IEEE RAMS 2020 Program

Colloquium Session

Why stochastic models that are so famous, become infamous in Reliability Engineering.....1 (ID: 25)

Manwinder Kaur, *General Shivdev Singh Diwan Gurbachan Singh Khalsa College (India)*

Trade-off between Sample Size and Test Time: Lessons Learned in Optimizing Reliability Demonstration Test Plan.....9 (ID: 30)

Pankaj Shrivastava, *Halliburton (United States)*; **Aswin Balasubramanian**, *(United States)*

ENVIRONMENTAL STRESS SCREENING APPROACH BASED ON MIL-HDBK-344A MILITARY STANDARD.....15 (ID: 105)

IPEK FERİHA KILIC, *ASELSAN INC. (Turkey)*

Environmental Conversion Factors for Missiles and Projectiles.....20 (ID: 238)

David DiPaola, *(United States)*; **Giuseppe Lo Voi**, *Raytheon Missile Systems (United States)*

Practical experience of the dependability case to deliver real world benefits.....23 (ID: 142)

Richard Denning, *Ministry of Defence (United Kingdom)*; **Nicholas Barnett**, *UK Ministry Of Defence (United Kingdom)*

U.S. Army Software System Safety Process, Case-Study, and Success Stories.....26 (ID: 195)

David Fernald, *U.S. Army Evaluation Center (United States)*

Electrical Overstress Estimation for PCB design.....32 (ID: 222)

SIDDHARTH MOHAN, *CADENCE DESIGN SYSTEMS (India)*

An Automotive EHPS Pump Software Reliability and Testing.....36 (ID: 196)

Yanshuo Wang, *Dare Auto Inc. (United States)*; **Jim(Jinming) Yang**, *Dare Auto Inc. (United States)*; **Mbiye N.M.**, *Dare Auto Inc. (United States)*

A new metric for time-dependent mechanism reliability analysis.....42 (ID: 136)

Shuang Zhou, *School of Reliability and Systems Engineering, Beihang University (China)*; **Jianguo Zhang**, *Science and Technology on Reliability and Environment Engineering Laboratory (China)*; **Jie Wu**, *Beihang University (China)*

Research on System Reliability of Eight-Rotor Fire-Fighting UAVS.....49 (ID: 66)

Zhan-ke Li, *(China)*; **Si-jia Zhang**, *Northwestern Polytechnical University (China)*; **Yi Wu**, *(China)*; **Xiao-min Zhang**, *(China)*

High available, fault tolerant and safety critical subsea actuator system.....56 (ID: 106)

Julian Popp, *Aalen University (Germany)*; **Markus Glaser**, *Aalen University, Institute for High Integrity Mechatronic Systems (Germany)*; **Bernd Bertsche**, *University of Stuttgart, Institute of Machine Components (Germany)*; **Sebastian Imle**, *Stuttgart University, Institute of Machine Components (Germany)*; **Tobias Winter**, *Aalen University (Germany)*

Monte Carlo Simulation for Reliability.....63 (ID: 204)

Rod Benson, *Acquisition Logistics Engineering (United States)*; **Darryl Kellner**, *Acquisition Logistics Engineering (United States)*; **Steve Rogers**, *Acquisition Logistics Engineering (United States)*

Ensuring Aircraft Safety In Single Point Failures, Automation and Human Factors.....69 (ID: 119) -

Syed Haider, *United Technologies Corporation (Canada)*

Generic Equations for a Probabilistic Metric for Random Hardware Failures According to ISO 26262.....75 (ID: 6)

Atsushi SAKURAI, *FS Micro Corporation (Japan)*

Quantifying Soft Error Rate and Demonstrating Systematic Capability of Programmable Electronic System.....81 (ID: 153)

Narasimman Sunderajan, *HCL Technologies Ltd (India)*

Front End Analysis as a Reliability Tool in Today's Commercial Off the Shelf Environment.....87 (ID: 151)

Mike Salvetti, *Ingalls Shipbuilding (United States)*

Is Your Organization Ready for RAMS Digitalization - Lessons Learned From Implementation in an Aerospace Company.....92 (ID: 161)

Yizhak Bot, *BQR (Israel)*

Comparison of Critical Bending Moment in a Bridge Based on Influence Line Diagram (ILD), FOSM Method and Optimization.....96 (ID: 7)

Chandrasekhar Putcha, *California State University, Fullerton (United States)*

Fault Diagnosis and Prediction Method for Valve Clearance of Diesel Engine Based on Linear Regression.....100 (ID: 207)

Yinglai Liu, *School of Reliability and System Engineering, Beihang University (China)*; **Wenbing Chang**, *School of Reliability and System Engineering, Beihang University (China)*; **Siyue Zhang**, *(China)*; **Shenghan Zhou**, *(China)*

01C Failure Modes and Effects Analysis Applications

A Simple Tool for Reliable Government Problem Solving and Getting Legislation Passed.....106 (ID: 1)

Alec Feinberg, *DfRSoftware (United States)*

Integration of DfR in Design of Control Circuit of Space Transmitter.....111 (ID: 21)

