SPIE

**Volume 11459**

Proceedings of SPIE, 1605-7422, V. 11459

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Saratov Fall Meeting 2019: Computations and Data Analysis: from Nanoscale Tools to Brain Functions*, edited by Dmitry E. Postnov, Proceedings of SPIE Vol. 11459 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## EEG DATA INTERPRETATION

---

11459 02	<b>Recognition of EEG patterns during mental intentions: a comparative study</b> [11459-1]
11459 03	<b>Neural activity during maintaining a body balance</b> [11459-8]
11459 04	<b>Features of motor-related brain activity revealed via recurrence quantification analysis</b> [11459-10]
11459 05	<b>Using artificial neural networks for classification of kinesthetic and visual imaginary movements by MEG data</b> [11459-11]
11459 06	<b>Cognitive interaction via a brain-to-brain interface</b> [11459-13]
11459 07	<b>Spatio-temporal activity in cortical network during cognitive activity</b> [11459-14]
11459 08	<b>Network analysis of electrical activity in brain motor cortex during motor execution and motor imagery</b> [11459-16]
11459 09	<b>Network structure of children's brain activity during cognitive load</b> [11459-18]
11459 0A	<b>Maintaining attention state of children during cognitive load</b> [11459-19]
11459 0B	<b>Analysis of real and imaginary motor activity with combined EEG and fNIRS</b> [11459-24]
11459 0C	<b>The typical dynamic of various frequency patterns in EEG recordings of post-stroke patients in acute period</b> [11459-25]
11459 0D	<b>Studying of human's mental state during visual information processing with combined EEG and fNIRS</b> [11459-27]

---

## NEW TECHNIQUES OF DATA ANALYSIS

---

- 11459 OE     **The space-time skeleton method for analyzing EEG data** [11459-28]
- 11459 OF     **The recurrence plot analysis in the processing of experimental biomedical data** [11459-20]
- 11459 OG     **New methods for processing spatial human electroencephalography based on modified wavelet analysis** [11459-21]
- 11459 OH     **Detecting best lag of embedding for modeling spike-wave discharges from experimental data** [11459-7]
- 11459 OI     **The technique for determining on EMG signals the precursors of start of limb movement** [11459-9]
- 11459 OJ     **Detection of early gastric cancer with wavelets** [11459-4]
- 11459 OK     **Identification of the most informative wavelengths for non-invasive melanoma diagnostics in spectral region from 450 to 950 nm** [11459-23]
- 11459 OL     **Features of phase synchronization of cardiovascular and respiratory oscillations in humans** [11459-6]
- 11459 OM     **Synchronization and coherence of the low-frequency components of the signals of the cardiovascular system in newborns** [11459-26]

---

## MODELING STUDIES ON CARDIOVASCULAR REGULATION AND BRAIN PHYSIOLOGY

---

- 11459 ON     **The role of NCX in initiation and expansion of astroglial  $Ca^{2+}$  events in a distributed model** [11459-30]
- 11459 OO     **Calcium activity in a sponge astrocyte model with AVF-parameter control** [11459-31]
- 11459 OP     **Functional model of the neurovascular unit: seeking for balance between physiological relevance and computability** [11459-32]
- 11459 OQ     **Opening the BBB could disable neurovascular coupling: the quantitative mathematical model prediction** [11459-39]
- 11459 OR     **Synchronization of cerebral and peripheral blood circulation: stress-induced changes** [11459-3]
- 11459 OS     **Mathematical modeling of low-frequency oscillations induced by modulated noise in human microvasculature** [11459-5]
- 11459 OT     **Application of cross-recurrent analysis to coupling detection in mathematical model of circulation autonomic control** [11459-22]

11459 0U **Mathematical model of lymphangion contractility** [11459-35]

---

**THEORETICAL BIOPHYSICS AND NONLINEAR DYNAMICS**

---

11459 0V **Interaction of bistable neurons leading to the complex network dynamics** [11459-12]

11459 0W **Control of dynamics of bistable neural network by an external pulse** [11459-15]

11459 0X **Inference of functional dependence in coupled chaotic systems using feed-forward neural network** [11459-17]

11459 0Y **Energy exchange of a M-soliton cluster in a 2D Morse lattice** [11459-33]

11459 0Z **Breathing dynamics of 2-crowdions in platinum** [11459-34]

11459 10 **A review of specially discretized Klein-Gordon models** [11459-37]

11459 11 **Phase transitions in carbon nanotube bundles under lateral compression** [11459-38]

11459 12 **Scaling features of intermittent dynamics characterized from data sets** [11459-2]
