2019 IEEE 3rd Conference on Energy Internet and Energy System Integration (EI2 2019)

Changsha, China
8 – 10 November 2019

Pages 1-665

IEEE Catalog Number: CFP19K59-POD
ISBN: 978-1-7281-3138-2

Table of Contents

SuA-01 Study on Off-Design Characteristics of Energy Hub 1
SuA-02 Research on Integrated Energy Management and Control System Architecture Based on Local Energy Internet 6
SuA-03 Research on Intelligent Autonomous Control Technology for Low-Voltage Multi-Terminal DC Power Distribution System 12
SuA-04 A Start-Up Inrush Current Suppression Method Based on Dual Parameters Soft-Start for PWM Rectifier 18
SuA-05 DC Grid Protection and Post-Fault Restoration Scheme Using AC Circuit Breakers 24
SuA-06 Optimal Allocation Method of Energy Stations of Large Park Integral Energy Systems 29
SuA-07 A New Switch Vector Scheme Control for Three-Level NPC Inverter 35
SuA-08 Low-Carbon Economic Dispatching for Integrated Energy System Based on Coordinated Optimization of Power to Gas and Carbon Capture Power Plant 39
SuA-09 Dynamic Harmonic Modeling and Characteristics Analysis of Photovoltaic Converter 44
SuA-10 Battery Energy Storage Power Station Based Suppression Method for Power System Broadband Oscillation 50
SuA-11 Modeling and Characteristics Analysis of Solar Cell-Supercapacitor Device Under Variable Illumination 55
SuA-12 Optimal Grid-Connected Storage Planning in Distribution Network Integated With Renewable Distributed Generations 61
SuA-13 A Control Strategy of Energy Storage System Considering Time Sequence Matching Degree Between Photovoltaic and Load 67
SuA-14 Electromagnetic Transient Model and Parameters Identification of PMSG-Based Wind Farm 72
SuA-15 DC Power Supply Control System Based on Hybrid Energy Storage 78
SuA-16 Hierarchical Optimal Planning of Battery Energy Storage Systems in Radial Distribution Networks 84
SuA-17 Active Reactive Power Control Strategy Based on Electrochemical Energy Storage Power Station 90
SuA-18 Reactive Power Control Strategy Based on Electrochemical Energy Storage Power Plant to Resist the Risk of Commutation Failure. 95
SuA-19 Impact of Charging Station Operator (CSO) on V2G Method for Primary Frequency Control (PFC) in An Industrial Microgrid 100
SuA-20 A Method of Selecting Charging Station Location of Electric Vehicle Based on Prospect Theory 106
SuA-21 Stabilizing Frequency of Microgrid Integrated With Electric Vehicles By Droop Control 112
SuB-01 Practices and Challenge on Planning With Large-Scale Renewable Energy Grid Integration 118
SuB-02 An Improved Method for Calculating Power Transmission Equipment Loss and Hot Spot Temperature in Distribution Network Under Harmonic Disturbance 122
SuB-03 Model Construction of the Electric Methane Generation Based on Biocatalyst 126
SuB-04 Classification of Consumer Behavior Analysis in Transformer Areas Under the Integrated Energy Environment 132
SuB-05 Life Assessment Study on Distribution Electric Power Transmission Equipment Based on Harmonic Modified Hot Spot Temperature Calculating Model 138
SuB-06 Optimized Design of Renewable Energy CCHP System Combined With Exergy Efficiency 142
SuB-07 Comparison of Strategies for Operational Flexibility Enhancement of Combined Heat and Power Plants 148
SuB-08 Research on Application of Power Material Bidding and Supplier Service Quality Evaluation Based on LCC 153
SuB-09 A Numerical Analysis of Power Consumption Differences Between Planning and Operation Stages Using Mutual Information 159
SuB-10 Study on Calibration System for Merging Unit Test Equipments 165
SuB-11 Applicability Evaluation of Wind Power Aggregation Models for Bulk System Dynamic Analysis 171
SuB-12 Modeling of Aggregated Wind Power Generation's Active Participation to System Frequency Regulation 176
SuB-13 Tech-Economic Evaluation of Typical Distribution Network Structures for Planning 182
SuB-14 Economic Analysis of Energy Storage System Based on LCC 188
SuB-15 Distributed Generators Access System Evaluation and Software Design Supporting Integrated Energy Services 193
SaC-01 Multi-Objective Security Constrained Dynamic Optimal Dispatch With Regenerative Clean Energy 199
SaC-02 Generalized Inverse Optimal Power Flow Calculation of Electrothermal Coupled Multi-Energy Flow System Contained Ground Source Heat Pump 207
SaC-03 A Semi-Smooth Projected Levenberg-Marquardt Power Flow Method to Cope With the Constraints Exchange Issue 213
SaC-04 Precise Load Curtailment Simulation United With Power System Simulation 219
SaC-05 Multi-Time Scale Source-Load-Energy Storage Coordination Dispatch Model With Highly Penetrated Wind Power 225
SaC-06 Study on the Correlation Between Internal and External Transient Phenomena Caused By Disconnector Operation in GIS 231
SaC-07 A Synchrophasor Estimation of Power Systems Under Out-Of-Band Interference 237

SaC-08 Interpretation of Stability Assessment Machine Learning Models Based on Shapley Value ... 243
SaC-09 Evaluation of Commutation Failure Risk for HVDC Caused By Harmonic Voltage ... 248
SaC-10 Effect of SF6 Liquid Drops on Electric Field Distribution of Porcelain Bushing ... 253
SaC-11 A Simplified Analysis Method of Voltage Stability Suitable for Large Power System With VSC-HVDC Connection for Offshore Wind Power ... 258
SaC-12 Power System Transient Stability Assessment Based on Bayesian Optimized Lightgbm ... 263
SaC-13 Comprehensive Evaluation of Household Energy Consumption Based on Least Absolute Shrinkage and Selection Operator Method 269
SaC-14 Three-Dimensional Structure Simulation of Strong Oil Air-Cooled Transformer and Finite Element Analysis of Internal Temperature Fluid Field ... 273
SaC-15 Dynamic Optimization for Generator Start-Up in Network Reconfiguration ... 279
SaC-16 Optimal Power-Gas Flow of Integrated Electricity and Natural Gas System: A Sequential MISOCP Approach ... 283
SaC-17 Electricity Consumption Patterns Analysis Using A Shape-Based Clustering Method Based on Seasonal Decomposition and Parallel Computing ... 289
SaC-18 Optimal Operation of A Multi-Energy Microgrid With Multiple Demand Response Programs ... 295
SaC-19 Study on Optimal Operation of Integrated Energy System Considering New Energy Incentive Mechanism ... 301
SaC-20 Feedforward Control Strategy of LCC-HVDC Receiving End Based on Synchronous Condenser Excitation Current ... 307
SaC-21 Optimal Operation of Electricity-Natural Gas Coupled System Considering Uncertainty of Demand Response ... 313
SaC-22 Dynamic Economic Dispatch of AC/DC Hybrid Microgrid Based on Consensus Algorithm ... 319
SaC-23 Minimum Startup Method of DC Near-Field Thermal Power Unit Based on Unit Voltage Supporting Effect ... 325
SaC-24 Multi-Stage Time-Ahead Optimal Scheduling of Multiple Resources Under the Presence of IPS ... 330
SaC-25 Distributed Optimal Economic Dispatch Based on Hierarchical Group Consensus Algorithm in Combined Heat and Power System ... 336
SaC-26 Automatic Generation Control of Power System Using Deep Neural Network ... 342
SaC-27 A Reliable Approach to Protect and Control of Wind Solar Hybrid DC Microgrids ... 348
SaC-28 Online Monitoring and Optimization Method for Power Oscillation Control of Steam Turbine ... 354
SaC-29 Frequency Response Enhance Control Method Based on Two-Step MPC for VSG ... 359
SuD-01 Optimization of SRM Direct Instantaneous Torque Control Strategy Based on Improved Firefly Algorithm ... 364
SuD-02 Operation Strategy of A Combined System Consists of Multi-Type Hydropower and Wind-Solar ... 369
SuD-03 Incremental Distribution Network Planning By Considering Electric Vehicle Charging Stations and Distributed Generators ... 375
SuD-04 Optimal Planning and Sizing of BESS for Wind Energy Ramp Rate Control Through DES Initiated Large Data Clustering and PSO Technique ... 381
SuD-05 Maximum PV Access Capacity Planning Method for Rural Power Grid Considering Overload Risk ... 387
SuE-01 Research on Control Strategy of Grid-Connected Inverter in Microgrid System ... 392
SuE-02 Pillar Industry Judgment Based on Big Data ... 397
SuE-03 Research on the Energy Internet Under the Background of Ubiquitous Power Internet of Things ... 403
SuE-04 Distributed Predictive Control for Cyber-Physical Systems With Probabilistic Input Constraints ... 408
SuE-05 Fault Diagnosis and Operation and Maintenance Matching of PMSG for Wind Power Generation ... 413
SuE-06 Cyber-Physical-Social Systems for Wind Power Operation and Maintenance ... 419
SuE-07 An Evaluation Method of Intelligent Wind Power Operation and Maintenance Based on Cyber-Physical-Social Systems ... 424
SuE-08 Information Value Based on the Scenario of Wind Power Trading in Electricity Markets ... 429
SuF-01 Research on Ubiquitous Power Internet of Things Architecture ... 435
SuF-02 The Ubiquitous Internet of Things in Power System Based on Dynamic and Reconfigurable ROF Technology ... 440
SuF-03 Research of Multi-Source Perception and Intelligent Diagnosis Technology of Outdoor Installation Protection Based on Data Syncretism ... 445
SuF-04 Airborne Defects Auxiliary Identification Technology of Transmission Line Inspection Based on Edge Calculation ... 451
SuF-05 Edge-Computing-Driven Autonomous Ubiquitous Internet of Things in Electricity: Architecture and Challenges ... 456
SuF-06 Research on Non-Intrusive Load Identification Technology Based on Deep Learning ... 462
SuF-07 Research on Design and Key Technology of New Generation Multi-Mcus Smart Meter ... 468
SuG-01 Research on Coordinated Control of Low-Voltage Multi-Terminal DC Distribution System Based on Model Predictive Control ... 474
SuG-02 Optimal Energy Resource Allocation Model in Provincial Electricity Market ... 480
SuG-03 Generalized Synthesis Load Model Considering Lithium-Ion Battery ... 486
SuG-04 Day-Ahead and Intraday Coordinated Scheduling Model Considering Flexible Load Response Uncertainty ... 491
SuG-05 Short-Term Load Forecasting Using Broad Learning System ... 497