Khilawan Choudhary, *MTRDC, DRDO (India)*; **Monisha S**, *MTRDC (India)*; **Neeraj Kumar**, *(India)*; **P SIDHARTHAN**, *MTRDC, DRDO (India)*

A Novel Framework to Assist the Novice in Defining Failure Modes for System-level Software FMEA.....117 (ID: 51)

Naoko Okubo, *Japan Aerospace Exploration Agency (Japan)*; **Kohsuke Namihira**, *Japan Aerospace*

Exploration Agency (Japan); Hiroki Umeda, Japan Aerospace Exploration Agency (Japan); Yasushi Ueda, Japan Aerospace Exploration Agency (Japan); Shuji Morisaki, Graduate School of Informatics, Nagoya University (Japan); Masafumi Katahira, Japan Aerospace Exploration Agency (Japan)

Chronology of Continuous Improvement of the World's Best FMECA Standard.....123 (ID: 177)

Allura Jackson, CSULB (United States); **Kristella Jackson**, California State University, Long Beach (United States); **Tyrone Jackson**, Raytheon Space and Airborne Systems (United States)

01D Accelerated Life Testing

Covariate Selection Considering Measurement Error with Application in Accelerated Life Testing.....129 (ID: 48)

Samira Karimi, University of Arkansas (United States); **Haitao Liao**, University of Arkansas (United States); **Ed Pohl**, University of Arkansas (United States)

Reliability-Test Planning Considering Multiple Failure Mechanisms and System Levels - an Approach for Identifying the Optimal System-Test Level, Type, and Configuration with Regard to Individual Cost and Time Constraints.....135 (ID: 62)

Alexander Grundler, University of Stuttgart, Institute of Machine Components (Germany); **Martin Dazer**, University of Stuttgart (Germany); **Bernd Bertsche**, University of Stuttgart, Institute of Machine Components (Germany)

Model Based Approach to Effectively Test Random Vibration for Reliability.....142 (ID: 152)

Narasimman Sunderajan, HCL Technologies Ltd (India)

Optimizing the Efficiency of Accelerated Reliability Testing for the Internet Router Motherboard.....148 (ID: 219)

Hanxiao Zhang, Tsinghua University (China); **shouzhou liu**, (China); **Yan-Fu Li**, Tsinghua University (China)

01E R & M Management

MTBFs and PDFs: How to (not) Manage for Reliability.....154 (ID: 85)

Christopher Jackson, Acuitas Reliability (Canada)

An Approach to Low Cost Reliability Demonstration Testing.....160 (ID: 124)

Paul Franklin, Genpact (United States)

The New NASA Approach to Reliability and Maintainability.....163 (ID: 224)

Harry Jones, NASA (United States)

Reliability Confidence Indicator.....169 (ID: 49)

Sorin Voiculescu, Concordia University (Canada); **Ilie Cacipu**, (Canada)

02C Reliability Growth Analysis

A Bayesian Approach for Modeling Reliability Growth.....175 (ID: 37)

Zhaojun Steven Li, Western New England University (United States); **Dong Xu**, University of Electronic Science and Technology of China (China)

A Hierarchical Bayesian Model for Reliability Growth Projection.....180 (ID: 46)

Martin Wayne, USCCDC DAC (United States); **Jonathan Blood**, USCCDC DAC (United States); **Paul Ellner**, AMSAA (United States)

The Impact of Model-Based Systems Engineering on Reliability Growth.....186 (ID: 172)

Bill Haughey, ReliaTrain (United States)

02D R&M Applications in Space Systems

Reliability Modeling Using Pseudo-Lifetime Degradation Data Method in Space Applications.....190 (ID: 2)

Antonio Harrison Sanchez, European Space Agency (Netherlands); **Lorenzo Bitetti**, Thales Alenia Space (France)

Enabling Assurance in the MBSE Environment.....195 (ID: 171)

John Evans, NASA HQ (United States); **Steven Cornford**, NASA/JPL/Caltech (United States); **Martin Feather**, Jet Propulsion Laboratory, California Institute of Technology (United States); **David Kotsifakis**, NASA (United States)

NASA Quality Assurance in an MBSE world.....202 (ID: 212)

Steven Cornford, NASA/JPL/Caltech (United States); **Sean Beckman**, NASA Glenn Research Center (United States)

Reliability Analysis of Complex NASA Systems with Model-Based Engineering.....208 (ID: 71)

Nancy Lindsey, NASA-GSFC (United States); **Mahdi Alimardani**, (United States); **Luis Gallo**, NASA-GSFC (United States)

02E Risk Analysis and Management I

Risk Assessment and Mitigation Strategies for Active Lower Limb Exoskeletons.....216 (ID: 104)

Johannes Schick, Aalen University, Institute for High Integrity Mechatronic Systems (Germany); **Markus Glaser**, Aalen University, Institute for High Integrity Mechatronic Systems (Germany); **Ralph Kennel**, Technical University of Munich, Institute for Electrical Drive Systems and Power Electronics (Germany)

Forecast Accuracy in Weibull Analysis Based on Now Risk.....223 (ID: 143)

Trevor Craney, Collins Aerospace (United States)

