of Technology), Manuel Martinez (Karlsruhe Institute of Technology), and Rainer Stiefelhagen (Karlsruhe Institute of Technology)

Symmetric Inkball Alignment with Loopy Models 349
Nicholas Howe (Smith College) and Ji Won Chung (Smith College)

No Padding Please: Efficient Neural Handwriting Recognition 355
Gideon Maillette de Buy Wenniger (The Adapt Centre, Dublin City University), Lambert Schomaker (Bernoulli Institute for Mathematics, Computer Science and Artificial Intelligence, University of Groningen), and Andy Way (The Adapt Centre, Dublin City University)

Integrating Coordinates with Context for Information Extraction in Document Images 363
Zhaohui Jiang (Shanghai Jiao Tong University), Zheng Huang (Shanghai Jiao Tong University), Yunrui Lian (Xiamen No.1 High School, Fujian, China), Jie Guo (Shanghai Jiao Tong University), and Weidong Qiu (Shanghai Jiao Tong University)

Text Line Segmentation in Historical Document Images Using an Adaptive U-Net Architecture 369
Olfa Mechi (Université de Sousse, Ecole Nationale d'Ingénieurs de Sousse, LATIS-Laboratory of Advanced Technology and Intelligent Systems, Sousse, Tunisie;), Maroua Mehri (Université de Sousse, Ecole Nationale d'Ingénieurs de Sousse, LATIS-Laboratory of Advanced Technology and Intelligent Systems, Sousse, Tunisie;), Rolf Ingold (DIVA Group, University of Fribourg, Fribourg, Switzerland), and Najoua Essoukri Ben Amara (Université de Sousse, Ecole Nationale d'Ingénieurs de Sousse, LATIS-Laboratory of Advanced Technology and Intelligent Systems, Sousse, Tunisie;)

TextEdge: Multi-oriented Scene Text Detection via Region Segmentation and Edge Classification 375
Chen Du (Institute of Automation, Chinese Academy of Sciences(CASIA); University of Chinese Academy of Sciences(UCAS)), Chunheng Wang (Institute of Automation, Chinese Academy of Sciences(CASIA)), Yanna Wang (Institute of Automation, Chinese Academy of Sciences(CASIA)), Zipeng Feng (Institute of Automation, Chinese Academy of Sciences(CASIA); University of Chinese Academy of Sciences(UCAS)), and Jiyuan Zhang (Institute of Automation, Chinese Academy of Sciences(CASIA); University of Chinese Academy of Sciences(UCAS))

Extraction of Math Expressions from PDF Documents Based on Unsupervised Modeling of Fonts 381
Zelun Wang (Texas A&M University), Donald Beyette (Texas A&M University), Jason Lin (Texas A&M University), and Jyh-Charn Liu (Texas A&M University)

Bigram Label Regularization to Reduce Over-Segmentation on Inline Math Expression Detection 387
Xing Wang (Texas A&M University), Zelun Wang (Texas A&M University), and Jyh-Charn Liu (Texas A&M University)

Automatic Synthetic Document Image Generation using Generative Adversarial Networks: Application in Mobile-Captured Document Analysis 393
Quang Anh Bui (PurchEase), David Mollard (PurchEase), and Salvatore Tabbone (LORIA, Université de Lorraine)

Selective Super-Resolution for Scene Text Images 401
Ryo Nakao (Kyushu University), Brian Kenji Iwana (Kyushu University), and Seiichi Uchida (Kyushu University)

Modality Conversion of Handwritten Patterns by Cross Variational Autoencoders 407
Taichi Sumi (Kyushu University), Brian Kenji Iwana (Kyushu University), Hideaki Hayashi (Kyushu University), and Seiichi Uchida (Kyushu University)

Adversarial Feature Enhancing Network for End-to-End Handwritten Paragraph Recognition 413
Yaoxiong Huang (South China University of Technology), Zecheng Xie (South China University of Technology), Lianwen Jin (South China University of Technology), Yuanzhi Zhu (South China University of Technology), and Shuaitao Zhang (South China University of Technology)

A Character Attention Generative Adversarial Network for Degraded Historical Document Restoration 420
Kha Cong Nguyen (Tokyo University of Agriculture and Technology), Cuong Tuan Nguyen (Tokyo University of Agriculture and Technology), Seiji Hotta (Tokyo University of Agriculture and Technology), and Masaki Nakagawa (Tokyo University of Agriculture and Technology)

Towards Automated Evaluation of Handwritten Assessments 426
Vijay Rowtula (IIIT Hyderabad), Subba Reddy Oota (IIIT Hyderabad), and Jawahar C.V (IIIT Hyderabad)

Digital Auditor: A Framework for Matching Duplicate Invoices 434
Himanshu Sharad Bhatt (AI Labs, American Express), Shourya Roy (AI Labs, American Express), Lokesh Bhatnagar (Global Supply Management, American Express), Chetan Lohani (Global Supply Management, American Express), and Vinit Jain (Global Supply Management, American Express)

Text Siamese Network for Video Textual Keyframe Detection 442
Hao Song (Tencent Research), Hongzhen Wang (Tencent Research), Shan Huang (Tencent Research), Pei Xu (Tencent Research), Shen Huang (Tencent Research), and Qi Ju (Tencent Research)

On the Ability of a CNN to Realize Image-to-Image Language Conversion 448
Kohei Baba (Kyushu University), Seiichi Uchida (Kyushu University), and Brian Kenji Iwana (Kyushu University)

Parameter-Free Table Detection Method 454
Laiphangbam Melinda (University of Hyderabad) and Chakravarthy Bhagvati (University of Hyderabad)

Table Rows Segmentation 461
Hervé Déjean (NAVER LABS Europe) and Jean-Luc Meunier (Naver Labs Europe)

Discourse Descriptor for Document Incremental Classification Comparison with Deep Learning 467
Vincent Poulain d'Andecy (Yooz), Aurélie Joseph (Yooz), Joaquín Cuenca (Yooz), and Jean-Marc Ogier (Université de La Rochelle)

CNN-Based Accidental Detection in Dense Printed Piano Scores 473
Kwon-Young Choi (Univ Rennes, CNRS, IRISA, F-35000), Bertrand Coüasnon (Univ Rennes, CNRS, IRISA, F-35000), Yann Ricquebourg (Univ Rennes, CNRS, IRISA, F-35000), and Richard Zanibbi (Rochester Institute of Technology)

Adversarial Generation of Handwritten Text Images Conditioned on Sequences 481
Eloi Alonso (A2iA SAS, Ecole des Ponts), Bastien Moysset (A2iA SAS), and Ronaldo Messina (A2iA SAS)

Field Typing for Improved Recognition on Heterogeneous Handwritten Forms 487
Ciprian Tomoiaga (AXA REV), Paul Feng (AXA REV), Mathieu Salzmann (CVLab, EPFL), and Patrick Jayet (AXA REV)

A Multi-task Network for Localization and Recognition of Text in Images 494
Mohammad Reza Sarshogh (Capital One) and Keegan Hines (Capital One)

On the Use of Attention Mechanism in a Seq2Seq Based Approach for Off-Line Handwritten Digit String Recognition 502
Thibault Lupinski (Université de Lorraine - LORIA), Abdel Belaid (Université de Lorraine - LORIA), and Afef Kacem Echi (Université de Tunis - ENSIT - LaTICE)

Scene Text Detection with Feature Pyramid Network and Linking Segments 508
Xi Liu (Meituan-Dianping Group), Rui Zhang (Meituan-Dianping Group), Yongsheng Zhou (Meituan-Dianping Group), and Dong Wang (Meituan-Dianping Group)

Instance Aware Document Image Segmentation using Label Pyramid Networks and Deep Watershed Transformation 514
Xiao-Hui Li (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, University of Chinese Academy of Sciences), Fei Yin (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, University of Chinese Academy of Sciences), Tao Xue (Tencent Co. Ltd), Long Liu (Tencent Co. Ltd), Jean-Marc Ogier (L3i Laboratory, University of La Rochelle), and Cheng-Lin Liu (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, University of Chinese Academy of Sciences, CAS Center for Excellence of Brain Science and Intelligence Technology)

Detecting Text in News Images with Similarity Embedded Proposals 520
Miaotong Jiang (University of Science and Technology Beijing, Beijing), Jiebo Hou (University of Science and Technology Beijing, Beijing), Chun Yang (University of Science and Technology Beijing, Beijing), Xiaobin Zhu (University of Science and Technology Beijing, Beijing), and Xucheng Yin (University of Science and Technology Beijing, Beijing)

A Stroke-Based RNN for Writer-Independent Online Signature Verification 526
Chuang Li (China Financial Certification Authority), Xing Zhang (China Financial Certification Authority), Feng Lin (China Financial Certification Authority), Zhiyong Wang (China Financial Certification Authority), Jun'E Liu (China Financial Certification Authority), Rui Zhang (China Financial Certification Authority), and Haiqiang Wang (Tencent)

