Volume 11223

Proceedings of SPIE, 1605-7422, V. 11223

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonic Diagnosis, Monitoring, Prevention, and Treatment of Infections and Inflammatory Diseases 2020*, edited by Tianhong Dai, Jürgen Popp, Mei X. Wu, Proceedings of SPIE Vol. 11223 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 PHOTONIC DIAGNOSIS I

11223 02 **Deuterium uptake in combination with Raman spectroscopy as a tool to investigate antibiotic susceptibility of bacteria (Invited Paper)** [11223-1]

SESSION 2 PHOTONIC DIAGNOSIS II

11223 08 **Non-contact Raman spectroscopic pH measurement of cerebrospinal fluid: in vivo rat and perimortem swine models (Invited Paper)** [11223-7]

11223 09 **The PVOH device: our first step on the path to small and very small physical embodiments of the PV[O]H algorithm** [11223-8]

SESSION 4 ANTIMICROBIAL PHOTODYNAMIC THERAPY

11223 0K **Photodynamic therapy: alternative in decontamination of surfaces** [11223-20]

SESSION 6 LIGHT-ASSISTED DELIVERY OF ANTIMICROBIALS

11223 0Q **Improving antibiotics' penetration and efficiency for treating biofilm infections by laser-induced vapor nanobubbles (Invited Paper)** [11223-26]

11223 0R **Photo-released drugs: a targeted treatment approach for arthritis (Invited Paper)** [11223-27]

11223 0S **New materials for laser welding of connective tissue and controlled release of antimicrobial principles** [11223-28]

SESSION 7 NEW MECHANISMS AND MISCELLANEOUS

11223 0T **Inhibiting staphylococcus aureus antibiotic resistance via photo-disassembly of membrane microdomains (Invited Paper)** [11223-29]

11223 0V **Investigation of active matrix-metaloproteinase-8 (aMMP-8) as a reference parameter for path control in antimicrobial photothermal therapy (aPTT) using a split-mouth design (Invited Paper)**
[11223-31]

POSTER SESSION

11223 15 **Optical properties of human gums after photodynamic therapy with methylene blue (in vitro)**
[11223-43]