How Do Systems Fail?.....229 (ID: 165)

Bryan O'Halloran, Naval Postgraduate School (United States); **Douglas Van Bossuyt**, Naval Postgraduate School (United States)

Failure Time Analysis Applied to Boeing 737 MAX.....235 (ID: 230)

Jan Smith, Zachry Industrial, Inc. (retired) (United States)

03D R & M Applications in Airborne Systems

Bayesian Reliability Analysis with Slice Sampling in Launch Vehicle Applications.....241 (ID: 141)

Marie Ireland, United Launch Alliance (United States); **Jeff Gonzales**, United Launch Alliance (ULA) (United States)

Automatic Fault Tree Generation from Radiation-Induced Fault Models.....247 (ID: 147)
Rebekah Austin, Vanderbilt University (United States); Nagabhushan Mahadevan, Vanderbilt University (United States); Arthur Witulski, Vanderbilt University (United States); Gabor Karsai, Vanderbilt University (United States); Brian Sierawski, Vanderbilt University (United States); Ronald D., Vanderbilt University (United States); Robert Reed, Vanderbilt University (United States)

Text Mining-based Research on Aircraft Faults Classification and Retrieval Model.....254 (ID: 203)
Xingxing Xu, School of Reliability and Systems Engineering (China); Shenghan Zhou, (China); YiYong Xiao, (China); Wenbing Chang, School of Reliability and System Engineering, Beihang University (China); Fajie Wei, (China); Ming Yang, School of Economics and Management, Beihang University (China)

Applying Model Based Safety Assessment for Aircraft Landing Gear System Certification.....261 (ID: 121)
Syed Haider, United Technologies Corporation (Canada)

03E System Security and Safety

Towards the Intelligent Application of Security Controls.....268 (ID: 90)
George Yee, Aptusinnova Inc. and Carleton University (Canada)

Behavior Modeling for Cybersecurity.....274 (ID: 91)
Leila Meshkat, Jet Propulsion Laboratory, California Institute of Technology (United States)

Coupling Multi-factor Hazard Analysis Based on HAZOP and DEMATEL.....281 (ID: 101)
MengWei Wei, Beihang University (China); Jian Jiao, (China); Ting-di Zhao, (China)

Analysis of an All-Electric Safety Subsea Actuation System Architecture.....288 (ID: 162)
Tobias Winter, Aalen University (Germany); Markus Glaser, Aalen University, Institute for High Integrity Mechatronic Systems (Germany); Bernd Bertsche, University of Stuttgart, Institute of Machine Components (Germany); Sebastian Imle, Stuttgart University, Institute of Machine Components (Germany); Julian Popp, Aalen University (Germany)

04C Maintenance Models and Methodologies I

Automatic Generation of RAMS Analyses from Model-Based Functional Descriptions using UML State Machines.....295 (ID: 31)
Marc Zeller, Siemens AG (Germany); Christof Kaukewitsch, Siemens AG (Germany); Henrik Papist, (Germany); Martin Rothfelder, Siemens AG (Germany)

Risk-based Maintenance Strategies for Offshore Wind Energy Assets.....301 (ID: 168)
Athanasios Kolios, University of Strathclyde (United Kingdom)

Incorporating Reliability Improvement and Fleet Maintenance into Rotorcraft Tradespace Tools.....307 (ID: 10)
Saikath Bhattacharya, University of Massachusetts (United States); Vidhyashree Nagaraju, University of Massachusetts (United States); Eric Spero, (United States); Anindya Ghoshal, (United States); Lance Fiondella, University of Massachusetts/US Army Research Laboratory (United States)

Economic Model in Support of Reliability Centered Maintenance.....313 (ID: 112)

Rod Benson, Acquisition Logistics Engineering (United States); **Darryl Kellner**, Acquisition Logistics Engineering (United States); **Steve Rogers**, Acquisition Logistics Engineering (United States)

04D Physical Reliability Models

1/f Phase Noise in Oscillators Modeled with Q and Its Entropy Origin.....320 (ID: 63)

Alec Feinberg, DfRSoftware (United States)

Accurate Reliability Prediction Based on Risk Informed Decision Making.....325 (ID: 215)

QUNYONG WANG, Beijing San-talking Testing Engineering Academy co. Ltd. (STEA) (China); **Dongmei Chen**, Beijing San-talking Testing Engineering Academy co. Ltd. (STEA) (China); **HUA BAI**, Beijing San-talking Testing Engineering Academy co. Ltd. (STEA) (China); **FAJIAN SHI**, Beijing San-talking Testing Engineering Academy Co. Ltd. (STEA) (China)

Origin of 1/f Noise - Active Degradation Generating Entropy.....332 (ID: 240)

Alec Feinberg, DfRSoftware (United States)

A Life Test Method for Rapidly Obtaining the Degradation Trend of Sensitive Parameters.....338 (ID: 134)

QUNYONG WANG, Beijing San-talking Testing Engineering Academy co. Ltd. (STEA) (China); **HUA BAI**, Beijing San-talking Testing Engineering Academy co. Ltd. (STEA) (China); **Dongmei Chen**, Beijing San-talking Testing Engineering Academy co. Ltd. (STEA) (China); **XUPENG SUN**, BEIJING SAN-TALKING TESTING ENGINEERING ACADEMY CO. LTD (China)