CNN Based Binarization of MultiSpectral Document Images 533
Fabian Hollaus (Computer Vision Lab, TU Wien), Simon Brenner (Computer Vision Lab, TU Wien), and Robert Sablatnig (Computer Vision Lab, TU Wien)

Text Line Adjustment Based on Neural Network 539
Ruochen Wang (Fujitsu Research & Development Center), Xiaojie Xia (Fujitsu Research & Development Center), Chunyan Zhang (Fujitsu Research & Development Center), Xiaoyi Yu (Fujitsu Research & Development Center), Jun Sun (Fujitsu Research & Development Center), and Satoshi Naoi (Fujitsu Research & Development Center)

Hybrid DBLSTM-SVM Based Beta-Elliptic-CNN Models for Online Arabic Characters Recognition 545
Yahia Hamdi (University of Sfax, National Engineering School of Sfax), Houcine Boubaker (University of Sfax, National Engineering School of Sfax), Thameur Dhieb (University of Sfax, National Engineering School of Sfax), Abdelkarim Elbaati (University of Sfax, National Engineering School of Sfax), and Adel M. Alimi (University of Sfax, National Engineering School of Sfax)

Towards Document Image Quality Assessment: A Text Line Based Framework and a Synthetic Text Line Image Dataset 551
Hongyu Li (Tongdun Technology), Fan Zhu (ZhongAn Technology), and Junhua Qiu (Tongdun Technology)

Curved Text Detection in Natural Scene Images with Semi- and Weakly-Supervised Learning 559
Xugong Qin (Institute of Information Engineering, Chinese Academy of Sciences), Yu Zhou (Institute of Information Engineering, Chinese Academy of Sciences), Dongbao Yang (Institute of Information Engineering, Chinese Academy of Sciences), and Weiping Wang (Institute of Information Engineering, Chinese Academy of Sciences)

Hybrid Training Data for Historical Text OCR 565
Jií Martínek (University of West Bohemia), Ladislav Lenc (University of West Bohemia), Pavel Král (University of West Bohemia), Anguelos Nicolaou (Friedrich-Alexander University Erlangen-Nürnberg), and Vincent Christlein (Friedrich-Alexander University Erlangen-Nürnberg)

Training Binary-Valued Gates LSTM ..... N/A
Zhe Li (National Laboratory of Pattern Recognition, Institute of Automation, Chinese Academy of Sciences) and Jian Cheng (National Laboratory of Pattern Recognition, Institute of Automation, Chinese Academy of Sciences)

An End-to-End Trainable System for Offline Handwritten Chemical Formulae Recognition 577
Xiaoxue Liu (Central China Normal University Wollongong Joint Institute, Central China Normal University), Ting Zhang (National Engineering Research Center for E-learning, Central China Normal University), and Xinguo Yu (National Engineering Research Center for E-learning, Central China Normal University)

Exploring Confidence Measures for Word Spotting in Heterogeneous Datasets 583
Fabian Wolf (TU Dortmund University), Philipp Oberdiek (TU Dortmund University), and Gernot Fink (TU Dortmund University)

Cross-Modal Prototype Learning for Zero-Shot Handwriting Recognition 589
Xiang Ao (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences; University of Chinese Academy of Sciences), Xu-Yao Zhang (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences; University of Chinese Academy of Sciences), Hong-Ming Yang (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences; University of Chinese Academy of Sciences), Fei Yin (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences; University of Chinese Academy of Sciences), and Cheng-Lin Liu (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences; University of Chinese Academy of Sciences; CAS Center for Excellence in Brain Science and Intelligence Technology)

Multiple Comparative Attention Network for Offline Handwritten Chinese Character Recognition 595
Qingquan Xu (Huazhong University of Science and Technology), Xiang Bai (Huazhong University of Science and Technology), and Wenyu Liu (Huazhong University of Science and Technology)

Oral Session 5: Text Detection and Recognition

An End-to-End Video Text Detector with Online Tracking 601
Hongyuan Yu (University of Chinese Academy of Sciences (UCAS), Center for Research on Intelligent Perception and Computing (CRIPAC), National Laboratory of Pattern Recognition (NLPR)), Chengquan Zhang (Department of Computer Vision Technology(VIS), Baidu Inc.), Xuan Li (Department of Computer Vision Technology(VIS), Baidu Inc.), Junyu Han (Department of Computer Vision Technology(VIS), Baidu Inc.), Errui Ding (Department of Computer Vision Technology(VIS), Baidu Inc.), and Liang Wang (University of Chinese Academy of Sciences (UCAS), Center for Research on Intelligent Perception and Computing (CRIPAC), National Laboratory of Pattern Recognition (NLPR), Chinese Academy of Sciences Artificial Intelligence Research (CAS-AIR))

KuroNet: Pre-Modern Japanese Kuzushiji Character Recognition with Deep Learning 607
Tarin Clanuwat (Center for Open Data in the Humanities, National Institute of Informatics), Alex Lamb (Mila, Université de Montréal), and Asanobu Kitamoto (Center for Open Data in the Humanities, National Institute of Informatics)

A New Approach for Integrated Recognition and Correction of Texts from Images 615
Jian Wei (Onlyou Artificial Intelligence Institute), Kai Chen (Onlyou Artificial Intelligence Institute, Shanghai Jiaotong University), Jianhua He (Onlyou Artificial Intelligence Institute, Aston University), Zheng Huang (Onlyou Artificial Intelligence Institute, Shanghai Jiaotong University), Yunrui Lian (Xiamen First High School), and Yi Zhou (Onlyou Artificial Intelligence Institute)

On the Improvement of Recognizing Single-Line Strings of Japanese Historical Cursive 621
Ayumu Nagai (Gunma University)

An Attention-Based End-to-End Model for Multiple Text Lines Recognition in Japanese Historical Documents 629
Nam Tuan Ly (Tokyo University of Agriculture and Technology), Cuong Tuan Nguyen (Tokyo University of Agriculture and Technology), and Masaki Nakagawa (Tokyo University of Agriculture and Technology)

Oral Session 6: Mathematical Expression and Text Recognition

Residual BiRNN Based Seq2Seq Model with Transition Probability Matrix for Online Handwritten Mathematical Expression Recognition 635
Zelin Hong (Sun Yat-sen University), Ning You (Sun Yat-sen University), Jun Tan (Sun Yat-sen University), and Ning Bi (Sun Yat-sen University)

Fuzzy Visibility Graph for Structural Analysis of Online Handwritten Mathematical Expressions 641
Arnaud Lods (Learn&Go, Univ Rennes, CNRS, IRISA), Éric Anquetil (Univ Rennes, CNRS, IRISA), and Sébastien Macé (Learn&Go)

LPGA: Line-of-Sight Parsing with Graph-Based Attention for Math Formula Recognition 647
Mahshad Mahdavi (Document and Pattern Recognition Lab, Rochester Institute of Technology), Michael Condon (Apple Inc.), Kenny Davila (Center for Unified Biometrics and Sensors University at Buffalo), and Richard Zanibbi (Document and Pattern Recognition Lab, Rochester Institute of Technology)

A Cost Efficient Approach to Correct OCR Errors in Large Document Collections 655
Deepayan Das (IIIT Hyderabad, India), Jerin Philip (IIIT Hyderabad, India), Minesh Mathew (IIIT Hyderabad, India), and C. V. Jawahar (IIIT Hyderabad, India)

Using ASR Methods for OCR 663
Ashish Arora (Johns Hopkins University), Chun Chieh Chang (Johns Hopkins University), Babak Rekabdar (University of Tehran), Bagher BabaAli (University of Tehran), Daniel Povey (Johns Hopkins University), David Etter (Johns Hopkins University), Desh Raj (Johns Hopkins University), Hossein Hadian (Sharif University of Technology, Iran), Jan Trmal (Johns Hopkins University), Paola Garcia (Johns Hopkins University), Shinji Watanabe (Johns Hopkins University), Vimal Manohar (Johns Hopkins University), Yiwen Shao (Johns Hopkins University), and Sanjeev Khudanpur (Johns Hopkins University)

Poster Session 2

A Multi-oriented Chinese Keyword Spotter Guided by Text Line Detection 669
Pei Xu (Tencent Research), Shan Huang (Tencent Research), Hongzhen Wang (Tencent Research), Hao Song (Tencent Research), Shen Huang (Tencent Research), and Qi Ju (Tencent Research)

Cascading Modular U-Nets for Document Image Binarization 675
Seokjun Kang (Kyushu University), Brian Kenji Iwana (Kyushu University), and Seiichi Uchida (Kyushu University)

