Desired Describe with Industry as a Learning Otestamy for International Family and Family and the	
Project-Based Learning with Industry as a Learning Strategy for Improvement Engineering Education	1–2 3–7
Work-in-Progress: Towards detection and syntactical analysis in UML class diagrams for software engineering education	3-7 8-11
Work-in-Progress: Internet Marketing Simulation for Project-Based Learning μLAB A remote laboratory to teach and learn the ATMega328p μC	12–13
Work-in-Progress: Soft-skills Development for Higher Education Engineering and Economic Students using HERA Collaborative Serious Games	12-13
Introducing Robotics to an English for Academic Purposes Curriculum in Higher Education: The Student Experience	20-21
Work-in-Progress: A Student-Centered Learning Environment for Foundation Computer Science Online Courses	N/A
A demo platform to teach and learn the behaviour of a PI controller	26–27
Work-in-Progress: Encouraging Girls in Science, Engineering and Information Technology	28–32
Work in Progress: Competence Building in Engineering Education in Mongolia	33–36
Internationalised Master Degree Education in Nanoelectronics in Asian Universities	37–40
Work-in-Progress: Pedestrian bridge application in a Fundamentals of Structural Analysis course inside an Architecture bachelor program	41–45
Work in Progress: Exploring teamwork and inclusivity amongst engineering students at a South African university	46–50
Effect of Multinational Projects on Engineering Students through a Summer Exposure Research Program	51–55
Mapping the Students' Journey to Develop Student-Centered Tools	56–60
Smart Technology to Improve Cultural and Gender Diversity in Engineering Education	61–65
Fostering metacognitive process using Active Learning in a Mechatronic Engineering Course	66–71
V-LAB – The Virtual Electric Machines Laboratory	72–77
Problem-Solution Patterns in the Introductions of Chemical Engineering Research Articles: Pedagogical Insights	78–84
Applied Physics Laboratory: A novel methodology	85–90
IoT as an Introduction to Computer Science and Engineering: A Case for NodeMCU in STEM-C Education	91–95
Which Strategies are Used in the Design of Technical LA Infrastructure?: A Qualitative Interview Study	96–105
Low-cost Remote Laboratory Concept based on NI myDAQ and NI ELVIS for Electronic Engineering Education	106–109
Flipped classroom in a CS1 course	110–114
Rethinking Quantitative Skills in a Data-Driven Society: A View from the Middle East	115–119
Enhancing the Psychological Dimension of Academic Advising via Implementing CliftonStrengths Themes	120–126
An Eye-Tracking Project in Industrial Design Education: A case study for Engaging in the Research Process	127–132
STEM 3.0 for Chinese Students with Sea Perch Underwater Robots: An Experimental Summer Camp for Hands-on Thinkers in Shanghai	133–138
Challenges of Academic Mobility in View of Students Inclusion in Engineering Education	139–144
Fostering students' analytical thinking and applied mathematical skills through 3D design and printing	145–149
Sustainable product design education: engineering students' perceptions and attitudes	150-157
Collaborative virtual community to share class plans for STEAM education	158–163
Deep learning practice for high school student engagement in STEM careers	164–169
Calculation of the Hubble Universe Expansion Constant by Analyzing Observational Data: An Exploratory Teaching Proposal based on STEM Epistemology	170–177
Support prospect of success in mathematics for first-year students in engineering	178–182 183–191
Automated Authentic Assessment Applied to an Undergraduate Course in Network and System Administration	192–196
"Should I Add 'Computer Science Education' to My Tinder(TM)-Bio?": An Investigation of Teacher Candidates' Stereotyping Modern Serious Board Games: modding games to teach and train civil engineering students	192-190
Software Engineering Education: Challenges and Perspectives	202–209
How Challenge Based Learning enables entrepreneurship.	210-213
RoboSTEAM Project Systematic Mapping: Challenge Based Learning and Robotics	210 210
Why Disciplinary Culture Matters: Lessons Learned from 7 Years of Internationalization in Engineering Education	222–226
Role of design and research work of hearing impaired students while mastering natural sciences at technical university in developing their cognitive skills	227–235
Learning-by-Doing as an Educational Method of Conducting Experiments in Electronic Physics	236–241
Developing English Language Competence for Global Engineers	242–249
Transferring Research on IoT Applications for Smart Buildings into Engineering Education	250-254
A Review of Personal Teaching Environments to Support Teaching Activities	255–263
On the Acceptance and Effects of Recapping Self-Test Questions in MOOCs	264–272
Involvement of students in online master's studies of Engineering and Science: a path to minimize the gender gap in STEM	273–278
Study of Wave Motion and Teaching Methods in Engineering Problem Solving Course	279–283
Providing Feedback for Students in E-Learning Systems: a Literature Review, based on IEEE Explore Digital Library	284–289