04E Design Optimization Using R & M Techniques

Fast Iterative Design Optimization for Reliability Vibration Tests in Automotive.....345 (ID: 33)

Marco Bonato, VALEO Thermal Systems FRANCE (France)

Strategic Uses of Different Shapes and Shifts in Weibull Plots.....351 (ID: 179)

Sarath Jayatileka, DaikinApplied Americas (United States)

Challenge and Response for Corner-Case Robustness Improvement.....357 (ID: 92)

Joseph Schwendler, Hypertherm Inc (United States); **Chris Kang**, Hypertherm Inc (United States); **Dan Worts**, Hypertherm Inc (United States)

05C R & M Applications in Manufacturing

Degradation Analysis of Machine Processing Accuracy for Manufacturing Systems with Effect of Unqualified Products.....364 (ID: 67)

Zhenggeng Ye, Northwestern Polytechnical University (China); **Zhiqiang Cai**, Northwestern Polytechnical University (China); **Fuli Zhou**, Zhengzhou University of Light Industry (China); **Pan Zhang**, Northwestern Polytechnical University (China)

A Branch and Bound Algorithm for Single Machine Scheduling with Two Stages of Failure Process.....370 (ID: 75)

Samareh Azimpoor, Ryerson University (Canada); **Sharareh Taghipour**, Ryerson University (Canada)

Joint Optimizing the Production Sequence and Maintenance Plan for a Single-Machine Multi-Failure System.....378 (ID: 163)

Mani sharifi, (Canada); Sharareh Taghipour, Ryerson University (Canada)

When Life Is Too Long To Test: Combining Multiple Methods To Minimize Risk.....384 (ID: 214)

Russell Watts, Thermo Fisher Scientific (United States)

05D Prognostics and Health Management

Soft Sensor Application to Predict Remaining Useful Life of Components of the Exhaust System of Diesel Engines.....390 (ID: 42)

Martin Diesch, Institut für Maschinenelemente (IMA) der Universität Stuttgart (Germany); Martin Dazer, University of Stuttgart (Germany); Kevin Lucan, University of Stuttgart (Germany); Thomas Bubolz, (Germany); Bernd Bertsche, University of Stuttgart, Institute of Machine Components (Germany)

Neural Networks Based Feature Selection Approaches for Prognostics of Aircraft Engines.....396 (ID: 18)

Phattara Khumprom, North Dakota State University (United States); Nita Yodo, North Dakota State University (United States); David Grewell, North Dakota State University (United States)

An Entropy-based Approach for Modeling Lithium-Ion Battery Capacity Fade.....403 (ID: 123)

Alireza Namdari, Western New England University (United States); Zhaojun Steven Li, Western New England University (United States)

05E Risk Analysis and Management II

Risk Considerations for Autonomy Software.....410 (ID: 93)

Leila Meshkat, Jet Propulsion Laboratory, California Institute of Technology (United States)

Probabilistic Risk Assessment for Acceptance Testing.....416 (ID: 210)

Kevin Singer, US Army, ARDEC (United States); Manoj Menon, Combat Capabilities Development Command - Armaments Center (United States)

Reliability Analysis of Crude Unit Overhead Piping Based on Wall Thickness Degradation Process.....419 (ID: 83)

Eric Bediako, Texas Tech University (United States); Ying Liao, Texas Tech University (United States); Yisha Xiang, Texas Tech University (United States); Suzan Alaswad, Zayed University, United Arab Emirates (United Arab Emirates); Liudong Xing, University of Massachusetts Dartmouth (United States)

Reliability Inference for Failure Mode of Sequential Hard and Soft Failure with Application on Crack data.....425 (ID: 208)

Zan Li, Academy of Mathematics and Systems Science, Chinese Academy of Sciences (China); Wang Chengjie, Academy of Mathematics and System of Science Academy of China Science (China); Qingpei Hu, Chinese Academy of Sciences (China); Yu Dan, Academy of Mathematics and System of Science, Chinese Academy of Sciences (China)

06D Availability and Supportability

Using System Availability to Drive Logistics Decisions.....432 (ID: 78)

Alastair Moubray, Raytheon Integrated Defense Systems (United States); **Thaddeus Mateja**, Raytheon Missiles & Defense (United States); **Michael Flanagan**, Raytheon (United States); **Jorge Hiraldo**, Raytheon IDS (United States)

Estimation of Operational and Maintenance Tasks Influence on Equipment Availability through Petri Net Modeling.....438 (ID: 109)

Gilberto Francisco Martha de Souza, Fundação de Apoio a Universidade de São Paulo CNPJ 68.314.830/0001-27 (Brazil); **Carlos Alberto Murad**, Polytechnic School - University of São Paulo (Brazil); **Arthur Henrique Melani**, Polytechnic School - University of São Paulo (Brazil); **Miguel Michalski**, Polytechnic School - University of São Paulo (Brazil); **Adherbal Caminada Netto**, Polytechnic School - University of São Paulo (Brazil)

