Volume 11380

Proceedings of SPIE 0277-786X, V. 11380

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Nondestructive Characterization and Monitoring of Advanced Materials, Aerospace, Civil Infrastructure, and Transportation XIV*, edited by Tzu-Yang Yu, H. Felix Wu, Peter J. Shull, Andrew L. Gyekenyesi, Proceedings of SPIE Vol. 11380 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

PZT TRANSDUCERS FOR NDE/SHM

11380 04 **Railway vehicle vibration energy harvesting using nonlinear resonators** [11380-3]

MICROWAVE/RF/RADAR NDE

11380 06 **Active magnetic sensing for subterranean urban target discrimination** [11380-5]

11380 07 **Quantification of surface crack depth in concrete panels using 1.6 GHz GPR images** [11380-6]

11380 08 **An in-situ millimeter-wave diagnostic for droplet characterization during jetting-based additive manufacturing processes** [11380-7]

ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING IN NDE/SHM

11380 0B **Machine learning enabled damage classification in composite laminated beams using mode conversion quantification** [11380-11]

11380 0C **Damage localization on composite structures: radial basis function application** [11380-12]

11380 0D **Structural damage identification using multi-objective optimization-based inverse analysis** [11380-13]

AUTOMOTIVE AND AEROSPACE STRUCTURES

11380 0L **Elastodynamic-reciprocity-based analysis of guided wave motion due to finite-length through-thickness tensile and shear cracks in plates** [11380-21]

11380 0M **Simulating bird strikes using smoothed particle hydrodynamics for improved aircraft safety** [11380-22]

11380 0O **Structural damage assessment of MAV flapping wings using DIC-wavelet technique** [11380-24]

NDE/SHM FOR CORROSION DETECTION

11380 0Q **Corrosion detection with ray-based and full-waveform guided wave tomography** [11380-27]

SMART MATERIALS FOR NDE/SHM

- 11380 OS **Multifunctional fatigue testing setup for in-plane operating DEAs** [11380-29]
- 11380 OU **Electromechanical analysis of self-sensing CFRP and its application to real-time non-destructive evaluation** [11380-32]

PIPES AND PIPELINES

- 11380 OV **Reciprocal amplification of wave front for planar or point sources using a metamaterial lens to increase the inspection distance of pipelines** [11380-33]
- 11380 OX **Evaluation of a cladding steel pipe artificially aged by NDE** [11380-35]

MODAL ANALYSIS AND DYNAMIC METHODS FOR NDE/SHM

- 11380 OY **In-situ damage monitoring of composites under dynamic impact using nylon/Ag fiber sensor** [11380-37]
- 11380 OZ **Development of a diagnostic technique for civil structures based on the model update of dynamic parameters** [11380-38]
- 11380 11 **Alternate strain-based modal analysis using piezosensors** [11380-40]

LDV, DIC, CAMERA, AND PHOTOGRAMMETRIC NDE

- 11380 13 **Non-destructive evaluation of additively manufactured metal (AISI10Mg) brackets using laser Doppler vibrometry and acoustical resonance spectroscopy** [11380-42]
- 11380 16 **Motion blur suppression by using an optical derotator for deformation measurement of rotating components** [11380-45]
- 11380 17 **Use of high-speed camera for defect detection in FRP bonded system under different excitation methods** [11380-46]

ACOUSTIC/ULTRASONIC NDE/SHM I

- 11380 1F **A nonlinear ultrasonic hybrid modulation subtraction method for structural health monitoring using sparse arrays** [11380-56]

POSTER SESSION

- 11380 1H **Nondestructive evaluation and monitoring of vibration characteristics of equipment by MEMS sensors** [11380-58]
- 11380 1J **Determination of the acoustic anisotropy on a recent and aged Mexican pine wood by ultrasound** [11380-60]
- 11380 1M **Composite bond quality nondestructive evaluation with noncontact Lamb wave system** [11380-63]
- 11380 1N **Acoustic metamaterial structure for potential health monitoring** [11380-64]
- 11380 1P **Acoustic emission damage evaluation of rolling element bearings for shipboard machinery** [11380-66]

ADDITIONAL PAPERS

- 11380 1Q **Ultrasonic evaluation of polymer additively manufactured parts for defect inspection and structural integrity assessment** [11380-70]