OBC306: A Large-Scale Oracle Bone Character Recognition Dataset 681
Shuangping Huang (South China University of Technology), Haobin Wang (South China University of Technology), Yongge Liu (Henan Key Laboratory of Oracle Bone Inscriptions Information Processing(Anyang Normal University)), Xiaosong Shi (Henan Key Laboratory of Oracle Bone Inscriptions Information Processing(Anyang Normal University)), and Lianwen Jin (South China University of Technology)

GARN: A Novel Generative Adversarial Recognition Network for End-to-End Scene Character Recognition .. 689
Hao Kong (Nanjing University), Dongqi Tang (Nanjing University), Xi Meng (Nanjing University), and Tong Lu (Nanjing University)

A Text-Context-Aware CNN Network for Multi-oriented and Multi-language Scene Text Detection 695
Yao Xiao (National Key Lab for Novel Software Technology, Nanjing University), Minglong Xue (National Key Lab for Novel Software Technology, Nanjing University), Tong Lu (National Key Lab for Novel Software Technology, Nanjing University), Yirui Wu (College of Computer and Information, Hohai University), and Shivakumara Palaiahnakote (Department of Computer System and Information Technology, University of Malaya)

Handwritten Words and Digits Recognition using Deep Learning Based Bag of Features Framework 701
Najoua Rahal (REGIM-Lab.: REsearch Groups in Intelligent Machines), Maroua Tounsi (REGIM-Lab.: REsearch Groups in Intelligent Machines), Tarek M Hamdani (REGIM-Lab.: REsearch Groups in Intelligent Machines), and Adel M Alimi (REGIM-Lab.: REsearch Groups in Intelligent Machines)

A Relation Network Based Approach to Curved Text Detection 707
Chixiang Ma (University of Science and Technology of China), Zhuoyao Zhong (South China University of Technology), Lei Sun (Microsoft Research Asia), and Qiang Huo (Microsoft Research Asia)

An Efficient off-Line Handwritten Japanese Address Recognition System 714
Xiaojie Xia (Fujitsu Research & Development Center), Xiaoyi Yu (Fujitsu Research & Development Center), Wei Liu (Fujitsu Research & Development Center), Chunyan Zhang (Fujitsu Research & Development Center), Jun Sun (Fujitsu Research & Development Center), and Satoshi Naoi (Fujitsu Research & Development Center)

A Comprehensive Study of ImageNet Pre-Training for Historical Document Image Analysis 720
Linda Studer (University of Fribourg, Switzerland), Michele Alberti (University of Fribourg, Switzerland), Vinaychandran Pondenkandath (University of Fribourg, Switzerland), Pinar Goktepe (University of Fribourg, Switzerland), Thomas Kolonko (University of Fribourg, Switzerland), Andreas Fischer (University of Fribourg, Switzerland), Marcus Liwicki (Lulea University of Technology, Sweden), and Rolf Ingold (University of Fribourg, Switzerland)

GRK-Papyri: A Dataset of Greek Handwriting on Papyri for the Task of Writer Identification 726
Hussein Mohammed (Universität Hamburg), Isabelle Marthot-Santaniello (Universität Basel), and Volker Märgner (Technische Universität Braunschweig)

The Pinkas Dataset 732
Berat Kurar Barakat (Ben-Gurion University of the Negev), Jihad El-Sana (Ben-Gurion University of the Negev), and Irina Rabaev (Shamoon College of Engineering)

Layout Analysis on Challenging Historical Arabic Manuscripts using Siamese Network 738
Reem Alaasam (Ben-Gurion University of the Negev), Berat Kurar (Ben-Gurion University of the Negev), and Jihad El-Sana (Ben-Gurion University of the Negev)

Online Writer Identification using GMM Based Feature Representation and Writer-Specific Weights 743
Vivek Venugopal (Indian Institute of Technology, Guwahati) and Suresh Sundaram (Indian Institute of Technology, Guwahati)

ReS2TIM: Reconstruct Syntactic Structures from Table Images 749
Wenyuan Xue (Beijing Jiaotong University), Qingyong Li (Beijing Jiaotong University), and Dacheng Tao (The University of Sydney)

Automatic Page Classification in a Large Collection of Manuscripts Based on the International Image Interoperability Framework 756
Emanuela Emanuela Boros (TEKLIA), Alexis Toumi (Department of Computer Science, University of Oxford, England), Erwan Rouchet (TEKLIA), Bastien Abadie (Teklia), Dominique Stutzmann (IRHT CNRS, Paris, France), and Christopher Kermorvant (Teklia and LITIS - Université de Rouen-Normandie, France)

A GAN-Based Feature Generator for Table Detection 763
Yibo Li (Peking University), Liangcai Gao (Peking University), Zhi Tang (Peking University), Qinqin Yan (State Key Laboratory of Digital Publishing Technology, Founder Group Co., LTD, Beijing, China), and Yilun Huang (Peking University)

Enhanced EAST: Improving Network's Feature Extraction Ability and Text Complete Shape Perception 769
Liu Yang (Xi'an Jiaotong University), Yonghong Song (Xi'an Jiaotong University), and Yuanlin Zhang (Xi'an Jiaotong University)

A Text Localization Method Based on Weak Supervision 775
Jiyuan Zhang (Institute of Automation, Chinese Academy of Sciences; University of Chinese Academy of Sciences), Chen Du (Institute of Automation, Chinese Academy of Sciences; University of Chinese Academy of Sciences), Zipeng Feng (Institute of Automation, Chinese Academy of Sciences; University of Chinese Academy of Sciences), Yanna Wang (Institute of Automation, Chinese Academy of Sciences), and Chunheng Wang (Institute of Automation, Chinese Academy of Sciences)

NRTR: A No-Recurrence Sequence-to-Sequence Model for Scene Text Recognition 781
Fenfen Sheng (Institute of Automation, Chinese Academy of Sciences; University of Chinese Academy of Sciences), Zhineng Chen (Institute of Automation, Chinese Academy of Sciences), and Bo Xu (Institute of Automation, Chinese Academy of Sciences)

A Robust Data Hiding Scheme Using Generated Content for Securing Genuine Documents 787
Vinh Loc Cu (L3i Laboratory, La Rochelle University, France), Jean-Christophe Burie (L3i Laboratory, La Rochelle University, France), Jean-Marc Ogier (L3i Laboratory, La Rochelle University, France), and Cheng-Lin Liu (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, Beijing, China)

CASIA-AHCDB: A Large-Scale Chinese Ancient Handwritten Characters Database 793
Yue Xu (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, Beijing; University of Chinese Academy of Sciences, Beijing), Fei Yin (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, Beijing; University of Chinese Academy of Sciences, Beijing), Da-Han Wang (Xiamen University of Technology), Xu-Yao Zhang (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, Beijing; University of Chinese Academy of Sciences, Beijing), Zhaoxiang Zhang (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, Beijing; University of Chinese Academy of Sciences, Beijing, P.R. China; CAS Center for Excellence of Brain Science and Intelligence Technology, Beijing), and Cheng-Lin Liu (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, Beijing; University of Chinese Academy of Sciences, Beijing, P.R. China; CAS Center for Excellence of Brain Science and Intelligence Technology, Beijing)

Manifold Mixup Improves Text Recognition with CTC Loss 799
Bastien Moysset (A2iA SAS) and Ronaldo Messina (A2iA SAS)

Selective Style Transfer for Text 805
Raul Gomez (Computer Vision Center, Universitat Autònoma de Barcelona), Ali Furkan Biten (Computer Vision Center, Universitat Autònoma de Barcelona), Lluis Gomez (Computer Vision Center, Universitat Autònoma de Barcelona), Jaume Gibert (Eurecat, Centre Tecnològic de Catalunya, Unitat de Tecnologies Audiovisuals), Dimosthenis Karatzas (Computer Vision Center, Universitat Autònoma de Barcelona), and Marçal Rusiñol (Computer Vision Center, Universitat Autònoma de Barcelona)

A YOLO-Based Table Detection Method 813
Yilun Huang (Peking University), Qinqin Yan (State Key Laboratory of Digital Publishing Technology, Founder Group Co., LTD, Beijing), Yibo Li (Peking University), Yifan Chen (State Key Laboratory of Digital Publishing Technology, Founder Group Co., LTD, Beijing), Xiong Wang (State Key Laboratory of Digital Publishing Technology, Founder Group Co., LTD, Beijing), Liangcai Gao (Peking University), and Zhi Tang (Peking University)

An Interactive and Generative Approach for Chinese Shanshui Painting Document 819
Le Zhou (Xi'an Jiaotong-Liverpool University), Qiu-Feng Wang (Xi'an Jiaotong-Liverpool University), Kaizhu Huang (Xi'an Jiaotong-Liverpool University), and Cheng-Hung Lo (Xi'an Jiaotong-Liverpool University)

Scene Text Magnifier 825
Toshiki Nakamura Nakamura (Human Interface Laboratory, Kyushu University, Fukuoka, Japan.), Anna Zhu (School of Computer, Wuhan University of Technology, Wuhan, China), and Seiichi Uchida (Human Interface Laboratory, Kyushu University, Fukuoka, Japan)

