**Volume 11405**

Proceedings of SPIE 0277-786X, V. 11405

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Waveguide and Laser Sensors*, edited by Robert A. Lieberman, Glen A. Sanders, Ingrid U. Scheel, Proceedings of SPIE Vol. 11405 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## OPTICAL ROTATION SENSORS 2020 I

---

- 11405 02 **An overview of the development of fiber gyros (Invited Paper)** [11405-1]
- 11405 05 **The fiber optic gyro 'adventure' at Photonetics, iXsea and now iXblue (Invited Paper)** [11405-5]
- 11405 06 **Recent improvements in fiber optic gyros at Northrop Grumman Corporation (Invited Paper)**  
[11405-6]

---

## OPTICAL ROTATION SENSORS 2020 II

---

- 11405 09 **Progress with interferometric fiber optic gyro at Honeywell (Invited Paper)** [11405-10]

---

## DISTRIBUTED, NOVEL AND EXTREME ENVIRONMENT FIBER OPTIC SENSING APPLICATIONS I

---

- 11405 0F **Monitoring internal power transformer temperature using distributed optical fiber sensors (Invited Paper)** [11405-17]
- 11405 0G **Integrated auxiliary interferometer to correct non-linear tuning errors in OFDR** [11405-19]
- 11405 0H **Multistage 2  $\mu\text{m}$  polarization-maintaining single clad Tm-doped fiber amplifier** [11405-20]
- 11405 0I **Optical parametric generation in liquid- and gas-filled hollow core fibers** [11405-21]
