Volume 11327

Proceedings of SPIE 0277-786X, V. 11327

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Optical Microlithography XXXIII*, edited by Soichi Owa, Mark C. Phillips, Proceedings of SPIE Vol. 11327 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Authors
ix Conference Committee

KEYNOTE SESSION AND LATEST TOPIC

11327 05 **Pixelated mask optimization on quantum computers** [11327-3]

MACHINE LEARNING AND COMPUTATIONAL LITHOGRAPHY I

11327 06 **Establishing fast, practical, full-chip ILT flows using machine learning (Invited Paper)** [11327-4]

11327 07 **Mask synthesis using machine learning software and hardware platforms (Invited Paper)** [11327-5]

11327 09 **Model based CAOPC flow for memory chips to improve performance and consistency of RET solutions** [11327-41]

11327 0A **Physics based feature vector design: a critical step towards machine learning based inverse lithography** [11327-7]

MACHINE LEARNING AND COMPUTATIONAL LITHOGRAPHY II

11327 0B **Accurate etch modeling with massive metrology and deep-learning technology** [11327-8]

11327 0C **SRAF printing prediction using artificial neural network** [11327-9]

11327 0D **Improving ORC methods and hotspot detection with the usage of aerial images metrology** [11327-10]

11327 0F **Fast all-angle Mask 3D for ILT patterning** [11327-12]

PROCESS CONTROL, RESIST MODELING

11327 0G **Resist shrinkage during development: rigorous simulations and first compact model for OPC** [11327-13]

11327 0H **Compact resist model using single convolution kernel** [11327-14]

11327 0I **Rigorous simulation of implant resist on topographic wafer** [11327-15]

11327 0J **Rigorous vase data fitting for ultrathin films** [11327-16]

11327 0K **TrueMask ILT MWCO: full-chip curvilinear ILT in a day and full mask multi-beam and VSB writing in 12 hrs for 193i** [11327-17]

LITHOGRAPHY EQUIPMENT, FOCUS CONTROL

11327 0M **Divided spectrum illumination for high resolution flat panel display exposure tools** [11327-19]

11327 0N **Investigating the fine line lithography process on the large-size organic panels for advanced packaging and development** [11327-20]

11327 0O **Accuracy improvement in advance lithography focus control** [11327-21]

DUV AND EUV MATCHING

11327 0S **Holistic alignment approach for on-product overlay improvement on DUV lithography process with combined solutions** [11327-24]

11327 0T **A novel projection lens manipulator for high frequent overlay tuning** [11327-25]

OVERLAY AND CD CONTROL

11327 0U **Advanced high order field-to-field modeling for wafer edge control** [11327-26]

11327 0V **Application of intra-field alignment to reduce wafer-to-wafer variation** [11327-27]

11327 0W **Novel overlay correction using inline alignment station (iAS) for scanner** [11327-28]

11327 0X **Improvement of SADP CD control in 7nm BEOL application** [11327-48]

11327 0Y **Through-the-mask (TTM) optical alignment for high volume manufacturing nanoimprint lithography systems** [11327-30]

POSTER SESSION

11327 0Z **Design and fabrication of UVLED array aligner for proximity and soft contact exposure** [11327-31]

11327 11 **Proteus SMO for process window improvement** [11327-33]

11327 13 **Approach for lightsource utilization improvement by extending Preventive Maintenance (PM) cycle along with performance monitoring feature** [11327-35]

11327 16 **Comparison of different lithographic source optimization methods based on compressive sensing** [11327-38]

11327 17 **Imaging performance enhancement by improvements of spectral performance stability and controllability on the cutting-edge** [11327-39]

11327 19 **Fast algorithm of the scanning lithographic metrics based on a quadratic imaging model and an integral transfer function** [11327-42]

11327 1A **Target recovery process optimization to improve image based overlay performance for critical recording head manufacturing processes** [11327-43]

11327 1B **KrF excimer laser-based patterning system for dual applications in both lithography and ablation** [11327-45]

11327 1C **Evaluating and correcting pattern variability induced by OPC within regular array layout** [11327-46]
