2019 18th IEEE International Conference on Machine Learning and Applications (ICMLA)

ICMLA 2019

Table of Contents

Preface ..... **xxxviii**
Program Committee and Reviewers ..... **xl**
Special Sessions: List of Program Committee / Paper Reviewers ..... **xlv**
Keynotes ..... **lii**
Tutorials ..... **lv**

Main Conference Full Papers

Session 1: Machine Learning on Image Processing

Regularization Learning for Image Recognition 1
Xinjie Lan (University of Delaware) and Kenneth Barner (University of Delaware)

GRAM: Gradient Rescaling Attention Model for Data Uncertainty Estimation in Single Image Super Resolution 8
Ki-Seok Chung (Hanyang University) and Changwoo Lee (Hanyang University)

Through-Wall Pose Imaging in Real-Time with a Many-to-Many Encoder/Decoder Paradigm 14
Kevin Meng (Independent Researcher, Texas) and Yu Meng (Independent Researcher, Texas)

Domain Mixture: An Overlooked Scenario in Domain Adaptation 22
Sebastian Schrom (TU Darmstadt) and Stephan Hasler (Honda Research Institute Europe GmbH)

Particle Detector Simulation using Generative Adversarial Networks with Domain Related Constraints 28
Gul Rukh Khattak (CERN), Sofia Vallecorsa (CERN), Federico Carminati (CERN), and Gul Muhammad Khan (UET Peshawar)

Session 2: Deep Learning Algorithms (I)

PI-LSTM: Physics-Infused Long Short-Term Memory Network 34
Shubhendu Kumar Singh (University at Buffalo), Ruoyu Yang (University at Buffalo), Amir Behjat (University at Buffalo), Rahul Rai (University at Buffalo), Souma Chowdhury (University at Buffalo), and Ion Matei (Palo Alto Research Center)

Enhancing Decision Tree Based Interpretation of Deep Neural Networks through L1-Orthogonal Regularization 42
Nina Schaaf (Fraunhofer IPA), Marco Huber (Fraunhofer IPA and University of Stuttgart), and Johannes Maucher (Stuttgart Media University)

Leveraging Semi-Supervised Learning for Fairness using Neural Networks 50
Vahid Noroozi (University of Illinois at Chicago), Sara Bahaadini (Northwestern University), Samira Sheikhi (Zillow Group), Nooshin Mojab (University of Illinois at Chicago), and Philip S. Yu (University of Illinois at Chicago)

Efficient Evolutionary Architecture Search for CNN Optimization on GTSRB 56
Fabio Marco Johner (Lucerne University of Applied Sciences and Arts (HSLU)) and Juergen Wassner (Lucerne University of Applied Sciences and Arts (HSLU))

Session 3: Temporal and Structural Modeling

Temporal Modeling of Deterioration Patterns and Clustering for Disease Prediction of ALS Patients 62
Dan Halbersberg (Ben-Gurion University of the Negev) and Boaz Lerner (Ben-Gurion University of the Negev)

A Deep Structural Model for Analyzing Correlated Multivariate Time Series 69
Changwei Hu (Yahoo Research), Yifan Hu (Yahoo Research), and Sungyong Seo (University of Southern California)

Recurrent Dilated DenseNets for a Time-Series Segmentation Task 75
Alexander Fuchs (Graz University of Technology), Robin Priewald (Bright Red Systems GmbH), and Franz Pernkopf (Graz University of Technology)

State Summarization of Video Streams for Spatiotemporal Query Matching in Complex Event Processing 81
Piyush Yadav (Lero- Irish Software Research Centre, National University of Ireland Galway), Dibya Prakash Das (Indian Institute of Technology, Kharagpur, IIT Kharagpur, India), and Edward Curry (Lero-Irish Software Research Centre, National University of Ireland Galway, Ireland)

RF Transmitter Fingerprinting Exploiting Spatio-Temporal Properties in Raw Signal Data 89
Debashri Roy (University of Central Florida), Tathagata Mukherjee (University of Alabama, Huntsville), Mainak Chatterjee (University of Central Florida), and Eduardo Pasiliao (Air Force Research Laboratory)

Session 4: Recognition and Detection

Brown Planthopper Damage Detection using Remote Sensing and Machine Learning 97
Dimuthu Lakmal (University of Moratuwa), Kumaran Kugathasan (University of Moratuwa), Vishaka Nanayakkara (University of Moratuwa), Suranga Jayasena (University of Moratuwa), Amal Shehan Perera (University of Moratuwa), and Lasantha Fernando (University of Moratuwa)

Generative Feature Models and Robustness Analysis for Multimedia Content Classification 105
Sunil Bharitkar (HP)

Bimodal Emotion Recognition Based on Audio and Facial Parts Using Deep Convolutional Neural Networks.. 111
Jadisha Cornejo (Institute of Computing, University of Campinas) and Helio Pedrini (Institute of Computing, University of Campinas)

Session 5: Machine Learning on Finance and Marketing

Predicting Futures Market Movement using Deep Neural Networks 118
Tong Sun (University of Massachusetts Lowell), Jia Wang (University of Massachusetts Lowell), Jing Ni (University of Massachusetts Lowell), Yu Cao (University of Massachusetts Lowell), and Benyuan Liu (University of Massachusetts Lowell)

DeepTrax: Embedding Graphs of Financial Transactions 126
Anish Khazane (Capital One), Jonathan Rider (Capital One), Max Serpe (Capital One), Antonia Gogoglou (Capital One), Keegan Hines (Capital One), C. Bayan Bruss (Capital One), and Richard Serpe (Capital One)

An Industry Case of Large-Scale Demand Forecasting of Hierarchical Components 134
Rodrigo Rivera-Castro (Skolkovo Institute of Science and Technology), Ivan Nazarov (Skolkovo Institute of Science and Technology), Yuke Xiang (Huawei Noah's Ark Lab), Ivan Maksimov (Skolkovo Institute of Science and Technology), Aleksandr Pletnev (Skolkovo Institute of Science and Technology), and Evgeny Burnaev (Skolkovo Institute of Science and Technology)

Risk-Based Dynamic Pricing via Failure Prediction 140
Chi Zhang (Hitachi America Ltd.), Chetan Gupta (Hitachi America Ltd.), Seiji Joichi (Hitachi High-Technologies Corporation), Ahmed Farahat (Hitachi America Ltd.), and Huijuan Shao (Hitachi America Ltd.)

Session 6: Text Analytics

Learning to Propose Amendments: Identifying Patterns in the Right to Information Query Log 148
Nayantara Kotoky (Indian Institute of Technology Guwahati) and Vijaya Saradhi (Indian Institute of Technology Guwahati)

Unsupervised Topic Model Based Text Network Construction for Learning Word Embeddings 155
Sun Sunnie Chung (Cleveland State University) and Michael D'Arcy (Cleveland State University)

Entity Set Expansion for Detecting Fashion Trends 162
Sagnik Sarkar (Myntra Designs Pvt Limited), Maulik Parmar (Myntra Designs Pvt Limited), and Sumeet Sandhu (Elementary IP LLC)

Collaborative Attentive Autoencoder for Scientific Article Recommendation 168
Meshal Alfarhood (University of Missouri-Columbia) and Jianlin Cheng (University of Missouri-Columbia)

Session 7: Recognition and Detection in Computer Vision

Radar-Based Human Target Detection using Deep Residual U-Net for Smart Home Applications 175
Michael Stephan (Infineon Technologies AG) and Avik Santra (Infineon Technologies AG)

Spatio-Temporal FAST 3D Convolutions for Human Action Recognition 183
Alexandros Stergiou (Utrecht University) and Ronald Poppe (Utrecht University)

Fall Detection in Video Sequences Based on a Three-Stream Convolutional Neural Network 191
Guilherme Leite (Institute of Computing, University of Campinas), Gabriel Silva (Institute of Computing, University of Campinas), and Helio Pedrini (Institute of Computing, University of Campinas)

Moving Cast Shadow Detection in Video Based on New Chromatic Criteria and Statistical Modeling 196
Hang Shi (New Jersey Institute of Technology) and Chengjun Liu (New Jersey Institute of Technology)

Towards Real-Time Detection and Mitigation of Driver Frustration using SVM 202
Sebastian Zepf (Mercedes-Benz AG), Tobias Stracke (Mercedes-Benz AG), Alexander Schmitt (Mercedes-Benz AG), Florian van de Camp (Fraunhofer IOSB), and Juergen Beyerer (Fraunhofer IOSB)

Session 8: Multi-agent and Robotics

Pattern-RL: Multi-robot Cooperative Pattern Formation via Deep Reinforcement Learning 210
Jia Wang (The Hong Kong Polytechnic University), Jiannong Cao (The Hong Kong Polytechnic University), Milos Stojmenovic (The Hong Kong Polytechnic University), Miao Zhao (The Hong Kong Polytechnic University), Jinlin Chen (The Hong Kong Polytechnic University), and Shan Jiang (The Hong Kong Polytechnic University)

Interpretable Approximation of a Deep Reinforcement Learning Agent as a Set of If-Then Rules 216
Subramanya Nageshrao (Ford Motor Co), Bruno Costa (Ford Motor Co), and Dimitar Filev (Ford Motor Co)

A Hierarchical Model for StarCraft II Mini-Game 222
Tianlin Liu (Peking University), Xihong Wu (Peking University), and Dingsheng Luo (Peking University)

Evaluating the Performance of the Deep Active Imitation Learning Algorithm in the Dynamic Environment of FIFA Player Agents 228
Matheus Prado Prandini Faria (Federal University of Uberlândia), Rita Maria Silva Julia (Federal University of Uberlândia), and Lídia Bononi Paiva Tomaz (Federal Institute of Triângulo Mineiro)

Shapley Value Approximation with Divisive Clustering 234
Kevin Corder (University of Delaware) and Keith Decker (University of Delaware)

Session 9: Supervised Learning Applications

Supervised Machine Learning Approach for Effective Supplier Classification 240
Ramkumar Harikrishnakumar (Wichita State University), Alok Dand (Wichita State University), Saideep Nannapaneni (Wichita State University), and Krishna Krishnan (Wichita State University)

Classifying, Detecting, and Predicting Infestation Patterns of the Brown Planthopper in Rice Paddies..... 246
Christopher Harris (University of Northern Colorado) and Y. Andi Trisyono (Universitas Gadjah Mada)

Reordering Genomic Sequences for Enhanced Classification via Compression Analytics 252
Christina Ting (Sandia National Laboratories), Renee Gooding (Sandia National Laboratories), Richard Field (Sandia National Laboratories), and Jacob Caswell (Sandia National Laboratories)

Main Conference Poster Papers

Educational Data Mining: Analysis of Drop out of Engineering Majors at the UnB - Brazil 259
Rodrigo da Fonseca Silveira (University of Brasilia), Maristela Holanda (University of Brasilia), Marcio de Carvalho Victorino (University of Brasilia), and Marcelo Ladeira (University of Brasilia)

Using Text Mining to Categorize the Purpose of Public Spending for the Benefit of Transparency and Accountability 263
Mauricio Barros de Jesus (Goias State Court of Accounts), Gladston Luiz da Silva (Universidade de Brasília), Marcelo Ladeira (University of Brasília), and Gustavo C. G. Van Erven (University of Brasília)

Leveraging Elastic Demand for Forecasting 268
Houtao Deng (Instacart), Ganesh Krishnan (Instacart), Ji Chen (Instacart), and Dong Liang (Instacart)