Exploration of CNN Features for Online Handwriting Recognition 831
Subhasis Mandal (IIT Guwahati), S. R. M Prasanna (IIT Guwahati), and Suresh Sundaram (IIT Guwahati)

Universal Barcode Detector via Semantic Segmentation 837
Andrey Zharkov (ABBYY Production LLC, Moscow Institute of Physics and Technology) and Ivan Zagaynov (ABBYY Production LLC, Moscow Institute of Physics and Technology)

HoughNet: Neural Network Architecture for Vanishing Points Detection 844
Alexander Sheshkus (Federal Research Center "Computer Science and Control" RAS, Moscow, Russia.), Anastasia Ingacheva (LLC Smart Engines Service, Moscow, Russia; National Research University Higher School of Economics), Vladimir Arlazarov (LLC Smart Engines Service, Moscow, Russia; National Research University), and Dmitry Nikolaev (LLC Smart Engines Service, Moscow, Russia; Kharkevich Institute)

Fast Method of ID Documents Location and Type Identification for Mobile and Server Application 850
Natalya Skoryukina (LLC Smart Engines Service; Federal Research Center "Computer Science and Control" RAS), Vladimir Arlazarov (LLC Smart Engines Service; Moscow Institute of Physics and Technology; Institute for Information Transmission Problems (Kharkevich Institute) RAS), and Dmitry Nikolaev (LLC Smart Engines Service; Moscow Institute of Physics and Technology; Institute for Information Transmission Problems (Kharkevich Institute) RAS)

Combination of Deep Learning and Syntactical Approaches for the Interpretation of Interactions Between Text-Lines and Tabular Structures in Handwritten Documents 858
Camille Guerry (Univ Rennes, CNRS, IRISA), Bertrand Coüasnon (Univ Rennes, CNRS, IRISA), and Aurélie Lemaitre (Univ Rennes, CNRS, IRISA)

A Synthetic Recipe for OCR 864
David Etter (Johns Hopkins University), Stephen Rawls (Information Science Institute, University of Southern California), Cameron Carpenter (Johns Hopkins University), and Gregory Sell (Johns Hopkins University)

Synthesis of Handwriting Dynamics using Sinusoidal Model 870
Himakshi Choudhury (Indian Institute of Technology Guwahati) and S. R. Mahadeva Prasanna (Indian Institute of Technology Dharwad (on deputaion))

Post-OCR Error Detection by Generating Plausible Candidates 876
Thi-Tuyet-Hai Nguyen (L3i, University of La Rochelle), Adam Jatowt (Graduate School of Informatics, Kyoto University), Mickael Coustaty (L3i, University of La Rochelle), Nhu-Van Nguyen (L3i, University of La Rochelle), and Antoine Doucet (L3i, University of La Rochelle)

Music Symbol Sequence Indexing in Medieval Plainchant Manuscripts 882
Jorge Calvo-Zaragoza (University of Alicante), Alejandro H. Toselli (PRHLT Research Center), Enrique Vidal (PRHLT Research Center), and Joan Andreu Sánchez (PRHLT Research Center)

Bi-Level Masked Multi-scale CNN-RNN Networks for Short Text Representation 888
Qian Li (Global Big Data Technologies Centre, University of Technology Sydney, Australia), Qiang Wu (Global Big Data Technologies Centre, University of Technology Sydney, Australia), Chengzhang Zhu (Advanced Analytics Institute, University of Technology Sydney, Australia), and Jian Zhang (Global Big Data Technologies Centre, University of Technology Sydney, Australia)

Challenges in End-to-End Neural Scientific Table Recognition 894
Yuntian Deng (Harvard University), David Rosenberg (Bloomberg), and Gideon Mann (Bloomberg)

Deep Neural Networks for Text Detection and Recognition in Historical Maps 902
Jerod Weinman (Grinnell College), Ziwen Chen (Grinnell College), Ben Gafford (Grinnell College), Nathan Gifford (Grinnell College), Abyaya Lamsal (Grinnell College), and Liam Niehus-Staab (Grinnell College)

Woodblock-Printing Mongolian Words Recognition by Bi-LSTM with Attention Mechanism 910
Yanke Kang (Inner Mongolia University), Hongxi Wei (Inner Mongolia University), Hui Zhang (Inner Mongolia University), and Guanglai Gao (Inner Mongolia University)

A Comparative Study of Attention-Based Encoder-Decoder Approaches to Natural Scene Text Recognition 916
Fuze Cong (Beijing University of Posts and Telecommunications, Key Lab of Universal Wireless Communications, Ministry of Education), Wenping Hu (Microsoft Research Asia), Qiang Huo (Microsoft Research Asia), and Li Guo (Beijing University of Posts and Telecommunications, Key Lab of Universal Wireless Communications, Ministry of Education)

Generating Synthetic Handwritten Mathematical Expressions from a LaTeX Sequence or a MathML Script 922
Vu Tran Minh Khuong (Tokyo University of Agriculture and Technology), Ung Quang Huy (Tokyo University of Agriculture and Technology), Nakagawa Masaki (Tokyo University of Agriculture and Technology), and Minh Khanh Phan (Tokyo University of Agriculture and Technology)

RankSVM for Offline Signature Verification 928
Yan Zheng (Kyushu University), Yuchen Zheng (Kyushu University), Wataru Ohyama (Saitama Institute of Technology), Daiki Suehiro (Kyushu University), and Seiichi Uchida (Kyushu University)

Japanese Character Segmentation for Historical Handwritten Official Documents Using Fully Convolutional Networks 934
Kei Watanabe (Chukyo University), Shinji Takahashi (Chukyo University), Yuki Kamaya (Chukyo University), Masashi Yamada (Chukyo University), Yoshito Mekada (Chukyo University), Junichi Hasegawa (Chukyo University), and Shinya Miyazaki (Chukyo University)

Deformation Classification of Drawings for Assessment of Visual-Motor Perceptual Maturity 941
Momina Moetesum (Bahria University Islamabad), Imran Siddiqi (Bahria University Islamabad), and Nicole Vincent (LIPADE, Paris University of Descartes)

OCR-VQA: Visual Question Answering by Reading Text in Images 947
Anand Mishra (Indian Institute of Science, Bangalore), Shashank Shekhar (Indian Institute of Science, Bangalore), Ajeet Kumar Singh (TCS), and Anirban Chakraborty (Indian Institute of Science Bangalore)

DICE: Deep Intelligent Contextual Embedding for Twitter Sentiment Analysis 953
Usman Naseem (University of Technology Sydney, Australia) and Katarzyna Musial (University of Technology Sydney, Australia)

Care Label Recognition 959
Jiri Kralicek (Czech Technical University), Jiri Matas (Czech Technical University), and Michal Busta (Czech Technical University)

Deep Learning Based Approach for Historical Manuscript Dating 967
Anmol Hamid (Bahria University Islamabad), Maryam Bibi (Bahria University Islamabad), Momina Moetesum (Bahria University of Islamabad), and Imran Siddiqi (Bahria University Islamabad)

Binarization of Degraded Document Images using Convolutional Neural Networks Based on Predicted Two-Channel Images 973
Younes Akbari (Qatar University), Alceu S. Britto Jr. (Pontifcia Universidade Catlica do Paran (PUCPR)), Somaya Al-maadeed (Qatar University), and Luiz S. Oliveira (Universidade Federal do Paran (UFPR))

Multi-label Connectionist Temporal Classification 979
Curtis Wigington (Adobe Research), Brian Price (Adobe Research), and Scott Cohen (Adobe Research)

Zero Shot Learning Based Script Identification in the Wild 987
Prateek Keserwani (Indian Institute of Technology Roorkee, Roorkee, India), Kanjar De (Norwegian University of Science and Technology, Norway), Partha Pratim Roy (Indian Institute of Technology Roorkee, Roorkee, India), and Umapada Pal (Indian Statistical Institute, Kolkata, India)

Oral Session 7: Layout Analysis

Contextual Stroke Classification in Online Handwritten Documents with Graph Attention Networks 993
Jun-Yu Ye (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, University of Chinese Academy of Sciences), Yan-Ming Zhang (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, University of Chinese Academy of Sciences), Qing Yang (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, University of Chinese Academy of Sciences), and Cheng-Lin Liu (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, University of Chinese Academy of Sciences)

Indiscapes: Instance Segmentation Networks for Layout Parsing of Historical Indic Manuscripts 999
Abhishek Prusty (International Institute of Information Technology, Hyderabad (IIIT-H)), Sowmya Aitha (International Institute of Information Technology, Hyderabad (IIIT-H)), Abhishek Trivedi (International Institute of Information Technology, Hyderabad (IIIT-H)), and Ravi Kiran Sarvadevabhatla (International Institute of Information Technology, Hyderabad (IIIT-H))