SuG-06 Agent-Based Simulation for Electric Vehicle Aggregators' Bidding and Pricing Strategy Considering Reserve Provision and EV Response ... 502
SuG-07 Optimal Investment of Mobile Energy Storage Based on Life Cycle Cost-Benefit Analysis ... 508
SuG-08 A Review on Virtual Power Plants Interactive Resource Characteristics and Scheduling Optimization ... 514
SuG-09 Precise Analysis of Interruption Response Rate and Interruptible Capacity of Large Users ... 520
SuG-10 Approach to Identifying Behind-The-Meter Wind Power: A Case Study in Northern Ireland ... 525
SuG-11 Determining Penetration of Distributed Generation in Distribution Networks Based on Quantification of Impacts ... 531
SuG-12 Research on Leakage Current Filtering Method of Low Voltage Distribution Network Based on IOT ... 537
SuG-13 Comparison for Development of Demand Response Between China and American Along With Situation Analysis in China ... 542
SuG-14 Optimal Allocation of Virtual Inertia and Damping for Energy Storage ... 547
SuG-15 An Improved Vector Control Strategy of VSC-HVDC Connected to Weak Power Grid ... 553
SuG-16 Precise Dispatch Control of Energy Storage to Enhance Renewable Energy Consumption ... 559
SuG-17 Deep Neural Network in Sequence to Short Sequence Form for Non-Intrusive Load Monitoring ... 565
SuG-18 Coordinated Operation of Active Distribution Network Considering Customers' Reliability Requirements ... 571
SuG-19 Optimal Investment Planning of Distribution Network Considering Customers' Reliability Requirements ... 577
SuG-20 Single Algorithm Mpso Based Solar and Wind Mppt Control and Integrated With Fuzzy Controller for Grid Integration ... 583
SuG-21 Dispatching Potential Evaluation of Thermostatically Controlled Loads Based on Realistic Customer Electricity Data in China ... 589
SuG-22 Evaluation Model of Load Regulation Value for Consumers in the Orderly Power Utilization ... 594
SuH-01 Development Model and Path of Future Power Grids Under the Ubiquitous Electrical Internet of Things ... 599
SuH-02 Energy Internet System Research Based on Development Trend of Urban Energy System ... 604
SuH-03 Research and Design of Business Model for Power Demand Response Business ... 610
SuH-04 Study on Carbon Emissions and Generation Right Trading Joint With Wind Power Consumption Considered ... 614
SuH-05 Analysis of Peer-To-Peer (P2P) Electricity Market and Piclo's Local Matching Trading Platform in UK ... 619
SuH-06 A Cooperative Energy Trading Model for Multi-Energy Microgrid Cluster in An Active Distribution Network ... 625
SuH-07 Blockchain Technology Based Decentralized Energy Trading for Multiple-Microgrid Systems ... 631
SuH-08 Optimal Capacity Allocation and Investment Analysis of Energy Storage System Considering Multi-Investors ... 637
SuH-09 Prosumers P2P Transaction Decision Considering Network Constraints ... 643
SuH-10 Distribution Locational Marginal Pricing for Active Network Management Considering High Penetration of Distributed Energy Resources ... 648
SuH-11 Many-To-Many Energy Trading Decision Based on Intelligent Contract and Auction Mechanism ... 654
SuH-12 Design of Electric Power Spot Market Mechanism to Promote Renewable Energy Consumption ... 660
SuH-13 Medium and Long Term Trading Portfolio Optimizing Decision of Power Grid Company Under Renewable Energy Quota ... 666
SuH-14 A Cooperative Game Based Fair-Efficient Trading Model in Global Green Energy Market ... 672
SuH-15 Research on Pricing Strategy of EV Charging Load Agent in Residential Areas Considering Peak-Shifting and Valley-Filling ... 677
SuH-16 Bidding of Retail Electricity Market Considering Uncertainty of Forecasted Nodal Price ... 683
SuH-17 Power Purchasing Decision of Grid Company Considering Power Deviation Under Renewable Energy Quota ... 688
SuH-18 Collaborative Detection of Bad Metering Data With Edge Computing ... 693
SuH-19 Locational Marginal Price Model Considering Multi-Dimensional Characteristics of Generators ... 699
SuI-01 Maximum Traveling-Wave-Based Fault Location for Meshed MTDC Networks ... 703
SuI-02 Wind Turbine Blade Inspection Based on Unmanned Aerial Vehicle(UAV) Visual Systems ... 708
SuI-03 Online Adaptive Learning Framework for Personalized Remaining Useful Life Prediction in A Heterogeneous Population ... 714
SuI-04 Online Diagnosis for Transformer Winding Deformation Based on Information Entropy and SVM ... 720
SuI-05 Risk Assessment of Commutation Failure Caused By Inrush Current Based on Multi-Principal Elements Modal Analysis ... 726
SuI-06 Faults Detection and Identification Based on Robust Residual Generation for A Single-Phase PWM Rectifier ... 732
SuI-07 Wideband Frequency Harmonic Resonance Analysis and Suppression Method of Power Grid ... 737
SuI-08 A Retrieval Method of Transformer Fault Case Based on Set Pair Analysis ... 743
SuI-09 Fault Diagnosis Using Deep Convolutional Neural Network With Dynamic Computer-Visualised Power Flow ... 749
SuI-10 Research on Multi-Variable Grey Prediction Model for Icing Thickness ... 754
SuI-11 Identification of Power Angle Instability and Transient Voltage Instability Based on Deep Learning ... 759
SuI-12 A Steady-State Alarm Analysis Approach Base on Finite Automata and Moving Window Algorithm ... 765
SuI-13 Research on Simulation Characteristics of Cascaded Multilevel SVG ... 770
SuI-14 Research on Reliability of Residual Current Operated Protective Device ... 775