Locally Convex Kernel Mixtures: Bayesian Subspace Learning 272
Duy Hoang Thai (Duke University), Hau-Tieng Wu (Duke University), and David B. Dunson (Duke University)

Rare Geometries: Revealing Rare Categories via Dimension-Driven Statistics 276
Henry Kvinge (Colorado State University), Elin Farnell (Amazon), Jingya Li (Colorado State University), and Yujia Chen (Colorado State University)

Client-Side Monitoring of HTTP Clusters Using Machine Learning Techniques 282
Ricardo Filipe (University of Coimbra) and Filipe Araujo (University of Coimbra)

Learning Mobile Application Usage - A Deep Learning Approach 287
Jingyi Shen (Carleton) and M. Omair Shafiq (Carleton University)

Machine Learning to Predict Developmental Neurotoxicity with High-Throughput Data from 2D Bio-Engineered Tissues 293
Finn Kuusisto (Morgridge Institute for Research), Vitor Santos Costa (University of Porto), Zhonggang Hou (University of Michigan), James Thomson (Morgridge Institute for Research), David Page (Duke University), and Ron Stewart (Morgridge Institute for Research)

Stochastic Coordinate Descent for 01 Loss and Its Sensitivity to Adversarial Attacks 299
Meiyan Xie (New Jersey Institute of Technology), Yunzhe Xue (New Jersey Institute of Technology), and Usman Roshan (New Jersey Institute of Technology)

Modelling, Learning and Prediction of Complex Radar Emitter Behaviour 305
Sabine Apfeld (Fraunhofer FKIE), Alexander Charlish (Fraunhofer FKIE), and Gerd Ascheid (RWTH Aachen University)

IsoClustering: A Generalized Framework for Local Data Clustering 311
David Haley (University of California, Davis), Ehsan Kamalinejad (California State University East Bay), and Jiaofei Zhong (California State University East Bay)

Using Bidirectional Long Short Term Memory with Attention Layer to Estimate Driver Behavior 315
Shokoufeh Monjezi Kouchak (Arizona State University) and Ashraf Gaffar (Arizona State University)

A Boosted Tree Machine Learning Alternative to Predictive Evaluation of Nondestructive Concrete Compressive Strength 321
Ahmed Lasisi (University of Delaware), Mufutau Obanishola Sadiq (University of Lagos), Ibrahim Balogun (University of Delaware), Abdulfatai Tunde-Lawal (Ove-Arup), and Nii Attoh-Okine (University of Delaware)

Style-Aware Neural Model with Application in Authorship Attribution 325
Fereshteh Jafariakinabad (University of Central Florida) and Kien A. Hua (University of Central Florida)

Lean Training Data Generation for Planar Object Detection Models in Unsteady Logistics Contexts 329
Laura Dörr (FZI Forschungszentrum Informatik), Felix Brandt (FZI Forschungszentrum Informatik), Anne Meyer (TU Dortmund), and Martin Pouls (FZI Forschungszentrum Informatik)

Unsupervised Learning on the Health and Retirement Study using Geometric Data Analysis 335
Reinaldo Sanchez-Arias (Florida Polytechnic University) and Roberto Williams Batista (Florida Polytechnic University)

A Machine Learning Approach to Maximizing Broadband Capacity via Dynamic DOCSIS 3.1 Profile Management 341
Anastasia Gaydashenko (Yandex Technologies) and Sangeeta Ramakrishnan (Cisco Systems)

Encoding in Neural Networks 346
Sunil Bharitkar (HP)

AudioForesight: A Process Model for Audio Predictive Maintenance in Industrial Environments 352
Dominic Henze (Technische Universität München), Klaidi Gorishti (Technische Universität München), Bernd Bruegge (Technische Universität München), and Jan-Philipp Simen (Carl Zeiss AG)

Cyclic Boosting - An Explainable Supervised Machine Learning Algorithm 358
Felix Wick (Blue Yonder GmbH), Ulrich Kerzel (IUBH Internationale Hochschule), and Michael Feindt (Blue Yonder GmbH)

Understanding Cohesion in Writings and Speech of Schizophrenia Patients 364
Amal AlQahtani (The George Washington University, King Saud University), Efsun Kayi (Columbia University), and Mona Diab (The George Washington University, AWS Amazon AI)

Low-Power Classification using FPGA—An Approach based on Cellular Automata, Neural Networks, and Hyperdimensional Computing 370
Niklas Karvonen (Lulea University of Technology, Sweden), Joakim Nilsson (Lulea University of Technology, Sweden), Denis Kleyko (Lulea University of Technology, Sweden), and Lara Lorna Jiménez (Lulea University of Technology, Sweden)

Classification and Feature Extraction for User Identification for Smart Home Networks Based on Apps Access History 376
Yosef Ashibani (Ontario Tech University) and Qusay Mahmoud (Ontario Tech University)

Facility Locations Utility for Uncovering Classifier Overconfidence 381
Karsten Maurer (Miami University) and Walter Bennette (Air Force Research Lab Information Directorate)

The Machine Learning Models for Activity Recognition Applications with Wearable Sensors 387
Igor Khokhlov (Rochester Institute of Technology), Leon Reznik (Rochester Institute of Technology), and Rohit Bhaskar (Rochester Institute of Technology)

Online Causal Structure Learning in the Presence of Latent Variables 392
Durdane Kocacoban (University of York) and James Cussens (University of York)

An Analysis of Univariate and Multivariate Electrocardiography Signal Classification 396
Nelly Elsayed (University of Cincinnati), Anthony S. Maida (University of Louisiana at Lafayette), and Magdy Bayoumi (University of Louisiana at Lafayette)

Pelee-Text: A Tiny Convolutional Neural Network for Multi-oriented Scene Text Detection 400
Manuel A. Córdova (University of Campinas, Brazil), Luis G. L. Decker (University of Campinas, Brazil), Jose L. Flores-Campana (University of Campinas, Brazil), Andreza A. dos Santos (University of Campinas, Brazil), and Jhonatas S. Conceição (University of Campinas, Brazil)

RNN-Based Classifier to Detect Stealthy Malware using Localized Features and Complex Symbolic Sequence 406
Sanket Shukla (George Mason University), Gaurav Kolhe (George Mason University), Sai Manoj PD (George Mason University), and Setareh Rafatirad (George Mason University)

Computer-Aided Diagnosis using Class-Weighted Deep Neural Network 410
Pritam Sarkar (Queen's University), Vandad Davoodnia (Queen's University), and Ali Etemad (Queen's University)

Physics-Guided Neural Network with Model Discrepancy Based on Upper Troposphere Wind Prediction 414
Ken-ichi Fukui (Osaka University), Junya Tanaka (Osaka University), Tomohiko Tomita (Kumamoto University), and Masayuki Numao (Osaka University)

Evaluating the Transferability and Adversarial Discrimination of Convolutional Neural Networks for Threat Object Detection and Classification within X-Ray Security Imagery 420
Yona Falinie A. Gaus (Durham University), Neelanjan Bhowmik (Durham University), Samet Akcay (Durham University), and Toby Breckon (Durham University)

When to Pull Starting Pitchers in Major League Baseball? A Data Mining Approach 426
Michael Woodham (Florida State University), Jason Hawkins (Florida State University), Ankita Singh (Florida State University), and Shayok Chakraborty (Florida State University)

Discovering Programmer Intention Behind Written Source Code 432
Gadiel Sznaier Camps (Stanford University), Nicolas Bohm Agostini (Northeastern University), and David Kaeli (Northeastern University)

Word Embedding by Combining Resources and Integrating Techniques 438
Kazem Qazanfari (George Washington University) and Abdou Youssef (George Washington University)

A Comparative Analysis of Unsupervised Learning Techniques for Anomaly Detection in Railway Systems ... 444
Macilio da Silva Ferreira (University of São Paulo), Lucio F Vismari (University of São Paulo), Paulo S. Cugnasca (University of São Paulo), Jorge R. de Almeida Jr (University of São Paulo), João B. Camargo Jr (University of São Paulo), and Guilherme Kallemback (VALE S.A. Vitória, Brazil)

Context-Aware Autonomous Driving Using Meta-Reinforcement Learning 450
Yesmina Jaafra (ICube Laboratory Université de Strasbourg, Segula Technologies, LTSIRS École Nationale d'Ingénieurs de Tunis.), Aline Deruyver (ICube Laboratory Université de Strasbourg.), Jean Luc Laurent (Segula Technologies), and Mohamed Saber Naceur (LTSIRS École Nationale d'Ingénieurs de Tunis.)

Predicting Louisiana Public High School Dropout through Imbalanced Learning Techniques 456
Marmar Orooji (Rice University) and Jianhua Chen (Louisisna State University)

LoGANv2: Conditional Style-Based Logo Generation with Generative Adversarial Networks 462
Cedric Oeldorf (Maastricht University) and Gerasimos Spanakis (Maastricht University)

Explainable Density-Based Approach for Self-Driving Actions Classification 469
Eduardo Soares (Lancaster University), Plamen Angelov (Lancaster University), Dimitar Filev (Ford Motor Company), Bruno Costa (Ford Motor Company), Marcos Castro (Ford Motor Company), and Subramanya Nageshrao (Ford Motor Company)

Identifying Laguerre-Gaussian Modes using Convolutional Neural Network 475
Safura Sharifi (Louisiana State University), Yaser Banadaki (Southern University and A&M College), Elisha Siddiqui (Louisiana State University), Savannah Cuzzo (College of William and Mary), Narayan Bhusal (Louisiana State University), Lior Cohen (Louisiana State University), Austin Kalasky (College of William and Mary), Nik Prajapati (College of William and Mary), Rachel Soto-Garcia (Louisiana State University), Sofia Brown (College of William and Mary), Irina Novikova (College of William and Mary), Eugeniy Mikhailov (College of William and Mary), Georgios Veronis (Louisiana State University), and Jonathan Dowling (Louisiana State University)

Denoising Internet Delay Measurements using Weak Supervision 479
Anirudh Muthukumar (University of Oregon) and Ramakrishnan Durairajan (University of Oregon)

Scalable Data Parallel Approaches to Anomaly Detection in Climate Data using Gaussian Processes 485
Krishna Karthik Gadiraju (North Carolina State University), Bharathkumar Ramachandra (North Carolina State University), Ashwin Shashidharan (North Carolina State University), Benjamin Dutton (North Carolina State University), and Ranga Raju Vatsavai (North Carolina State University)

Advanced Decision Making and Interpretability through Neural Shrubs 489
Kyle Caudle (South Dakota School of Mines and Technology), Randy C. Hoover (South Dakota School of Mines and Technology), Aaron Alphonsus (South Dakota School of Mines and Technology), and Shashwati Shradha (South Dakota School of Mines and Technology)

Region Based Anomaly Detection with Real-Time Training and Analysis 495
Philip Adey (Durham University), Oliver Hamilton (Cosmonio), Magnus Bordewich (Durham University), and Toby Breckon (Durham University)

Extracting Cryptocurrency Price Movements from the Reddit Network Sentiment 500
Stephen Wooley (University of North Carolina at Charlotte), Andrew Edmonds (University of North Carolina at Charlotte), Arunkumar Bagavathi (Oklahoma State University), and Siddharth Krishnan (University of North Carolina at Charlotte)

Frosting Weights for Better Continual Training 506
Xiaofeng Zhu (Northwestern University), Feng Liu (Florida Atlantic University), Goce Trajcevski (Iowa State University), and Dingding Wang (Florida Atlantic University)

Mood Classification with Lyrics and ConvNets 511
Revanth Akella (Rocket Software) and Teng-Sheng Moh (San Jose State University)

Feature Changes in Source Code for Commit Classification Into Maintenance Activities 515
Richard V. R. Mariano (Pontifical Catholic University of Minas Gerais), Geanderson E. dos Santos (Federal University of Minas Gerais), Markos V. de Almeida (University of Alberta), and Wladmir C. Brandão (Pontifical Catholic University of Minas Gerais)

An Application of Autonomous Learning Multimodel System for Localization in Industrial Warehouse Storage Rack 519
Sheng Huang (Singapore Institute of Manufacturing Technology) and Zheng Hua Shi (University of Warwick)

Root Cause Detection Among Anomalous Time Series Using Temporal State Alignment 523
Sayan Chakraborty (Zillow Group Inc.), Smit Shah (Zillow Group Inc.), Kiumars Soltani (Zillow Group Inc.), and Anna Swigart (Zillow Group inc.)

