**Volume 11262**

Proceedings of SPIE 0277-786X, V. 11262

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Diode Laser Technology XVIII*, edited by Mark S. Zediker, Proceedings of SPIE Vol. 11262 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510632875

ISBN: 9781510632882 (electronic)

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

vii *Authors*  
ix *Conference Committee*

---

## **SESSION 1 IR LASER DEVICES AND PACKAGE TECHNOLOGY I**

---

- 11262 02 **1 kW cw fiber-coupled diode laser with enhanced brightness** [11262-1]
- 11262 03 **Highly efficient 9xx-nm band single emitter laser diodes optimized for high output power operation** [11262-2]
- 11262 04 **Efficient, high power 780 nm pumps for high energy class mid-infrared solid state lasers** [11262-3]
- 11262 05 **Design progress for higher efficiency and brightness in 1 kW diode-laser bars** [11262-4]
- 11262 06 **Advances in diode laser bar power and reliability for multi-kW disk laser pump sources** [11262-5]
- 11262 07 **Physics of failure based reliability model of high-power InGaAs-AlGaAs strained QW lasers prone to COBD failure** [11262-6]

---

## **SESSION 2 IR LASER DEVICES AND PACKAGE TECHNOLOGY II**

---

- 11262 08 **High power and reliable 793nm single emitter and T-bar for thulium-doped fiber laser pumping** [11262-7]
- 11262 09 **Performance comparison between model-based and machine learning approaches for the automated active alignment of FAC-lenses** [11262-8]
- 11262 0A **High brightness diodes and 600W 62% efficient low SWaP fiber-coupled package** [11262-9]
- 11262 0B **Offline development of active alignment based on empirical virtual environments** [11262-10]
- 11262 0C **Kilowatt wavelength-stabilized CW and QCW diode laser** [11262-33]

---

## **SESSION 3 LASER FOR 3D SENSING AND LIDAR**

---

- 11262 0D **Lidar sensors for autonomous driving** [11262-34]

11262 0H **Pulse laser diode modules for high-power, high-frequency operation** [11262-15]

---

**SESSION 4 WAVELENGTH STABILIZED DEVICES**

---

11262 0I **Wavelength stabilized fiber-coupled diode laser modules for DPSS and fiber laser pumping** [11262-16]

11262 0J **High-power, high-beam quality miniaturized laser module for pumping of solid state lasers at 980 nm** [11262-17]

11262 0K **High power wavelength stabilized multiemitter semiconductor laser module using highly manufacturable DBR diode lasers** [11262-19]

11262 0L **Reliable high-spectral-radiance 635 nm tapered diode lasers with monolithically integrated distributed Bragg reflector** [11262-20]

---

**SESSION 5 BLUE LASER SYSTEMS**

---

11262 0M **Developments of high power blue diode laser systems for laser metal deposition and welding of pure copper materials (Invited Paper)** [11262-21]

11262 0N **Kilowatt-class high power fiber-coupled diode lasers at 450nm** [11262-22]

11262 0O **High brightness 100 W-50  $\mu$ m delivery blue laser diode module** [11262-23]

11262 0P **Scalable blue laser system architecture** [11262-24]

---

**SESSION 6 BLUE LASER TECHNOLOGY**

---

11262 0Q **Blue high power InGaN semiconductor laser diodes: design optimization of laser bars and single emitters for best performance and reliability (Invited Paper)** [11262-25]

11262 0R **High brightness MOCVD-grown laser diodes using RPCVD tunnel junctions** [11262-26]

11262 0S **A high power InGaN laser array with built-in smile suppression structure** [11262-27]

11262 0T **Optical materials for digital projection** [11262-28]

---

**SESSION 7 WAVELENGTH MULTIPLEXED MODULES**

---

11262 0V **Development of a 350 W, 50  $\mu$ m, 0.15 NA wavelength stabilized fiber coupled laser diode module for pumping Yb-doped fiber laser** [11262-30]

11262 0W     **Power scaling of laser diode modules using high-power DBR chips [11262-31]**

**POSTER SESSION**

---

11262 0Z     **Field-of-view control of segmented NIR VCSEL arrays for next-generation flash LiDARs [11262-35]**
