Proceedings of SPIE, 1605-7422, V. 11256

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Reporters, Markers, Dyes, Nanoparticles, and Molecular Probes for Biomedical Applications XII*, edited by Samuel Achilefu, Ramesh Raghavachari, Proceedings of SPIE Vol. 11256 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

---

## FLUORESCENT AND LUMINESCENT PROBES

---

11256 0G	<b>An orange-fluorescent dye with long-lasting blinking for single molecule localization microscopy</b> [11256-15]
11256 0H	<b>Aggregation induced enhanced emission in Dimethyl-2,5-bis(4-methoxyphenylamino)terephthalate (Invited Paper)</b> [11256-16]

---

## POSTER SESSION

---

11256 0I	<b>Analysis of Wikipedia pageviews to identify popular chemicals</b> [11256-17]
11256 0J	<b>Absorption and fluorescence spectra of organic compounds from 40 sources: archives, repositories, databases, and literature search engines</b> [11256-18]
11256 0K	<b>Electron properties of porous carbon nanostructures doped by atoms cesium</b> [11256-19]
11256 0L	<b>Modification of the molecular-mechanics method for realizing the interaction of carbon structures with potassium atoms</b> [11256-20]
11256 0M	<b>The penetration and movement of nanoparticles on membrane</b> [11256-21]
11256 0N	<b>Water desalination using zigzag pillared graphene</b> [11256-22]
11256 0O	<b>Electron-energy properties of pillared graphene modified with potassium</b> [11256-23]
11256 0P	<b>2D monocrystalline nanostructures of cobalt oxide <math>\text{Co}_3\text{O}_4</math> for sensing individual molecules</b> [11256-24]
11256 0Q	<b>Patterns of interaction of the cell membrane with a matrix of natural polymers and carbon nanotubes</b> [11256-25]