Asynchronous Multitask Reinforcement Learning with Dropout for Continuous Control 529
Zilong Jiao (Syracuse University) and Jae Oh (Syracuse University)

End-to-End Reinforcement Learning for Multi-agent Continuous Control 535
Zilong Jiao (Syracuse University) and Jae Oh (Syracuse University)

Maximizing Customer Lifetime Value using Stacked Neural Networks: An Insurance Industry Application 541
Gaddiel Desirena (Relativity6 Inc.), Armando Diaz (Relativity6 Inc.), Jalil Desirena (Relativity6 Inc.), Ismael Moreno (Relativity6 Inc.), and Daniel Garcia (Relativity6 Inc.)

Face Recognition Using Segmentation Technology 545
Fei Gao (Lamar University) and Jiangjiang Liu (Lamar University)

Assessing Wireless Data Services with Machine Learning and Geostatistics 549
Jose Mijangos (California State University, Monterey Bay) and Glenn Bruns (California State University, Monterey Bay)

Hateful Speech Detection in Public Facebook Pages for the Bengali Language 555
Alvi Md Ishmam (Bangladesh University of Engineering and Technology) and Sadia Sharmin (Bangladesh University of Engineering and Technology)

A Comparative Analysis of Traditional and Deep Learning-Based Anomaly Detection Methods for Streaming Data 561
Mohsin Munir (Technische Universität Kaiserslautern, Germany), Muhammad Ali Chattha (Technische Universität Kaiserslautern, Germany), Andreas Dengel (Technische Universität Kaiserslautern, Germany), and Sheraz Ahmed (DFKI, Germany)

Session 10: Machine Learning Algorithms (I)

Active Learning for Feasible Region Discovery 567
Nicolas Knudde (Ghent University - imec), Ivo Couckuyt (Ghent University - imec), Kohei Shintani (Toyota Motor Corporation), and Tom Dhaene (Ghent University - imec)

Independent Component Analysis Based on Mutual Dependence Measures 573
Ze Jin (Cornell University), David S. Matteson (Cornell University), and Tianrong Zhang (Microsoft)

Domain-Invariant Regression Under Beer-Lambert's Law 581
Ramin Nikzad-Langerodi (Software Competence Center Hagenberg (SCCH)), Werner Zellinger (Johannes Kepler University Linz, Software Competence Center Hagenberg GmbH), Susanne Saminger-Platz (Johannes Kepler University Linz), and Bernhard Moser (Software Competence Center Hagenberg GmbH)

Multiple Learning for Regression in Big Data 587
Xiang Liu (Purdue University), Ziyang Tang (Purdue University), Huyunting Huang (Purdue University), Tonglin Zhang (Purdue University), and Baijian Yang (Purdue University)

Kernel Selection for Modal Linear Regression: Optimal Kernel and IRLS Algorithm 595
Ryoya Yamasaki (Kyoto University) and Toshiyuki Tanaka (Kyoto University)

Session 11: Deep Learning Applications

Deep Neuronal Based Classifiers for Wireless Multi-hop Network Mobility Models 602
Daniel Gutiérrez (University of Seville) and Sergio Toral (University of Seville)

Deep Learning Approach to Trademark International Class Identification 608
Girish Showkatramani (United States Patent and Trademark Office), Nidhi Khatri (Arktix Solutions, Inc.), Arlene Landicho (Arktix Solutions, Inc.), and Darwin Layog (Arktix Solutions, Inc.)

LSTM Based Bearing Fault Diagnosis of Electrical Machines using Motor Current Signal 613
Russell Sabir (SEG Automotive Germany GmbH and Chair of Electronic Measurement and Diagnostic Technology & Technische Universitaet Berlin), Daniele Rosato (SEG Automotive Germany GmbH), Sven Hartmann (SEG Automotive Germany GmbH), and Clemens Guehmann (Chair of Electronic Measurement and Diagnostic Technology & Technische Universitaet Berlin)

A Long-Short Term Memory Network for Detecting CRISPR Arrays 619
Shantanu Deshmukh (San Jose State University), Philip Heller (San Jose State University), and Natalia Khuri (San Jose State University)

Session 12: Object Detection

An Edge Computing Visual System for Vegetable Categorization 625
Chang Liu (University of Massachusetts Lowell), Xizhe Wang (University of Massachusetts Lowell), Jing Ni (University of Massachusetts Lowell), Yu Cao (University of Massachusetts Lowell), and Benyuan Liu (University of Massachusetts Lowell)

Deep Learning-Based Object Detection for Digital Inspection in the Mining Industry 633
Thiago D'Angelo (Federal University of Ouro Preto (UFOP)), Marina Mendes (Federal University of Ouro Preto (UFOP)), Breno Keller (Federal University of Ouro Preto (UFOP)), Rafael Ferreira (Federal University of Ouro Preto (UFOP)), Saul Delabrida (Federal University of Ouro Preto (UFOP)), Ricardo Rabelo (Federal University of Ouro Preto (UFOP)), Hector Azpurua (Vale Institute of Technology (ITV)), and Andrea Bianchi (Federal University of Ouro Preto (UFOP))

On the Performance of Extended Real-Time Object Detection and Attribute Estimation within Urban Scene Understanding 641
Khalid Ismail (Durham University) and Toby Breckon (Durham University)

MobileNet-Tiny: A Deep Neural Network-Based Real-Time Object Detection for Rasberry Pi 647
Nithesh Singh Sanjay (California State University San Marcos) and Ali Ahmadinia (California State University San Marcos)

Experimental Exploration of Compact Convolutional Neural Network Architectures for Non-Temporal Real-Time Fire Detection 653
Ganesh Samarth C.A. (Indian Institute of Technology Dharwad), Neelanjan Bhowmik (Durham University), and Toby P. Breckon (Durham University)

Session 13: Text Mining

Text Similarity in Vector Space Models: A Comparative Study 659
Omid Shahmirzadi (EPFL), Adam Lugowski (PatRF), and Kenneth Younge (EPFL)

Suggestion Mining from Online Reviews usingRandom Multimodel Deep Learning 667
Feng Liu (Florida Atlantic University), Liangji Wang (Google), Xiaofeng Zhu (Microsoft), and Dingding Wang (Florida Atlantic University)

Mining Strengths and Weaknesses of Cricket Players Using Short Text Commentary 673
Swarup Ranjan Behera (Indian Institute of Technology Guwahati), Parag Agrawal (LinkedIn), Amit Awekar (Indian Institute of Technology Guwahati), and Vijaya Saradhi Vedula (Indian Institute of Technology Guwahati)

Does Semantic Search Performs Better than Lexical Search in the Task of Assisting Legal Opinion Writing? 680
Daniel de Souza Costa Pedroso (University of Brasilia, Brazil), Marcelo Ladeira (University of Brasilia, Brazil), and Thiago de Paulo Faleiros (University of Brasilia, Brazil)

Session 14: Deep Learning Algorithms (II)

Feedback Learning for Improving the Robustness of Neural Networks 686
Chang Song (Duke University), Zuoguan Wang (Black Sesame Technologies Inc), and Hai Li (Duke University)

Disentangling and Learning Robust Representations with Natural Clustering 694
Javier Antoran (University of Zaragoza) and Antonio Miguel (University of Zaragoza)

Forcing Interpretability for Deep Neural Networks through Rule-Based Regularization 700
Nadia Burkart (Fraunhofer IOSB), Marco Huber (Fraunhofer IPA), and Phillip Faller (Fraunhofer IOSB)

Low-Bit Quantization and Quantization-Aware Training for Small-Footprint Keyword Spotting 706
Yuriy Mishchenko (Amazon.com), Yusuf Goren (Amazon.com), Ming Sun (Amazon.com), Chris Beauchene (Amazon.com), Spyros Matsoukas (Amazon.com), Oleg Rybakov (Amazon.com), and Shiv Naga Prasad Vitaladevuni (Amazon.com)

Session 15: Social Networks and Event Mining

Large-Scale Gender/Age Prediction of Tumblr Users 712
Yao Zhang (Linkedin), Changwei Hu (Yahoo Research), Yifan Hu (Yahoo Research), Tejaswi Kasturi (Yahoo Research), Shanmugam Ramasamy (Verizon Media), Matt Gillingham (Verizon Media), and Keith Yamamoto (Verizon Media)

Legislative Vote Prediction using Campaign Donations and Fuzzy Hierarchical Communities 718
Scott Wahl (Montana State University), John Sheppard (Montana State University), and Elizabeth Shanahan (Montana State University)

Evaluation of Event Impact on Key Performance Indicators 726
Qiyao Wang (Industrial AI Lab, Hitachi America, Ltd. R&D), Ahmed Farahat (Industrial AI Lab, Hitachi America, Ltd. R&D), Kosta Ristovski (Industrial AI Lab, Hitachi America, Ltd. R&D), Chetan Gupta (Industrial AI Lab, Hitachi America, Ltd. R&D), and Shuai Zheng (Industrial AI Lab, Hitachi America, Ltd. R&D)

Complete Rare Event Specification using Stochastic Treatment: CRESST 734
Debanjana Banerjee (Walmart Labs) and Ritish Menon (Walmart Labs)

Session 16: Machine Learning on Imbalanced Data

Machine Learning Models to Identify the Risk of Modern Slavery in Brazilian Cities 740
Marlu da Silva Santos (University of Brasília), Marcelo Ladeira (University of Brasília), Gustavo C. G. Van Erven (University of Brasília), and Gladston Luiz da Silva (University of Brasília)

An Empirical Comparison of Classification Algorithms for Imbalanced Credit Scoring Datasets 747
Leopoldo Soares de Melo Junior (Universidade Federal do Ceará), Franco Maria Nardini (Istituto di Scienza e Tecnologie dell'Informazione Alessandro Faedo), Chiara Renso (Istituto di Scienza e Tecnologie dell'Informazione Alessandro Faedo), and José Antônio Fernandes de Macêdo (Universidade Federal do Ceará)

Deep Learning and Thresholding with Class-Imbalanced Big Data 755
Justin M. Johnson (Florida Atlantic University) and Taghi M Khoshgoftaar (Florida Atlantic University)

Learning Curve Estimation with Large Imbalanced Datasets 763
Aaron N Richter (Florida Atlantic University) and Taghi M Khoshgoftaar (Florida Atlantic University)

Session 17: Deep Learning Algorithms (III)

PPD: Permutation Phase Defense Against Adversarial Examples in Deep Learning 769
Mehdi Jafarnia-Jahromi (University of Southern California), Tasmin Chowdhury (University of Nevada), Hsin-Tai Wu (Docomo Innovations Inc.), and Sayandev Mukherjee (Docomo Innovations Inc.)

