Volume 11408

Proceedings of SPIE 0277-786X, V. 11408

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Radar Sensor Technology XXIV*, edited by Kenneth I. Ranney, Ann M. Raynal, Proceedings of SPIE Vol. 11408 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SESSION 1 ALGORITHMS AND PROCESSING I

- 11408 02 **Machine learning for extracting target electrical parameters from qualitative inverse scattering imagery** [11408-1]
- 11408 03 **Real-time emulation of LTE emissions for testing spectrum sharing systems** [11408-2]
- 11408 04 **Method for determining low entropy POLSAR coherence matrices** [11408-3]

SESSION 2 ALGORITHMS AND PROCESSING II

- 11408 05 **Transmission scheduling in spatio-temporal process monitoring based wireless sensor networks** [11408-11]

SESSION 3 MICRO-DOPPLER

- 11408 08 **Micro-Doppler classification of activities of daily living incorporating human ethogram** [11408-14]
- 11408 09 **Multiple drone classification using millimeter-wave CW radar micro-Doppler data** [11408-15]
- 11408 0A **Cross-frequency training with adversarial learning for radar micro-Doppler signature classification (Rising Researcher Paper)** [11408-16]
- 11408 0B **Automatic arm gesture recognition using information gleaned from maximum instantaneous Doppler frequencies** [11408-17]

SESSION 4 PHENOMENOLOGY

- 11408 0C **Wireless underwater-to-air communications via water surface modulation and radar detection** [11408-18]
- 11408 0E **Nonlinear radar: a historical overview and a summary of recent advancements** [11408-21]

SESSION 5 SYSTEMS AND APPLICATIONS I

11408 OF **Simulation and verification of multi-functional pulsed-Doppler radars in presence of ground-clutter: a system approach** [11408-23]

SESSION 6 SYSTEMS AND APPLICATIONS II

11408 OJ **Balanced random walk for binary phase noise waveform design** [11408-28]

11408 OK **Chaotic systems for simultaneous communications and bistatic radar** [11408-29]

11408 OL **Moving target detection using bistatic radar** [11408-30]

SESSION 7 QUANTUM RADAR

11408 OQ **Correlation properties of single photon binary waveforms used in quantum radar/lidar**
[11408-35]

11408 OR **Remote sensing performance enhancement due to quantum + classical cooperative sensor**
[11408-36]

11408 OS **Electric field correlations in quantum radar and the quantum advantage** [11408-37]

SESSION 8 ALGORITHMS AND PROCESSING III

11408 OT **Fast and accurate polar SAR image reconstruction without interpolation** [11408-38]

11408 OU **Wavefront curvature correction for radar imaging in a degraded visual environment** [11408-39]

11408 OV **SAR imaging of moving targets based on fusion of range-Doppler and probabilistic multi-hypothesis tracking algorithms** [11408-40]

SESSION 9 SYSTEMS AND APPLICATIONS III

11408 OX **Exploring transmit null forming in open-loop coherent distributed arrays** [11408-42]

11408 OY **Photonic CMOS technology: Regulator/controller for high power semiconductor lasers, photon sensors, high-speed mixed-signal RF ASICs for radar electronics, and laser signal multiplexing**
[11408-43]

SESSION 10 SYSTEMS AND APPLICATIONS IV

- 11408 0Z **Operational reliability of a moving target indication (MTI) radar** [11408-4]
- 11408 10 **Electrically controlled phased array OAM radar** [11408-5]
- 11408 11 **Phased array radar initial alignment algorithm using mutual coupling: an iterative approach**
[11408-6]

SESSION 11 JOINT SESSION WITH CONFERENCES 11408 AND 11411: MILLIMETER WAVE RADAR I

- 11408 12 **Ka-band high-altitude precipitation radar with ground measurements: data processing and initial validations** [11408-7]
- 11408 13 **Orthogonality using frequency division multiplexing to enable multiple input multiple output in an automotive radar** [11408-8]

POSTER SESSION

- 11408 14 **Revisit of radar cross section enhancement for two types of radar systems** [11408-44]
- 11408 15 **Implementation of a hyperspectral integrated vision system combining radar technology and single-pixel optical principle for unmanned ground vehicles (UGV)** [11408-46]
- 11408 16 **The NVEDS templar radar: results from the initial data collection** [11408-47]
- 11408 18 **Artificial intelligence implementation for multi-domain sensor suite optimization** [11408-49]