Article Segmentation in Digitised Newspapers with a 2D Markov Model 1007
Andrew Naoum (The University of Sydney), Joel Nothman (The University of Sydney), and James Curran (The University of Sydney)

PubLayNet: Largest Dataset Ever for Document Layout Analysis 1015
Xu Zhong (IBM Research Australia), Jianbin Tang (IBM Research Australia), and Antonio Jimeno Yepes (IBM Research Australia)

Page Segmentation using a Convolutional Neural Network with Trainable Co-Occurrence Features 1023
Joonho Lee (Kyushu University), Hideaki Hayashi (Kyushu University), Wataru Ohyama (Saitama Institute of Technology), and Seiichi Uchida (Kyushu University)

DoT-Net: Document Layout Classification Using Texture-Based CNN 1029
Sai Chandra Kosaraju (Kennesaw State University), Mohammed Masum (Kennesaw State University), Nelson Zange Tsaku (Kennesaw State University), Pritesh Patel (GE Power), Tanju Bayramoglu (GE Power), Girish Modgil (GE Power), and Mingon Kang (Kennesaw State University)

Oral Session 8: Applications of Document Analysis

CNN-BLSTM-CRF Network for Semantic Labeling of Students' Online Handwritten Assignments 1035
Amirali Darvishzadeh (University of California, Riverside), Thomas Stahovich (University of California, Riverside), Amir Feghahati (University of California, Riverside), Negin Entezari (University of California, Riverside), Shaghayegh Gharghabi (University of California, Riverside), Reed Kanemaru (University of California, Riverside), and Christian Shelton (University of California, Riverside)

Serif or Sans: Visual Font Analytics on Book Covers and Online Advertisements 1041
Yuto Shinahara (Kyushu University), Takuro Karamatsu (Kyushu University), Daisuke Harada (Kyushu University), Kota Yamaguchi (CyberAgent, Inc.), and Seiichi Uchida (Kyushu University)

Content Extraction from Lecture Video via Speaker Action Classification Based on Pose Information 1047
Fei Xu (University at Buffalo), Kenny Davila (University at Buffalo), Srirangaraj Setlur (University at Buffalo), and Venu Govindaraju (University at Buffalo)

Developing Horizon Scanning Methods for the Discovery of Scientific Trends 1055
Maja Karasalo (Swedish Defence Research Agency) and Johan Schubert (Swedish Defence Research Agency)

Identifying the Central Figure of a Scientific Paper 1063
Sean T. Yang (University of Washington), Po-Shen Lee (University of Washington), Lia Kazakova (University of Washington), Abhishek Joshi (University of Washington), Bum Mook Oh (University of Washington), Jevin D. West (University of Washington), and Bill Howe (University of Washington)

BRIDGE: Building Plan Repository for Image Description Generation, and Evaluation 1071
Shreya Goyal (Indian Institute of Technology Jodhpur), Vishesh Mistry (Indian Institute of Technology Jodhpur), Chiranjoy Chattopadhyay (Indian Institute of Technology Jodhpur), and Gaurav Bhatnagar (Indian Institute of Technology Jodhpur)

Oral Session 9: Script Identification and Authentication

Patch Aggregator for Scene Text Script Identification 1077
Changxu Cheng (Huazhong University of Science and Technology), Qiuhui Huang (Huazhong University of Science and Technology), Xiang Bai (Huazhong University of Science and Technology), Bin Feng (Huazhong University of Science and Technology), and Wenyu Liu (Huazhong University of Science and Technology)

Script Identification using Across- and Within-Image Distribution Estimation 1084
Gregory Sell (Johns Hopkins University), David Etter (Johns Hopkins University), Daniel Garcia-Romero (Johns Hopkins University), and Alan McCree (Johns Hopkins University)

Deep Generalized Max Pooling 1090
Vincent Christlein (Friedrich-Alexander-Universität Erlangen-Nürnberg), Lukas Spranger (Friedrich-Alexander-Universtität Erlangen-Nürnberg), Mathias Seuret (Friedrich-Alexander-Universtität Erlangen-Nürnberg), Anguelos Nicolaou (Friedrich-Alexander-Universtität Erlangen-Nürnberg), Pavel Král (University of West Bohemia Plze), and Andreas Maier (Friedrich-Alexander-Universtität Erlangen-Nürnberg)

A Spatio-Spectral Hybrid Convolutional Architecture for Hyperspectral Document Authentication 1097
Muhammad Jaleed Khan (Institute of Space Technology, Pakistan), Khurram Khurshid (Institute of Space Technology, Pakistan), and Faisal Shafait (National University of Sciences and Technology, Pakistan)

Oral Session 10: Signature Verification

Deep Dynamic Time Warping: End-to-End Local Representation Learning for Online Signature Verification 1103
Xiaomeng Wu (NTT Corporation), Akisato Kimura (NTT Corporation), Brian Kenji Iwana (Kyushu University), Seiichi Uchida (Kyushu University), and Kunio Kashino (NTT Corporation)

Capturing Micro Deformations from Pooling Layers for Offline Signature Verification 1111
Yuchen Zheng (Kyushu University), Wataru Ohyama (Saitama Institute of Technology), Brian Kenji Iwana (Kyushu University), and Seiichi Uchida (Kyushu University)

Offline Signature Verification using Structural Dynamic Time Warping 1117
Michael Stauffer (University of Applied Sciences and Arts Northwestern Switzerland), Paul Maergner (University of Fribourg), Andreas Fischer (University of Fribourg), Rolf Ingold (University of Fribourg), and Kaspar Riesen (University of Applied Sciences and Arts Northwestern Switzerland)

Online Signature Verification by Few-Shot Separable Convolution Based Deep Learning 1125
Chandra Sekhar Vorugunti (Indian Institute of Information Technology SriCity), Rama Krishna Sai Gorthi (Indian Institute of Technology Tirupathi), and Viswanath Pulabaigari (Indian Institute of Information Technology SriCity)

Poster Session 3

Age Estimation using Disconnectedness Features in Handwriting 1131
V. Basavaraja (University of Mysore, India), Palaiahnakote Shivakumara (University of Malaya, Kuala Lumpur), D. S. Guru (University of Mysore, India), Umapada Pal (Indian Statistical Institute, Kolkata), Tong Lu (Nanjing University), and Michael Blumenstein (University of Technology Sydney)

Offline Writer Identification Based on the Path Signature Feature 1137
Songxuan Lai (South China University of Technology) and Lianwen Jin (South China University of Technology)

Do You Need More Data? The DeepSignDB On-Line Handwritten Signature Biometric Database 1143
Ruben Tolosana (Universidad Autonoma de Madrid), Ruben Vera-Rodriguez (Universidad Autonoma de Madrid), Julian Fierrez (Universidad Autonoma de Madrid), Aythami Morales (Universidad Autonoma de Madrid), and Javier Ortega-Garcia (Universidad Autonoma de Madrid)

CRNN Based Jersey-Bib Number/Text Recognition in Sports and Marathon Images 1149
Sauradip Nag (Kalyani Government Engineering College, India), Raghavendra Ramachandra (Norwegian University of Science and Technology), Palaiahnakote Shivakumara (University of Malaya, Malaysia), Umapada Pal (Indian Statistical Institute, Kolkata), Tong Lu (Nanjing University), and Mohan Kankanhalli (National University of Singapore)

KeyWord Spotting using Siamese Triplet Deep Neural Networks 1157
Yasmine Serdouk (Université De Lyon CNRS INSA-Lyon, LIRIS, UMR5205), Véronique Eglin (Université De Lyon CNRS INSA-Lyon, LIRIS, UMR5205), Stéphane Bres (Université De Lyon CNRS INSA-Lyon, LIRIS, UMR5205), and Mylène Pardoen (Université de Lyon CNRS Maison des Sciences de l'Homme Lyon Saint-Etienne)

Learning Character Recognition with Graph-Based Privileged Information 1163
Florian Westphal (Blekinge Institute of Technology), Niklas Lavesson (Jönköping University), and Håkan Grahn (Blekinge Institute of Technology)

Simultaneous Optimisation of Image Quality Improvement and Text Content Extraction from Scanned Documents 1169
Shashank Mujumdar (IBM Research India), Nitin Gupta (IBM Research India), Abhinav Jain (IBM Research India), and Douglas Burdick (IBM Research Almaden)

Improving Text Recognition using Optical and Language Model Writer Adaptation 1175
Yann Soullard (LITIS lab, Normandie University, Universite de Rouen Normandie), Wassim Swaileh (LITIS lab, Normandie University, Universite de Rouen Normandie), Pierrick Tranouez (LITIS lab, Normandie University, Universite de Rouen Normandie), Thierry Paquet (LITIS lab, Normandie University, Universite de Rouen Normandie), and Clément Chatelain (LITIS lab, INSA Rouen Normandie)