Multi-adversarial Variational Autoencoder Networks 777
Abdullah-Al-Zubaer Imran (University of California, Los Angeles) and Demetri Terzopoulos (University of California, Los Angeles)

Gradient Boosted Trees with Extrapolation ..... N/A
Alexey Malistov (Yandex) and Arseniy Trushin (App in the Air)

Joint Regularization on Activations and Weights for Efficient Neural Network Pruning 790
Qing Yang (Duke University), Wei Wen (Duke University), Zuoguan Wang (Black Sesame Technologies), and Hai Li (Duke University)

Session 18: Natural Language Processing

Natural Language Generation Using Reinforcement Learning with External Rewards ..... N/A
Vidhushini Srinivasan (UNC Charlotte), Sashank Santhanam (UNC Charlotte), and Samira Shaikh (UNC Charlotte)

Language-Agnostic Syllabification with Neural Sequence Labeling 804
Jacob Krantz (Gonzaga University), Maxwell Dulin (Gonzaga University), and Paul De Palma (Gonzaga University)

Investigating Input and Output Units in Diacritic Restoration 811
Sawsan Alqahtani (GWU) and Mona Diab (AWS, Amazon AI)

Feature Separation and Selective Fusion for Aspect Term Extraction Based on Multi-task Neural Networks ..... N/A
Hongwei Liang (Xi'an Jiaotong University, China), Yuan Rao (Xi'an Jiaotong University, China), Yinong Xun (Xi'an Jiaotong University, China), and Lianwei Wu (Xi'an Jiaotong University, China)

P-Net: Convolutional Neural Network for Multi-task Semantic Segmentation with Uncertain Label ..... N/A
Jin-woo Lee (ARTIX, Seoul, Korea), Junhyeok Kang (ARTIX, Seoul, Korea), Jungmin Lee (ARTIX, Seoul, Korea), and Hyemin Lee (ARTIX, Seoul, Korea)

Session 19: Machine Learning for Self Driving

Ensemble Bayesian Decision Making with Redundant Deep Perceptual Control Policies 831
Keuntaek Lee (Georgia Institute of Technology), Ziyi Wang (Georgia Institute of Technology), Bogdan Vlahov (Georgia Institute of Technology), Harleen Brar (Georgia Institute of Technology), and Evangelos A. Theodorou (Georgia Institute of Technology)

Automatic CNN Compression System for Autonomous Driving 838
Daichi Murata (Hitachi Ltd.), Toru Motoya (Hitachi Ltd.), and Hiroaki Ito (Hitachi Automotive Systems, Ltd.)

Discretionary Lane Change Decision Making using Reinforcement Learning with Model-Based Exploration ... 844
Songan Zhang (University of Michigan), Huei Peng (University of Michigan), Subramanya Nageshrao (Ford Motor Company), and Eric Tseng (Ford Motor Company)

Colorectal Polyp Segmentation by U-Net with Dilation Convolution 851
Xinzi Sun (University of Massachusetts Lowell), Pengfei Zhang (University of Massachusetts Lowell), Dechun Wang (University of Massachusetts Lowell), Yu Cao (University of Massachusetts Lowell), and Benyuan Liu (University of Massachusetts Lowell)

Session 20: Machine Learning on Acoustic Data

Predicting Music Popularity Using Music Charts 859
Carlos Vicente Soares Araujo (Federal University of Amazonas), Marco Antônio Pinheiro de Cristo (Federal University of Amazonas), and Rafael Giusti (Federal University of Amazonas)

Classifying Humpback Whale Calls to Song and Non-Song Vocalizations using Bag of Words Descriptor on Acoustic Data 865
Hamed Mohebbi-Kalkhoran (Northeastern University), Chenyang Zhu (Northeastern University), Matthew Schinault (Northeastern University), and Purnima Ratilal (Northeastern University)

Acoustic Scene Classification Using Deep Mixtures of Pre-trained Convolutional Neural Networks 871
Truc Nguyen (Graz University of Technology), Alexander Fuchs (Graz University of Technology), and Franz Pernkopf (Graz University of Technology)

Session 21: Machine Learning Applications

Predictive and Prescriptive Analytics for Performance Optimization: Framework and a Case Study on a Large-Scale Enterprise System 876
Indu John (Indian Institute of Science, Bangalore), Ravikumar Karumanchi (SigmaStream India), and Shalabh Bhatnagar (Indian Institute of Science, Bangalore)

Hydropower Optimization Using Split-Window, Meta-Heuristic and Genetic Algorithms 882
Jivitesh Sharma (University of Agder), Bernt-Vigo Matheussen (Agder Energi AS), Sondre Glimsdal (University of Agder), and Ole-Christoffer Granmo (University of Agder)

T-REC: Towards Accurate Bug Triage for Technical Groups 889
Cícero Augusto De Lara Pahins (Sidia: Institute of Science and Technology), Fabrício D'Morison (Sidia: Institute of Science and Technology), Thiago M. Rocha (Sidia: Institute of Science and Technology), Larissa M. Almeida (Sidia: Institute of Science and Technology), Arthur F. Batista (Sidia: Institute of Science and Technology), and Diego F. Souza (Sidia: Institute of Science and Technology)

Session 22: Machine Learning Algorithms (II)

FlexAdapt: Flexible Cycle-Consistent Adversarial Domain Adaptation 896
Akhil Mathur (University College London and Nokia Bell Labs), Anton Isopoussu (Nokia Bell Labs), Fahim Kawsar (Nokia Bell Labs), Nadia B. Berthouze (University College London), and Nicholas D. Lane (University of Oxford)

Distill-to-Label: Weakly Supervised Instance Labeling Using Knowledge Distillation 902
Jayaraman J. Thiagarajan (Lawrence Livermore National Laboratory), Satyananda Kashyap (IBM), and Alexandros Karargyris (IBM)

Adapting Standard External Clustering Metrics for Repetitive, Noisy Observations 908
Rob Smith (University of Montana), Jebediah Rosen (University of Montana), and Dan Ventura (Brigham Young University)

Prune and Replace NAS 915
Kevin Alexander Laube (University of Tuebingen, Cognitive Systems Group) and Andreas Zell (University of Tuebingen, Cognitive Systems Group)

Fuzzy-Rough Cognitive Networks: Building Blocks and Their Contribution to Performance 922
Marnick Vanloffelt (Universiteit Hasselt), Gonzalo Napoles (Universiteit Hasselt), and Koen Vanhoof (Universiteit Hasselt)

Performance Effectiveness of Multimedia Information Search Using the Epsilon-Greedy Algorithm 929
Nikki Lijing Kuang (University of California San Diego) and Clement H.C. Leung (The Chinese University of Hong Kong)

A Multi-label, Dual-Output Deep Neural Network for Automated Bug Triaging 937
Christopher A. Choquette-Choo (Vector Institute, University of Toronto), David Sheldon (Intel PSG, United States), Jonny Proppe (Work completed while at University of Toronto), John Alphonso-Gibbs (Intel PSG, United States), and Harsha Gupta (Intel PSG, United States)

Session 23: Machine Learning on Healthcare and Medical Data

Non-Linear Feature Selection for Prediction of Hospital Length of Stay 945
Sadaf Kabir (West Virginia University) and Leily Farrokhvar (West Virginia University)

Deep Ensemble Network for Quantification and Severity Assessment of Knee Osteoarthritis 951
Mohammed Bany Muhammad (University of Memphis), Ashraf Moinuddin (University of Memphis), Ming Ta Michael Lee (Geisinger Health System), Yanfei Zhang (Geisinger Health System), Vida Abedi (Geisinger Health System), Ramin Zand (Geisinger Medical Center), and Mohammed Yeasin (University of Memphis)

Data-Driven Target Controlled Infusion Algorithm for Norepinephrine to Prevent Hypotension Associated with Labour Epidural: A Reinforcement Learning Approach ..... N/A
Sherwin Davoud (Augusta University), Weinan Gao (Georgia Southern University), and Efrain Riveros-Perez (Augusta University)

Optic-Net: A Novel Convolutional Neural Network for Diagnosis of Retinal Diseases from Optical Tomography Images 964
Sharif Amit Kamran (University of Nevada, Reno), Sourajit Saha (Center for Cognitive Skill Enhancement, Independent University Bangladesh), Ali Shihab Sabbir (Center for Cognitive Skill Enhancement, Independent University Bangladesh), and Alireza Tavakkoli (University of Nevada, Reno)

Multi-resolution 3D Dual Path Squeeze and Excitation Network for Pulmonary Nodule Classification ..... N/A
Wenshuo Xiong (Shandong University, China), Enqing Dong (Shandong University, China), and Huizhong Ji (Shandong University, China)

Session 24: Anomaly Detection

AudiDoS: Real-Time Denial-of-Service Adversarial Attacks on Deep Audio Models 978
Taesik Gong (KAIST, Republic of Korea), Alberto Gil C. P. Ramos (Nokia Bell Labs, UK), Sourav Bhattacharya (Nokia Bell Labs, UK), Akhil Mathur (Nokia Bell Labs, UK), and Fahim Kawsar (Nokia Bell Labs, UK and TU Delft)

On the Impact of Object and Sub-Component Level Segmentation Strategies for Supervised Anomaly Detection within X-Ray Security Imagery 986
Neelanjan Bhowmik (Durham University), Yona Falinie A. Gaus (Durham University), Samet Akçay (Durham University), Jack W. Barker (Durham University), and Toby P. Breckon (Durham University)

A Deep Learning Approach to Distributed Anomaly Detection for Edge Computing 992
Okwudili M. Ezeme (Ontario Tech University), Qusay H. Mahmoud (Ontario Tech University), and Akramul Azim (Ontario Tech University)

Time Series Anomaly Detection from a Markov Chain Perspective 1000
Iman Vasheghani Farahani (SAS Institute Inc.), Alex Chien (MetLife), Russell E. King (Edward P. Fitts Department of Industrial and Systems Engineering), Michael G. Kay (Edward P. Fitts Department of Industrial and Systems Engineering), and Brad Klenz (SAS Institute Inc.)