Reliability: Enablers for Sustainment through Supportability Focused Design Influence.....444 (ID: 148)

Kenney Crooks, Northrop Grumman Corp (United States); **Mark Nanney**, Northrop Grumman (United States)

Reliability-Equivalent Field Reference Usage and Stress Level When Both are Random for Product with Weibull Life Distribution.....449 (ID: 86)

Feng-Bin Sun, Tesla Inc. (United States)

06E Software Reliability and Testing

An Empirical Study of Comparison of Code Metric Aggregation Methods and Software Reliability Evaluation.....455 (ID: 111)

ZEKUN SONG, School of Reliability and Systems Engineering, Beihang University (China); **yichen wang**, (China); **Pengyang Zong**, Science & Technology on Reliability & Environment Engineering Laboratory, Beihang University (China); **Lin Wang**, (China); **Guiya Feng**, (China); **Wenqian Kang**, Precision Instrument and Opto-Electronics Engineering, Tianjin University, Tianjin, China (China)

Online Optimal Release Time for Non-homogeneous Poisson Process Software Reliability Growth Model.....462 (ID: 8)

Vidhyashree Nagaraju, University of Massachusetts (United States); **Lance Fiondella**, University of Massachusetts/US Army Research Laboratory (United States)

CLAIM: An Enhanced Machine Learning Technique for Discrepancy Report Analysis.....468 (ID: 202)

Myron Hecht, Aerospace Corporation (United States); **Jaron Chen**, Aerospace Corporation (United States); **Phanitta Chomsinsap**, Aerospace Corporation (United States); **Ross Raymond**, Aerospace Corporation (United States)

Effects Assessment for Requirements Faults of Safety Critical Software in Nuclear Industry.....475 (ID: 243)

Boyuan Li, The Ohio State University (United States); **Carol Smidts**, The Ohio State University (United States)

07C Big Data and IoT Applications in R & M

Real-Time Management of RAM Data Using OT and IT Infrastructure in Oil & Gas Operations.....481 (ID: 32)

Tian Shyong Tan, PETRONAS (Malaysia); **M Rashdan B Mahmood**, PETRONAS (Malaysia)

Lessons from Deploying Predictive Analytics on Manufacturing Shop Floor.....484 (ID: 87)

Alex Romriell, Northrop Grumman (United States); **Stefan Niculescu**, PTC (United States)

From Manufacturing Process Control to In-Field Reliability: Case Study of Automotive Heat Exchangers.....489 (ID: 34)

Marco Bonato, VALEO Thermal Systems FRANCE (France)

Real-Time Optimization of Maintenance and Production Scheduling for an Industry 4.0-Based Manufacturing System.....496 (ID: 88)

Mageed Ghaleb, Ryerson University (Canada); **Sharareh Taghipour**, Ryerson University (Canada); **Hossein Zolfagharinia**, Ryerson University (Canada)

07D Reliability Modeling I

A Multivariate Correlation Degradation Model for Reliability Analysis Based on Copula.....504 (ID: 69)

WEN CHEN, Beihang University (China); **Guangyan Zhao**, Beihang University (China)

Dual-Ring Network Reliability Analytical Solution with Application to Large Video Systems.....510 (ID: 3)

Les Warrington, Les Warrington Consulting (Canada)

A Fractal-Cluster-Based Analytical Model for Spatial Pattern of Congestion.....516 (ID: 125)

Xiangyu Zheng, Beihang (China); **Ning Huang**, (China)

Simulation of Anode Corrosion in the Electrowinning Process of Non-Ferrous Metals.....523 (ID: 129)

Christoph Rosebrock, University of Wuppertal (Germany); **Stefan Bracke**, University of Wuppertal Chair of Safety Engineering and Risk Management (Germany)

07E System Optimization Using R & M Techniques

Software Assurance of Autonomous Spacecraft Control.....529 (ID: 73)

Martin Feather, Jet Propulsion Laboratory, California Institute of Technology (United States); **Benjamin Smith**, Jet Propulsion Laboratory, California Institute of Technology (United States); **Terrance Huntsberger**, Jet Propulsion Laboratory, California Institute of Technology (United States); **Robert Bocchino**, Jet Propulsion Laboratory, California Institute of Technology (United States)

A Systems Approach to Rapid Logistics.....536 (ID: 81)

Darryl Kellner, Acquisition Logistics Engineering (United States); **Steve Rogers**, Acquisition Logistics Engineering (United States); **Rod Benson**, Acquisition Logistics Engineering (United States); **Stephen Brunner**, Acquisition Logistics Engineering (United States)

Optimized Derating to Support Reliable System Design.....542 (ID: 15)

Lori Bechtold, Retired (United States); **Bruce Douty**, L3Harris (United States); **John Murray**, Harris (United States); **Bryan Caldwell**, L3Harris Technologies (United States)

Use Case7, Identifying the Boundaries of Use and Environment in Your Product.....547 (ID: 80)

Adam Bahret, Apex Ridge Reliability (United States)

08C Failure Prevention Methods

Combining Hazards into a Single-Top Fault Tree.....551 (ID: 145)

