SPIE

Volume 11421

Proceedings of SPIE 0277-786X, V. 11421

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sensing for Agriculture and Food Quality and Safety XII*, edited by Moon S. Kim, Bryan A. Chin, Byoung-Kwan Cho, Proceedings of SPIE Vol. 11421 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

FOOD ANALYSIS

- 11421 03 In-line inspecting device for leak detection from gas-filled food packages [11421-3]
- 11421 04 Inspecting species and freshness of fish fillets using multimode hyperspectral imaging techniques [11421-4]

RAMAN SPECTROSCOPY AND IMAGING

- 11421 06 Continuous gradient temperature Raman spectroscopy of polyunsaturated fish lipids provides detailed vibrational analysis and rapid, nondestructive graphical product authentication (Invited Paper) [11421-5]
- 11421 07 Raman imaging for detection of corn kernels infected with *Aspergillus flavus*: a preliminary study [11421-6]
- 11421 08 Towards a miniaturized application-specific Raman spectrometer [11421-8]

NIR SPECTROSCOPY AND IMAGING

- 11421 0B Predicting internal quality parameters of individual pieces of intact oranges using hyperspectral images [11421-11]
- 11421 0D Investigation of moisture distribution of ginger slices and splits during hot-air drying and rehydration procedures by NIR hyperspectral imaging [11421-13]

SENSING TECHNOLOGIES

- 11421 0F SOILSENSE handheld device for soil monitoring [11421-15]
- 11421 0G New generation NIRS sensors for quality and safety assurance in summer squashes along the food supply chain [11421-16]
- 11421 0I Reconstruction of hyperspectral spectra of fish fillets using multi-wavelength imaging and point spectroscopy [11421-19]

AI/MACHINE LEARNING II

11421 0O **Hyperspectral imaging and machine learning for monitoring produce ripeness [11421-25]**

POSTER SESSION

11421 0T **Online detection of tomato internal and external quality attributes by an optical sensing system [11421-31]**

11421 0V **Classification of subclinical mastitis in raw cow milk using near infrared reflectance spectroscopy [11421-33]**

11421 0X **Setting up a methodology to distinguish between green oranges and leaves using hyperspectral imaging [11421-36]**