SuI-15 Research on the Dynamic Capture By Particle Trap in 1100 Kv Gas Insulated Transmission Line for Metal Particles ... 779
SuI-16 Research on Cable Partial Discharge Location Method Based on Self-Constructing Mother Wavelet ... 784
SuI-17 Fault Diagnosis of Power Transformer Based on RVFL Model ... 788
SuI-18 Petri Net Based Intelligent Substation Fault Diagnosis ... 794
SuI-19 Research on Prediction Model of Insulation Failure Rate of Power Transformer Considering Real-Time Aging State ... 800
SuI-20 On-Line Resonance Measurement of Generator Stator Insulation Considering Damping Coefficient of Arc Suppression Coil ... 806
SuI-21 Negative Sample Generation of Bushing Fault Diagnose Based on Cyclegan ... 811
SuI-22 Wildfire Early Warning of Power Grid Failure Rate Based on Modified Ellipse Model ... 815
SuI-23 Prediction of Breaking Probability of Transmission Line Galloping Under Ice Storm Disaster ... 820
SuI-24 Research on Reliability of Transformer Water Mist Fire Extinguishing Device ... 826
SuI-25 Heavy Precipitation Numerical Prediction Model Based on Himawari-8 Sounder Data Assimilation: A Case Study ... 831
SuI-26 Influence of Filter Reactance on Input and Output Characteristics of DC De-Icer ... 836
SuI-27 Analysis of Temporal-Spatial Characteristics of Wildfire in Hunan Province During Qingming Festival ... 842
SuI-28 A Multi-Temporal Anomaly Analysis Wildfire Detection Method for Transmission Lines ... 846
SuI-29 Multiple Time-Scale Characteristics Analysis of Rainfall in Hunan Province Based on Ensemble Empirical Mode Decomposition ... 851
SuI-30 SO2 Concentration Prediction in Atmospheric Based on CEEMDAN-ApEn-RBFNN-BPNN Algorithm ... 856
SuI-31 Study on the Mechanical Performance of Anti-Thunder Composite Insulator for Distribution Line ... 862
SuI-32 Studies on Big Data Mining Techniques in Wildfire Prevention for Power System ... 866
SuI-33 Risk Analysis of Wild Fire on Electric Grid Transmission Lines Considering Cascading Failure ... 872
SuI-34 Design Method of Modular Multilevel Real-Time On-Line Anti-Icing and Ice-Melting Equipment Based on Self-Ice-Melting Conductors ... 877
SuI-35 Islanding Detection Method for Inverter Cluster Based on Interharmonic Impedance Measurement ... 883
SuI-36 Distribution Line Fault Location Method Based on Multi Terminal Information Fusion and Filtering Estimation ... 889
SuI-37 Traveling Wave Line Selection Method Based on Multi-Terminal Information Fusion and Artificial Neural Network ... 894
SuI-38 Accurate Modeling and Simulation of Distribution Network Engineering Application ... 899
SuI-39 Fault Diagnosis of Distribution Network Considering Multiple Source Information ... 904
SuJ-01 Research on Terminal Security Technology of Ubiquitous Power Internet of Things Based on PUF and SM3 ... 910
SuJ-02 Cyber Security Protection of Distribution Automation System Based on Hybrid Encryption Algorithms ... 916
SuK-01 Coordinated Control Strategy for the Multiple Single Phase Converters in the Series Side of Distributed Power Flow Controller ... 921
SuK-02 Real-Time Simulation Modeling Study of the HVDC Circuit Breaker Based on Nodal Dynamic Equation ... 927
SuK-03 A Novel Synchronous Reference Frame Transformation Technique for Background Harmonics Elimination and Its Application ... 933
SuK-04 Fractional-Order Sliding Mode Control Strategy for Quasi-Z Source Photovoltaic Grid-Connected Inverter ... 939
SuK-05 Commutation Torque Ripple Suppression of BLDCM Based on Quasi-Y-Source Net ... 944
SuK-06 Individual Blade Pitch Control for Floating Wind Turbine Based on RBF-SMC ... 949
SuK-07 Synergetic Controller Design for the LFC in Interconnected Hydraulic-Thermal Power System ... 954
SuK-08 A Multi-Objective Model for PMU Placement Considering Redundancy in the Presence of Line Outages ... 960
SuK-09 Research on Zero-Potential Live Working Method Based on Active Inverter ... 966
SuK-10 Design and Implementation of Distribution Network Planning System Based on GIS Automatic Drawing Technology ... 971
SuK-11 Correlation Analysis of Wind and Photovoltaic Power Based on Mixed Copula Theory and Its Application Into Optimum Capacity Allocation ... 976
SuK-12 Optimal Reconfiguration of PV Array Under Mismatch Conditions Using Simulated Annealing Algorithm ... 981
SuK-13 Study on SVG Reactive Power Compensation Based on Sliding Mode Variable Structure and Internal Model Control ... 987
SuK-14 A Two-Stage Microgrid Reconfiguration Model With Mobile Energy Storage ... 992
SuK-15 Research on Reliability Optimization Method of Disconnecting Circuit Breakers ... 997
SuK-16 A Novel Method for Calculating Ground Return Impedance of Overhead Lines ... 1003
SuK-17 Study for Distributed Power Flow Controller Investment ... 1008
SuK-18 The Quantitative Assessment Method for Flexibility Adjustment of Self-Supplied Power Plants ... 1012
PoA-01 Analysis and Control of Isolated Modular Multilevel DC_DC Converter Under Asymmetric Arm Parameter Conditions ... 1018
PoA-02 Stability Analysis of Energy Routing System Considering Drop Control ... 1024
PoA-03 Integrated Droop Control Strategy for Parallel Operation of Solid State Transformers in Intelligent Distribution Network ... 1030
PoA-04 A Study on Energy Management Research for Ubiquitous Power Internet of Things ... 1036
PoA-05 Coordinated Optimization Scheduling for Photo-Voltaic Storage Home Energy Management System Considering User Satisfaction ... 1042