John Weglian, EPRI (United States); **Jeff Riley**, EPRI (United States); **Fernando Ferrante**, Electric Power Research Institute (United States)

Agile FRACAS in Production Manufacturing.....556 (ID: 198)

Jason Tanner, Raytheon (United States)

Resilience in the Context of Nuclear Safety Engineering.....562 (ID: 126)

Sarah Dunnnett, Loughborough Univeristy (United Kingdom); **Rundong Yan**, (United Kingdom); **Silvia Tolo**, (United Kingdom); **John Andrews**, University Of Nottingham (United Kingdom); **Edoardo Patelli**, (United Kingdom)

Reliability Analysis of Tree-Structured Systems Using Characteristic Function.....568 (ID: 61)

Rui Sun, University of Science and Technology of China (China); **Weidong WANG**, University of Science and Technology of China (China); **Li CHEN**, University of Science and Technology of China (China); **Wenyi ZHANG**, University of Science and Technology of China (China)

08D Life Data Analysis I

Life Data Analysis with a Joint Probability Density Function.....574 (ID: 170)

Umur Yenil, HBM Prenscia (United States); **David Jimenez**, HBM Prencia (United States)

Thermal Fatigue in a Membrane Heat Exchanger with Environmental Degradation.....580 (ID: 242)

Julio Pulido, Nortek (United States)

Ring Laser Gyroscope Warm Standby Redundancy Subject to Wear-out Failure and Time Varying Thermal Stresses.....587 (ID: 154)

Wei Huang, Space Systems/Loral, LLC (United States); **Roy Andrada**, (United States); **Dale Borja**, (United States)

XM808 Sub Caliber Trainer Life Distribution Analysis.....593 (ID: 201)

Douglas Ray, US Army CCDC Armaments Center (United States); **Joseph Grasso**, US Army ARDEC (United States)

08E Maintenance Models and Methodologies II

Deterioration Modelling and Condition Based Maintenance Policies.....597 (ID: 16)

Ercan Kablan, ASELSAN (Turkey); **Yasemin Serin**, Middle East Technical University (Turkey)

Selective Maintenance of Multi-Component Systems with Multiple Failure Modes.....605 (ID: 70)

Cesar Ruiz Torres, University of Arkansas (United States); **Ed Pohl**, University of Arkansas (United States); **Haitao Liao**, University of Arkansas (United States)

Preventive and Predictive Maintenance Modeling.....611 (ID: 117)

Nita Hivarekar, John Deere (India); **Vivek Kuppusamy**, (India); **Priyanka Singh**, John Deere (India); **Swarup Kumar Jadav**, John Deere (India); **Chanchal Gupta**, John Deere (India)

An Advanced Sustainment Modeling Approach for Global Defense Data Architecture.....617 (ID: 76)
Vaibhav Suthar, Raytheon (United States)

09C Systems Approach to Failure Modes and Effects Analysis (FMEA)

Detailed Interface FMECA in a Large Aerospace System.....621 (ID: 94)
Reinaldo Perez, Jet Propulsion Laboratory (United States)

Systems Engineering Modelling Diagrams as Prerequisites to Failure Mode and Effect Analysis.....626 (ID: 169)
Sarath Jayatileka, DaikinApplied Americas (United States)

The Impact of Manufacturing Errors on Product Defects.....632 (ID: 174)
Bill Haughey, ReliaTrain (United States)

Automated Generation of FMEAs using SysML for Reliability, Safety, and Cybersecurity.....636 (ID: 227)
Myron Hecht, Aerospace Corporation (United States); **Aaron Chuidian**, Aerospace Corporation (United States); **Taiki Tanaka**, Aerospace Corporation (United States)

09D Reliability Modeling II

A Physics of Failure Approach to Common Cause Failure Considering Component Degradation.....643 (ID: 38)
Reuel Smith, University of Maryland (United States); **Mohammad Modarres**, University of Maryland (United States)

A Method of Estimating Demonstrated Reliability Based on A Physics Failure Reliability Model.....649 (ID: 5)
Zhaofeng Carl Huang, Aerospace Corporation (United States)

A Novel Parameter-Related Wiener Process Model with Its Estimation of Remaining Useful Life in Degradation Analysis.....656 (ID: 59)
Bingxin Yan, BEIHANG UNIVERSITY (China); **Xiaobing Ma**, Beihang University (China)

Exact Confidence Intervals for the Hazard Rate of a Series Reliability System.....662 (ID: 65)
Patrick Plum, KAI - Kompetenzzentrum Automobil- und Industrieelektronik GmbH (Austria); **Horst Lewitschnig**, Infineon Technologies Austria AG (Austria); **Jürgen Pilz**, Alpen-Adria Universität Klagenfurt (Austria)

09E Safety Critical Systems and Diagnostics

Human Factors Correlation Analysis for Nuclear Micro-Reactors Based on Literature Review and Evidence Theory.....668 (ID: 244)
Yunfei Zhao, The Ohio State University (United States); **Patrick Tosh**, (United States); **Carol Smidts**, The Ohio State University (United States); **Ronald Boring**, (United States)

