2019 IEEE 30th International Symposium on Software Reliability Engineering (ISSRE)

ISSRE 2019

Table of Contents

Message from the General Chairs xi
Message from the Program Co-Chairs xiii
ISSRE 2019 Organizing Committee xv
ISSRE 2019 Program Committee xvii
ISSRE 2019 External Reviewers xix
Keynotes xx

Research Session 1: Best Paper Nominees

Charting a Course Through Uncertain Environments: SEA Uses Past Problems to Avoid Future Failures 1
Preston Moore (New York University), Justin Cappos (New York University), Phyllis Frankl (New York University), and Thomas Wies (New York University)

Assessing the Safety and Reliability of Autonomous Vehicles from Road Testing 13
Xingyu Zhao (Heriot-Watt University), Valentin Robu (Heriot-Watt University), David Flynn (Heriot-Watt University), Kizito Salako (University of London), and Lorenzo Strigini (University of London)

A Safety Analysis Method for Perceptual Components in Automated Driving 24
Rick Salay (University of Waterloo), Matt Angus (University of Waterloo), and Krzysztof Czarnecki (University of Waterloo)

Research Session 2: Failure/Fault Root Cause Analysis 1

FluxRank: A Widely-Deployable Framework to Automatically Localizing Root Cause Machines for Software Service Failure Mitigation 35
Ping Liu (Tsinghua University), Yu Chen (Baidu, Inc), Xiaohui Nie (Tsinghua University), Jing Zhu (Tsinghua University), Shenglin Zhang (Nankai University), Kaixin Sui (Bizseer, Inc), Ming Zhang (China Construction Bank), and Dan Pei (Tsinghua University)

Generic and Robust Localization of Multi-dimensional Root Causes 47
Zeyan Li (Tsinghua University), Chengyang Luo (Tsinghua University), Yiwei Zhao (Tsinghua University), Yongqian Sun (Nankai University), Kaixin Sui (BizSeer), Xiping Wang (Tsinghua University), Dapeng Liu (BizSeer), Xing Jin (China Construction Bank), Qi Wang (China Construction Bank), and Dan Pei (Tsinghua University)

How to Explain a Patch: An Empirical Study of Patch Explanations in Open Source Projects .58
Jingjing Liang (Peking University), Yaozong Hou (Beijing Kuaishou Technology Co.), Shurui Zhou (Carnegie Mellon University), Junjie Chen (Tianjin University), Yingfei Xiong (Peking University), and Gang Huang (Peking University)

Research Session 2: Failure/Fault Root Cause Analysis 2

Inferring Performance Bug Patterns from Developer Commits .70
Yiqun Chen (TU Darmstadt), Stefan Winter (TU Darmstadt), and Neeraj Suri (TU Darmstadt)

Engineering a Better Fuzzer with Synergically Integrated Optimizations .82
Jie Liang (Tsinghua University), Yuanliang Chen (Tsinghua University), Mingzhe Wang (Tsinghua University), Yu Jiang (Tsinghua University), Zijiang Yang (Western Michigan University), Chengnian Sun (University of Waterloo), Xun Jiao (Villanova University), and Jiaguang Sun (Tsinghua University)

Spotting Problematic Code Lines using Nonintrusive Programmers' Biofeedback .93
Ricardo Couceiro (CISUC, University of Coimbra), Raul Barbosa (CISUC, University of Coimbra), João Durães (CISUC, Polytechnic Institute of Coimbra), Gonçalo Duarte (CISUC, University of Coimbra), João Castelhano (ICNAS, University of Coimbra), Catarina Duarte (ICNAS, University of Coimbra), Cesar Teixeira (CISUC, University of Coimbra), Nuno Laranjeiro (CISUC, University of Coimbra), Júlio Medeiros (CISUC, University of Coimbra), Paulo Carvalho (CISUC, University of Coimbra), Miguel Castelo Branco (ICNAS/CIBIT, University of Coimbra), and Henrique Madeira (CISUC, University of Coimbra)

An Empirical Study of Common Challenges in Developing Deep Learning Applications .104
Tianyi Zhang (University of California, Los Angeles), Cuiyun Gao (The Chinese University of Hong Kong), Lei Ma (Kyushu University), Michael Lyu (The Chinese University of Hong Kong), and Miryung Kim (University of California, Los Angeles)

Research Session 4: Fault Injection

TripleAgent: Monitoring, Perturbation and Failure-Obliviousness for Automated Resilience Improvement in Java Applications .116
Long Zhang (KTH Royal Institute of Technology, Sweden) and Martin Monperrus (KTH Royal Institute of Technology, Sweden)

Fuzzing Error Handling Code in Device Drivers Based on Software Fault Injection .128
Zu-Ming Jiang (Tsinghua University), Jia-Ju Bai (Tsinghua University), Julia Lawall (Sorbonne University/Inria/LIP6), and Shi-Min Hu (Tsinghua University)

Enhancing Failure Propagation Analysis in Cloud Computing Systems .139
Domenico Cotroneo (Università degli Studi di Napoli Federico II), Luigi De Simone (Università degli Studi di Napoli Federico II), Pietro Liguori (Università degli Studi di Napoli Federico II), Roberto Natella (Università degli Studi di Napoli Federico II), and Nematollah Bidokhti (Futurewei Technologies, Inc.)

