

PROCEEDINGS OF SPIE

# ***Twelfth International Conference on Machine Vision (ICMV 2019)***

**Wolfgang Osten  
Dmitry Nikolaev  
Jianhong Zhou**  
*Editors*

**16–18 November 2019  
Amsterdam, The Netherlands**

*Organized by*  
University of Electronic Science and Technology of China (China)  
Halmstad University (Sweden)  
Universidad de Barcelona (Spain)

*Sponsored by*  
American Science and Engineering Institute (United States)

*Published by*  
SPIE

**Volume 11433**

**Part One of Two Parts**

Proceedings of SPIE 0277-786X, V. 11433

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Twelfth International Conference on Machine Vision (ICMV 2019)*, edited by Wolfgang Osten, Dmitry Nikolaev, Jianhong Zhou, Proceedings of SPIE Vol. 11433 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

xi	<i>Authors</i>
xv	<i>Conference Committee</i>
xix	<i>Introduction</i>

## Part One

---

### FEATURE EXTRACTION AND MATCHING

---

11433 02	<b>Learning bag of spatio-temporal features for human interaction recognition</b> [11433-74]
11433 03	<b>Image selection based on low level properties for lifelog moment retrieval</b> [11433-30]
11433 04	<b>A ship target tracking algorithm based on deep learning and multiple features</b> [11433-138]
11433 05	<b>Aztec core symbol detection method based on connected components extraction and contour signature analysis</b> [11433-73]
11433 06	<b>Impact of geometrical restrictions in RANSAC sampling on the ID document classification</b> [11433-78]
11433 07	<b>Chebyshev multifractal signatures and their use in multifractal interpretation of SAR images of ice-covered sea areas</b> [11433-93]
11433 08	<b>Keyframe extraction using binary robust invariant scalable keypoint features</b> [11433-70]
11433 09	<b>An intelligent approach to identify parasitic eggs from a slender-billed's nest</b> [11433-67]

---

### TARGET DETECTION AND TRACKING

---

11433 0A	<b>Mobile application for receipt fraud detection based on optical character recognition</b> [11433-10]
11433 0B	<b>K-nearest neighbors based nonlinear process monitoring using kernel EPCA</b> [11433-41]
11433 0C	<b>Enhanced single shot detector with image sharpening for detection of knee joint</b> [11433-51]
11433 0D	<b>A method of fluorescent fibers detection on identity documents under ultraviolet light</b> [11433-60]

- 11433 OE **Learning to validate the quality of detected landmarks** [11433-114]
- 11433 OF **Improved non-maximum suppression for detecting overlapping objects** [11433-5]
- 11433 OG **Exploiting polar grid structure and object shadows for fast object detection in point clouds** [11433-27]
- 11433 OH **Long short-term memory networks based fall detection using unified pose estimation** [11433-16]
- 11433 OI **Single-sample augmentation framework for training Viola-Jones classifiers** [11433-99]
- 11433 OJ **A document skew detection method using fast Hough transform** [11433-69]
- 11433 OK **A method of detecting end-to-end curves of limited curvature** [11433-133]
- 11433 OL **Study on usability evaluation of medical software interface based on eye movement tracking technology** [11433-6]
- 11433 OM **Teaching a robot to draw: hand gesture demonstration based on human-robot interaction** [11433-126]

---

#### PATTERN RECOGNITION

- 11433 ON **Evaluating classifiers to determine user-preferred stops in a personalized recommender system** [11433-15]
- 11433 OO **Margin based knowledge distillation for mobile face recognition** [11433-40]
- 11433 OP **Human expression recognition using facial shape based Fourier descriptors fusion** [11433-48]
- 11433 OQ **PTLHAR: PoseNet and transfer learning for human activities recognition based on body articulations** [11433-120]
- 11433 OR **Local optimal oriented pattern for person independent facial expression recognition** [11433-68]
- 11433 OS **GAIT analysis: 3D pose estimation and prediction in defence applications using pattern recognition** [11433-85]
- 11433 OT **Global evaluate-and-rescale network: an efficient model for action recognition** [11433-76]
- 11433 OU **Multi-channels CNN temporal features for depth-based action recognition** [11433-98]
- 11433 OV **Improving open-set person reidentification by statistics-driven gallery refinement** [11433-101]

11433 OW **Training the convolutional neural network with statistical dependence of the response on the input data distortion** [11433-108]

---

#### IMAGE IDENTIFICATION

---

11433 OX **Unsupervised domain adaptation for DNN-based automated harvesting** [11433-112]

11433 OY **The analysis of projective transformation algorithms for image recognition on mobile devices** [11433-128]

11433 OZ **Machine learning models reproducibility and validation for MR images recognition** [11433-115]

11433 10 **Improving object recognition of CNNs with multiple queries and HMMs** [11433-94]

11433 11 **Recognition of images of Korean characters using embedded networks** [11433-106]

11433 12 **Synthetic images generation for text detection and recognition in the wild** [11433-29]

11433 13 **Real-time identification of animals found in domestic areas of Europe** [11433-9]