PoA-06 Overall Optimization and Design of Combined Cooling Heating and Power System 1047
PoA-07 Review on Technologies of Compressed Air Energy Storage in Aquifers 1053
PoA-08 Research on Influence Factors of Primary Frequency Regulation Contribution Electric Energy of Hydropower Unit 1058
PoA-09 The Rmodynamic Analysis of Integrated Energy System Based on Fuel Cell A Comparison Research 1064
PoA-10 Dispatch Strategies of Distributed Tri-Generation System in the Context of Energy Internet 1069
PoA-11 A High-Efficiency Air-Cooling and Waste Heat Utilization System for 100Mvar STATCOM 1075
PoA-12 Control Strategy of Energy Storage Buffer System for Charging Station Based on V2G 1079
PoA-13 An Indirect Method for Measuring Transformer Residual Magnetism 1084
PoA-14 Study on Temperature Rise of Solid Insulated Energy Transfer Equipment Under Harmonic Actions 1088
PoA-15 Summary of Energy Storage Systems and Renewable Energy Participation in AGC Research 1093
PoA-16 Research on the Dispatch Proportion of Battery Capacity in Photovoltaic Primary Frequency Control 1098
PoA-17 Study on Construction Scheme of Power Grid Side Storage Station 1104
PoA-18 Battery Energy Storage System Participates in Power Market Analysis Based on Energy Distribution 1108
PoA-19 Electricity Charge Saved for Industrial and Commercial Utilizing Cloud Energy Storage Services 1113
PoA-20 Modeling and Simulation of Hydrogeneration System With Doubly Fed Generator 1117
PoA-21 Research on the Loading Capacity of Solid Insulated Energy Transfer Equipment Under Harmonic Actions 1121
PoA-22 Load Frequency Control Strategy for Wind Power Grid-Connected Power Systems Considering Wind Power Forecast 1124
PoA-23 Research and Application on the Resonance Suppression for Parallel T-Type Three-Level PCS Based on Capacitor Voltage Active Dampling 1129
PoA-24 Research on the Model of Hydrogen Oxygen Fuel Cell 1135
PoA-25 Smooth Control Strategy for Fuel Cell - Battery Power System 1139
PoA-26 Research on Mechanism and Benefits of Frequency Regulation of Energy Storage Combined With Thermal Power Unit 1144
PoA-27 Design and Experimental Study of Traveling Wave Positioning System Based on TMR 1150
PoA-28 Capacity Optimization Configuration of Wind Farm Energy Storage System Based on Life Cycle Economic Analysis 1155
PoA-29 Research on Development of Energy Storage Frequency Auxiliary Service in Hybrid Delivery Grid 1161
PoA-30 Charging Harmonic Characteristic Analysis of Electric Vehicles Based on Simulation and Analytical Methods 1166
PoA-31 Charging Load Modeling of Large-Scale Electric Vehicles in A Wider Time Scale 1172
PoA-32 Research on Stabilizing the Output Power of Wind Farms By Electric Vehicles Based on Robust Optimization Model 1177
PoA-33 Static Voltage Stability Assessment Considering Harmonic Effects 1183
PoA-34 Role of Power Electronics in Primary Frequency Control and Power Quality in An Industrial Micro-Grid Considering V2G Technology 1188
PoA-35 A VMD-Based Parameter Identification Method for Permanent Magnet Synchronous Machine 1194
PoA-36 The Framework of Residential and Commercial User-Side Intelligent Power Management System Considering Electric Vehicles 1199
PoA-37 A Comprehensive Review of Health Indicators of Li-Ion Battery for Online State of Health Estimation 1203
PoA-38 Evaluation of Electric Vehicles Dispatching Potential Considering Multiple Travel Needs 1209
PoA-39 Research on Speed Expansion Capability of Hybrid Permanent Magnet Synchronous Motor 1215
PoA-40 An Evaluation Approach of Carbon Emission Reduction Caused By Power Interconnection Based on Integrated Generation-Transmission Planning Model 1220
PoA-41 Prediction of Probability Density of Electric Vehicle Load Based on Deep Learning QRDCC Model 1225
PoA-42 User Satisfaction and Responsivity Orderly Dispatching Strategies Application on Time-Of-Use Price of Electronic Vehicle Optimisation 1230
PoB-01 Optimal Planning of AC/DC Hybrid System With Renewable Generations：An Expansion Planning Modle 1236
PoB-02 High-Precision Calculation of Geographical Current Density of DC Grounding Electrodes 1242
PoB-03 Planning Model of Integrated Energy System Considering P2G and Energy Storage (Revise) 1246
PoB-04 Load Characteristics and Impacts of Different Electric Heating Equipment Integrated Into Power Grid 1252
PoB-05 Capacities Optimizing of Region-Level Integrated Energy Systems Based on Random Model 1258
PoB-06 Parameter Sensitivity Analysis of the Combined Cooling Heating and Power System 1263
PoB-07 Tolerance Evaluation of Typical Building Energy Systems With Imprecise Load Prediction 1268
PoB-08 Energy Efficiency Community Plan From System Arrangement of Renewable Energy Resources and Load Management 1273
PoB-09 Prediction Approach for Hourly Output of the Energy Station in the District Energy System Based on the Attenuation and Delay of the Pipeline Network 1279
PoB-10 Voltage Stability Analysis of AC/DC System Considering Static Load Characteristics 1284

PoB-11 Research on Modeling and Simulation of New Energy Ship Power System 1288
PoB-12 The Comparative Study of Instantaneous Power Theory in Three-Phase Three-Wire Systems 1293
PoB-13 Intelligent Identification of Transmission Line Defects Based on Fast Neural Network Model 1299
PoB-14 Analysis of Broken Lines At Overhead Ground Wire and Pre-Twisted Wire Port Based on Skin Effect 1303
PoB-15 A Novel Reliability Assessment Method of Microgrid Based on Time Correlation Model 1307
PoB-16 Study on the Wind Power Capacity Credibility Considering the Convergence Effect of Wind Farm Cluster 1312
PoB-17 Reliability Analysis of A Microgrid Using Dynamic Bayesian Belief Networks 1318
PoB-18 A Detection Method of Harmonic and Interharmonic Using Window Interpolation and Complex Modulation Refinement Algorithm 1323
PoB-19 Comprehensive Energy Efficiency Evaluation of Distributed Energy System Model Based on Entropy Weight Method 1329
PoB-20 Comprehensive Energy System Evaluation Model Based on Secondary Energy Analysis 1334
PoB-21 Research on Benefit of Power Grid Enterprises Based on Projection Pursuit and Gray Method 1337
PoB-22 Research on Evaluation Indices and Assessment Methods of Offshore Multi-Platform Integrated Energy System 1342
PoB-23 Multiple Attribute Decision Model for Interval Number Sequence Correlation Analysis of Grid Investment 1348
PoB-24 Index Systems for Analysis and Evaluation of Clean Energy Development Based on AHP 1353
PoC-01 Load Flow Analysis of District Heating Systems By A Newton-Raphson Method 1357
PoC-02 Research on Thermoelectric Power Flow of Distributed Integrated Energy System Based on Model of Heat Network and Power System 1363
PoC-03 Probabilistic Load Flow Calculation Method Based on Polynomial Normal Transformation and Extended Latin Hypercube 1369
PoC-04 Effects of Pipeline Elevations on Load Flow of An Integrated Electricity-Gas Distribution System 1375
PoC-05 Research on Multi-Energy Power Flow Calculation of Thermoelectric Coupling Integrated Energy System 1380
PoC-06 Continuation Power Flow Considering Generation/Voltage Regulation: A Versatile Framework and Its Applications 1385
PoC-07 The Distribution Network Digital-Analog Hybrid Simulation Technology of Distributed Power Access 1392
PoC-08 Bilevel Optimization Strategy for Interconnection of Wind-Photovoltaic Power Generation and EV Charging and Discharging 1396
PoC-09 The Influence of Overhead Collector Feeder on the Stability of Grid-Connected Renewable Energy Multi-Converter 1402
PoC-10 Research on Model Integration Strategy in Short-Term Power Load Forecasting 1408
PoC-11 Study on Synthesis Load Modeling for North China Power Grid 1413
PoC-12 A Framework for Assessing the Inertia Distribution of Power Systems 1418
PoC-13 Damping Analysis and Parameter Adjustment of Hydraulic Turbine Governor Under Ultra-Low Frequency Oscillation 1424
PoC-14 An Ensemble Feature Selection Method for Short-Term Electrical Load Forecasting 1429
PoC-15 A Fast and Stable Algorithm for Switching Treatment During EMTP-Type Simulations 1433
PoC-16 Study on Fault Control Requirement and Strategy of Large Scale Renewable Energy Connect to VSC-HVDC Grid 1438
PoC-17 Low-Frequency Oscillation Pattern Recognition Based on Wavelet Packet and SVM 1442
PoC-18 Method for Improving the Dynamic Stability of Grid Based on PSS Parameter Optimization 1447
PoC-19 Scheme and Operation Characteristic Analysis of Large Sending Terminal DC Grid Based on Flexible DC in West China 1451
PoC-20 Research on Power Modulation Strategy for MMC-HVDC and LCC-HVDC in Parallel HVDC System 1456
PoC-21 Modeling and Analysis of Ground - Into Stray DC Based on Multi - System Coupling 1462
PoC-22 Statistical Analysis of HVDC Transmission Protection Operational Defects in Hubei Power Grid 1467
PoC-23 Effectiveness Evaluation System and Evaluation Method for Anti-Birds Damage Technical Transformation Projects of Overhead Lines 1472
PoC-24 Effect of External Insulation Environment on Electric Field Distribution of 500kv Porcelain Bushing 1478
PoC-25 Challenges and Countermeasures of Security Analysis in the Mid Long Term Development of Qinghai Power Grid 1484
PoC-26 Observation and Analysis of Gas Temperature Characteristic in the Streamer-To-Leader Transition Under Positive Impulse Discharge 1489
PoC-27 New Energy Short-Term Prediction System Based on Measured Weather and Network Weather Error Correction 1493
PoC-28 State Assessment of Relay Protection Device Based on Defect Information 1499
PoC-29 Research on Wind Power Prediction 1504
PoC-30 Short-Term Wind Power Forecasting With Evolutionary Deep Learning 1508
PoC-31 Electricity Consumption Forecast of Provincial Power Companies Based on VEC Model 1514
PoC-32 Research on Frequency Control and Evaluation of Various Power Disturbances 1519
PoC-33 Low-Frequency Oscillation Mode Source Identification With Wide-Area Measurement System 1525
PoC-34 Research on State Evolution of Power Grid Based on Random Matrix Theory Indicators 1530
PoC-35 Electric Load Forecasting Based on CEEMDAN and LSSVM Optimized By Cuckoo Search Algorithm 1536

