PROCEEDINGS OF SPIE

MIPPR 2019: Parallel Processing of Images and Optimization Techniques; and Medical Imaging

Hong Sun
Bruce Hirsch
Chao Cai
Editors

2–3 November 2019
Wuhan, China

Organized by
Huazhong University of Science and Technology (China)
National Key Laboratory of Science and Technology on Multi-spectral Information Processing (China)
Wuhan Institute of Technology (China)

Sponsored by
National Key Laboratory of Science and Technology on Multi-spectral Information Processing (China)
Huazhong University of Science and Technology (China)
Wuhan Institute of Technology (China)
Automation Association of Hubei (China)

Published by
SPIE

Volume 11431

Proceedings of SPIE 0277-786X, V. 11431

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *MIPPR 2019: Parallel Processing of Images and Optimization Techniques; and Medical Imaging*, edited by Hong Sun, Bruce Hirsch, Chao Cai, Proceedings of SPIE Vol. 11431 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*

vii *Symposium Committees*

xi *Introduction*

PARALLEL PROCESSING OF IMAGES AND OPTIMIZATION TECHNIQUES

11431 02 **A real-time FPGA-based architecture of improved ORB** [11431-2]

11431 03 **Blind deblurring with image layer separation using relative smoothness** [11431-4]

11431 04 **Research on denoising technology of Generative Adversarial Networks (GAN) based on big data** [11431-5]

11431 05 **Synthetic aperture remove occlusion algorithm based on microlens array light field imaging** [11431-6]

11431 06 **New algorithm and its systolic implementation for digital correlation by using first-order moment** [11431-11]

11431 07 **Adaptive residual neural network for image super-resolution** [11431-12]

11431 08 **OpenCL-code generation framework for MobileNets with depthwise separable convolution and merged layers** [11431-14]

MEDICAL IMAGING AND PROCESSING

11431 09 **False positive reduction in lymph node detection by using convolutional neural network with multi-view input** [11431-101]

11431 0A **A novel exponential loss function for pathological lymph node image classification** [11431-103]

11431 0B **Accurate segmentation of bladder wall and tumor regions in MRI using stacked dilated U-Net with focal loss** [11431-104]

11431 0C **A novel spatial-frequency filtering scheme for x-ray angiograms with simultaneous denoising and enhancement** [11431-106]

11431 0D **Medical image segmentation based on tree-structured MRF in wavelet domain** [11431-108]

11431 0E **A graph TV minimization framework for cardiac motion analysis** [11431-111]

11431 0F **A novel algorithm based on mathematical morphology to detect degeneration of spinal images in MRI** [11431-112]

11431 0G **Research on scene temperature calibration method for medical infrared temperature measurement components** [11431-121]