11433 14 **A low computational approach for price tag recognition** [11433-57]

11433 15 **Synthetic dataset generation for text recognition with generative adversarial networks** [11433-62]

11433 16 **A new approach of object recognition in encrypted images using convolutional neural network** [11433-132]

---

#### IMAGE SEGMENTATION

---

11433 17 **Monospaced font detection using character segmentation and Fourier transform** [11433-88]

11433 18 **Multi-modal brain tumor segmentation utilizing convolutional neural networks** [11433-55]

11433 19 **Comparison of single channel indices for U-Net based segmentation of vegetation in satellite images** [11433-8]

11433 1A **Automatic artery/vein classification in colour retinal images** [11433-52]

11433 1B **A deep interactive segmentation method with user interaction-based attention module and polar transformation** [11433-20]

11433 1C **Semantic segmentation networks of 3D point clouds for RGB-D indoor scenes** [11433-56]

- 11433 1D **FMRI image segmentation based on hidden Markov random field with directional statistics observation model** [11433-119]
- 11433 1E **Segmentation criteria in the problem of porosity determination based on CT scans** [11433-61]

---

#### IMAGE ANALYSIS AND METHOD

---

- 11433 1F **DPCA: denoising point cloud auto-encoder for 6D object detection** [11433-25]
- 11433 1G **Memorability based image to image translation** [11433-17]
- 11433 1H **Sparse representation of images using substitution of wavelet by patches** [11433-66]
- 11433 1I **A comparative analysis of SVM, K-NN, and decision trees for high resolution satellite image scene classification** [11433-54]
- 11433 1J **Comparative study of upsampling methods for super-resolution in remote sensing** [11433-44]
- 11433 1K **Wavelet domain residual proximity search for image detail enhancement** [11433-92]
- 11433 1L **Dimensionality reduction of hyperspectral images based on the linear mixture model and dimensionality estimation** [11433-95]
- 11433 1M **Optical-to-SAR image registration using a combination of CNN descriptors and cross-correlation coefficient** [11433-63]
- 11433 1N **Fast projective image rectification for planar objects with Manhattan structure** [11433-123]
- 11433 1O **Multi-path learnable wavelet neural network for image classification** [11433-14]
- 11433 1P **Deep stacked sparse auto-encoder based on patches for image classification** [11433-131]
- 11433 1Q **Evaluating CNN interpretability on sketch classification** [11433-118]

## Part Two

---

#### IMAGE RECONSTRUCTION AND IMAGING SYSTEM

---

- 11433 1R **Dense urban scene reconstruction using stereo depth image triangulation** [11433-21]
- 11433 1S **The algorithm for reconstruction piecewise constant image distorted by a linear transformation** [11433-28]
- 11433 1T **CNN-based leukocyte detection for microscopy imaging at 10x magnification objective lens** [11433-122]

- 11433 1U **Explainable 3D convolutional neural network using GMM encoding** [11433-43]
- 11433 1V **Simultaneous iterative reconstruction method for high resolution x-ray phase-contrast tomography** [11433-33]
- 11433 1W **Iterative tomography reconstruction in a limited field of view** [11433-50]
- 11433 1X **3D imaging endoscopy using small-size prism-based stereo systems** [11433-23]

---

#### CONVOLUTIONAL NEURAL NETWORK AND IMAGE APPLICATION

---

- 11433 1Y **Video player controlled by gesture based on convolutional neural network** [11433-127]
- 11433 1Z **Detecting pneumonia in chest radiographs using convolutional neural networks** [11433-116]
- 11433 20 **Classification of corrosion and coating damages on bridge constructions from images using convolutional neural networks** [11433-45]
- 11433 21 **Interpretable diagnosis of breast cancer from histological images using Siamese neural networks** [11433-58]
- 11433 22 **Transfer of a high-level knowledge in HoughNet neural network** [11433-107]
- 11433 23 **ICPS-net: an end-to-end RGB-based indoor camera positioning system using deep convolutional neural networks** [11433-75]
- 11433 24 **Integrated convolutional neural network model with statistical moments layer for vehicle classification** [11433-89]
- 11433 25 **Convolutional neural network for early detection of gastric cancer by endoscopic video analysis** [11433-102]
- 11433 26 **Convolutional neural network weights regularization via orthogonalization** [11433-79]
- 11433 27 **Real-time road surface marking detection from a bird's-eye view image using convolutional neural networks** [11433-3]

---

#### COMPUTER VISION AND VISUALIZATION

---

- 11433 28 **Adversarial computer vision: a current snapshot** [11433-121]
- 11433 29 **Non-static object reconstruction system based on multiple RGB-D cameras** [11433-4]
- 11433 2A **Monocular visual odometry based on hybrid parameterization** [11433-22]