PoC-36 Study on Frequency Dynamic of Power System Based on Continuum Model 1542
PoC-37 Analysis of Harmonic Interactions Among Current-Controlled and Voltage-Controlled Inverters 1547
PoC-38 Partial Discharge Pattern Recognition Method of Distribution Cabinet Equipment Based on Higher Moment Feature 1553
PoC-39 A New Generator Control Device Level Disturbance Source Location Method of Power Oscillation Based on PMU 1558
PoC-40 Model for Controlling Risk Optimization Using Energy Storage and Distributed Renewable Energy 1563
PoC-41 Control Strategy of UHVDC Project in Some Special Conditions 1568
PoC-42 Economic Analysis of Ice-Storage in Multiple Energy Systems An Real-World Case Study 1574
PoC-43 Research on Control Method of Energy Storage Interface for DC Micro-Grid 1579
PoC-44 Joint Optimal Operation of Generalized Demand Response and Multi-Energy Storage for Energy Internet 1584
PoC-45 Optimal Siting and Sizing of Wind Farm Considering Peak Load Regulation Capability of Power System 1590
PoC-46 Hierarchical Optimization Scheduling Method for Integrated Community Energy Systems 1596
PoC-47 Combined Simulation Method of Multi-Source Automatic Generation Control 1602
PoC-48 Evaluation Index of Demand Response Based on Stationary Measure of Time Series 1607
PoC-49 Study on Optimized Integrated Energy-Use Modes of Hospitals Considering TOU Price 1613
PoC-50 Study on Frequency Emergency Coordination and Optimal Control With Multitype Measures 1619
PoC-51 The Combined Optimization Schedule Model of Wind Power, Thermal Power and Pumped Storage Considering N-1 Safety Constraints 1625
PoC-52 A Consensus-Based Distributed Environmental-Economic Multi-Objective Dispatch Strategy for Combined Heat and Power Generation Systems 1631
PoC-53 An Overview on Large-Scale Source-Grid-Load Friendly Interaction System 1637
PoC-54 Optimal Control for A Wind-Hydrogen-Fuel Cell Multi-Vector Energy System 1642
PoC-55 Framework of A Simplified Precise Load Shedding System 1647
PoC-56 Risk Control Optimization Models of Different Power Market Purchasing Combinations of Power Selling Companies 1653
PoC-57 Optimization Model of Joint Operation Risk Control of Virtual Power Plant Power Selling Company 1659
PoC-58 Microgrid Optimal Dispatch Model Considering Energy Storage System 1665
PoC-59 Design of Power Dispatching Post-Evaluation 1670
PoC-60 Application of Non-Player Character Simulation Technology in Union Dispatcher Training Simulator of Multi-Level Dispatching and Control System 1676
PoC-61 Intelligent Community Stratification Optimization Scheduling Strategy Based on Demand-Responsive Energy Cells 1682
PoC-62 Consistent Cooperative Control of Multi-Energy Storage in DC Microgrid 1686
PoC-63 A Parameter Optimization Method for Commutation Failure Prevention in LCC-HVDC System 1691
PoC-64 Frequency Control Strategy and Test Technology of Photovoltaic Power Plant 1695
PoD-01 Research on Wind Speed Prediction of Wind Power System Based on GRU Deep Learning 1699
PoD-02 Analysis of Influence of Wind Turbine on Short Circuit Capacity of System 1704
PoD-03 Model Construction and Analysis of Transformer DC Magnetic Bias Induced By Rail Transit Stray Current 1710
PoD-04 Two-Stage Optimal Dispatching Based on Wind-Photovoltaic - Pumped Storage-Thermal Power Combined Power Generation System 1714
PoD-05 An Expandable Interline DC Power-Flow Controller 1720
PoE-01 Research on the Mechanism of Distribution Network CPS Security Impact 1726
PoE-02 Estimation of Grid Operating State Based on Mixed Data From Multiple Information Sources 1732
PoE-03 Analysis of Interaction Between Distributed Power, Energy Storage and Diverse Loads in A Smart Home 1738
PoE-04 A Simulation Study of Data Flow Time Domain Feature in Widespread Power Internet of Things Based on OPNET 1742
PoE-05 A Service Data Flow Control Method Based on Network Isolation Architecture 1749
PoE-06 MRIO Modelling of Small-Scale Trigeneration Systems 1754
PoE-07 Short-Term Load Forecasting for Industrial Enterprises Based on Long Short-Term Memory Network 1759
PoE-08 Strategy on Interruptible Load Selection for Precise Load Shedding System of Source-Grid-Load Friendly Interaction System 1765
PoE-09 The Evaluation Method for Power Information System'S Topology Planning Against Cyber-Attacks 1770
PoE-10 Research Framework of the Human-Cyber-Energy Coupled Urban Energy Internet Catastrophe Analysis and Its Dynamic Early Warning 1776
PoE-11 Status Detection System for Power Plugs Based on Data Sampling 1782
PoE-12 Function System and Application Scenario Design of Energy Big Data Application Center 1788
PoE-13 A SVM Optimized By Particle Swarm Optimization Approach to Load Disaggregation in Non-Intrusive Load Monitoring in Smart