Multi-modal Attention Network for Handwritten Mathematical Expression Recognition 1181
Jiaming Wang (University of Science and Technology of China), Jun Du (University of Science and Technology of China), Jianshu Zhang (University of Science and Technology of China), and Zi-Rui Wang (University of Science and Technology of China)

Semantic and Interaction: When Document Image Analysis Meets Computer Vision and Machine Learning .. 1187
Jean-Yves Ramel (LIFAT, Ecole Polytechnique de l'Université de Tours) and Nicole Vincent (LIPADE, Université Paris Descartes)

Improving Text Image Resolution using a Deep Generative Adversarial Network for Optical Character Recognition 1193
Xiangdong Su (Inner Mongolia University, Hohhot, China), Huali Xu (Inner Mongolia University, Hohhot, China), Ying Kang (The People's Liberation Army (PLA) of China No.31401), Xiang Hao (Inner Mongolia University, Hohhot, China), Guanglai Gao (Inner Mongolia University, Hohhot, China), and Yue Zhang (Inner Mongolia University, Hohhot, China)

Labeling, Cutting, Grouping: An Efficient Text Line Segmentation Method for Medieval Manuscripts 1200
Michele Alberti (University of Fribourg), Lars Vögtlin (University of Fribourg), Vinaychandran Pondenkandath (University of Fribourg), Mathias Seuret (Friedrich-Alexander-Universität Erlangen-Nürnberg), Rolf Ingold (University of Fribourg), and Marcus Liwicki (Luleå University of Technology, Sweden)

PopEval: A Character-Level Approach to End-to-End Evaluation Compatible with Word-Level Benchmark Dataset 1207
Hong-Seok Lee (NAVER Corporation), Youngmin Yoon (NAVER Corporation), Pil Hoon Jang (NAVER Corporation), and Chankyu Choi (NAVER Corporation)

Hiding Security Feature Into Text Content for Securing Documents Using Generated Font 1214
Vinh Loc Cu (L3i Laboratory, La Rochelle University, France), Jean-Christophe Burie (L3i Laboratory, La Rochelle University, France), Jean-Marc Ogier (L3i Laboratory, La Rochelle University, France), and Cheng-Lin Liu (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, Beijing)

A Modified Inception-ResNet Network with Discriminant Weighting Loss for Handwritten Chinese Character Recognition 1220
Linhui Chen (Tsinghua University), Liangrui Peng (Tsinghua University), Gang Yao (Tsinghua University), Changsong Liu (Tsinghua University), and Xudong Zhang (Tsinghua University)

A Novel Procedure to Speed up the Transcription of Historical Handwritten Documents by Interleaving Keyword Spotting and user Validation 1226
Adolfo Santoro (Natural Intelligent Technologies srl) and Angelo Marcelli (DIEM - University of Salerno)

Handwriting Recognition Based on Temporal Order Restored by the End-to-End System 1231
Abdelkarim Elbaati (University of Sfax, National Engineering School of Sfax, REGIM-Lab.: REsearch Groups in Intelligent Machines, Tunisia), Yahia Hamdi (University of Sfax, National Engineering School of Sfax, REGIM-Lab.: REsearch Groups in Intelligent Machines, Tunisia), and Adel M. Alimi (University of Sfax, National Engineering School of Sfax, REGIM-Lab.: REsearch Groups in Intelligent Machines, Tunisia)

Deep CNN-Based Speech Balloon Detection and Segmentation for Comic Books 1237
David Dubray (University of Potsdam) and Jochen Laubrock (University of Potsdam)

A New Document Image Quality Assessment Method Based on Hast Derivations 1244
Alireza Alaei (School of Business and Tourism (IT Programs), Southern Cross University, Australia)

Analysis of Unsupervised Training Approaches for LSTM-Based OCR 1250
Martin Jenckel (German Research Center for Artificial Intelligence (DFKI)), Syed Saqib Bukhari (German Research Center for Artificial Intelligence (DFKI)), and Andreas Dengel (German Research Center for Artificial Intelligence (DFKI))

Unsupervised OCR Model Evaluation Using GAN 1256
Abhash Sinha (TU Kaiserslautern), Martin Jenckel (TU Kaiserslautern, German Research Center for Artificial Intelligence (DFKI), Germany), Syed Saqib Bukhari (German Research Center for Artificial Intelligence (DFKI), Germany), and Andreas Dengel (TU Kaiserslautern, German Research Center for Artificial Intelligence (DFKI), Germany)

Chemical Structure Recognition (CSR) System: Automatic Analysis of 2D Chemical Structures in Document Images 1262
Syed Saqib Bukhari (German Research Center for Artificial Intelligence (DFKI)), Zaryab Iftikhar (University of Kaiserslautern), and Andreas Dengel (German Research Center for Artificial Intelligence (DFKI))

Amharic Text Image Recognition: Database, Algorithm, and Analysis 1268
Birhanu Hailu Belay (University of Kaiserslautern and Bahir Dar Institute of Technology, Ethiopia), Tewodros Habtegebirial (University of Kaiserslautern), Marcus Liwicki (Lulea University of Technology), Gebyehu Belay (Bahir Dar Institute of Technology, Ethiopia), and Didier Stricker (DFKI-German Research Center for Artificial Intelligence, Germany)

A Genetic-Based Search for Adaptive Table Recognition in Spreadsheets 1274
Elvis Koci (Technical University of Dresden, Germany), Maik Thiele (Technical University of Dresden, Germany), Oscar Romero (Universitat Politecnica de Catalunya-BarcelonaTech), and Wolfgang Lehner (Technical University of Dresden, Germany)

DECO: A Dataset of Annotated Spreadsheets for Layout and Table Recognition 1280
Elvis Koci (Technische Universität Dresden), Elvis Koci (Universitat Politècnica de Catalunya-BarcelonaTech), Maik Thiele (Technische Universität Dresden), Josephine Rehak (Technische Universität Dresden), Oscar Romero (Universitat Politècnica de Catalunya-BarcelonaTech), and Wolfgang Lehner (Technische Universität Dresden)

Evaluating Sequence-to-Sequence Models for Handwritten Text Recognition 1286
Johannes Michael (University of Rostock), Roger Labahn (University of Rostock), Tobias Grüning (PLANET artificial intelligence GmbH), and Jochen Zöllner (PLANET artificial intelligence GmbH)

Training-Free and Segmentation-Free Word Spotting using Feature Matching and Query Expansion 1294
Ekta Vats (Uppsala University, Sweden), Anders Hast (Uppsala University, Sweden), and Alicia Fornés (Universitat Autònoma de Barcelona)

Textual Description for Mathematical Equations 1300
Ajoy Mondal (International Institute of Information Technology, Hyderabad, India) and C V Jawahar (International Institute of Information Technology, Hyderabad, India)

Recurrent Neural Network Approach for Table Field Extraction in Business Documents 1308
Clément Sage (Univ Lyon, CNRS, LIRIS), Alexandre Aussem (Univ Lyon, CNRS, LIRIS), Haytham Elghazel (Univ Lyon, CNRS, LIRIS), Véronique Eglin (Univ Lyon, CNRS, LIRIS), and Jérémy Espinas (Esker)

Faster R-CNN Based Table Detection Combining Corner Locating 1314
Ningning Sun (Tianjin Normal University), Yuanping Zhu (Tianjin Normal University), and Xiaoming Hu (Tianjin Normal University)

Weighted Direct Matching Points for User Stability Model in Multiple Domains: A Proposal for On-Line Signature Verification 1320
Donato Impedovo (Università degli Studi di Bari Aldo Moro), Giuseppe Pirlo (Università degli Studi di Bari Aldo Moro), Moises Diaz (Universidad del Atlántico Medio), and Miguel Angel Ferrer (Universidad de Las Palmas de Gran Canaria)

DeepSignCX: Signature Complexity Detection using Recurrent Neural Networks 1326
Ruben Vera-Rodriguez (Universidad Autonoma de Madrid), Ruben Tolosana (Universidad Autonoma de Madrid), Miguel Caruana (Universidad Autonoma de Madrid), Gustavo Manzano (Universidad Autonoma de Madrid), Carlos Gonzalez-Garcia (Universidad Autonoma de Madrid), Julian Fierrez (Universidad Autonoma de Madrid), and Javier Ortega-Garcia (Universidad Autonoma de Madrid)

Recurrent Comparator with Attention Models to Detect Counterfeit Documents 1332
Albert Berenguel Centeno (Universitat Autònoma of Barcelona), Oriol Ramos Terrades (Universitat Autònoma of Barcelona), Josep Lladós Canet (Universitat Autònoma of Barcelona), and Cristina Cañero Morales (Mitek Systems, Inc., Barcelona, Spain)

Linking Art through Human Poses 1338
Tomas Jenicek (Visual Recognition Group, FEE, Czech Technical University in Prague) and Ondej Chum (Visual Recognition Group, FEE, Czech Technical University in Prague)

