

PROCEEDINGS OF SPIE

New Concepts in Solar and Thermal Radiation Conversion III

Jeremy N. Munday

Peter Bermel

Editors

24 August – 4 September 2020

Online Only, United States

Sponsored and Published

SPIE

Volume 11496

Proceedings of SPIE 0277-786X, V. 11496

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *New Concepts in Solar and Thermal Radiation Conversion III*, edited by Jeremy N. Munday, Peter Bermel, Proceedings of SPIE Vol. 11496 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

HIGH-EFFICIENCY THERMOPHOTOVOLTAICS

- 11496 05 **Rugate filter window coating for improvement of vacuum solar thermal absorber efficiencies**
[11496-20]

NOVEL CONCEPTS IN PHOTOVOLTAICS

- 11496 0D **Impedance spectroscopy study of hybrid photovoltaic supercapacitors** [11496-9]
- 11496 0E **The effect of embedded dye molecules with the TiO₂ on the performance of solar-capacitor device** [11496-10]

PHOTOVOLTAIC PERFORMANCE AND RELIABILITY

- 11496 0G **Android-based application for shading analysis and assessment of actual solar energy potential** [11496-11]
- 11496 0H **Encapsulant polymer materials functionalized by luminescent down shift technique (LDS) with metallic oxides for photovoltaic application** [11496-12]
- 11496 0I **Quality control of EVA as emerging encapsulant material in photovoltaic market: challenges and opportunities for long term photovoltaic module reliability** [11496-13]

POSTER SESSION

- 11496 0N **Incorporating chirped tilted piezoelectric superlattice inside thermoelectric modules and comparison with photovoltaic cells for space applications** [11496-18]
- 11496 0Q **Toward low-cost, stable, and uniform high-power LED array for solar cells characterization**
[11496-23]
- 11496 0R **Development of pre-sizing techno-economic Matlab code for grid-connected PV system, using four cities in Egypt** [11496-24]