	Homes	1793
PoE-14	Technical Analysis of Intelligent Measurement Technology Innovation Under the Environment of Energy Internet	1798
PoE-15	Compression Algorithm for Relay Protection Equipment Data	1803
PoE-16	Prospects for Energy Internet of Agricultural Engineering in China	1807
PoE-17	The Development and Application of the Power Load Integration Platform for Auxiliary Peaking Service	1812
PoF-01	Strategy and Mechanism of Time and Sampling Synchronization of Digital Substation in China	1816
PoF-02	Research on Data Pool Construction of Distribution Network Oriented Ubiquitous Electric Power Internet of Things	1822
PoF-03	Research on the Construction of Data Pool and the Management Model of Data Pool Integrating Block Chain Concept for Ubiquitous Electric Power Internet of Things	1828
PoF-04	Detection Method for the Enclosed Space Based on Image Identification and Unity3D Virtual Comparison Techniques	1834
PoF-05	Research on Video Monitoring Method for Switching Status of Switch Cabinet Breaker	1839
PoF-06	Research on Factory Simulation and Debugging Technology of Smart Substation Expansion With Multi-System Interconnection	1844
PoF-07	Research on Substation Intelligent Diagnosis Technology Based on Secondary Cable Circuit Modeling	1850
PoF-08	Research on System Dynamics and Agent Hybrid Modeling Method for Multi-Energy Collaborative Control Under Ubiquitous Power Internet	1856
PoF-09	Research on Model-Based Condition-Based Maintenance Technology of Process-Layer Smart Switch in Smart Substation	1861
PoF-10	Application Prospects of Compressed Sensing in Ubiquitous Internet of Things in Electricity	1867
PoF-11	The Mixed Reality Modeling and Application Oriented At the Operation and Maintenance of Distribution Network	1873
PoF-12	Space Distance Intelligent Perception Device Based on Stereoscopic Visual Recognition Technology	1879
PoF-13	Dormitory Non-Intrusive Load Identification Algorithm Based on Penalty Function	1884
PoF-14	Defect Rating for Different Production Models of Line Protection Devices Based on Decision Trees	1888
PoF-15	Collaborative Optimization of Resident Load Based on Cloud-Edge-Terminal	1893
PoF-16	Research and Application of FTU Distribution Network Automation Security Protection Scheme Based on Embedded Security Chip	1899
PoF-17	Multi-Level Non-Intrusive Load Identification Based on K-NN	1905
PoF-18	Dynamic Pricing Model for Direct Power Purchase By Large Consumers Based on Risk Factors of Transmission Network	1911
PoG-01	Scenario-Based Unit Commitment Model Considering Stochastic Wind Power	1917
PoG-02	Advanced Intelligent Micro Inverter Control in the Distributed Solar Generation System	1922
PoG-03	AGC Real-Time Control Strategy Based on DFT Method	1928
PoG-04	Hybrid Microgrid Load Distribution and DC Voltage Control	1933
PoG-05	Secondary Power Sharing Control Strategy for Hybrid AC/DC Microgrid Via Maximum Power Coordination Factor	1938
PoG-06	Reliability Analysis and Control Optimization of Distributed Control System of 300 Mvar Dual-Water Internal Cooling Synchronous Condenser	1944
PoG-07	Impact of DC-DC Converters for DC Grid Voltage Support	1949
PoG-08	Adaptive Management Interface Device of Grid-Connected Dgs Based on Wide-Time Scale	1954
PoG-09	Trading Decision for Multiple Virtual Power Plants Considering Power Sharing	1958
PoG-10	An Optimal Customization and Operation Strategy of Reserve-Oriented Virtual Power Plant Based on Cvar	1964
PoG-11	Harmonic Current Detection and Reactive Power Compensation Method for Photovoltaic System Based on FBD Method	1970
PoG-12	Study on Droop Frequency Modulation of Micro-Grid Based on Variable Domain Fuzzy PI	1976
PoG-13	Economic Dispatch Considering Flexibility Provided By Load Static Voltage Characteristics	1980
PoG-14	Summary of Load Modeling Methods Considering Distributed Generation	1986
PoG-15	Optimal Scheduling of Air Conditioning Loads By Aggregator Under Dynamic Price	1991
PoG-16	Robust Optimization for Power Consumption Strategy of Commercial Building Considering Uncertainty of Environmental Factors .	1996
PoG-17	An Analysis Method of Electric-Thermal Load Coupling Relationship of Park Based on Fusion Feature	2002
PoG-18	Research on Multi-Dimensional Electricity Characteristic Evaluation Indicator System for Resident Users	2006
PoG-19	Multi-Objective Stochastic Scheduling Optimization Model for Virtual Power Plants With Carbon Emission Constraints	2012
PoG-20	A Calculation Method of Distribution Power Transmission Equipment Hot Spot Temperature Based on Relative Load Coefficient	2018
PoG-21	New Energy Dispatching System Design	2021
PoG-22	Multi-Microgrid Optimal Scheduling Considering Electric Vehicle Participation	2026
PoG-23	Peak Load Regulation Method Considering Wind Power Accommodation Based on Source-Load Coordination	2032
PoG-24	Combination and Application of Virtual Power Plant, Microgrid and Demand Response Technology in Multi-Court Distribution Network for Energy Use Optimization	2037
PoG-25	A Comprehensive Evaluation Indicator System of “Source-Grid-Load” Interaction	2043

PoG-26 Multi-Dimensional Difference Analysis Model for Distribution Network Mesh Planning 2048
PoG-27 Optimal Capacity Allocation for Wind-Solar Station Considering Power Response of Pumped Storage 2053
PoG-28 Optimal Design of Electricity Plans for Active Demand Response of Power Demand Side 2059
PoG-29 Urban User and Grid Supply and Demand Friendly Interaction System Based on Two-Layer Optimization Model 2065
PoG-30 Coordinated Planning of Distribution Network of Source-Grid-Load Considering Multi-Party Interaction and Demand-Side Response 2070
PoG-31 Household Appliance Identification Based on A Novel Load Signature Processing Framework 2076
PoG-32 Two-Stage Solution Strategy for Alleviating Line Overloads Based on Transmission Switching 2081
PoG-33 Modeling and Parameter Identification of Grid-Connected PV System During Asymmetrical Grid Faults 2086
PoH-01 Energy Internet Business Ecosystem Analysis 2091
PoH-02 Study on the P2P Sharing Mode Operating Scheme of Consumer Side Distributed Energy Storage 2097
PoH-03 Bi-Level Multi-Agents Interactive Decision-Making Model in Regional Integrated Energy System 2103
PoH-04 Two-Way Listing Distributed Power Trading Mechanism Research and Platform Development Based on Ethereum 2109
PoH-05 Design of Energy-Use Scoring Rule in Student Dormitories Based on Consumption and Behavior Analysis 2114
PoH-06 Dispatch Strategy of Energy Trading Platform With Distributed Energy Storage System for Multiple Microgrids 2120
PoH-07 A Review of the Application Research of Locational Marginal Price Theory Under the New Situation 2126
PoH-08 Policy Development and Market Mechanism for Self-Supply Power Stations 2132
PoH-09 Research on the Quantitative Impact of Policies on Power Consumption 2136
PoH-10 Business Model Evaluation Using Improved Analytic Hierarchy Process and Grey Evaluation Method 2140
PoH-11 Investment Benefit Assessment for the Power Grid Considering the Optimization Strategy of Electric Price 2146
PoH-12 Research on the Credit Evaluation Model of Electricity Selling Company Based on GA-SVM 2151
PoH-13 Optimal Bidding Strategy for Electricity Sales Company Considering Contract for Difference and Risk 2155
PoH-14 Optional Two-Part Electricity Price Based on User Load Rate 2161
PoH-15 Policy Analysis and Recommendation for Self-Supply Power Stations 2166
PoI-01 A Non-Artificial Setting Method for Fault Feeder Detection Systems Based on Data Fusion Used in Resonant Grounding Systems 2172
PoI-02 The DC Bias Risk Assessment of Transformer Based on Nonlinear Magnetic Circuit Equations 2177
PoI-03 Multiscale Information Fusion-Based Extreme Learning Machine for Power Transformer Fault Diagnosis 2182
PoI-04 Fault Modeling and Characteristic Analysis of Offshore Wind Turbines With Doubly Fed Induction Generator 2187
PoI-05 Synchronous Condenser Fault Diagnosis Method Based on RBF Neutral Network 2193
PoI-06 Synchronous Condenser Vibration Signal Acquisition and Storage Method 2197
PoI-07 Cause Analysis of Sent-In-Error Thyristor Protective Trigger on HVDC 2201
PoI-08 Fault Early Warning, Fault Diagnosis and Intelligent Decision Platform Construction Technology for Condenser Based on Ubiquitous Internet of Things 2207
PoI-09 Remote Fault Diagnosis and Intelligent Decision-Making System for Condenser Based on Pattern Recognition and Reliability Evaluation 2212
PoI-10 Overvoltage Simulation Research of UHVDC Transmission Converter Caused By Upper Converter Midpoint Bus Grounding Fault 2218
PoI-11 Fault Detection Technology and Analysis of 10 Kv XLPE Power Cable 2222
PoI-12 Research of Intrinsic Mode Function Illusive Component Recognition and Adaptive Threshold Denoising Method Based on Empirical Mode Decomposition 2227
PoI-13 A Design of the Passive Micro Sensor for SF6 Detection 2231
PoI-14 Research on the UAV Intelligent Inspection System to Monitor and Prevent Abnormal Heat of Composite Insulators for 500kv Transmission System 2236
PoI-15 Research on Tree Crown Segmentation Method in Tree Height Image Monitoring of Transmission Lines 2241
PoI-16 Seismic Performance and Aseismic Measures of ±800 Kv UHV Wall Bushing-Valve Hall System 2246
PoI-17 Wind Turbine Multi-Label Fault Recognition Based on Combined Feature Selection and Neural Network 2252
PoI-18 Response Characteristics of the UHV Supporting Capacitor Subjected to Bidirectional Earthquakes 2258
PoI-19 Research on Combination of Partial Discharge Inspection of Cable and Accurate Position Detection of Oscillating Wave 2264
PoI-20 Research on Arrester Interference Compensation Based on Finite Element Method 2269
PoI-21 Seismic Performance Analysis of ±800kv UHV Delta-Connection Converter Transformer System 2274
PoI-22 Non-Destructive Detecting Method for Wind Turbine Blade By Using Robots 2280
PoI-23 A New Transformer Protection Scheme Based on the Numerical Characteristics of Equivalent Excitation Impedance 2286
PoI-24 Design of Infrared Anomaly Detection for Power Equipment Based on Yolov3 2291

