Volume 11211

Proceedings of SPIE, 1605-7422, V. 11211

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonics in Dermatology and Plastic Surgery 2020*, edited by Bernard Choi, Haishan Zeng, Proceedings of SPIE Vol. 11211 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SPATIAL FREQUENCY DOMAIN IMAGING

- 11211 05 **Experimental integration of a spatial frequency domain spectroscopy and pulse cam system for quantifying changes in skin optical properties and vasculature among individuals with obesity** [11211-3]
- 11211 06 **Using Spatial Frequency Domain Imaging (SFDI) to quantify physiological changes of patients undergoing radiotherapy for breast cancer treatment** [11211-4]

SKIN CANCER

- 11211 08 **Multimodal optical imaging for in vivo discrimination of equivocal melanocytic skin lesions** [11211-6]
- 11211 09 **Visible light optical coherence microscopy for quantitative imaging of human skin in vivo** [11211-7]
- 11211 0A **Polarization sensitive optical coherence tomography for assessing skin roughness** [11211-8]

MACHINE LEARNING

- 11211 0B **Automatic classification of melanocytic skin tumors based on hyperparameters optimized by cross-validation using support vector machines** [11211-9]

THERAPEUTICS

- 11211 0M **A novel method for direct measurement of optical fluence of focused laser energy in ex-vivo skin** [11211-20]

OPTICAL COHERENCE TOMOGRAPHY

- 11211 0R **Depth-resolved investigation of multiple optical properties and wrinkle morphology in eye-corner area by multi-functional Jones matrix optical coherence tomography** [11211-25]

11211 0S **Handheld line-field confocal optical coherence tomography for dermatology** [11211-26]

SKIN CHARACTERIZATION/BIOLOGICAL RESPONSE

11211 0V **Rapid handheld screening device to detect skin and soft tissue infections** [11211-29]

11211 0X **Characterization of tattoos in human skin using pulsed photothermal radiometry and diffuse reflectance spectroscopy** [11211-31]

11211 0Z **Hemodynamics in traumatic bruises assessed by diffuse reflectance spectroscopy and photothermal radiometry** [11211-33]

11211 10 **Skimager for the objective erythema estimation in atopic dogs** [11211-35]

POSTER SESSION

11211 14 **Video-mosaicking of human skin in vivo using handheld line-field confocal optical coherence tomography** [11211-39]

11211 16 **Non-contact fast Mueller matrix measurement system for investigation of bio-tissues** [11211-42]