An Encoder-Decoder Based Approach for Anomaly Detection with Application in Additive Manufacturing ... 1008
Yingshui Tan (University of California, Berkeley), Baihong Jin (University of California, Berkeley), Alexander Nettekoven (University of Texas at Austin), Yuxin Chen (The University of Chicago), Yisong Yue (Caltech), Ufuk Topcu (University of Texas at Austin), and Alberto Sangiovanni-Vincentelli (University of California, Berkeley)

Evaluating Unsupervised Anomaly Detection Models to Detect Faults in Heavy Haul Railway Operations 1016
David F.N. Oliveira (University of São Paulo), Lucio F. Vismari (University of São Paulo), Jorge R. de Almeida Jr (University of São Paulo), Paulo S. Cugnasca (University of São Paulo), João B. Camargo Jr (University of São Paulo), Eduardo Marreto (University of São Paulo), Debora R. Doimo (University of São Paulo), Leandro P. F. de Almeida (VALE S.A. Vitória, Brazil), Rafael Gripp (VALE S.A. Vitória, Brazil), and Marcelo M. Neves (VALE S.A. Vitória, Brazil)

Detection of False Data Injection Attacks in Cyber-Physical Systems using Dynamic Invariants 1023
Kiyoshi Nakayama (NEC Laboratories America), Nikhil Muralidhar (Virginia Tech), Chenrui Jin (NEC Laboratories America), and Ratnesh Sharma (NEC Laboratories America)

Special Session Presentations

Session 1: Predictive Models in Engineering Applications I

Semi-Supervised Discriminative Transfer Learning in Cross-Language Text Classification 1031
Mingon Kang (University of Nevada, Las Vegas), Ashis Biswas (University of Colorada Denver), Dong-Chul Kim (University of Texas Rio Grande Valley), and Jean Gao (University of Texas at Arlington)

Inducing Embeddings for Rare Words through Morphological Decomposition, Stemming and Bidirectional Translation 1039
Xiaotao Li (China Mobile Research Institute), Shujuan You (China Mobile Research Institute), and Wai Chen (China Mobile Research Institute)

A Study on Software Metric Selection for Software Fault Prediction 1045
Huanjing Wang (Western Kentucky University) and Taghi M Khoshgoftaar (Florida Atlantic University)

Naive Bayes with Correlation Factor for Text Classification Problem 1051
Jiangning Chen (Georgia Institute of Technology), Zhibo Dai (Georgia Institute of Technology), Juntao Duan (Georgia Institute of Technology), Heinrich Matzinger (Georgia Institute of Technology), and Ionel Popescu (Georgia Institute of Technology)

Semantic Label Prediction of Mammography Based on CC and MLO Views ..... N/A
Xiaomeng Wang (Donghua University), Jiyun Li (Donghua University), and Chen Qian (Donghua University)

Mining the Highway-Rail Grade Crossing Crash Data: A Text Mining Approach 1063
Samira Soleimani (Louisiana State University), Ali Mohammadi (Louisiana State University), Jianhua Chen (Louisiana State University), and Michael Leitner (Louisiana State University)

Session 2: Topological Data Analysis in Machine Learning I

Exposition and Interpretation of the Topology of Neural Networks 1069
Rickard Brüel Gabrielsson (Stanford University) and Gunnar Carlsson (Stanford University)

Path Homologies of Deep Feedforward Networks 1077
Samir Chowdhury (Stanford University), Thomas Gebhart (University of Minnesota), Steve Huntsman (BAE Systems FAST Labs), and Matvey Yutin (UC Berkeley and BAE Systems FAST Labs)

A Notion of Harmonic Clustering in Simplicial Complexes 1083
Stefania Ebli (EPFL) and Gard Spreemann (EPFL)

Multiscale Geometric Data Analysis via Laplacian Eigenvector Cascading 1091
Joshua Mike (Michigan State University) and Jose Perea (Michigan State University)

Mapper Based Classifier 1099
Jacek Cyranka (University of Warsaw), Alexander Georges (University of California), and David Meyer (University of California)

Hyperparameter Optimization of Topological Features for Machine Learning Applications 1107
Francis Motta (Florida Atlantic University), Christopher Tralie (Ursinus College), Rossella Bedini (Italian National Institute of Health, National Centre of Innovative Technologies in Public Health), Fabiano Bini (University of Rome), Gilberto Bini (Università degli Studi di Milano), Hamed Eramian (Netrias), Marcio Gameiro (Rutgers University), Steve Haase (Duke University), Hugh Haddox (University of Washington), John Harer (Duke University), Nick Leiby (Two Six Labs), Franco Marinozzi (University of Rome), Scott Novotney (Two Six Labs), Gabe Rocklin (Northwestern University), Jed Singer (Two Six Labs), Devin Strickland (University of Washington), and Matt Vaughn (Texas Advanced Computing Center)

Adaptive Template Systems: Data-Driven Feature Selection for Learning with Persistence Diagrams 1115
Luis Polanco (Michigan State University) and Jose A. Perea (Michigan State University)

Session 3: Machine and Deep Learning in Cybersecurity and Privacy Issues I

A Survey of Intrusion Detection Techniques 1122
Deepthi Hassan Lakshminarayana (East Carolina University), James Philips (East Carolina University), and Nasseh Tabrizi (East Carolina University)

Web User Authentication Using Chosen Word Keystroke Dynamics 1130
Khandaker Abir Rahman (Saginaw Valley State University), Deepak Neupane (Saginaw Valley State University), Abdulrahman Zaiter (Saginaw Valley State University), and Md Shafaeat Hossain (Southern Connecticut State)

Online EM Monitoring of 802.11n Networks using Self Adaptive Kernel Machine 1136
Jonathan Villain (URIA, IMT Lille Douai and Univ Lille), Anthony Fleury (URIA, IMT Lille Douai and Univ. Lille), Virginie Deniau (IFSTTAR COSYS-LEOST, France), Christophe Gransart (IFSTTAR COSYS-LEOST, France), and Eric Simon (IEMN, Univ. Lille)

Anomaly Dataset Augmentation Using the Sequence Generative Models 1143
SungUk Shin (Agency for Defense Development), Inseop Lee (Agency for Defense Development), and Changhee Choi (Agency for Defense Development)

PcapGAN: Packet Capture File Generator by Style-Based Generative Adversarial Networks 1149
Baik Dowoo (Agency for Defense Development), Yujin Jung (Agency for Defense Development), and Changhee Choi (Agency for Defense Development)

Exploring Adversaries to Defend Audio CAPTCHA 1155
Heemany Shekhar (San Jose State University), Melody Moh (San Jose State University), and Teng-Sheng Moh (San Jose State University)

Towards the Integration of a Post-Hoc Interpretation Step into the Machine Learning Workflow for IoT Botnet Detection 1162
Sven Nomm (Tallinn University of Technology), Alejandro Guerra-Manzanares (Tallinn University of Technology), and Hayretdin Bahsi (Tallinn University of Technology)

Session 4: Predictive Models in Engineering Applications II

Dimensionality Reduction for Low-Latency High-Throughput Fraud Detection on Datastreams 1170
Cristian Axenie (Huawei German Research Center), Radu Tudoran (Huawei German Research Center), Stefano Bortoli (Huawei German Research Center), Mohamad Al Hajj Hassan (Huawei German Research Center), Carlos Salort Sanchez (Huawei German Research Center), and Goetz Brasche (Huawei German Research Center)

Software Fault Prediction Based on Fault Probability and Impact 1178
Salim Moudache (University of Quebec at Trois-Rivières) and Mourad Badri (University of Quebec at Trois-Rivières)

How can Automated Machine Learning Help Business Data Science Teams? 1186
Ashkan Ebadi (Digital Technologies Research Centre, The National Research Council Canada), Yvan Gauthier (DRDC Centre for Operational Research and Analysis, Department of National Defence), Stéphane Tremblay (Digital Technologies Research Centre, The National Research Council Canada), and Patrick Paul (Digital Technologies Research Centre, The National Research Council Canada)

Ranking Clusters of Postal Codes to Improve Recruitment in the Canadian Armed Forces 1192
Ryuichi Ueno (Department of National Defence, Canada), Robert M. Bryce (Department of National Defence, Canada), and Dragos Calitoiu (Department of National Defence, Canada)

Urban Street Contexts Classification Using Convolutional Neural Networks and Streets Imagery 1198
Fahad Alhasoun (MIT) and Marta González (University of California, Berkeley)

Hyperparameters Search Methods for Machine Learning Linear Workflows 1205
Klára Peškova (Charles University in Prague) and Roman Neruda (Czech Academy of Sciences)

Session 5: Topological Data Analysis in Machine Learning II

Chatter Diagnosis in Milling Using Supervised Learning and Topological Features Vector 1211
Melih C. Yesilli (Michigan State University), Sarah Tymochko (Michigan State University), Firas A. Khasawneh (Michigan State University), and Elizabeth Munch (Michigan State University)

Persistent Homology Machine Learning for Fingerprint Classification 1219
Noah Giansiracusa (Bentley University), Robert Giansiracusa (Independent Researcher), and Chul Moon (Southern Methodist University)

Adaptive Partitioning for Template Functions on Persistence Diagrams 1227
Sarah Tymochko (Michigan State University), Elizabeth Munch (Michigan State University), and Firas A. Khasawneh (Michigan State University)

A Topological Approach for Motion Track Discrimination ..... N/A
Tegan H. Emerson (Pacific Northwest National Laboratory), Colin C. Olson (US Naval Research Laboratory), George Stantchev (US Naval research Laboratory), Jason A. Edelberg (US Naval Research Laboratory), and Michael Wilson (US Naval Research Laboratory)

Classification of Single-Lead Electrocardiograms: TDA Informed Machine Learning 1241
Paul Samuel Ignacio (University of the Philippines), Christopher Dunstan (University of Maryland Baltimore County), Esteban Escobar (California Polytechnic State University Pomona), Luke Trujillo (Harvey Mudd College), and David Uminsky (University of San Francisco)

Bayesian Topological Learning for Brain State Classification 1247
Farzana Nasrin (University of Tennessee), Christopher Oballe (University of Tennessee), David Boothe (US Army Research Laboratory, Aberdeen Proving Ground), and Vasileios Maroulas (University of Tennessee)

Session 6: Machine and Deep Learning in Cybersecurity and Privacy Issues II

An Intrusion Detection System for Multi-class Classification Based on Deep Neural Networks 1253
Petros Toupas (Information Technologies Institute, Center for Research & Technology-Hellas, Greece), Dimitra Chamou (Information Technologies Institute, Center for Research & Technology-Hellas, Greece), Konstantinos M. Giannoutakis (Information Technologies Institute, Center for Research & Technology-Hellas, Greece), Anastasios Drosou (Information Technologies Institute, Center for Research & Technology-Hellas, Greece), and Dimitrios Tzovaras (Information Technologies Institute, Center for Research & Technology-Hellas, Greece)

One-Class Classification to Continuously Authenticate Users Based on Keystroke Timing Dynamics 1259
Rasana Manandhar (University of Wyoming), Shaya Wolf (University of Wyoming), and Mike Borowczak (University of Wyoming)

Data Integrity of Industrial Controllers via Multi-resolution Hierarchical Time Series Clustering 1267
Andrew Walker (Hitachi America, Ltd.) and Joydeep Acharya (Hitachi America, Ltd.)