PoI-25 Online Ambient Temperature Monitoring of Electronic Transducer Based on Thermocouple 2295
PoI-26 Research on External Partial Discharge of Transformer Bushing Based on UHF Method 2299
PoI-27 Interturn Fault Detection Algorithm for Shunt Reactors Based on Leakage Magnetic Field 2303
PoI-28 Design and Realization of Double TEC Air Conditioning for Outdoor Intelligent Control Cabine 2308
PoI-29 Simulation Framework of Non-Technical Losses Detection in Micro Grid Environment 2314
PoI-30 Measurement Method of Verdet Constant Based on Refractive Index Dispersion of Optical Fiber Current Sensing Materials 2319
PoI-31 Ultimate Wind-Resistant Capacity Assessment of A Transmission Line Tower and A New Decouple Idea 2324
PoI-32 A Cable Partial Discharge Signal Extraction Method Based on Improved Wavelet-Laplace Function 2330
PoI-33 Signal Recognition Method of Power Cable Oscillating Wave Partial Discharge Detection Based on Support Vector Machine 2334
PoI-34 Cause Analysis and Countermeasure of Oil Leakage Caused By Cable Terminal Belt Expansion 2338
PoI-35 Analysis and Countermeasure of 110KV Cable Joint Defects 2342
PoI-36 An Early Warning Model for Damage of Power Grid Under Typhoon Disaster 2346
PoI-37 Enhancing Power System Resilience - A Review 2350
PoI-38 Response Characteristics of Power Grid Rainstorm Convection Disaster to ENSO in Spring and Winter 2355
PoI-39 Distribution Characteristics of Transmission Line Galloping Events and the Analysis of Key Meteorological Factors 2360
PoI-40 The Portable DC De-Icer With Emergency Power Supply Function 2364
PoI-41 Research on Melting and De-Icing Methods of Lines in Distribution Network 2370
PoI-42 Galloping Early Warning Technology of Transmission Lines Based on RBF Neural Network 2374
PoI-43 Topology and Simulation of Charged Melting Ice on Transmission Lines 2379
PoI-44 Harmonics Analysis of Grid Tied Solar System By Employing FFT 2382
PoI-45 Design of Energy Acquisition System for Overhead Ground Wire of Transmission Lines 2386
PoI-46 Research on High-Energy Light Spot Deicing Method for Substation Insulator 2392
PoI-47 PM10 Concentration Forecasting Based on CEEMDAN, SE and LSTM Neural Network 2398
PoI-48 Analysis of Parameter Imbalance Influence on DC Voltage of SVG Type DC De-Icer 2403
PoI-49 Wildfire Monitoring Technology of Transmission Lines Based on Himawari-8 Geostationary Meteorological Satellite 2408
PoI-50 Gale Change and Grading for Power Grid Wind Zone in Jiangsu Province 2413
PoI-51 Development and Tests of A 220 Kv Novel Composite Insulator With Lightning Protection and Icing Flashover Prevention 2418
PoI-52 Research on Laser Deicing Technology for Overhead Line 2424
PoI-53 Influence of Water Film Over Sphere- Sphere Electrodes on Power Frequency Discharge Characteristics of Air Gap 2429
PoI-54 Simulation Study on Lightning Protection of New 500 Kv Lightning-Proof Line Insulator 2433
PoI-55 Real-Time On-Line Anti-Icing and Ice-Melting Power Calculation Method for Transmission Lines Based on Self-Ice-Melting Conductors 2439
PoI-56 Extended-Range Forecasts of Power Grid Ice Accretion in Southern China: Case Studies 2443
PoI-57 Study on Dispatching Decision Information of Power Flow Distribution Under Wildfire Disasters 2447
PoI-58 Analysis on the Maximum Leading Phase Operation Capability of Pumped Storage Units in Leading Power Factor Test 2452
PoI-59 Study on Distribution Regularity of Overhead Transmission Line Nearby Wildfires 2456
PoI-60 Low Harmonic DC Ice Melting Device Capable of Reactive Power Compensation With SVG 2460
PoI-61 Stockbridge Damper Identification of Overhead Power Lines Based on HOG Feature and GWOSVM 2466
PoI-62 Study on the Improvement of Commutation Failure By Synchronous Condenser 2471
PoI-63 Research on Ice Disaster Risk of Transmission Line Based on Annual Ice Extremum 2476
PoI-64 Research on Time Serialization Simulation of Power System Accident Anticipated Plan 2481
PoI-65 Candidate Bus Selection Method for VAR Planning of Wind-Penetrated Power System Based on Morris Screening Method 2487
PoI-66 Arc-Suppression Method of Grounding Fault for Distribution Network Based on Controlled Voltage Source Access 2493
PoI-67 A Construction Method of Power Grid Abnormal State KPI Based on AHP 2498
PoI-68 Single-Ended Protection Scheme for Multi-Terminal VSC-Based DC Distribution System Based on the Transient Energy 2502
PoI-69 Research on Discrimination of Wide-Area Backup Protection Faults Based on Stacked Auto-Encoder 2508
PoI-70 Wide-Area Protection of AC/DC Distribution Network Based on Fault Degree Correlation Matrix 2514
PoI-71 Risk Assessment Optimization for the Relay Protection System Based on Proportional Intensity Model 2519
PoI-72 Research on Current Transfer Arc-Extinguishing Technology of Distribution Network 2524
PoI-73 Comparison of Transient Angle Stability Between Different Virtual Synchronous Generators 2529
PoI-74 Short-Circuit Fault Analysis of Energy Storage System Converter Using Different Control Methods in DC Microgrid 2534
PoI-75 Research on Microgrid Relay Protection Scheme 2540

