Volume 11477

Proceedings of SPIE 0277-786X, V. 11477

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Molecular and Nano Machines III*, edited by Zouheir Sekkat, Takashige Omatu, Proceedings of SPIE Vol. 11477 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9781510637603

ISBN: 9781510637610 (electronic)

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

PHOTOMECHANICS AND SOFT ROBOTICS

- 11477 03 **Control of molecular-level mechano-optical response of chiral liquid-crystalline elastomers (Invited Paper) [11477-2]**
- 11477 04 **Modeling light-controlled actuation of flexible magnetic composite structures using the finite element method (FEM) [11477-3]**

BIOMOLECULAR MACHINES

- 11477 08 **Peptide-based scaffolds for in vivo immobilization and enzyme attachment in therapeutic applications [11477-7]**
- 11477 09 **Visual detection of bacterial and viral pathogens with peroxidase-like deoxyribozymes [11477-8]**

PLASMONIC NANOMACHINES

- 11477 0D **Nano-photomechanical motion of small particles induced by switching photon force through photochemical processes (Invited Paper) [11477-11]**