Thai Handwritten Recognition on Text Block-Based from Thai Archive Manuscripts 1346
Rapeeporn Chamchong (Mahasarakham University, Thailand), Wei Gao (University of South Australia), and Mark D. McDonnell (University of South Australia)

Brno Mobile OCR Dataset 1352
Martin Kišš (Brno University of Technology), Michal Hradiš (Brno University of Technology), and Oldich Kodym (Brno University of Technology)

A New Parallel Detection-Recognition Approach for End-to-End Scene Text Extraction 1358
Jinrong Li (South China University of Technology), Zijian Zhou (Horizon Robotics), Zhizhong Su (Horizon Robotics), Shuangping Huang (South China University of Technology), and Lianwen Jin (South China University of Technology)

Table Structure Extraction with Bi-Directional Gated Recurrent Unit Networks 1366
Saqib Ali Khan (National University of Sciences and Technology (NUST), Islamabad), Syed Muhammad Daniyal Khalid (National University of Sciences and Technology (NUST), Islamabad), Muhammad Ali Shahzad (National University of Sciences and Technology (NUST), Islamabad), and Faisal Shafait (National University of Sciences and Technology (NUST), Islamabad)

A Deep Transfer Learning Approach to Document Image Quality Assessment 1372
Tan Lu (Vrije Universiteit Brussel) and Ann Dooms (Vrije Universiteit Brussel)

HITHCD-2018: Handwritten Chinese Character Database of 21K-Category 1378
Tonghua Su (Harbin Institute of Technology), Wei Pan (Harbin Huade University), and lijuan Yu (Hainan Cancer Hospital)

Learning Free Document Image Binarization Based on Fast Fuzzy C-Means Clustering 1384
Tanmoy Mondal (L3i, La-Rochelle University, France), Mickaël Coustaty (L3i, La-Rochelle University, France), Petra Gomez-Krämer (L3i, La-Rochelle University, France), and Jean-Marc Ogier (L3i, La-Rochelle University, France)

A Robust Hybrid Approach for Textual Document Classification 1390
Muhammad Nabeel Asim (German Research Center for Artificial Intelligence (DFKI); University of Engineering and Technology, Lahore, Pakistan), Muhammad Usman Ghani Khan (University of Engineering and Technology, Lahore, Pakistan), Muhammad Imran Malik (National University of Sciences and Technology, Islamabad), Andreas Dengel (German Research Center for Artificial Intelligence (DFKI)), and Sheraz Ahmed (German Research Center for Artificial Intelligence (DFKI))

Rethinking Semantic Segmentation for Table Structure Recognition in Documents 1397
Shoaib Ahmed Siddiqui (German Research Center for Artificial Intelligence (DFKI)), Pervaiz Iqbal Khan (German Research Center for Artificial Intelligence (DFKI)), Andreas Dengel (German Research Center for Artificial Intelligence (DFKI)), and Sheraz Ahmed (German Research Center for Artificial Intelligence (DFKI))

DeepTabStR: Deep Learning based Table Structure Recognition 1403
Shoaib Ahmed Siddiqui (TU Kaiserslautern; German Research Center for Artificial Intelligence (DFKI)), Imran Ali Fateh (TU Kaiserslautern; German Research Center for Artificial Intelligence (DFKI)), Syed Tahseen Raza Rizvi (TU Kaiserslautern; German Research Center for Artificial Intelligence (DFKI)), Andreas Dengel (TU Kaiserslautern; German Research Center for Artificial Intelligence (DFKI)), and Sheraz Ahmed (German Research Center for Artificial Intelligence (DFKI))

Two Stream Deep Network for Document Image Classification 1410
Muhammad Nabeel Asim (German Research Center for Artificial Intelligence (DFKI); University of Engineering and Technology, Lahore, Pakistan), Muhammad Usman Ghani Khan (University of Engineering and Technology, Lahore, Pakistan), Muhammad Imran Malik (National University of Sciences and Technology, Islamabad), Khizar Razzaque (University of Engineering and Technology, Lahore, Pakistan), Andreas Dengel (German Research Center for Artificial Intelligence (DFKI)), and Sheraz Ahmed (German Research Center for Artificial Intelligence (DFKI))

Speeding-up the Handwritten Signature Segmentation Process through an Optimized Fully Convolutional Neural Network 1417
Paloma G. S. Silva (University of Pernambuco), Celso A. M. L. Junior (University of Pernambuco, Callere Document Solutions), Estanislau B. Lima (University of Pernambuco), Byron L. D. Bezerra (University of Pernambuco), and Cleber Zanchettin (Universidade Federal de Pernambuco)

End-to-End Measure for Text Recognition 1424
Gundram Leifert (University of Rostock, Germany), Roger Labahn (University of Rostock, Germany), Tobias Grüning (PLANET artificial intelligence GmbH, Germany), and Svenja Leifert (PLANET artificial intelligence GmbH, Germany)

Document Domain Adaptation with Generative Adversarial Networks 1432
Diede Rusticus (Informatics Institute, University of Amsterdam; omni:us GmbH, Berlin, Germany), Lutz Goldmann (omni:us GmbH, Berlin, Germany), Matthias Reisser (Informatics Institute, University of Amsterdam), and Mauricio Villegas (omni:us GmbH, Berlin, Germany)

A Neural Approach for Text Extraction from Scholarly Figures 1438
David Morris (TIB – Leibniz Information Centre for Science and Technology), Peichen Tang (L3S Research Center, Leibniz Universität Hannover), and Ralph Ewerth (TIB – Leibniz Information Centre for Science and Technology and L3S Research Center, Universität Hannover)

A Quality and Time Assessment of Binarization Algorithms 1444
Rafael Dueire Lins (Universidade Federal Rural de Pernambuco), Rodrigo Bernardino (UFPE), and Darlisson Marinho Jesus (UFPE)

A Study of Script Language Effects in Deep Neural-Network-Based Scene Text Detection 1451
Jiaxin Cheng (University of Southern California, Information Sciences Institute), Achin Gupta (University of Southern California, Information Sciences Institute), Yue Wu (University of Southern California, Information Sciences Institute), and Premkumar Natarajan (University of Southern California, Information Sciences Institute)

Fast Text/non-Text Image Classification with Knowledge Distillation 1458
Miao Zhao (Beijing Jiaotong University), Rui-Qi Wang (Institute of Automation of Chinese Academy of Sciences), Fei Yin (Institute of Automation of Chinese Academy of Sciences), Xu-Yao Zhang (Institute of Automation of Chinese Academy of Sciences), Lin-Lin Huang (Beijing Jiaotong University), and Jean-Marc Ogier (University of La Rochelle)

A Handwritten Chinese Text Recognizer Applying Multi-level Multimodal Fusion Network 1464
Yuhuan Xiu (East China Normal University, Shanghai), Qingqing Wang (University of Technology Sydney), Hongjian Zhan (East China Normal University, Shanghai), Man Lan (East China Normal University, Shanghai and Shanghai Key Laboratory of Multidimensional Information Processing), and Yue Lu (East China Normal University, Shanghai and Shanghai Key Laboratory of Multidimensional Information Processing)

OSVNet: Convolutional Siamese Network for Writer Independent Online Signature Verification 1470
Chandra Sekhar Vorugunti (Indian Institute of Information Technology SriCity), Guru Devanur S (University of Mysore), Prerana Mukherjee (Indian Institute of Information Technology SriCity), and Viswanath Pulabaigari (Indian Institute of Information Technology SriCity)

Blind Source Separation Based Framework for Multispectral Document Images Binarization 1476
Abderrahmane Rahiche (University of Quebec, Montreal), Athmane Bakhta (University of Quebec, Montreal), and Mohamed Cheriet (University of Quebec, Montreal)

Logo Design Analysis by Ranking 1482
Takuro Karamatsu (Kyushu University), Daiki Suehiro (Kyushu University), and Seiichi Uchida (Kyushu University)

Competition Papers

ICDAR2019 Competition on Historical Book Analysis - HBA2019 1488
Maroua Mehri (Université de Sousse, Ecole Nationale d'Ingénieurs de Sousse, LATIS-Laboratory of Advanced Technology and Intelligent Systems), Pierre Héroux (Normandie Univ, UNIROUEN, UNIHAVRE, INSA Rouen, LITIS), Rémy Mullot (University of La Rochelle, L3i Laboratory), Jean-Philippe Moreux (Bibliothèque nationale de France, Digitization service), Bertrand Coüasnon (Univ Rennes, CNRS, IRISA), and Bill Barrett (Brigham Young University)

cBAD: ICDAR2019 Competition on Baseline Detection 1494
Markus Diem (TU Wien), Florian Kleber (TU Wien), Robert Sablatnig (TU Wien), and Basilis Gatos (Computational Intelligence Laboratory National Center for Scientific Research Demokritos)

