Volume 11220

Proceedings of SPIE, 1605-7422, V. 11220

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Methods for Tumor Treatment and Detection: Mechanisms and Techniques in Photodynamic Therapy XXIX*, edited by David H. Kessel, Tayyaba Hasan, Proceedings of SPIE Vol. 11220 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

PHOTODYNAMIC THERAPY I

11220 02	Photodynamic therapy: apoptosis, paraptosis, and autophagy [11220-1]
----------	---

PHOTODYNAMIC THERAPY III

11220 0A	Development of photodynamic diagnosis and therapy for peritoneal dissemination using NIR fiber laser system [11220-9]
----------	--

PHOTODYNAMIC THERAPY IV

11220 0E	Light induced bacterial deactivation using graphene quantum dot [11220-13]
----------	---

PHOTODYNAMIC THERAPY V

11220 0I	Metronomic PDT induces innate and adaptive immune responses in murine models of skin cancer and pre-cancer [11220-17]
----------	--

PHOTODYNAMIC THERAPY VI

11220 0L	Use of 3-D photographic images to document changes in tumor volume following photodynamic therapy in patients with basal cell carcinoma of the skin [11220-20]
----------	---

POSTER SESSION

11220 0P	Photodynamic diagnosis with 5-aminolevulinic acid for intramucosal gastric cancer using green light [11220-25]
11220 0S	Method to determine tissue optical properties in anal canal during photodynamic therapy [11220-28]

11220 0V

Combined fluorescence and optoacoustic imaging for monitoring the efficiency of photodynamic therapy with BPD-based nanoconstructs [11220-31]