A Tale of Two Injectors: End-to-End Comparison of IR-Level and Assembly-Level Fault Injection .151
Lucas Palazzi (The University of British Columbia), Guanpeng Li (The University of British Columbia), Bo Fang (The University of British Columbia), and Karthik Pattabiraman (The University of British Columbia)

Research Session 5: Fault Prediction

Supervised Representation Learning Approach for Cross-Project Aging-Related Bug Prediction .163
Xiaohui Wan (Beihang University), Zheng Zheng (Beihang University), Fangyun Qin (Beihang University), Yu Qiao (Beihang University), and Kishor S. Trivedi (Duke University)

Propheticus: Machine Learning Framework for the Development of Predictive Models for Reliable and Secure Software .173
João R. Campos (University of Coimbra), Marco Vieira (University of Coimbra), and Ernesto Costa (University of Coimbra)

Identifying Crashing Fault Residence Based on Cross Project Model .183
Zhou Xu (Wuhan University, and The Hong Kong Polytechnic University), Tao Zhang (Harbin Engineering University), Yifeng Zhang (Wuhan University), Yutian Tang (The Hong Kong Polytechnic University), Jin Liu (Wuhan University and Chinese Academy of Sciences), Xiapu Luo (The Hong Kong Polytechnic University), Jacky Keung (City University of Hong Kong), and Xiaohui Cui (Wuhan University)

Learning Marked Markov Modulated Poisson Processes for Online Predictive Analysis of Attack Scenarios .195
Laura Carnevali (University of Florence), Francesco Santoni (University of Florence), and Enrico Vicario (University of Florence)

Research Session 6: Testing 1

Test Case Generation Based on Client-Server of Web Applications by Memetic Algorithm .206
Weiwei Wang (Beijing University of Chemical Technology), Xiaohong Guo (Beijing University of Chemical Technology), Zheng Li (Beijing University of Chemical Technology), and Ruilian Zhao (Beijing University of Chemical Technology)

Machine Learning and Constraint Solving for Automated Form Testing .217
Dionny Santiago (Florida International University), Justin Phillips (Ultimate Software Group, Inc., USA), Patrick Alt (Ultimate Software Group, Inc., USA), Brian Muras (Ultimate Software Group, Inc., USA), Tariq M. King (Ultimate Software Group, Inc., USA), and Peter J. Clarke (Florida International University)

Understanding and Improving Regression Test Selection in Continuous Integration .228
August Shi (University of Illinois at Urbana-Champaign), Peiyuan Zhao (University of Illinois at Urbana-Champaign), and Darko Marinov (University of Illinois at Urbana-Champaign)

Textout: Detecting Text-Layout Bugs in Mobile Apps via Visualization-Oriented Learning .239
Yaohui Wang (Fudan University; Shanghai Key Laboratory of Intelligent Information Processing), Hui Xu (The Chinese University of Hong Kong; Shenzhen Research Institute, The Chinese University of Hong Kong), Yangfan Zhou (Fudan University; Shanghai Key Laboratory of Intelligent Information Processing), Michael R. Lyu (The Chinese University of Hong Kong; Shenzhen Research Institute, The Chinese University of Hong Kong), and Xin Wang (Fudan University; Shanghai Key Laboratory of Intelligent Information Processing)

Research Session 7: Testing 2

Integrating Safety Certification Into Model-Based Testing of Safety-Critical Systems .250
Aiman Gannous (University of Denver) and Anneliese Andrews (University of Denver)

Mirage: Towards a Metasploit-Like Framework for IoT .261
Romain Cayre (CNRS, LAAS; Univ de Toulouse, INSA, LAAS; APSYS), Vincent Nicomette (CNRS, LAAS; Univ de Toulouse, INSA, LAAS), Guillaume Auriol (CNRS, LAAS; Univ de Toulouse, INSA, LAAS), Eric Alata (CNRS, LAAS; Univ de Toulouse, INSA, LAAS), Mohamed Kaaniche (CNRS, LAAS; Univ de Toulouse, INSA, LAAS), and Géraldine Marconato (APSYS)

Estimating Return on Investment for GUI Test Automation Frameworks .271
Felix Dobslaw (Chalmers University of Technology), Robert Feldt (Chalmers University of Technology), David Michaëlsson (Chalmers University of Technology), Patrik Haar (Canea Partner Group), Francisco Gomes de Oliveira Neto (University of Gothenburg), and Richard Torkar (University of Gothenburg)

Amplifying Integration Tests with CAMP .283
Franck Chauvel (SINTEF), Brice Morin (SINTEF), and Enrique Garcia-Ceja (SINTEF)

