Volume 11363

Proceedings of SPIE 0277-786X, V. 11363

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Tissue Optics and Photonics*, edited by Valery V. Tuchin, Walter C. Blondel, Zeev Zalevsky, Proceedings of SPIE Vol. 11363 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Authors*
ix *Conference Committee*

IMAGING II

- 11363 04 **Imaging of early stage breast cancer with circularly polarized light (Invited Paper)** [11363-3]
- 11363 05 **Polarimetric monitoring of docetaxel treated tumors in murine models** [11363-4]
- 11363 06 **Mobile system for early diagnosis of the parameters of pigmented skin lesions** [11363-6]
- 11363 07 **Cerebral haemodynamic effects in the human brain during radiation therapy for brain cancer** [11363-76]

IMAGING III

- 11363 08 **Remote photoacoustic tomography using diode-array and speckle-analysis (Invited Paper)** [11363-5]
- 11363 0B **Evaluation of germination ability of seeds at different temperatures by biospeckle optical coherence tomography** [11363-10]

DIAGNOSTICS AND MEASUREMENT

- 11363 0F **Agar-based phantoms for skin diagnostic imaging** [11363-15]

TISSUE OPTICS I

- 11363 0G **Measurement of optical properties of normal and pathological human liver tissue from deep-UV to NIR (Invited Paper)** [11363-16]
- 11363 0I **The ways and effects of ultraviolet radiation on the human and animal body** [11363-19]

IMAGING IV

- 11363 0J **Differential diagnostics of paraffin-embedded tissues by IR-THz spectroscopy and machine learning (Invited Paper)** [11363-20]

SPECTROSCOPY AND IMAGING I

- 11363 0U **5-ALA/PpIX photodiagnosis of stress-induced gastrointestinal metastatic tumours in laboratorial animals (Invited Paper)** [11363-31]
- 11363 0V **Optical fine needle biopsy in hepatocellular carcinoma mouse model** [11363-32]

SPECTROSCOPY AND IMAGING II

- 11363 0X **Combined spectroscopic and video fluorescent instrument for intraoperative navigation when removing a glial tumor (Invited Paper)** [11363-35]
- 11363 0Y **Measurements of iron-bound transferrin in breast cancer tumor xenografts using Raman spectral imaging** [11363-36]
- 11363 0Z **Autofluorescence spectroscopy of cutaneous neoplasia under ultraviolet, visible and near infrared excitation** [11363-37]
- 11363 10 **Multiparametric spectral diagnosis of skin cancer (Invited Paper)** [11363-47]

TISSUE OPTICS III

- 11363 13 **Diffuse reflectance Monte Carlo simulation to assess the transit time error in intraoperative fluorescence angiography** [11363-40]
- 11363 14 **Simulation of laser induced retinal thermal injuries for non-uniform irradiance profiles and their evaluation according to the laser safety standard** [11363-41]

THERAPY I

- 11363 18 **Sapphire-based medical instruments for diagnosis, surgery and therapy (Invited Paper)** [11363-45]

THERAPY II

- 11363 1D **Influence of the beam profile on laser-induced thresholds using explants** [11363-51]

IMAGING AND DATA PROCESSING

- 11363 1E **Remote thermal sensing of tissues based upon analysis of time-changing back-scattered speckle patterns (Invited Paper)** [11363-52]
- 11363 1F **Image reconstruction for remote photoacoustic tomography using speckle-analysis (Invited Paper)** [11363-53]
- 11363 1G **Depolarizing spaces for biological tissue classification based on a wavelength combination** [11363-54]
- 11363 1H **Blood pressure measurement based on pulse transit time from different positioned photoplethysmography signals** [11363-55]
- 11363 1I **Time-frequency analysis and laser Doppler spectrum decomposition to reveal new feature space for diagnosis of diabetes mellitus vascular complications** [11363-56]

POSTER SESSION

- 11363 1K **Wearable laser Doppler flowmetry for the analysis of microcirculatory changes during intravenous infusion in patients with diabetes mellitus** [11363-57]
- 11363 1L **Extraction of thickness and fluorophore concentration of the upper layer in a two-layered solid phantom using spatially resolved fluorescence spectroscopy** [11363-58]
- 11363 1N **A multimodal approach to monitoring the state of microvasculature in patients with psoriasis in the course of treatment** [11363-60]
- 11363 1O **Additive simulation of Raman light scattering from skin cancer using the Monte Carlo method** [11363-61]
- 11363 1P **The interaction mechanism between bovine serum albumin and single-walled carbon nanotubes depending on their diameter and concentration in solid bionanocomposites** [11363-62]
- 11363 1R **Wavelet transform of Fourier domain low coherence interference spectra for breast cancer detection** [11363-64]
- 11363 1S **PhotoBioModulation therapy (PBMT): the effect of rat weight on the delivered fluence to spinal cord injury rat model-computational study** [11363-65]
- 11363 1W **Temperature-stimulated changes in the spectral characteristics of the biological tissues** [11363-69]
- 11363 1X **Qualitative comparison of speckle image processing techniques for vein detection in plant leaf tissue** [11363-70]
- 11363 1Y **Developing an automated data acquisition system and real time analysis of an in house fabricated hand-held probe** [11363-71]

- 11363 20 **Remitted photon path length in human skin, skin phantoms and cell cultures** [11363-73]
- 11363 21 **Optical noninvasive diagnostics of dynamic changes in the level of blood microcirculation and oxidative metabolism using temperature tests** [11363-74]
- 11363 23 **Fiber probe configurations simulation for depth-resolved skin fluorescence registration** [11363-77]
- 11363 26 **Liposomal nanoparticles enhance contrast of fluorescence, speckle-contrast imaging, and ultrasound measurements in phantoms and murine model** [11363-80]
- 11363 29 **Binding of ceruloplasmin with cationic porphyrins: pH and salt composition of a medium** [11363-83]
- 11363 2A **Chemometric analysis of bioimplants of bone tissues during their manufacture** [11363-84]
- 11363 2B **Comparative analysis of the different types of plasty using Raman spectroscopy method** [11363-85]
- 11363 2C **Raman spectroscopy for studying the tissues of teeth infected by periodontitis** [11363-86]
