SPIE

Volume 11247

Proceedings of SPIE, 1605-7422, V. 11247

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Diagnostics and Sensing XX: Toward Point-of-Care Diagnostics*, edited by Gerard L. Coté, Proceedings of SPIE Vol. 11247 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	Authors
vii	Conference Committee

SESSION 1 MONTE CARLO MODELLING OF OPTICAL PROPERTIES FOR POC APPLICATIONS

11247 02	Parallelized multi-layered Monte Carlo model for evaluation of a proximal phalanx photoplethysmograph [11247-1]
----------	---

SESSION 2 RAMAN AND SURFACE ENHANCED RAMAN FOR POC APPLICATIONS

11247 05	Toward point-of-care uropathogen detection using SERS active filters [11247-4]
11247 06	Development of a paper microfluidic surface enhanced Raman scattering assay for cardiac troponin I [11247-5]
11247 07	Serum Raman spectroscopy: exploring delineation of oral premalignant disorders [11247-6]

SESSION 3 OPTICAL ANALYSIS OF BLOOD FOR MULTIPLE APPLICATIONS

11247 09	Using near-infrared spectroscopy to monitor spinal cord oxygenation in the injured spinal cord [11247-8]
11247 0A	Determination of hemoglobin derivatives in unaltered whole blood samples using Support Vector regression in the spectral range from 450 to 700nm [11247-9]
11247 0B	Deep-ultraviolet microscopy for label-free hematological analysis [11247-10]

SESSION 4 USE OF MOBILE PHONE FOR POC ANALYSIS

11247 0F	Detection of Schistosoma haematobium using lensless imaging and flow cytometry, a proof of principle study [11247-14]
----------	---

POSTER SESSION

11247 0I	Lens-free holographic microscopy for complete blood analysis on a chip [11247-17]
11247 0J	Photoplethysmography for bovine heat detection: the preliminary results [11247-18]