Research Session 8: Program Analysis

TCD: Statically Detecting Type Confusion Errors in C++ Programs .292
Changwei Zou (University of New South Wales), Yulei Sui (University of Technology Sydney), Hua Yan (University of New South Wales), and Jingling Xue (University of New South Wales)

OpenErrorPro: A New Tool for Stochastic Model-Based Reliability and Resilience Analysis .303
Andrey Morozov (Technische Universität Dresden), Kai Ding (Technische Universität Dresden), Mikael Steurer (Technische Universität Dresden), and Klaus Janschek (Technische Universität Dresden)

Symbolic Execution for Importance Analysis and Adversarial Generation in Neural Networks 313
Divya Gopinath (Carnegie Mellon University), Mengshi Zhang (University of Texas at Austin), Kaiyuan Wang (University of Texas at Austin), smet Burak Kadron (University of California, Santa Barbara), Corina Psreanu (Carnegie Mellon University and NASA Ames), and Sarfraz Khurshid (University of Texas at Austin)

How Do Developers Act on Static Analysis Alerts? An Empirical Study of Coverity Usage 323
Nasif Imtiaz (North Carolina State University), Brendan Murphy (Microsoft), and Laurie Williams (North Carolina State University)

Research Session 9: Context, Evolution, and Reliability

Analyzing the Context of Bug-Fixing Changes in the OpenStack Cloud Computing Platform 334
Domenico Cotroneo (Università degli Studi di Napoli Federico II), Luigi De Simone (Università degli Studi di Napoli Federico II), Antonio Ken Iannillo (SnT - University of Luxembourg), Roberto Natella (Università degli Studi di Napoli Federico II), Stefano Rosiello (Università degli Studi di Napoli Federico II), and Nematollah Bidokhti (Futurewei Technologies, Inc., USA)

On the Density and Diversity of Degradation Symptoms in Refactored Classes: A Multi-case Study 346
Willian Oizumi (PUC-Rio), Leonardo Sousa (PUC-Rio), Anderson Oliveira (PUC-Rio), Luiz Carvalho (PUC-Rio), Alessandro Garcia (PUC-Rio), Thelma Colanzi (UEM), and Roberto Oliveira (UEG)

FILO: FIx-LOcus Recommendation for Problems Caused by Android Framework Upgrade 358
Marco Mobilio (University of Milano-Bicocca), Oliviero Rignaelli (University of Milano-Bicocca), Daniela Micucci (University of Milano-Bicocca), and Leonardo Mariani (University of Milano-Bicocca)

HiRec: API Recommendation using Hierarchical Context 369
Rensong Xie (Southeast University), Xianglong Kong (Southeast University), Lulu Wang (Southeast University), Ying Zhou (Southeast University), and Bixin Li (Southeast University)

Research Session 10: Process Quality

Criteria to Systematically Evaluate (Safety) Assurance Cases 380
Thomas Chowdhury (McMaster University), Alan Wassyng (McMaster University), Richard F. Paige (McMaster University), and Mark Lawford (McMaster University)

The Impact of Data Preparation on the Fairness of Software Systems 391
Inês Valentim (University of Coimbra), Nuno Lourenço (University of Coimbra), and Nuno Antunes (University of Coimbra)

Back to Basics - Redefining Quality Measurement for Hybrid Software Development Organizations 402
Satya Pradhan (Cisco Systems, Inc., San Jose, CA, USA) and Venky Nanniyur (Cisco Systems, Inc., San Jose, CA, USA)

Benefits and Challenges of Model-Based Software Engineering: Lessons Learned Based on Qualitative and Quantitative Findings 413
Katerina Goseva-Popstojanova (West Virginia University), Thomas Kyanko (Berkshire Grey Pittsburgh, PA, USA), and Noble Nkwocha (NASA Independent Verification & Validation Facility Fairmont, USA)

Research Session 11: Security

TamperNN: Efficient Tampering Detection of Deployed Neural Nets 424
Erwan Le Merrer (Univ Rennes) and Trédan Gilles (LAAS/CNRS)

Trustworthiness Assessment of Web Applications: Approach and Experimental Study using Input Validation Coding Practices 435
Cristiano Inácio Lemes (University of Coimbra), Vincent Naessens (KU Leuven), and Marco Vieira (University of Coimbra)

Evaluation of Anomaly Detection Algorithms Made Easy with RELOAD 446
Tommaso Zoppi (University of Florence), Andrea Ceccarelli (University of Florence), and Andrea Bondavalli (University of Florence)

MPro: Combining Static and Symbolic Analysis for Scalable Testing of Smart Contract 456
William Zhang (University of Waterloo), Sebastian Banescu (Quantstamp Inc.), Leonardo Pasos (Quantstamp Inc.), Steven Stewart (Quantstamp Inc.), and Vijay Ganesh (University of Waterloo)

Author Index 463
