

PROCEEDINGS OF SPIE

Photosensitive Materials and their Applications

Robert R. McLeod
Inmaculada Pascual Villalobos
Yasuo Tomita
John T. Sheridan
Editors

6–10 April 2020
Online Only, France

Sponsored by
SPIE

Cosponsored by
City of Strasbourg (France)
Eurometropole (France)
CNRS (France)
Région Grand Est (France)
iCube (France)
Université de Strasbourg (France)

Cooperating Organisations
Photonics 21 (Germany)
EOS—European Optical Society (Germany)
Photonics Public Private Partnership (Belgium)
Photonics France (France)

Volume 11367

Proceedings of SPIE 0277-786X, V. 11367

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photosensitive Materials and their Applications*, edited by Robert R. McLeod, Inmaculada Pascual Villalobos, Yasuo Tomita, John T. Sheridan, Proceedings of SPIE Vol. 11367 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$18.00.

Printed in the United States of America

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii	<i>Authors</i>
ix	<i>Conference Committee</i>

MATERIAL DESIGN, CHARACTERIZATION AND ANALYSIS

11367 02	Aqueous photochemistry for the fabrication of grating sensors in hydrogels (Invited Paper) [11367-1]
11367 06	Optimisation of the performance of holographic beam-shaping diffractive diffusers through refinement of the recording process [11367-4]

SENSING APPLICATIONS AND VOLUME REFLECTION GRATINGS

11367 0B	Holographic transmission gratings stored in a hydrogel matrix [11367-9]
----------	--

PHOTOSENSITIVE GLASS

11367 0I	Study of optical diffraction in Bragg and intermediate regime for a gratings on PTR glass [11367-16]
----------	--

PHOTOSENSITIVE NANOCOMPOSITE MATERIALS

11367 0M	Nanodiamond-polymer composite gratings as diffractive optical elements for light and neutrons I: their fabrication and light optical diffraction properties [11367-20]
11367 0N	Nanodiamond-polymer composite gratings as diffractive optical elements for light and neutrons II: neutron optical diffraction properties [11367-21]

APPLICATIONS OF VOLUME HOLOGRAPHIC GRATINGS

11367 0O	DigiLens holographic photopolymers for wide angle AR waveguides (Invited Paper) [11367-22]
11367 0T	Optical replication of relief-phase gratings in volume medium [11367-27]

LIQUID CRYSTAL AND WAVEGUIDE STRUCTURE

- 11367 0V **Effect of chiral concentration of chiral smectic C liquid crystal mixture on the photorefractive property** [11367-29]
- 11367 0X **Optical analysis and characterization of self-written and coupled waveguides** [11367-31]

PHOTOSENSITIVE MATERIALS

- 11367 0Y **Photoactive organic-inorganic hybrid polymer waveguides for optical device technologies (Invited Paper)** [11367-32]
- 11367 10 **Rapid optical erasure of surface relief and bulk birefringence gratings in azo-polymer thin films** [11367-34]
- 11367 11 **High fidelity holographic recording with cyclic allylic sulfide monomer** [11367-35]

APPLICATIONS OF PHOTOSENSITIVE MATERIALS

- 11367 15 **New ways how to apply Bayfol HX® film into recording stacks and into optical parts** [11367-39]
- 11367 17 **Relief phase diffraction gratings providing quadrature phase shift for optical encoder** [11367-41]
- 11367 18 **Improving the repeatability of the spectral bandwidth and diffraction efficiency of holograms formed in dichromated gelatin** [11367-42]

POSTER SESSION

- 11367 1B **Trapping of dielectric microparticles on iron-doped lithium niobate crystal by optical Bessel beam induced space-charge field** [11367-45]
- 11367 1C **Batch imprinting of DFB fiber lasers for underwater sensing using excimer KrF laser** [11367-47]
- 11367 1E **3-dimensional modelling of the DOEs formation in PVA/AA photopolymers** [11367-49]
- 11367 1G **Diffraction efficiency of polarization holographic gratings recorded in azopolymer thin films coated using different solvents** [11367-51]
- 11367 1I **Principles of developing of a scintillation detector based on SiPM for field gamma-spectrometry problems** [11367-53]

11367 1N **Application of scanning focused x-ray imaging positioning technique in preparation of GaAs photocathodes** [11367-54]