CheckNet: Secure Inference on Untrusted Devices ..... N/A
Marcus Comiter (Harvard University), Surat Teerapittayanon (Harvard University), and H. T. Kung (Harvard University)

Generation & Evaluation of Adversarial Examples for Malware Obfuscation 1283
Daniel Park (Rensselaer Polytechnic Institute), Haidar Khan (Amazon Alexa), and Bülent Yener (Rensselaer Polytechnic Institute)

Anomaly Detection using Supervised Learning and Multiple Statistical Methods 1291
Watson Jia (Princeton University), Raj Mani Shukla (University of Nevada, Reno), and Shamik Sengupta (University of Nevada, Reno)

An Unsupervised Framework for Anomaly Detection in a Water Treatment System 1298
Mayra Macas (Zhejiang University) and Chunming Wu (Zhejiang University)

Session 7: Machine and Deep Learning in Cybersecurity and Privacy Issues III

Deep Learning Versus Conventional Learning in Data Streams with Concept Drifts 1306
Sid Ryan (University of Ottawa), Roberto Corizzo (American University), Iluju Kiringa (University of Ottawa), and Nathalie Japkowicz (American University)

A Comparison Between Statistical and Symbolic Learning Approaches for Generative Policy Models 1314
Graham White (IBM), Daniel Cunnington (IBM), Mark Law (Imperial College London), Elisa Bertino (Purdue University), Geeth De Mel (IBM), and Alessandra Russo (Imperial College London)

Active Learning to Improve Static Analysis 1322
Maxwell Berman (University of Virginia), Stephen Adams (University of Virginia), Tim Sherburne (University of Virginia), Cody Fleming (University of Virginia), and Peter Beling (University of Virginia)

Machine Learning in Anomaly Detection: Example of Colluded Applications Attack in Android Devices 1328
Igor Khokhlov (Rochester Institute of Technology), Michael Perez (Rochester Institute of Technology), and Leon Reznik (Rochester Institute of Technology)

CausalConvLSTM: Semi-Supervised Log Anomaly Detection Through Sequence Modeling 1334
Steven Yen (San Jose State University), Melody Moh (San Jose State University), and Teng-Sheng Moh (San Jose State University)

Special Session Posters

Special Session: Machine Learning in Advanced Machine Vision

Image Classification of Clogs in Direct Ink Write Additive Manufacturing 1342
Albert Bruce Chu (Lawrence Livermore National Laboratory), Maxwell Murialdo (Lawrence Livermore National Laboratory), James P. Lewicki (Lawrence Livermore National Laboratory), Jennifer N. Rodriguez (Lawrence Livermore National Laboratory), Mitchell K. Shiflett (Lawrence Livermore National Laboratory), Brian Giera (Lawrence Livermore National Laboratory), and Alan D. Kaplan (Lawrence Livermore National Laboratory)

Special Session: Deep Learning

Causal Discovery of Cyber Attack Phases 1348
W. Graham Mueller (Leidos, Inc.), Alex Memory (Leidos, Inc.), and Kyle Bartrem (Leidos, Inc.)

Exploiting Stereo Sound Channels to Boost Performance of Neural Network-Based Music Transcription 1353
Xian Wang (The University of Adelaide), Lingqiao Liu (The University of Adelaide), and Qinfeng Shi (The University of Adelaide)

An Auto Regressive Deep Learning Model for Sales Tax Forecasting from Multiple Short Time Series 1359
Elham Buxton (University of Illinois at Springfield), Kenneth Kriz (University of Illinois at Springfield), Matthew Cremeens (University of Illinois at Springfield), and Kim Jay (University of Illinois at Springfield)

Optimizing Deep Neural Network Architecture with Enhanced Genetic Algorithm 1365
Ajay Shrestha (University of Bridgeport) and Ausif Mahmood (University of Bridgeport)

Instance Segmentation of Newspaper Elements Using Mask R-CNN 1371
Abdullah Almutairi (Kuwait University) and Meshal Almashan (The University of Tokyo)

Robustness Evaluation of Deep Learning Models Based on Local Prediction Consistency 1376
Ziqiang Shi (Fujitsu R&D Center, Co., LTD), Chaoliang Zhong (Fujitsu R&D Center, Co., LTD), Yasuto Yokota (Fujitsu Laboratories), Wensheng Xia (Fujitsu R&D Center, Co., LTD), and Jun Sun (Fujitsu R&D Center, Co., LTD)

A Fast and Light Weight Deep Convolution Neural Network Model for Cancer Disease Identification in Human Lung(s) 1382
Siva Skandha Sanagala (CMR College of Engineering & Technology, Hyderabad, Bennett University, Greater Noida), Suneet Kr. Gupta (Bennett University, Greater Noida), Vijaya Kumar Koppula (CMR College of Engineering & Technology, Hyderabad), and Mohit Agarwal (Bennett University, Greater Noida)

Inferring Convolutional Neural Networks' Accuracies from Their Architectural Characterizations 1388
Duc Hoang (Rhodes College), Jesse Hamer (The University of Iowa), Gabriel Perdue (Fermi National Accelerator Laboratory), Steven Young (Oak Ridge National Laboratory), Jonathan Miller (UNIVERSIDAD TECNICA FEDERICO SANTA MARIA), and Anushree Ghosh (UNIVERSIDAD TECNICA FEDERICO SANTA MARIA)

Deep Learning for Flood Forecasting and Monitoring in Urban Environments 1392
Charalampos Karyotis (Interactive Coventry Ltd., UK), Tomasz Maniak (Interactive Coventry Ltd., Coventry UK), Faiyaz Doctor (University of Essex), Rahat Iqbal (Coventry University, UK), Vasile Palade (Coventry University, UK), and Raymond Tang (Metrobinaya Sdn Bhd Bhd, Malaysia)

Using Convolutional Neural Networks to Extract Keywords and Keyphrases: A Case Study for Foodborne Illnesses 1398
Jingjing Wang (University of Guelph), Fei Song (University of Guelph), Kavita Walia (University of Guelph), Jeffery Farber (University of Guelph), and Rozita Dara (University of Guelph)

Collapse Resistant Deep Convolutional GAN for Multi-object Image Generation 1404
Elijah Bolluyt (Stevens Institute of Technology) and Cristina Comaniciu (Stevens Institute of Technology)

Radar Gesture Recognition System in Presence of Interference using Self-Attention Neural Network 1409
Souvik Hazra (Infineon Technologies AG) and Avik Santra (Infineon Technologies AG)

Image Generation and Style Transfer Using Conditional Generative Adversarial Networks 1415
Sharada Murali (University of Southern California), Mohammad Reza Rajati (University of Southern California), and Somasekhar Suryadevara (Concerto Health AI)

Design of a Cost-Effective Deep Convolutional Neural Network–Based Scheme for Diagnosing Faults in Smart Grids 1420
Hossein Hassani (University of Windsor), Maryam Farajzadeh-Zanjani (University of Windsor), Roozbeh Razavi-Far (University of Windsor), Mehrdad Saif (University of Windsor), and Vasile Palade (Coventry University)

Special Session: Machine Learning in Health

Using Machine Learning to Improve Surgical Outcomes 1426
Sindhura Bonthu (University of Nebraska at Omaha), Priscila Rodrigues Armijo (University of Nebraska Medical Center), Tiffany Tanner (University of Nebraska Medical Center), and Qiuming Zhu (University of Nebraska at Omaha)

Improving Machine Learning Based Detection of Freezing of Gait Using Data Synthesis Methods 1432
Nader Naghavi (University of Tennessee, Knoxville), Soheil Borhani (University of Tennessee, Knoxville), and Eric Wade (University of Tennessee, Knoxville)

Understanding Early Childhood Obesity via Interpretation of Machine Learning Model Predictions 1438
Xueqin Pang (Children's Hospital of Philadelphia), Christopher B. Forrest (Children's Hospital of Philadelphia), Félice Lê-Scherban (Drexel University), and Aaron J. Masino (University of Pennsylvania)

Abnormal Gait Detection by Classifying Inertial Sensor Data using Transfer Learning 1444
Tejul Pandit (K. J. Somaiya College of Engineering), Harshal Nahane (K. J. Somaiya College of Engineering), Dhanshree Lade (K. J. Somaiya College of Engineering), and Vaibhav Rao (K. J. Somaiya College of Engineering)

Clinical Knowledge Graph Embedding Representation Bridging the Gap between Electronic Health Records and Prediction Models 1448
Matthew Wai Heng Chung (University College London), Jianyu Liu (University College London), and Hegler Tissot (University College London)

On Activity Identification Pipelines for a Low-Accuracy EEG Device 1454
Ákos Rudas (Eötvös Loránd University) and Sándor Laki (Eötvös Loránd University)

IoT Environmental Analyzer using Sensors and Machine Learning for Migraine Occurrence Prevention 1460
Rosemarie J. Day (Worcester Polytechnic Institute), Hassan Salehi (California State University, Chico), and Mahsa Javadi (University of Connecticut Health Center)

Feature Clustering Towards Gene Selection 1466
Hanieh Marvi-Khorasani (Memorial University of Newfoundland) and Hamid Usefi (Memorial University of Newfoundland)

Genetic Algorithms for Feature Selection in the Children and Adolescents Depression Context 1470
Renata Santana (Pontifícia Universidade Católica de Minas Gerais), Bruno Santos (Pontifícia Universidade Católica de Minas Gerais), Thiago Lima (Pontifícia Universidade Católica de Minas Gerais), Maycoln Teodoro (Federal University of Minas Gerais), Saulo Pinto (Pontifícia Universidade Católica de Minas Gerais), Luiz Zárate (Pontifícia Universidade Católica de Minas Gerais), and Cristiane Nobre (Pontifícia Universidade Católica de Minas Gerais)

Special Session: Machine Learning for Predictive Models in Engineering Applications

Supervised Classification of EEG Signals with Score Threshold Regulation for Pseudo-Online Asynchronous Detection of Gait Intention 1476
S M Shafiul Hasan (Florida International University), Masudur R. Siddiquee (Florida International University), and Ou Bai (Florida International University)

An Online Incremental Clustering Framework for Real-Time Stream Analytics 1480
Carlos Salort Sanchez (School of Life Sciences Weihenstephan, Technical University of Munich (TUM)), Radu Tudoran (Huawei German Research Center), Mohamad Al Hajj Hassan (Huawei German Research Center), Stefano Bortoli (Huawei German Research Center), Goetz Brasche (Huawei German Research Center), Jan Baumbach (School of Life Sciences Weihenstephan, Technical University of Munich (TUM)), and Cristian Axenie (Huawei German Research Center)

Machine Learning of the Ultrasound Signal Travel Path Effect in Estimating the Residual Life of the US Army Vehicles 1486
Ramakrishna Valisetty (US ARL)

Predictive Models with Resampling: A Comparative Study of Machine Learning Algorithms and their Performances on Handling Imbalanced Datasets 1492
Adithi D. Chakravarthy (University of Nebraska at Omaha), Sindhura Bonthu (University of Nebraska at Omaha), Zhengxin Chen (University of Nebraska at Omaha), and Qiuming Zhu (University of Nebraska at Omaha)

Comparing the Modeling Powers of RNN and HMM 1496
Achille Salaün (Nokia Bell Labs, Samovar, CNRS, Telecom SudParis, Institut Polytechnique de Paris), Yohan Petetin (Samovar, CNRS, Telecom SudParis, Institut Polytechnique de Paris), and François Desbouvries (Samovar, CNRS, Telecom SudParis, Institut Polytechnique de Paris)

Multi-objective Shipment Allocation using Extreme Nondominated Sorting Genetic Algorithm-III (E-NSGA-III) 1500
Kittichai Lavangnananda (King Mongkut's University of Technology, Thailand) and Peerasak Wangsom (CAT Telecom, Thailand)

A Deep Learning Approach to Modeling a Complex Multi-variate, Temporal Thermal Problem 1506
Forrest Jehlik (Argonne National Laboratory) and Alvaro Blazquez de Mingo (Argonne National Laboratory)

Predictive Analytics and Statistical Learning for Waterflooding Operations in Reservoir Simulations 1511
Xuan Liao (PetroChina, Beijing, China) and Mayank Tyagi (Louisiana State University, Baton Rouge)

ragamAI: A Network Based Recommender System to Arrange a Indian Classical Music Concert 1517
Arunkumar Bagavathi (Oklahoma State University), Siddharth Krishnan (University of North Carolina at Charlotte), Sanjay Subrahmanyan (NA), and Narasimhan S. L. (NA)

