

PROCEEDINGS OF SPIE

MIPPR 2019: Multispectral Image Acquisition, Processing, and Analysis

Xinyu Zhang
Chao Pan
Hongshi Sang
Editors

2–3 November 2019
Wuhan, China

Organized by
Huazhong University of Science and Technology (China)
National Key Laboratory of Science and Technology on Multi-spectral Information Processing
(China)
Wuhan Institute of Technology (China)

Sponsored by
National Key Laboratory of Science and Technology on Multi-spectral Information Processing
(China)
Huazhong University of Science and Technology (China)
Wuhan Institute of Technology (China)
Automation Association of Hubei (China)

SPIE

Volume 11428

Proceedings of SPIE 0277-786X, V. 11428

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *MIPPR 2019: Multispectral Image Acquisition, Processing, and Analysis*, edited by Xinyu Zhang, Chao Pan, Hongshi Sang, Proceedings of SPIE Vol. 11428 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

vii	<i>Symposium Committees</i>
xi	<i>Introduction</i>

MULTISPECTRAL IMAGE ACQUISITION

11428 02	An electrically tunable focusing and filtering infrared liquid-crystal device for light-field imaging and spectral imaging [11428-1]
11428 03	Autofocusing imaging based on electrically controlled liquid-crystal microlens array [11428-2]
11428 04	MIMO radar three-dimensional imaging via joint time-space observation [11428-4]
11428 05	ISAR image visualization for aerospace targets [11428-8]
11428 06	Coherent ISAR imaging based on phase matching processing of complex range profile for procession space target [11428-10]
11428 07	Infrared and terahertz integration detection based on optical antennas [11428-11]
11428 08	Research on compressed light-field and infrared reflection characteristics of patterned metallic micro-nano-structure arrays [11428-13]
11428 09	Generation of vortex lightbeams [11428-14]
11428 0A	Modeling and simulation of DBRs based on a MEMS-FP array with a robust responsibility at different angles [11428-15]
11428 0B	A convolution neural network for reconstructing microgrid polarimeter imagery [11428-16]
11428 0C	Modeling and simulation of light reflection and transmission characteristics of electrically modulated infrared nano-apexes [11428-19]
11428 0D	Modeling and simulation of electro-modulation reflection and transmission characteristics of infrared optical antenna [11428-20]
11428 0E	Focusing behaviors of optical nanotip antenna array based on surface plasmons [11428-21]
11428 0F	Remote multi-object detection based on bounding box field [11428-25]

MULTISPECTRAL IMAGE PROCESSING AND ANALYSIS

- 11428 OG **A restoration method for the turbulent degraded images based on the salient edge selection and the L0 norm constraint [11428-103]**
- 11428 OH **Spectral group attention networks for hyperspectral image classification [11428-104]**
- 11428 OI **An accurate de-stripping method based on cubic Hermite spline interpolation and gradient information of stripes [11428-105]**
- 11428 OJ **A novel self-relearning approach for Landsat image change detection [11428-106]**
- 11428 OK **Research on target salient region unmixing method [11428-107]**
- 11428 OL **A new temporal high-pass adaptive filter nonuniformity correction based on rolling guidance filter [11428-112]**
- 11428 OM **An improved contrast fusion approach in gradient domain for low light level image enhancement [11428-113]**
- 11428 OO **SRNet: a cascade network to speckle reduction of SAR image [11428-116]**
- 11428 OQ **Hyperspectral face recognition based on SLRC for single sample problem [11428-118]**
- 11428 OR **Far-infrared pedestrian sequence segmentation based on time domain semantics [11428-119]**
- 11428 OT **Infrared spectrum image inversion method for augmenting data sets [11428-121]**
- 11428 OU **Similarity evaluation technology of spectral imaging simulation based on analytic hierarchy process model [11428-122]**
