

PROCEEDINGS OF SPIE

Photonics and Plasmonics at the Mesoscale

Sylvain Lecler
Vasily N. Astratov
Igor V. Minin
Editors

6-10 April 2020
Online Only, France

Sponsored by
SPIE

Cosponsored by
City of Strasbourg (France)
Eurometropole (France)
CNRS (France)
Région Grand Est (France)
iCube (France)
Université de Strasbourg (France)

Cooperating Organisations
Photonics 21 (Germany)
EOS—European Optical Society (Germany)
Photonics Public Private Partnership (Belgium)
Photonics France (France)

Volume 11368

Proceedings of SPIE 0277-786X, V. 11368

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Photonics and Plasmonics at the Mesoscale*, edited by Sylvain Lecler, Vasily N. Astratov, Igor V. Minin, Proceedings of SPIE Vol. 11368 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

WHISPERING GALLERY MODES AND APPLICATIONS

- 11368 02 **Hybrid system of different shapes of gold nanoparticles on microcavity to study Purcell's effect (Invited Paper)** [11368-1]
- 11368 04 **Scatterer induced Fano resonances in WS₂ coated microsphere resonator** [11368-3]

PHOTONIC JETS AND UNCONVENTIONAL BEAMS

- 11368 06 **Tuning the photonic nanojet based on the Babinet principle (Invited Paper)** [11368-5]
- 11368 07 **Electromagnetic field localization behind a mesoscale dielectric particle with a broken symmetry: a photonic hook phenomenon (Invited Paper)** [11368-6]
- 11368 09 **Nanojet-based dielectric multi-material color splitters for image sensor applications** [11368-8]
- 11368 0A **Structuring non-diffracting hollow beams within micrometer spatial domains** [11368-9]

PLASMONICS AND METAMATERIALS

- 11368 0B **Development of mesoscale photonics and plasmonics: a tribute to the jubilee of Professors Igor V. Minin and Oleg V. Minin** [11368-14]

POSTER SESSION

- 11368 0E **Tailoring light absorption of plasmonic-doped spherical dielectric microcapsule (Invited Paper)** [11368-11]
- 11368 0F **Exploiting plasmon resonances in a composite photonic crystal for polarization-sensitive dichroic filtering (Invited Paper)** [11368-12]