Aviation Data Analytics in MRO Operations: Prospects and Pitfalls.....675 (ID: 140)
Asteris Apostolidis, KLM Royal Dutch Airlines (Netherlands); **Maurice Pelt**, Aviation Academy, Faculty of

Technology, Amsterdam University of Applied Sciences (AUAS) Amsterdam, Netherlands (Netherlands); **Konstantinos P. Stamoulis**, Aviation Academy, Faculty of Technology, Amsterdam University of Applied Sciences (Netherlands)

Optimal RUL Estimation: A State-of-Art Digital Twin Application.....682 (ID: 180)

Mohamad Danish Anis, University of Toronto (Canada); **Sharareh Taghipour**, Ryerson University (Canada); **Chi-Guhn Lee**, (Canada)

Architecture-based Software Reliability Incorporating Fault Tolerant Machine Learning.....689 (ID: 186)

Maskura Nafreen, University of Massachusetts Dartmouth (United States); **Saikath Bhattacharya**, University of Massachusetts (United States); **Lance Fiondella**, University of Massachusetts/US Army Research Laboratory (United States)

10D Discrete Event Modeling and Simulation

Non-Homogeneous Markov Models and Their Application in Reliability.....695 (ID: 50)

John Bessman, PACCAR Technical Center (United States)

Modeling Common Cause Failures in Systems with Triple Modular Redundancy and Repair.....702 (ID: 159)

Matthew Cannon, Brigham Young University (United States); **Andrew Keller**, Brigham Young University (United States); **Juan Andres Perez Celis**, Brigham Young University (United States); **Michael Wirthlin**, Brigham Young University (United States)

Simulation-Based Robust Scheduling for Smart Factories Considering Improved Test Strategies.....708 (ID: 107)

Ulrich Hipp, Siemens AG (Germany); **Tobias Zeh**, (Germany); **Andreas Joanni**, Siemens AG (Germany); **Wolfram Klein**, Siemens AG (Germany); **Stefan Rothbauer**, Siemens AG (Germany); **Marc Zeller**, Siemens AG (Germany)

10E Model-based System Engineering for Reliability Analysis

Engaging Supportability Analysis through Model-Based Design.....715 (ID: 35)

Raymond Beshears, Raytheon (United States); **Andrew Bouma**, Raytheon Company (United States)

Obtaining Fault Trees Through SysML Diagrams: A MBSE Approach for Reliability Analysis.....720 (ID: 139)

Gilberto Francisco Martha de Souza, Fundação de Apoio a Universidade de São Paulo CNPJ 68.314.830/0001-27 (Brazil); **Arthur Henrique Melani**, Polytechnic School - University of São Paulo (Brazil)

3D RAM Modeling and Simulation in a Model Based Systems Engineering Environment.....725 (ID: 120)

Keith Janasak, Raytheon Company (United States); **Brent Dingle**, Raytheon (United States); **James Coleman Eubanks**, Raytheon (Austria)

A RAMS Journey for MicroTurbine Power Generation.....731 (ID: 205)

Evan Franke, Capstone Turbine Inc (United States); **Gerard (Gerry) Cohen**, Ops-A-La-Carte (United States)

11C Integrated Reliability

Post-Disaster Recovery Optimization for Road-Bridge Network Considering Restoration Ability and Economic Loss.....738 (ID: 20)

Jiangbin Zhao, Northwestern Polytechnical University (China); **Ming Zuo**, University of Alberta (Canada); **Zhiqiang Cai**, Northwestern Polytechnical University (China); **Shubin Si**, Northwestern Polytechnical University (China)

Contribution of Risk from Human Failures in PRA Models.....744 (ID: 144)

John Weglian, EPRI (United States); **Jeff Riley**, EPRI (United States); **Mary Presley**, EPRI (United States)

Performance of Reliability Models for Repairable Systems: Dealing with Information Uncertainty.....748 (ID: 225)

Olivier Blancke, Institut de Recherche d'Hydro-Québec (IREQ) (Canada); **Gabriel McCarthy**, Université de Sherbrooke (Canada); **Mathieu Payette**, Université du Québec à Trois-Rivières (Canada); **Lucie Bibeau**, Institut de recherche d'Hydro-Québec (IREQ) (Canada); **Jean-François Boudreau**, Institut de recherche d'Hydro-Québec (IREQ) (Canada); **Alain Côté**, Institut de recherche d'Hydro-Québec (IREQ) (Canada); **Dragan Komljenovic**, Institut de recherche d'Hydro-Québec (IREQ) (Canada); **Darragi Messaoudi**, Hydro-Québec (Canada); **Bannour Souilah**, Hydro-Québec (Canada)

11D Reliability Modeling III

A Robust and Efficient Algorithm for Reliability Assessment of Phased-Mission Systems.....754 (ID: 228)

Suprasad Amari, BAE Systems (United States)

Degradation Analysis of Gun Barrel Life Using Machine Learning and Design of Experiments.....761 (ID: 199)

Christopher Drake, US ARMY ARDEC (United States); **Douglas Ray**, US Army CCDC Armaments Center (United States)