A Hybrid Collaborative Filtering Model Using Customer Search Keyword Data for Product Recommendation..... 1523
Ha-Ram Won (Kookmin University), Yunju Lee (Kookmin University), Jae-Seung Shim (Kookmin University), and Hyunchul Ahn (Kookmin University)

An Automatic Extraction Tool for Ethnic Vietnamese Thai Dances Concepts 1527
Truong-Thanh Ma (Can Tho University, Vietnam), Salem Benferhat (Université d'Artois, France), Zied Bouraoui (Université d'Artois, France), Karim Tabia (Université d'Artois, France), Thanh-Nghi Do (Can Tho University, Vietnam), and Nguyen-Khang Pham (Can Tho University, Vietnam)

Special Session: Topological Data Analysis in Machine Learning

Sampling Real Algebraic Varieties for Topological Data Analysis 1531
Emilie Dufresne (University of York), Parker Edwards (University of Florida), Heather Harrington (University of Oxford), and Jonathan Hauenstein (University of Notre Dame)

Characterizing the Shape of Activation Space in Deep Neural Networks 1537
Thomas Gebhart (University of Minnesota), Paul Schrater (University of Minnesota), and Alan Hylton (NASA)

Time-Series Data Analysis for Classification of Noisy and Incomplete Internet-of-Things Datasets 1543
Michael Postol (U.S. Department of Defense), Candace Diaz (Sandia National Labortories Department of Energy), Robert Simon (George Mason University), and Drew Wicke (George Mason University)

A Topological "Reading" Lesson: Classification of MNIST using TDA 1551
Adélie Garin (EPFL) and Guillaume Tauzin (EPFL)

Text Classification via Network Topology: A Case Study on the Holy Quran 1557
Mehmet Emin Aktas (University of Central Oklahoma) and Esra Akbas (Oklahoma State University)

Session 8: Machine Learning in Health I

An Ensemble Approach Based on Machine Learning for Stroke Screening ..... N/A
Jizhi Chen (East China Normal University), Junzhong Gu (East China Normal University), Yongming Wang (CETC Software Information Service Co., Ltd), and Xiutao Cui (CETC Software Information Service Co., Ltd)

Convolutional Classification of Pathogenicity in H5 Avian Influenza Strains 1570
Akshay Chadha (University of Guelph), Rozita Dara (University of Guelph), and Zvonimir Poljak (University of Guelph)

An Effective CNN Approach for Diabetic Retinopathy Stage Classification with Dual Inputs and Selective Data Sampling 1578
Jing Ni (University of Massachusetts Lowell), Qilei Chen (University of Massachusetts Lowell), Chang Liu (University of Massachusetts Lowell), Honghao Wang (University of Massachusetts Lowell), Yu Cao (University of Massachusetts Lowell), and Benyuan Liu (University of Massachusetts Lowell)

Scalable Deep Learning for Stress and Affect Detection on Resource-Constrained Devices 1585
Abhijith Ragav (SRM Institute of Science and Technology), Nanda Harishankar Krishna (SSN College of Engineering), Naveen Narayanan (SSN College of Engineering), Kevin Thelly (SSN College of Engineering), and Vineeth Vijayaraghavan (Solarillion Foundation)

Gene Subset Selection for Transfer Learning using Bilevel Particle Swarm Optimization ..... N/A
Hassen Dhrif (University of Miami), Veronica Bolon Canedo (Universidade da Coruna, Spain), and Stefan Wuchty (University of Miami)

Weakly Supervised Fine Tuning Approach for Brain Tumor Segmentation Problem 1600
Sergey Pavlov (Moscow Institute of Physics and Technology), Alexey Artemov (Skolkovo Institute of Science and Technology), Maksim Sharaev (Skolkovo Institute of Science and Technology), Alexander Bernstein (Skolkovo Institute of Science and Technology), and Evgeny Burnaev (Skolkovo Institute of Science and Technology)

Towards Real-Time Detection of Squamous Pre-Cancers from Oesophageal Endoscopic Videos 1606
Xiaohong Gao (Middlesex University), Barbara Braden (John Radcliffe Hospital Oxford, United Kingdom), Stephen Taylor (MRC WIMM Centre of Computational Biology MRC Weatherall Institute of Molecular Medicine Oxford, United Kingdom), and Wei Pang (University of Aberdeen, United Kingdom)

Session 9: Deep Learning I

CSNNs: Unsupervised, Backpropagation-Free Convolutional Neural Networks for Representation Learning .. 1613
Bonifaz Stuhr (University of Applied Sciences) and Jürgen Brauer (University of Applied Sciences)

Deep Neural Network Compression for Image Classification and Object Detection 1621
Georgios Tzelepis (Volvo Technology AB, Sweden), Ahraz Asif (Volvo Technology AB, Sweden), Saimir Baci (Volvo Technology AB, Sweden), Selcuk Cavdar (Volvo Technology AB, Sweden), and Eren Erdal Aksoy (Halmstad University, Sweden)

Single-Net Continual Learning with Progressive Segmented Training 1629
Xiaocong Du (Arizona State University), Gouranga Charan (Arizona State University), Frank Liu (Oak Ridge National Lab), and Yu Cao (Arizona State University)

Parameter Continuation Methods for the Optimization of Deep Neural Networks 1637
Harsh Nilesh Pathak (Data Science Expedia Group) and Randy Paffenroth (Worcester Polytechnic Institute)

Generation of Pedestrian Pose Structures using Generative Adversarial Networks 1644
James Spooner (Coventry University), Madeline Cheah (HORIBA MIRA Limited), Vasile Palade (Coventry University), Stratis Kanarachos (Coventry University), and Alireza Daneshkhah (Coventry University)

Anomaly Detection with Conditional Variational Autoencoders 1651
Adrian Alan Pol (University of Paris-Saclay), Victor Berger (University of Paris-Saclay), Cecile Germain (University of Paris-Saclay), Gianluca Cerminara (CERN), and Maurizio Pierini (CERN)

Optimal Ensembles for Deep Learning Classification: Theory and Practice 1658
Wenjing Li (Worcester Polytechnic Institute) and Randy Paffenroth (Worcester Polytechnic Institute)

Session 10: Machine Learning in Energy Application I

SVM-Based Segmentation of Home Appliance Energy Measurements 1666
Marc Wenninger (Rosenheim Technical University of Applied Sciences, Germany), Dominik Stecher (Rosenheim Technical University of Applied Sciences, Germany), and Jochen Schmidt (Rosenheim Technical University of Applied Sciences, Germany)

Multi-agent Learning for Energy-Aware Placement of Autonomous Vehicles 1671
Ömer Ibrahim Erduran (Goethe University Frankfurt), Mirjam Minor (Goethe University Frankfurt), Lars Hedrich (Goethe University Frankfurt), Ahmad Tarraf (Goethe University Frankfurt), Frederik Ruehl (Continental Teves AG & Co. oHG), and Hans Schroth (Continental Teves AG & Co. oHG)

Power Flow Approximation Based on Graph Convolutional Networks 1679
Valentin Bolz (DIgSILENT GmbH, University of Tübingen), Johannes Rueß (DIgSILENT GmbH), and Andreas Zell (University of Tübingen)

Hybrid Condition Monitoring for Power Electronic Systems 1687
Nikola Markovic (Ruhr University Bochum), Thomas Stoetzel (Ruhr University Bochum), Volker Staudt (Ruhr-University Bochum), and Dorothea Kolossa (Ruhr-University Bochum)

Domain Adaptation for Ageing State Recognition of Cables used in Power Systems 1695
Nathalie Morette (LPEM, ESPCI Paris, PSL Research University, CNRS), Thierry Ditchi (LPEM, Sorbonne Université, CNRS), and Yacine Oussar (LPEM, ESPCI Paris, PSL Research University, CNRS)

A Novel Graphical Lasso Based Approach Towards Segmentation Analysis in Energy Game-Theoretic Frameworks 1702
Hari Prasanna Das (University of California, Berkeley), Ioannis C. Konstantakopoulos (University of California, Berkeley), Aummul Baneen Manasawala (University of California, Berkeley), Tanya Veeravalli (University of California, Berkeley), Huihan Liu (University of California, Berkeley), and Costas J. Spanos (University of California, Berkeley)

Session 11: Machine Learning in Health II

3D Deformable Convolutions for MRI Classification 1710
Marina Pominova (Skolkovo Institute of Science and Technology), Ekaterina Kondrateva (Skolkovo Institute of Science and Technology), Maksim Sharaev (Skolkovo Institute of Science and Technology), Alexander Bernstein (Skolkovo Institute of Science and Technology), Sergey Pavlov (Moscow Institute of Physics and Technology), and Evgeny Burnaev (Skolkovo Institute of Science and Technology)

Radar-Based Non-intrusive Fall Motion Recognition using Deformable Convolutional Neural Network 1717
Yogesh Shankar (Infineon Technologies AG), Souvik Hazra (Infineon Technologies AG), and Avik Santra (Infineon Technologies AG)

Knee Bone Segmentation on Three-Dimensional MRI 1725
Rania Almajalid (Pace University; Saudi Electronic University, Saudi Arabia), Juan Shan (Pace University), Maolin Zhang (Hopewell Valley Central High School, USA), Garrett Stonis (Wentworth Institute of Technology, USA), and Ming Zhang (Wentworth Institute of Technology, USA; Tufts Medical Center, USA)

Depression Detection Using Feature Extraction and Deep Learning from sMRI Images 1731
Marzieh Mousavian (Louisiana State University), Jianhua Chen (Louisiana State University), and Steven Greening (Louisiana State University)

Weakly Supervised Deep Learning for Detecting and Counting Dead Cells in Microscopy Images 1737
Siteng Chen (The University of Arizona), Ao Li (The University of Arizona), Kathleen Lasick (The University of Arizona), Julie Huynh (The University of Arizona), Linda Powers (The University of Arizona), Janet Roveda (The University of Arizona), and Andrew Paek (The University of Arizona)

Echo Doppler Flow Classification and Goodness Assessment with Convolutional Neural Networks 1744
Ghada Zamzmi (National Institutes of Health (NIH)), Li-Yueh Hsu (National Institutes of Health (NIH)), Wen Li (National Institutes of Health (NIH)), Vandana Sachdev (National Institutes of Health (NIH)), and Sameer Antani (National Institutes of Health (NIH))

Session 12: Deep Learning II

Enhancing Claims Handling Processes with Insurance Based Language Models 1750
Anuj Dimri (American Family Insurance), Suraj Yerramilli (American Family Insurance), Peng Lee (American Family Insurance), Sardar Afra (American Family Insurance), and Andrew Jakubowski (American Family Insurance)

Pattern and Anomaly Localization in Complex and Dynamic Data 1756
Sid Ryan (University of Ottawa), Roberto Corizzo (American University), Iluju Kiringa (University of Ottawa), and Nathalie Japkowicz (American University)

Sparse Super-Regular Networks 1764
Andrew W. E McDonald (Drexel University) and Ali Shokoufandeh (Drexel University)

Concept Saliency Maps to Visualize Relevant Features in Deep Generative Models 1771
Lennart Brocki (Institute of Theoretical Physics, University of Wroclaw) and Neo Christopher Chung (Institute of Informatics, University of Warsaw)