ICDAR 2019 Historical Document Reading Challenge on Large Structured Chinese Family Records 1499
Rajkumar Saini (LTU, Sweden), Derek Dobson (FamilySearch, USA), Jon Morrey (FamilySearch, USA), Marcus Liwicki (LTU, Sweden), and Foteini Simistira Liwicki (LTU, Sweden)

ICDAR 2019 Competition on Image Retrieval for Historical Handwritten Documents 1505
Vincent Christlein (Friedrich-Alexander-Universität Erlangen-Nürnberg), Anguelos Nicolaou (Friedrich-Alexander-Universität Erlangen-Nürnberg), Mathias Seuret (Friedrich-Alexander-Universität Erlangen-Nürnberg), Dominique Stutzmann (Institut de Recherche et d'Histoire des Textes), and Andreas Maier (Friedrich-Alexander-Universität Erlangen-Nürnberg)

ICDAR 2019 Competition on Table Detection and Recognition (cTDaR) 1510
Liangcai Gao (Peking University), Yilun Huang (Peking University), Hervé Déjean (Naver Labs Europe), Jean-Luc Meunier (Naver labs Europe), Qinqin Yan (Digital Publishing Technology Founder Group Co. LTD., China), Yu Fang (Digital Publishing Technology Founder Group Co. LTD., China), Florian Kleber (Computer Vision Lab TU Wien), and Eva Lang (Archiv des Bistums Passau, Germany)

ICDAR2019 Competition on Scanned Receipt OCR and Information Extraction 1516
Zheng Huang (Shanghai Jiaotong University), Kai Chen (Onlyou), Jianhua He (Aston University), Xiang Bai (Huazhong University of Science and Technology), Dimosthenis Karatzas (Universitat Autónoma de Barcelona), Shijian Lu (Nanyang Technological University), and C. V. Jawahar (IIIT Hyderabad)

ICDAR2019 Competition on Recognition of Documents with Complex Layouts - RDCL2019 1521
Christian Clausner (University of Salford), Apostolos Antonacopoulos (University of Salford), and Stefan Pletschacher (University of Salford)

ICDAR2019 Competition on Recognition of Early Indian Printed Documents – REID2019 1527
Christian Clausner (University of Salford), Apostolos Antonacopoulos (University of Salford), Tom Derrick (British Library), and Stefan Pletschacher (University of Salford)

ICDAR 2019 CROHME + TFD: Competition on Recognition of Handwritten Mathematical Expressions and Typeset Formula Detection 1533
Mahshad Mahdavi (Rochester Institute of Technology), Richard Zanibbi (Rochester Institute of Technology), Harold Mouch`ere (University of Nantes), Christian Viard-Gaudin (University of Nantes), and Utpal Garain (Computer Vision and Pattern Recognition Unit Centre for Artif. Intel. and Mach. Leaning Indian Statistical Institute)

ICDAR 2019 Time-Quality Binarization Competition 1539
Rafael Dueire Lins (Universidade Federal Rural de Pernambuco), Ergina Kavallieratou (University of the Eagian Mytilene), Elisa Barney Smith (Boise State University), Rodrigo Barros Bernardino (UFPE), and Darlisson Marinho de Jesus (UFPE)

ICDAR 2019 Competition on Document Image Binarization (DIBCO 2019) 1547
Ioannis Pratikakis (Democritus University of Thrace), Konstantinos Zagoris (Democritus University of Thrace), Xenofon Karagiannis (Democritus University of Thrace), Lazaros Tsochatzidis (Democritus University of Thrace), Tanmoy Mondal (INRIA), and Isabelle Marthot-Santaniello (Universität Basel)

ICDAR 2019 Competition on Large-Scale Street View Text with Partial Labeling - RRC-LSVT 1557
Yipeng Sun (Baidu Inc, Beijing, China), Zihan Ni (Baidu Inc, Beijing, China), Chee-Kheng Chng (University of Malaya, Malaysia), Yuliang Liu (South China University of Technology, Guangdong, China), Canjie Luo (South China University of Technology, Guangdong, China), Chun Chet Ng (University of Malaya, Malaysia), Junyu Han (Baidu Inc, Beijing, China), Errui Ding (Baidu Inc, Beijing, China), Jingtuo Liu (Baidu Inc, Beijing, China), Dimosthenis Karatzas (Computer Vision Center, Universitat Autonoma de Barcelona, Spain), Chee Seng Chan (University of Malaya, Malaysia), and Lianwen Jin (South China University of Technology, Guangdong, China)

ICDAR 2019 Competition on Scene Text Visual Question Answering 1563
Ali Furkan Biten (Computer Vision Center Barcelona, Spain), Rubèn Tito (Computer Vision Center Barcelona, Spain), Andrés Mafla (Computer Vision Center Barcelona, Spain), Lluis Gomez (Computer Vision Center Barcelona, Spain), Marçal Rusiñol (Computer Vision Center Barcelona, Spain), Minesh Mathew (CVIT, IIIT Hyderabad), C.V. Jawahar (CVIT, IIIT Hyderabad), Ernest Valveny (Computer Vision Center Barcelona, Spain), and Dimosthenis Karatzas (Computer Vision Center Barcelona, Spain)

ICDAR2019 Robust Reading Challenge on Arbitrary-Shaped Text - RRC-ArT 1571
Chee Kheng Chng (University of Malaya), Yuliang Liu (South China University of Technology), Yipeng Sun (South China University of Technology), Chun Chet Ng (University of Malaya, Malaysia), Canjie Luo (South China University of Technology), Zihan Ni (Baidu Inc, Beijing, China), ChuanMing Fang (South China University of Technology), Shuaitao Zhang (South China University of Technology), Junyu Han (Baidu Inc, Beijing, China), Errui Ding (Baidu Inc, Beijing, China), Jingtuo Liu (Baidu Inc, Beijing, China), Dimosthenis Karatzas (Computer Vision Center, Universitat Autònoma de Barcelona, Spain), Chee Seng Chan (University of Malaya, Malaysia), and Lianwen Jin (South China University of Technology)

ICDAR 2019 Robust Reading Challenge on Reading Chinese Text on Signboard 1577
Rui Zhang (Meituan-Dianping Group, China), Yongsheng Zhou (Meituan-Dianping Group, China), Qianyi Jiang (Meituan-Dianping Group, China), Qi Song (Meituan-Dianping Group, China), Nan Li (Meituan-Dianping Group, China), Kai Zhou (Meituan-Dianping Group, China), Lei Wang (Meituan-Dianping Group, China), Dong Wang (Meituan-Dianping Group, China), Minghui Liao (Huazhong University of Science and Technology, China), Mingkun Yang (Huazhong University of Science and Technology, China), Xiang Bai (Huazhong University of Science and Technology, China), Baoguang Shi (Microsoft Redmond, USA), Dimosthenis Karatzas (Computer Vision Centre, UAB, Spain), Shijian Lu (Nanyang Technological University), and C. V. Jawahar (IIIT Hyderabad, India)

ICDAR2019 Robust Reading Challenge on Multi-lingual Scene Text Detection and Recognition — RRC-MLT-2019 1582
Nibal Nayef (no affiliation), Yash Patel (The Robotics Institute, Carnegie Mellon Universiry, Pittsburgh, USA and Center for Machine Perception, Department of Cybernetics, Czech Technical University, Prague, Czech Republic), Michal Busta (Center for Machine Perception, Department of Cybernetics, Czech Technical University, Prague, Czech Republic), Pinaki Nath Chowdhury (CVPR unit, Indian Statistical Institute, India), Dimosthenis Karatzas (Computer Vision Center, Universitat Autònoma de Barcelona, Spain), Wafa Khlif (L3i Laboratory, University of La Rochelle, France), Jiri Matas (Center for Machine Perception, Department of Cybernetics, Czech Technical University, Prague, Czech Republic), Umapada Pal (CVPR unit, Indian Statistical Institute, India), Jean-Christophe Burie (L3i Laboratory, University of La Rochelle, France), Cheng-lin Liu (National Laboratory of Pattern Recognition, Institute of Automation of Chinese Academy of Sciences, China), and Jean-Marc Ogier (L3i Laboratory, University of La Rochelle, France)

ICDAR 2019 Competition on Post-OCR Text Correction 1588
Christophe Rigaud (La Rochelle University), Antoine Doucet (La Rochelle University), Mickaël Coustaty (La Rochelle University), and Jean-Philippe Moreux (National Library of France)

ICDAR 2019 Competition on Harvesting Raw Tables from Infographics (CHART-Infographics) 1594
Kenny Davila (University at Buffalo, SUNY), Bhargava Urala Kota (University at Buffalo, SUNY), Srirangaraj Setlur (University at Buffalo, SUNY, Buffalo), Venu Govindaraju (University at Buffalo, SUNY), Christopher Tensmeyer (Adobe Research), Sumit Shekhar (Adobe Research), and Ritwick Chaudhry (Adobe Research)
