

PROCEEDINGS OF SPIE

# ***Laser Communication and Propagation through the Atmosphere and Oceans IX***

**Jaime A. Anguita**

**Jeremy P. Bos**

**David T. Wayne**

*Editors*

**August 24 – 4 September 2020**

**Online Only, United States**

*Sponsored and Published by*  
SPIE

**Volume 11506**

Proceedings of SPIE 0277-786X, V. 11506

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Communication and Propagation through the Atmosphere and Oceans IX*, edited by Jaime A. Anguita, Jeremy P. Bos, David T. Wayne, Proceedings of SPIE Vol. 11506 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## FREE SPACE OPTICAL COMMUNICATIONS

---

- 11506 03 **Demonstration of an FSO/RF hybrid-communication system on aeronautical and space applications** [11506-2]
- 11506 04 **High data-rate optical communication payload for CubeSats** [11506-3]
- 11506 05 **Impact of Reed Solomon forward error correction code in enhancing performance of free space optical communication link** [11506-4]
- 11506 06 **Study of fog mitigation in low-cost visible band FSO communication system** [11506-5]

---

## OCEAN OPTICS

---

- 11506 09 **Measurement of the orbital angular momentum spectrum of light through turbid water using modal decomposition** [11506-8]

---

## BROADBAND AND ULTRASHORT PULSED LASERS

---

- 11506 0D **Exploring the behavior of supercontinuum laser sources in atmospheric turbulence (Invited Paper)** [11506-12]
- 11506 0F **Femtosecond multifilament arrays in air using diffraction optical elements** [11506-14]

---

## ORBITAL ANGULAR MOMENTUM

---

- 11506 0H **Propagation of Laguerre-Gaussian and  $l_m$  Bessel beams through atmospheric turbulence: a computational study** [11506-16]
- 11506 0I **Measurement of the orbital angular momentum spectrum of light through artificial turbulence by interferometry** [11506-17]

---

## ATMOSPHERIC CHARACTERIZATION: JOINT SESSION WITH 11506 AND 11508

---

- 11506 0J **Profiling atmospheric turbulence using dual-camera imagery of non-cooperative targets (Invited Paper)** [11506-18]

---

**IMAGING THROUGH TURBULENCE: JOINT SESSION WITH 11506 AND 11508**

---

11506 OP     **Complete wavefront reconstruction of perturbed singular beams by single-pixel phase retrieval**  
[11506-24]

---

**POSTER SESSION**

---

11506 OS     **Method on improving the performance of the optical phased array with large number of emitting elements** [11506-26]

11506 OU     **Investigation of demultiplexer in Laguerre-Gaussian mode multiplexing for optical wireless communication** [11506-28]