Deep Learning with Domain Randomization for Optimal Filtering 1779
Matthew Weiss (Worcester Polytechnic Institute), Randy C. Paffenroth (Worcester Polytechnic Institute), Jacob R. Whitehill (Worcester Polytechnic Institute), and Joshua R. Uzarski (Soldier Protection and Survivability Directorate U.S. Army CCDC-SC)

Mask R-CNN End-to-End Text Detection and Recognition 1787
Sandeep Shivajirao (CSAI Lab ENGIE), Rim Hantach (CSAI Lab ENGIE), Sarra Ben Abbes (CSAI Lab ENGIE), and Philippe Calvez (CSAI Lab ENGIE)

Learnable Visual Rhythms Based on the Stacking of Convolutional Neural Networks for Action Recognition 1794
Helena Maia (University of Campinas), Marcos Souza (University of Campinas), Anderson Santos (University of Campinas), Helio Pedrini (University of Campinas), Hemerson Tacon (Federal University of Juiz de Fora), André Brito (Federal University of Juiz de Fora), Hugo Chaves (Federal University of Juiz de Fora), Marcelo Vieira (Federal University of Juiz de Fora), and Saulo Villela (Federal University of Juiz de Fora)

Session 13: Predictive Models in Engineering Applications III

Widened Learning of Index Tracking Portfolios 1800
Iuliia Gavriushina (University of Konstanz), Oliver Sampson (University of Konstanz), Michael R. Berthold (University of Konstanz), Winfried Pohlmeier (University of Konstanz), and Christian Borgelt (Paris Lodron University of Salzburg)

A Cost-Sensitive Approach to Enhance the use of ML Classifiers in Software Testing Efforts 1806
Alexandre Moreira Nascimento (Stanford University), Lucio Flavio Vismari (Universidade de São Paulo), Paulo Sergio Cugnasca (Universidade de São Paulo), João Batista Camargo Júnior (Universidade de São Paulo), and Jorge Rady de Almeira Júnior (Universidade de São Paulo)

Rare-Event Time Series Prediction: A Case Study of Solar Flare Forecasting 1814
Azim Ahmadzadeh (Georgia State University), Berkay Aydin (Georgia State University), Dustin J. Kempton (Georgia State University), Maxwell Hostetter (Georgia State University), Rafal A. Angryk (Georgia State University), Manolis K. Georgoulis (Georgia State University), and Sushant S. Mahajan (Georgia State University)

Hierarchical Temporal Memories Prediction Performance and Robustness to Faults on Multivariate Time Series 1821
Mathieu Jégou (ENIB, France), Pierre Chevaillier (ENIB, France), and Pierre De Loor (ENIB, France)

Comparing Learning-Based Methods for Identifying Disaster-Related Tweets 1829
Nasser Assery (North Carolina A&T State University), Yuan Xiaohong (North Carolina A&T State University), Sultan Almalki (North Carolina A&T State University), Roy Kaushik (North Carolina A&T State University), and Qu Xiuli (North Carolina A&T State University)

Sparse Feature Extraction for Activity Detection Using Low-Resolution IR Streams 1837
Yordanka Karayaneva (Coventry University), Sara Sharifzadeh (Coventry University), Yanguo Jing (Coventry University), Kevin Chetty (University College London), and Bo Tan (Tampere University, Finland)

Session 14: Machine Learning in Health III

Comprehend Medical: A Named Entity Recognition and Relationship Extraction Web Service 1844
Parminder Bhatia (Amazon), Busra Celikkaya (Amazon), Mohammed Khalilia (Amazon), and Selvan Senthivel (Amazon)

Towards Fast and Unified Transfer Learning Architectures for Sequence Labeling 1852
Parminder Bhatia (Amazon), Kristjan Arumae (Amazon), and Busra Celikkaya (Amazon)

Hypergraph Link Prediction: Learning Drug Interaction Networks Embeddings 1860
Maria Vaida (Harrisburg University of Science and Technology) and Kevin Purcell (Harrisburg University of Science and Technology)

Session 15: Deep Learning III

Hexagonal Image Processing in the Context of Machine Learning: Conception of a Biologically Inspired Hexagonal Deep Learning Framework 1866
Tobias Schlosser (Chemnitz University of Technology), Michael Friedrich (Chemnitz University of Technology), and Danny Kowerko (Chemnitz University of Technology)

A Stochastic Variance Reduced Nesterov's Accelerated Quasi-Newton Method 1874
Sota Yasuda (Shizuoka University), Shahrzad Mahboubi (Shonan Institute of Technology), S. Indrapriyadarsini (Shizuoka University), Hiroshi Ninomiya (Shonan Institute of Technology), and Hideki Asai (Shizuoka University)

Automated Stenosis Classification of Carotid Artery Sonography using Deep Neural Networks 1880
Tony Lindsey (NASA Ames Research Center Intelligent Systems Division) and Zsolt Garami (Houston Methodist Hospital DeBakey Heart & Vascular Center)

Session 16: Predictive Models in Engineering Applications IV

Wireless Indoor Positioning Using Online Machine Learning 1885
Sheng Huang (Singapore Institute of Manufacturing Technology), Andri Ashfahani (Nanyang Technological University), and Mahardhika Pratama (Nanyang Technological University)

The Effect of Time on the Maintenance of a Predictive Model 1891
Joffrey L Leevy (Florida Atlantic University), Taghi M Khoshgoftaar (Florida Atlantic University), Richard A Bauder (Florida Atlantic University), and Naeem Seliya (Ohio Northern University)

Utilising Evolutionary Algorithms to Design Granular Materials for Industrial Applications 1897
Gary W. Delaney (CSIRO Data61), David Howard (CSIRO Data61), and Krystal De Napoli (CSIRO Data61)

Session 17: Machine Learning Applications in Education I

Deep Knowledge Tracing on Floor/Ceiling Skills and Limited data ..... N/A
Ange Tato (Université du Québec à Montréal) and Roger Nkambou (Université du Québec à Montréal)

Uncertainty-Aware Personalized Readability Assessments for Second Language Learners 1909
Yo Ehara (Shizuoka Institute of Science and Technology)

Rule Insertion Technique for Dynamic Cell Structure Neural Network 1917
Osama Elsarrar (West Virginia University), Marjorie Darrah (West Virginia University), and Richard Devine (West Virginia University)

A Voice Interactive Multilingual Student Support System using IBM Watson 1923
Kennedy Ralston (Queen's University, Canada), Yuhao Chen (Queen's University, Canada), Haruna Isah (Queen's University, Canada), and Farhana Zulkernine (Queen's University, Canada)

Session 18: Machine Learning in Energy Application II

Coordination of PV Smart Inverters Using Deep Reinforcement Learning for Grid Voltage Regulation 1929
Changfu Li (University of California San Diego), Chenrui Jin (NEC Laboratories America), and Ratnesh Sharma (NEC Laboratories America)

DeepECO: Applying Deep Learning for Occupancy Detection from Energy Consumption Data 1937
Neelanjana Pal (Vanderbilt University), Purboday Ghosh (Vanderbilt University), and Gabor Karsai (Vanderbilt University)

Session 19: Predictive Models in Engineering Applications V

Gender Estimation from a Hybrid of Face, Upper and Full Body Images at Varying Body Poses 1943
Ogechukwu Iloanusi (University of Nigeria) and Charles Mbah (University of Nigeria)

Looking for the Best Fit of a Function over Circadian Rhythm Data 1949
Fabian Fallas-Moya (University of Tennessee), Manfred Gonzalez-Hernandez (Universidad de Costa Rica), Luis Barboza-Barquero (Universidad de Costa Rica), Kenneth Obando (Programa Estado de la Nacion), Ovidio Valerio (Universidad de Costa Rica), Andrea Holst (Universidad de Costa Rica), and Ronald Arias (Universidad de Costa Rica)

Partially Detected Intelligent Traffic Signal Control: Environmental Adaptation 1955
Rusheng Zhang (Carnegie Mellon University), Romain Leteurtre (Ecole Polytechnique Federale de Lausanne), Benjamin Striner (Carnegie Mellon University), Ammar Alanazi (King Abdulaziz City for Science and Technology), Abdullah Alghafis (King Abdulaziz City for Science and Technology), and Ozan K. Tonguz (Carnegie Mellon University)

Session 20: Machine Learning Application in Education II

Exploring the Landscape of Employers for Individuals with Autism Spectrum Disorder 1960
Kayleigh Hyde (Chapman University), Amy-Jane Griffiths (Chapman University), Cristina Giannantonio (Chapman University), Amy Hurley-Hanson (Chapman University), Sneha Mathur (Chapman University), and Erik Linstead (Chapman University)

Generating Near and Far Analogies for Educational Applications: Progress and Challenges 1967
Mark Boger (University of South Florida), Antonio Laverghetta Jr. (University of South Florida), Nikolai Fetisov (University of South Florida), and John Licato (University of South Florida)

Investigation of Factors Affecting Ownership the Household Informatics Equipment with CHAID Algorithm 1975
Mahmut Coskun (Turkish Telecom Inc.) and Halil Ibrahim Bülbül (Gazi University)

Graph-Based Analysis of Similarities between Word Frequency Distributions of Various Corpora for Complex Word Identification 1981
Yo Ehara (Shizuoka Institute of Science and Technology)

Session 21: Machine Learning in Advanced Machine Vision

Mass Estimation from Images using Deep Neural Network and Sparse Ground Truth 1986
Muhammad Hamdan (Iowa State University), Diane Rover (Iowa State University), Matthew Darr (Iowa State University), and John Just (Iowa State University)

Anyone here? Smart Embedded Low-Resolution Omnidirectional Video Sensor to Measure Room Occupancy 1992
Timothy Callemein (KU LEUVEN - EAVISE), Kristof Van Beeck (KU LEUVEN - EAVISE), and Toon Goedemé (KU LEUVEN - EAVISE)

Coarse Annotation Refinement for Segmentation of Dot-Matrix Batchcodes 2000
Ning Jia (Durham University), Christopher Holder (Durham University), Stephen Bonner (Durham University), and Boguslaw Obara (Durham University)

Evaluation of Deep Learning for Semantic Image Segmentation in Tool Condition Monitoring 2007
Benjamin Lutz (Friedrich-Alexander University), Dominik Kisskalt (Friedrich-Alexander University), Daniel Regulin (Siemens AG, Germany), Raven Reisch (Siemens AG, Germany), Andreas Schiffler (Siemens AG, Germany), and Jörg Franke (Friedrich-Alexander University)

Infrared and Visible Image Fusion via Multi-discriminators Wasserstein Generative Adversarial Network 2013
Jing Li (People's Public Security University of China), Hongtao Huo (People's Public Security University of China), Kejian Liu (People's Public Security University of China), Chang Li (Hefei University of Technology), Shuo Li (People's Public Security University of China), and Xin Yang (People's Public Security University of China)

Deep Diamond Re-ID 2019
Floris De Feyter (KU Leuven), Dries Hulens (KU Leuven), Bram Claes (Antwerp Labs), and Toon Goedeme (KU Leuven)

Fusing Visual and Textual Information to Determine Content Safety 2025
Rodrigo Leonardo (Universidad del Valle de Guatemala), Amber Hu (Yale University), Mohammad Uzair (National University of Science and Technology), Qiujing Lu (University of California Los Angeles), Iris Fu (GumGum Inc.), Keishin Nishiyama (GumGum Inc.), Sooraj Mangalath Subrahmannian (GumGum Inc.), and Divyaa Ravichandran (GumGum Inc.)
