Volume 11273

Proceedings of SPIE 0277-786X, V. 11273

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Laser Materials Processing: Applications, Diagnostics, and Systems IX*, edited by Stefan Kaiserle, Stefan W. Heinemann, Proceedings of SPIE Vol. 11273 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 SURFACE TREATMENT

- 11273 01 **Microhardness and microabrasion behaviour of NiTi shape memory alloy after femtosecond laser shock peening without coating in air** [11273-1]
- 11273 03 **Development of high-power laser ablation process for polycrystalline diamond polishing Part 2: upscaling of PCD ultra-short pulsed laser ablation to high power** [11273-3]
- 11273 04 **Upscaling laser polishing for large 3D surfaces** [11273-4]
- 11273 05 **Scaling laser shock peening process towards high repetition rates: a demonstration on industrial grade Al2024-T351** [11273-5]

SESSION 2 SENSING AND CONTROL

- 11273 07 **Direct, real-time, high-resolution beam profiler for high-power laser** [11273-7]
- 11273 08 **Coupled membrane free optical microphone and optical coherence tomography keyhole measurements to setup welding laser parameters** [11273-8]

SESSION 3 WELDING

- 11273 0B **Dissimilar material combination in laser beam welding: reduction of distortion (Invited Paper)** [11273-11]
- 11273 0C **Welding strategies for joining copper and aluminum by fast oscillating, high quality laser beam** [11273-12]
- 11273 0D **Copper welding applications with a 2 kW cw laser in the green wavelength regime** [11273-13]
- 11273 0E **Bead-on-plate welding of pure copper sheet with 200 W high intensity blue diode laser** [11273-14]
- 11273 0F **Joining steel and aluminum parts combining additive manufacturing process and laser welding** [11273-15]
- 11273 0G **Laser based repair of CFRP for the aerospace industry** [11273-16]

- 11273 0I **Investigations on welding of several materials with adjustable intensity profiles: new approaches and findings** [11273-22]
- 11273 0J **Investigations on the effect of different ultrasonic amplitudes and positions in the vibration distribution on the microstructure of laser beam welded stainless steel** [11273-23]

POSTER SESSION

- 11273 0K **Reflection-type diffractive optical element employing SiC and Si for application to high power laser material processing** [11273-18]
- 11273 0L **High peak power DUV laser processing** [11273-19]
- 11273 0M **CaliBend: a flexible, cost-effective laser module for thermal-assisted bending of high-strength steels** [11273-20]
