Volume 11221

Proceedings of SPIE, 1605-7422, V. 11221

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Mechanisms of Photobiomodulation Therapy XV*, edited by Michael R. Hamblin, James D. Carroll, Praveen Arany, Proceedings of SPIE Vol. 11221 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 CELLULAR MECHANISMS OF PBM

11221 03 **Photobiomodulation promotes cell survival in diabetic wounded fibroblast cells** [11221-2]

SESSION 2 MODELING PBM DOSIMETRY

11221 09 **Review on clinical trial results of red and near infrared LED photobiomodulation** [11221-8]

11221 0A **Fluorescent light energy in wound healing: when is a photon something more?** [11221-9]

SESSION 3 MOLECULAR MECHANISMS OF PBM

11221 0D **Femtosecond transient absorption spectroscopy to study the effects of low irradiance light on cytochrome c and cytochrome c reductase** [11221-12]

11221 0E **Low irradiance light exposure alters the activity of key enzymes in the mitochondrial electron transport chain** [11221-13]

11221 0F **Effects of specific inhibitors and low irradiance visible light on the redox cycling of cytochrome c in isolated mitochondria using resonance Raman spectroscopy** [11221-14]

SESSION 4 PBM CLINICAL APPLICATIONS

11221 0L **40 Hz invisible spectral flicker and its potential use in Alzheimer's light therapy treatment** [11221-20]

POSTER SESSION

11221 0O **Effect of LED phototherapy on pain control after insertion of elastomeric separators in orthodontics patients: clinical trial** [11221-23]

- 11221 0P **Nanoconcentrations of 1,9-dimethylmethylene blue (DMMB) associated to laser, LED or polarized light are highly effective on AmPDT carried out in aerobes and aerotolerant anaerobes Gram-positive bacteria** [11221-24]
- 11221 0Q **Evaluation of optical redox ratio in Candida albicans cells exposed to photobiomodulation** [11221-25]
- 11221 0R **LED-bed therapy of cardiovascular disorders: a volunteer study** [11221-27]