Emídio Garcia School Pilot description: A Robosteam Erasmus+ Project Activity based on a Challenge based Learning Approach	290–294
Influence of Problem-Based Learning on Student Performance	295–299
Active Learning Behavior of Men and Women in MOOC Discussion Forums	300–307

Title Iable of Contents	Page range
Foundation Courses' Soft Skills Evaluation using Fuzzy Cognitive Maps	308–314
Biomedical students' motivation with project-based learning: a case study	315–318
Analysing Exam Results – Developing a Methodology	319–322
Teaching Network Covert Channels using a Hands-on Approach	323–328
Automated Measurement of Competencies and Generation of Feedback in Object-Oriented Programming Courses	329–338
Interdisciplinary Education - The Case Of Bio Medical Signal Processing	339–343
Elemem: Interactive Digital Card Game for Chemistry	344–348
Work in Progress: Hardware Development for a Remote Lab Platform to Investigate Grasping Scenarios of Robotic Grippers	349–353
Non-Technical skills needed by cybersecurity graduates	354–358
Training needs for a PhD programme in Engineering Education	359–363
A Concept for Addressing Abstract Thinking Competence While Teaching Software Development	364–373
STR-SA: Session-based Thread Recommendation for Online Course Forum with Self-Attention	374–381
Practical Framework for Problem-Based Learning in an Introductory Circuit Analysis Course	382–391
MuLE - a Multiparadigm Language for Education	392–401
Stack Overflow – Informal learning and the global expansion of professional development and opportunities in programming?	402–408
Curriculum for Business Information Technology Studies at BSc and MSc Levels – Observations from a Long-term Educational Endeavour	409–418
Investigating the Timeliness and Quality of Assessment Feedback in a Computing Laboratory using a Custom Application	419–428
Trauma Narrative for Civil Engineering Students: A Case Study on Hydrometeorological Disaster Victims in Malaysia	429-433
Virtual Ecological Laboratory to develop a PV module recycling workshop	434–441
The Future of Things: Simulations and Next Generation Manufacturing	442–446
Detecting Learner Engagement in MOOCs using Automatic Facial Expression Recognition	447–456
Visual block programming languages and their use in educational robotics	457–464
Positive Effects of Summer Research Program on Diverse Community College Students	465–471
Two Cs of Signals and Systems that should be taught initially in Discrete Time: Causality & Convolution	472–476
Student-Centered Engineering Education: The Renewable Energy Case	477–486
Sail Car - An EPS@ISEP 2019 Project	487–492
Problem based learning for teaching new technologies	493–496
Hands-On Power Electronics Course - deep understanding by combination of simulation, calculation and practical measurements	497–503
Bringing Students and Companies together by means of Project development	504–511
Improving the Flipped Classroom Model by the Use of Inductive Learning	512-520
Teaching Triangle Rigidity to K-12 Students with Applications to Civil Engineering	521–524
Strategies for Teaching Industry-Specific English and German Terminology to Engineering Students	525-529
Experiments in Active Learning through Project Across Courses	530–539
A hierarchical RNN-based model for learning recommendation with session intent detection	540–547
Digitization of a Lecture – An Experience Report	548–553
STEM Educator challenges and professional development needs: the educators' views	554–562
Teacher education in engineering design through practice in reverse engineering and making	563–567
Overseas Use of a Remote Laboratory	568–573
"Yo quiero ser científica" a creative way to inspire girls in science	574–578
Technical projects with social commitment for teaching-learning intervention in STEM students	579–586
Methodology for training engineers teamwork skills	587–591
Insights in Students' Problems during UML Modeling	592-600
Providing competencies through practical activities for future engineering students	601–604
Development and Evaluation of an Assessment Tool for Self-Reflection	605–612
Lack of adoption of education technology on an instant student and lecturer feedback system	613–621
Evaluation of Decision-making Quality Using Multi-attribute Decision Matrix and Design Thinking	622–629
Collaborative Learning for Innovation Education	630–637
Metacognitive awareness and Creative Thinking: the capacity to cope with uncertainty in engineering	638–643
Becoming Fully Operational: Employability and the Need for Training of Computer Science Graduates	644–651
Semestre i as an Active Methodology to modify the Teaching-Learning Process in Engineering	652–666
Using Knowledge Networks to Support the Student's Learning Initiative	667–672
Succesful Strategies for the attraction of more women into Engineering in Southern Mexico	673–678
Addressing Students' Creativity in Algorithm Design	679–684
Behaviour Patterns of Learners while Solving Programming Task: an Analysis of Log Files	685–690

Title Iable of Contents	Page range
Potentializing the problem-solving competence in programming courses through a practice-based learning + tutoring strategy	691–697