Transitioning a Reliability/Sustainment Model into a Digital Twin.....766 (ID: 79)

Alastair Moubray, Raytheon Integrated Defense Systems (United States); **Philip Bedard**, Raytheon Company (United States); **James Miro**, DoD (United States); **Robert Stukes**, DoD (United States)

A Method and Model to Predict Initial Failure Rates.....773 (ID: 22)

Harry Jones, NASA (United States)

11E Complex Systems and Healthcare Reliability

A Model-Based Framework for Analyzing the Security of System Architectures.....779 (ID: 17)

Kit Siu, GE Global Research (United States); **Heber Herencia-zapana**, GE Global Research (United States); **Daniel Prince**, GE Aviation Systems (United States); **Abha Moitra**, GE Global Research (United States)

Early Combined Safety - Security Defense in Depth Assessment of Complex Systems.....785 (ID: 55)

Nikolaos Papakonstantinou, VTT Technical Research Centre of Finland (Finland); **Joonas Linnosmaa**, VTT Technical Research Centre of Finland (Finland); **Ahmed Bashir**, Department of National Defence Canada (Canada); **Timo Malm**, VTT Technical Research Centre of Finland (Finland); **Douglas Van Bossuyt**, Naval Postgraduate School (United States)

Modelling Reliability and Efficiency of English Community Pharmacy Processes.....792 (ID: 217)
Rasa Remenyte-Prescott, University of Nottingham (United Kingdom); **Matt Naybour**, University of Nottingham (United Kingdom); **Matthew Boyd**, University of Nottingham (United Kingdom)

An Integrated Medical System Dependability Framework.....799 (ID: 218)
Scott Hareland, Medtronic (United States)

12C Business Process and Economic Models

Utilizing Design of Experiments to Reduce IT System Testing Cost.....807 (ID: 231)
Madhav Phadke, Phadke Associates, Inc. (United States); **Kedar Phadke**, Phadke Associates, Inc. (United States)

Microgrid Maintenance Strategies for Optimal Reliability and Cost.....813 (ID: 128)
Annette Skowronska, Oakland University (United States); **Zissimos Mourelatos**, OAKLAND UNIVERSITY (United States)

Reliability Predictions Using Model-Based Criticality-Associated Similarity Analysis.....817 (ID: 181)
Tyrone Jackson, Raytheon Space and Airborne Systems (United States); **Allura Jackson**, CSULB (United States); **Alazel Jackson**, Raytheon Company (United States); **Kristella Jackson**, California State University, Long Beach (United States)

Intersection of Systems and Reliability Engineering during New Product Development Process.....824 (ID: 197)
Sarath Jayatileka, DaikinApplied Americas (United States)

12D Life Data Analysis II

The Translation of Field Failures to the Laboratory.....830 (ID: 24)
Jon Rittgers, Mallinckrodt Pharmaceuticals Ireland Ltd (Ireland); **David Benson**, HP Inc (United States)

Using Life Data of Competing Failure Modes to Increase the Remaining Useful Life of Gear Wheels....838 (ID: 54)
Yvonne Gretzinger, Institute of Machine Components - University of Stuttgart (Germany); **Martin Dazer**, University of Stuttgart (Germany); **Bernd Bertsche**, University of Stuttgart, Institute of Machine Components (Germany)

Reliability Demonstration Within the Framework of Event-Based Endurance Testing considering prior knowledge.....844 (ID: 64)
Marcel Göldenboth, Mercedes-Benz AG (Germany); **Alexander Grundler**, University of Stuttgart, Institute of Machine Components (Germany); **Bernd Bertsche**, University of Stuttgart, Institute of Machine Components (Germany)

Reliability Analysis of Flow Meters with Multiple Failure Modes in the Process Industry.....850 (ID: 84)
Ying Liao, Texas Tech University (United States); **Elias Keedy**, Covestro LLC (United States); **Yisha Xiang**, Texas Tech University (United States)

12E Autonomous Systems and AI

Fault Detection Using Non-Linear Low-Dimensional Representation of Sensor Data.....856 (ID: 160)
*Deovrat Kakde, SAS Institute (United States); Arin Chaudhuri, SAS Institute (United States); Anya McGuirk, SAS Institute, Inc. (United States); Yuwei Liao, SAS Institute, Inc. (United States); **Kai Shen**, SAS Institute (United States)*

Software and System Reliability Engineering for Autonomous Systems Incorporating Machine Learning.....862 (ID: 56)
*Aiden Gula, (United States); **Christian Ellis**, University of Massachusetts (United States); Saikath Bhattacharya, University of Massachusetts (United States); Lance Fiondella, University of Massachusetts/US Army Research Laboratory (United States)*

Autonomous Cars, Trust and Safety Case for the Public.....868 (ID: 72)
***Thor Myklebust**, SINTEF Digital (Norway); Tor Stålhane, (Norway); Irene Wærø, (Norway); Gunnar Jensen, (Norway)*

Dynamic Environmental Stress Screening Using Machine Learning.....874 (ID: 135)
***Justin Brown**, Raytheon Technologies/ Southern Methodist University (United States); Ian Campbell, Raytheon (United States)*
