**Volume 11469**

Proceedings of SPIE 0277-786X, V. 11469

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Emerging Topics in Artificial Intelligence 2020*, edited by Giovanni Volpe, Joana B. Pereira, Daniel Brunner, Aydogan Ozcan, Proceedings of SPIE Vol. 11469 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## INDUSTRIAL APPLICATIONS

---

- 11469 06 **Artificial intelligence (AI) as a key enabling technology for next generation mixed reality (MR) experiences leading to mass adoption in enterprise and consumer spaces (Invited Paper)** [11469-3]
- 11469 0A **Supervised learning with low-quality ground truth in early diagnostics of malignant melanoma (Invited Paper)** [11469-7]

---

## BRAIN CONNECTIVITY

---

- 11469 0W **Assessment of mesial temporal sclerosis through MRI processing** [11469-28]

---

## APPLICATIONS IN PHYSICS I

---

- 11469 12 **Bayesian optimization of neural networks for the inverse design of all-dielectric metasurfaces** [11469-34]

---

## PARTICLE TRACKING: JOINT SESSION WITH CONFERENCES 11463 AND 11469

---

- 11469 1C **The anomalous diffusion challenge: single trajectory characterisation as a competition (Invited Paper)** [11469-44]

---

## POSTER SESSION

---

- 11469 1N **Fiscal classification using convolutional neural network** [11469-55]
- 11469 1S **Experimental implementation of wavefront sensorless real-time adaptive optics aberration correction control loop with a neural network** [11469-60]
- 11469 1W **Optimizing electric vehicles station performance using AI-based decision maker algorithm** [11469-64]