- 11433 2B **Automated visual inspection algorithm for the reflection detection and removing in image sequences** [11433-80]
- 11433 2C **Multiple light source dataset for colour research** [11433-109]
- 11433 2D **Depth perception tendencies on a widescreen display: an experimental study** [11433-124]
- 11433 2E **Performance of bottom-up visual attention models when compared in contextless and context awareness scenarios** [11433-34]
- 11433 2F **Design and novel control solution for a modular mechatronic demonstrator with video feedback used in research and education** [11433-139]
- 11433 2G **Impact of mobile device sensors errors on SLAM problem solution** [11433-13]
- 11433 2H **Topological data analysis in computer vision** [11433-140]

---

#### VIDEO PROCESSING TECHNOLOGY AND METHOD

---

- 11433 2I **Preliminary design for Earth observation video satellites to apply predictable trajectory parameters in video compression techniques** [11433-46]
- 11433 2J **Content based video retrieval using histogram of gradients and frame fusion** [11433-65]
- 11433 2K **Valid depth data extraction and correction for time-of-flight camera** [11433-53]
- 11433 2L **Methods of weighted combination for text field recognition in a video stream** [11433-90]
- 11433 2M **Next integrated result modelling for stopping the text field recognition process in a video using a result model with per-character alternatives** [11433-103]
- 11433 2N **MIDV-2019: challenges of the modern mobile-based document OCR** [11433-64]
- 11433 2O **Digital video forgery detection based on statistical features calculation** [11433-111]
- 11433 2P **Obtaining a noise-free image based on an analysis of an unstabilized video sequence under conditions of a probable optical flow failure** [11433-110]
- 11433 2Q **Subjective assessment of the quality of static and video images from mobile phones** [11433-84]

---

#### COMPUTER GRAPHICS AND PHOTOGRAPHY

---

- 11433 2R **Refined image colorization using capsule generative adversarial networks** [11433-19]

- 11433 2S     **Wearable camera-based human absolute localization in large warehouses** [11433-96]
- 11433 2T     **Stereo camera-based computer vision system of a robot** [11433-38]
- 11433 2U     **Unsupervised generation of artistic representations** [11433-32]
- 11433 2V     **Where to drive: free space detection with one fisheye camera** [11433-12]
- 11433 2W     **A calibration method for automotive augmented reality head-up displays using a chessboard and warping maps** [11433-26]
- 11433 2X     **Two-step technology for improving details of images captured with mobile devices** [11433-24]
- 11433 2Y     **Optimal measurements strategy in micro-tomography: amount of data and representative elementary volume assessment and application to porous media** [11433-1]
- 11433 2Z     **M.A.G.E.C: machine assisted geometry extraction and creation** [11433-100]
- 11433 30     **Orthotropic artifacts suppression for THz and x-ray images using guided filtering** [11433-49]
- 11433 31     **Method for numeric estimation of Cupping effect on CT images** [11433-37]
- 11433 32     **1-point RANSAC for circular motion estimation in computed tomography (CT)** [11433-125]
- 11433 33     **Dense structure and motion recovery from scanning electron microscope image sequences based on factorization** [11433-7]
- 11433 34     **GPU paralleled transformation and quantization for wavelet-based bitplane coding of multiresolution meshes** [11433-134]

**IMAGE PROCESSING TECHNOLOGY AND APPLICATION**

---

- 11433 35     **Conditional GANs for painting generation** [11433-18]
- 11433 36     **Large scale stencil registration method based on two-node tree** [11433-35]
- 11433 37     **Deformable 3D registration with PWC-net optical flow and textured node correspondences** [11433-113]
- 11433 38     **Depth-map inpainting using learned patch-based propagation** [11433-105]
- 11433 39     **Image resizing enhancement with DCT coefficients** [11433-81]
- 11433 3A     **Comparison of scanned administrative document images** [11433-86]

- 11433 3B **Theory and methodology of multifractal interpretation of aerospace images** [11433-72]
- 11433 3C **Estimation of extent of trees and biomass infestation of the suburban forest of Thessaloniki (Seich Sou) using UAV imagery and combining R-CNNs and multichannel texture analysis** [11433-11]
- 11433 3D **Learning signer-invariant representations with adversarial training** [11433-117]
- 11433 3E **Possibilistic registration based on unsupervised classification (BMPRUC)** [11433-135]
- 11433 3F **Localization of characters horizontal bounds in text line images with fully convolutional network** [11433-104]
- 11433 3G **Fast approach for QR code localization on images using Viola-Jones method** [11433-91]
- 11433 3H **Comparative study of feature detector and descriptor methods for registration** [11433-136]

---

#### COMPUTER AND INFORMATION TECHNOLOGY

---

- 11433 3I **Complexity-aware loss function for fast neural networks with early exits** [11433-31]
- 11433 3J **Bipolar morphological neural networks: convolution without multiplication** [11433-77]
- 11433 3K **Topic aspects-based generative mixture model for movie recommendation system using deep convolutional network** [11433-2]
- 11433 3L **Deep learning self-calibration from planes** [11433-42]
- 11433 3M **Steganographic generative adversarial networks** [11433-97]
- 11433 3N **A survey on generative adversarial networks and their variants methods** [11433-130]
- 11433 3O **Chinese font translation with improved Wasserstein generative adversarial network** [11433-83]