PoI-76 Zoning-Prediction-Response(ZPR) Monitoring and Early Warning Model for Thunderstorms in Power Grid 2546
PoI-77 Power Supply Recovery Strategy of Distribution Network Based on Weak Voltage Area Recognition 2551
PoI-78 Research on Distribution Network Fault Recognition and Diagnosis Technology Based on Synchronized Two-Terminal Information 2557
PoI-79 Novel Indices for Voltage Stability Evaluation of Wind-Penetrated Power System With Complex Load 2563
PoI-80 Study on the Influence of Distance Protection in Power Grid With New Energy Sources 2568
PoI-81 Distribution High Impedance Fault Detection Using the Fault Signal Reconstruction Method 2573
PoI-82 Distribution Network Reconfiguration Based on BP Neural Networks 2578
PoI-83 Laboratory Investigation on Phase Selection Closing Approach for Suppression of Inrush Current 2583
PoI-84 A Real Time Monitoring Method for Single-Line Break Fault Based on Dual-Terminal Information of Distribution Network With Fault Tolerant 2587
PoI-85 Novel Traveling Wave Detection Method Based on VMD-S Transform in Distribution Network 2593
PoI-86 A New Measurement Technology of Grounded Capacitance Parameters of the Distribution Network Lines Based on Resonance Method 2597
PoI-87 Development of Non-Contact Traveling Wave Sensor Based on Tunnel Magnetoresistance 2602
PoI-88 R&D and Field Test Analysis of Fault Traveling Wave Positioning System for Distribution Networks 2607
PoI-89 Research on Misoperation of Line Differential Protection Mixed With Different CT 2612
PoI-90 Modeling and Simulation of Fault Location With Traveling Wave for 35kv Distribution Networks 2617
PoI-91 A Station Domain Protection Scheme Based on Logical Information Fusion 2621
PoJ-01 A Novel Energy Trading Platform for Distribution Network Based on Edge Computing 2625
PoJ-02 Analysis of Cyber-Attacks Influence on the Identification of Critical Measurements 2630
PoJ-03 Intelligent Substation Communication Traffic Prediction Based on QAPSO-RBF Neural Network 2635
PoJ-04 Data-Driven Measurement Tampering Detection Considering Spatial-Temporal Correlations 2641
PoJ-05 Industrial Control Intrusion Detection Model Based on S7 Protocol 2647
PoJ-06 A Security Model of SCADA System Based on Attack Tree 2653
PoJ-07 ADDP: Anomaly Detection for DTU Based on Power Consumption Side-Channel 2659
PoJ-08 Malicious Code Detection Scheme Based on CW-RNN for Microgrid Controllers 2664
PoJ-09 Using Power Side-Channel to Implement Anomaly-Based Intrusion Detection on Smart Grid Terminals 2669
PoJ-10 High-Risk Problem of Penetration Testing of Power Grid Rainstorm Disaster Artificial Intelligence Prediction System and Its Countermeasures 2675
PoJ-11 An Internet Hosted Website Detection Method Based on Network Behavior Analysis for Power Grid Enterprises 2681
PoJ-12 Research of Crucial Technologies on Dispatcher's Behavior Pattern Mining Based on Big Data 2685
PoJ-13 Research on the Whole Life Cycle Cost Management and Maintenance Decision of Secondary Equipment Based on Physical ID 2691
PoJ-14 Decentralized Identity Authentication and Key Management Scheme 2697
PoJ-15 Distribution Network Post-Disaster Power Supply Recovery Strategy Based on Path Description 2703
PoJ-16 Research on the Over-Voltage Suppression Strategy for HVDC With New-Generation Synchronous Condensers 2708
PoK-01 The Method for Power Flow Calculation With Doubly-Fed Wind Turbine Integration Into Power System 2714
PoK-02 Design of A Dual Axis Photoelectric Tracking System Based on Four Quadrant Photoelectric Detector 2720
PoK-03 A New Method of BLDCM Commutation Error Compensation Based on Line Voltage Difference 2725
PoK-04 Transformer Inrush Current Impact on Commutation Failure Prevention of UHVDC Transmission System 2730
PoK-05 Active Power Optimal Damping Control Strategy for Units Based on Deep Q-Network 2735
PoK-06 Comparison of Connection Modes of 10kv Switch Station in Shanghai Fengxian New Town 2740
PoK-07 Study on Harmonic Load Loss Calculation Method of Oil-Paper Insulated Distribution Power Transmission Equipment 2746
PoK-08 Calculation Method of Hot Spot Temperature of Distribution Power Transmission Equipment Insulation Winding Based on Eddy Current Loss Density Distribution 2750
PoK-09 Pressure Simulation and Experimental Study of GIS/GIL Disc Insulators 2754
PoK-10 A Reactive Power Optimization Strategy Considering Relevance of Random Variables 2759
PoK-11 Tripping Characteristics of Residual Current Devices Under Different Working Conditions 2765
PoK-12 Identifying Fridge Consumption Non-Intrusively Based on Temporal Characteristic 2770
PoK-13 An Approach for Resistance Parameter Identification of Transmission Line Based on Electric Energy Data 2776
PoK-14 Research on Sub-Synchronous Oscillation Characteristics Between PMSG-Based Wind Farms and Weak AC Grids Based on Prony Method 2781

PoK-15 Study on Corona Aging of Room Temperature Vulcanized Silicone Rubber 2787
PoK-16 Research on Active Power Regulation of Hydropower Unit Monitoring System 2792
PoK-17 Research on Secondary Circuit Monitoring Method for High Voltage Metering System 2797
PoK-18 Coordination Degree Evaluation of Energy-Economy-Environment System Based on P-S-R Model 2803
PoK-19 Grid Benefit Analysis Considering the Correlation Between Load Characteristics and Electricity Price 2807
PoK-20 A Distribution Network Reconfiguration Method Based on the Representative Daily Load Curve 2811
PoK-21 Study of Interruptible Load Utility Model for Building Users 2816
PoK-22 Research on the Privacy-Preserving Energy Management in Power Grid Based on Information Masking 2822
PoK-23 The Interface Effect in X-Ray Testing of Concentric Multi-Layer Materials 2827
PoK-24 Emergency Power Control Technology for Wind Power and Photovoltaic Power to Improve New Energy Consumption Capacity 2832
PoK-25 Transmission Network Planning Considering Different Functional Attributes of Power Grid 2838
PoK-26 Research and Application of Integrated System Design of Smart Substation Secondary System Based on SCD/CAD File Mapping Technology 2844
PoK-27 Reliability Evaluation of Hybrid AC/DC Distribution Network Based on DC Conversion 2849
PoK-28 Integrated Analysis and Monitoring for Large-Scale Wind Farm Connected With Large Capacity Thermal Power Plant 2855
PoK-29 A Study on the Influence of Three-Phase Unbalance of AC Side Voltage on the Operating Characteristics of VSC 2860
PoK-30 Dynamic Equivalent Model for Wind Farms With Doubly Fed Induction Generator 2864
PoK-31 A Circular Recursion Algorithm Power Load Forecasting Model and Application 2870
PoK-32 A Partial Discharge Pattern Recognition Method Based on Optimal Setting of Characteristic Parameters and Classifiers 2874
PoK-33 A Transformer Winding Deformation Fault Diagnosis Method Based on Improved Directed Acyclic Graph 2878
PoK-34 Study on the Influence of Load Imbalance on Current Carrying Capacity of Power Transmission Equipment in Distribution Network 2882
PoK-35 Evaluation and Management Model of Dstribution Network Grid Planning Based on the Analytic Hierarchy Process 2886
PoK-36 Business Model Selection Model of Distributed Photovoltaic Energy Storage System in China 2891
PoK-37 Short-Term Load Forecasting Based on R-SDBN 2896
PoK-38 Droop Based Power Programmable Algorithm in DC Microgrids 2902
PoK-39 Review of Micro-Grid Site Selection and Operation Mode Considering Economic Applicability 2908
PoK-40 Application of Physical ID in Asset Management of Secondary Equipment in Power Grid-Revised Paper 2914
PoK-41 Coordinated Optimization Method of Reactive Power of Synchronous Condenser Considering Transient Constraint 2919
PoK-42 Influences of Control Parameters on Harmonic Characteristics of Current-Controlled Inverters 2925
PoK-43 Research on Fractional Order PID Controller in Servo Control System 2931
PoK-44 Comprehensive Intelligent Evaluation Method for Power Grid Dispatching and Control Training 2936
PoK-45 Design of Intelligent Safety Supervision System in Electric Power Substation 2941
PoK-46 Economic Optimization of Gas-steam Combined Cycle Energy Station 2945
PoK-47 Multi-objective Optimization of Gas-steam Combined Cycle Energy Station Base on Nash Negotiation Method 2950
PoK-48 Environmental/Economic Power Dispatch Based on Multi-objective Particle Swarm Algorithm 2956
