

PROCEEDINGS OF SPIE

# ***Organic Electronics and Photonics: Fundamentals and Devices II***

**Sebastian Reineke  
Koen Vandewal  
Wouter Maes**  
*Editors*

**6–10 April 2020  
Online Only, France**

*Sponsored by*  
SPIE

*Cosponsored by*  
City of Strasbourg (France)  
Eurometropole (France)  
CNRS (France)  
iCube (France)  
Université de Strasbourg (France)

*Cooperating Organisations*  
Photonics 21 (Germany)  
EOS—European Optical Society (Germany)  
Photonics Public Private Partnership (Belgium)  
Photonics France (France)

*Published by*  
SPIE

**Volume 11365**

Proceedings of SPIE 0277-786X, V. 11365

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in Organic Electronics and Photonics: Fundamentals and Devices II, edited by Sebastian Reineke, Koen Vandewal, Wouter Maes, Proceedings of SPIE Vol. 11365 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$18.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

Paper Numbering: Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## ORGANIC ELECTRONIC DEVICES AND OLEDs I

---

11365 05	<b>Inkjet printing of multiple layers for large-scale, cadmium-free quantum dot light-emitting diodes</b> [11365-4]
----------	---

---

## POSTER SESSION

---

11365 00	<b>Innovation management in laser research: research project combines technological development with economic benefits (final main results)</b> [11365-24]
11365 0Q	<b>Spatially and temporally resolved degradation in antisolvent treated perovskite films</b> [11365-27]
11365 0U	<b>Plasmonic metal-oxide core-shell nanoparticles for enhanced power conversion efficiency of organic solar cells</b> [11365-32]
11365 0W	<b>Ultrafast photophysical studies and femtosecond third-order nonlinear optical properties of a Soret-band excited zinc phthalocyanine</b> [11365-35]
11365 0X	<b>Photosensitive junctions based on UV-modified graphene and inkjet-printed organic molecules</b> [11365-36]