A hybrid flipped-learning model and a new learning-space to improve the performance of students in Structural Mechanics courses	698–703
The Effect of Mandatory Assignments on Students Learning Outcome and Performance in Introductory Programming Courses	704-712
Reconfigurable web-interface remote lab for instrumentation and electronic learning	713–717
Initiative to Increment the number of Women in STEM Degrees: Women, Science and Technology Chair of the Public University of Navarre	718–721
The concepts of Linear Algebra present in Industrial Robotics: integrative designs and applications	722-726
Engaging Students in Research: a Comparative Case Study Between Engineering and Business	727-733
Designing a Competency-oriented Prep Course for First-Year CS Students	734–740
Engineers' job - related perceptions of empathy in Germany	741–745
Performance of college students in a statistics course using mastery learning	746–751
Associative Media Learning Using Smartwatches	752-755
The Open Design education approach - an integrative teaching and learning concept for management and engineering	756–762
Embedded cluster platform for a remote parallel programming lab	763–772
Effects of a Hackathon on the Motivation and Grades of CS1 Students	773–778
THE PERCEPTION AND THE KNOWLEDGE OF ENGINEERING TEACHERS ABOUT THE STRUCTURATION OF THE PROJECT BASED LEARNING	779–786
RECoNE: A Remote Environment for Computer Networks Education	787–791
Challenge-Based Learning and Traditional Teaching in Automatic Control Engineering Courses: a Comparative Analysis	792–798
Service Learning with Impact: How Engineering Students and People with Disabilities Acquire Future Skills	799–807
Teaching Technical Journalism with an Engineering Foundation	808-813
Mechatronic TVET Student Development Using Project Approach for In-depth Learning	814-818
Using Learning Styles to Accommodate for Heterogeneous Groups of Learners in Software Engineering	819-826
Applying Data Analysis to Identify Early Indicators for Potential Risk of Droupout in CS Students	827-836
Report of a CS1 Course for Computer Engineering Majors Based on PBL	837-846
Learning Platform for Power Quality Surveillance	847-851
Augmented Reality and Matlab® for Visuospatial Competence Development	852-858
Gamification in STEM programming courses: State of the art	859-866
Students' integration in Engineering degrees: Mathematics Support Center (CeAMatE) Product-based Learning using CES EduPack in Undergraduate Engineering Courses	867–870 871–877
Application of PBL in ERP Textbook Design and Technical University Students Learning Effectiveness Study	878-884
Challenge-Based Learning (CBL) in Engineering: which evaluation instruments are best suited to evaluate CBL experiences?	885-893
Examples of authentic assessments in engineering education	894-897
Study methods in introductory programming courses	898–904
	905-912
Sustaining complex projects by linking in- and off-curriculum elements: The BRSU Racing Engineer Certificate	913–918
Use of XR technologies to bridge the gap between Higher Education and Continuing Education C4 model in a Software Engineering subject to ease the comprehension of UML and the software development process	919-924
Closing the Theory-Practice Gap: Psychologically-Based Laboratory Course in Electrical Engineering	925-930
Technical Setup of an Inverted Virtual Classroom	925-930
Mechanisms for Intercultural Competence Development for Engineering Students	938–942
	943-947
Building Resilience in Engineering Students: Rube Goldberg Machine Massive Challenge Scrum Higher Education – The Scrum Master Supports as Solution-focused Coach	943-947
Teaching 3D Printing Technology Hands-on	946-952 953-957
Equalizing Opportunities of First Year Students of Engineering Faculties by Improving Their Knowledge of Mathematics	
A Systematic Quantitative and Qualitative Analysis of Participants' Opinions on Peer Assessment in Surveys and Course Forum Discussions of MOOCs	958-961
	962-971
Support to Construct Work Process Knowledge in Blended Work-process-oriented Learning	972–979 980–987
Architecture Proposal for Micro-learning Application for Learning and Teaching Programming Courses Integration of circular economy principles for developing sustainable development competences in higher education: an analysis of bachelor construction	988–996
	997-1000
Increasing student motivation in computer programming with gamification	
A Taxonomy of Engineering Attributes for Tackling Humanitarian Challenges	1001–1006 1007–1012
Demystifying Humanitarian Engineering: A comparative study on perceptions in UK and Asia	
Using Transmedia Approaches in STEM Predicting students' performance using survey data	1013–1016 1017–1023
Supporting Teachers for Innovative Learning in Smart Schools using Internet of Things	1024-1030
Virtual Reality as a tool for active learning and student engagement: industrial engineering experience	1031-1037
Key factors of subjective well-being index in engineering students	1038–1043

Title Iable of Contents	Page range
Design Of Interactive Learning Cyber-Physical Tools for Mechanical Design Engineering Courses	1044–1048
Predicting performance with AI, a new tool for teachers and students	1049–1054
Engaging a Calculus course with Telepresence through Gamification	1055–1059
Enhacing ABET problem solving and function on a team with a Programming Methodology	1060-1064
Problem-based learning for Data Science: The Da.Re Approach	1065–1071
Questionnaire-based Evaluation of a Block scheduled instruction in computer engineering	1072-1078
A living lab for professional skills development in Software Engineering Management at U.Porto	1079–1085
Computer-supported Collaborative Learning in Programming Education: A Systematic Literature Review	1086–1095
DEVELOPING QUALITY ASSURANCE FOR WORK PLACEMENT IN HIGHER EDUCATION	1096–1101
Approaches to Assessing the level of Engineering Students' Sustainable Development Mindset	1102-1109
DEVELOPING STUDENTS' INTERCULTURAL COMPETENCE DURING THE PROFESSIONAL ORIENTED COURSE IN ENGLISH AS A FOREIGN	1110–1114
Enhancing Multicultural and Global Literacy through Computer Science Gaming	1115–1118
Cloud and WebRTC based Laboratory Solution for Practical Work in Computer Science for a Traditional University	1119–1124
Game-based learning approach to cybersecurity	1125–1132
3D Printing in Education: an European perspective	1133–1138
A multigenerational approach to Project Management: implications for Engineering Education in a smart world	1139–1148
Concept Maps and Self-Regulated Learning: an Exploratory Study	1149–1158
Engaging professional competencies through gamification	1159–1163
ENGAGING ENGINEERING STUDENTS IN CULTURAL DIVERSITY AND UNITY STUDIES	1164–1167
Identifying Cheating Users in Online Courses	1168–1175
Continuous Professional Development for Secondary Education Teachers to adopt Next Generation Digital Learning Environment Platforms	1176–1182
Thermographic Data Acquisition System for Livestock Applications: PBL approach	1183–1186
An investigation into the effects of gamification on students' situational interest in a learning environment	1187–1192
Framework of an Active Learning Python Curriculum for First Year Mechanical Engineering Students	1193–1200
Application of learning analytics to study the accuracy of self-reported working patterns in self-regulated learning questionnaires	1201–1205
Real-time modeling of abnormal physiological signals in a Phantom for Bioengineering Education	1206–1211
Teaching Supramolecular Chemistry with Microfluidic Techniques	1212–1216
Development of a Gamified Educational Framework to Teach Mechanical Engineering to High School Students	1217–1224
Beyond Creativity: Reflection and Practice of Imagination with Students of Technical Universities	1225-1229
Bridging the gaps in engineering curriculum through systems engineering approach	1230–1236
Introduction of Data Literacy in the Undergraduate Engineering Curriculum	1237–1245
Analyzing Learning Outcomes for a Massive Online Competition through a Project-Based Learning Engagement	1246-1251
Perception of the gender gap in computer engineering studies: a comparative study in Peru and Argentina	1252-1258
Playful Computer Science for Girl Scout Juniors	1259–1265
Ways and Benefits of Closing the Gap: Aligning Language and Communication Teaching with the Technical Curriculum	1266-1271
Modern Mechatronics and Robotics Education Program: Border Cooperation between Estonia and Russia	1272-1277
Software Startup formation in an experiential-based course – An Empirical Investigation of Students' Motivations	1278–1285
Online Drone Education, a Mapping Review	1286-1289
Building Methodologies for Teaching Transversal Skills to Future Engineers	1290-1298
Experiencing the Sheffield Team Software Project: A project-based learning approach to teaching Agile	1299–1305
Experience with teaching with BBC micro:bit	1306–1310
SWitCH: A Reskilling Program in Information Technology	1311–1315
Introducing Engineering Undergraduate Students to Network Management Techniques: a Hands-on approach using the Citylab Smart City	1316–1324
Analysing and Improving mathematical formulation of WEBAVALIA: A self and peer assessment tool	1325–1332
A Low-Cost Remote Laboratory for Photovoltaic Systems to Explore the Acceptance of the Students	1333–1337
Validation of instruments to measure social entrepreneurship competence. The OpenSocialLab project	1338–1342
Use of emerging technologies for the proposal and design of a course on the development of social entrepreneurship competencies	1343–1346
Entrepreneurial barriers perceptions of Information Technology students	1347–1351
INTEGRATING SOFT SKILLS INTO ENGLISH LANGUAGE TEACHING IN ENGINEERING EDUCATION	1352–1356
Proposal of an educational strategy to bring students in telecommunications and networks back to the fundamentals of the discipline	1357–1360
Cybersecurity Education and Skills: Exploring Students' Perceptions, Preferences and Performance in a Blended Learning Initiative	1361–1369
Sustainability as a theme of interdisciplinarity between design and engineering courses	1370–1376
Understanding Fundamentals of Transistor Amplifiers by Mathematical Interactive Visual Modeling with GeoGebra	1377–1380
Towards the development of learner autonomy of Portuguese mechanical engineering students	1381–1386
