SPIE

Volume 11473

Proceedings of SPIE 0277-786X, V. 11473

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Organic and Hybrid Light Emitting Materials and Devices XXIV*, edited by Chihaya Adachi, Jang-Joo Kim, Franky So, Proceedings of SPIE Vol. 11473 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

DEVICE FABRICATION AND PROCESSING

- 11473 0F **High-performance OLED microdisplays made with multi-stack OLED formulations on CMOS backplanes (Invited Paper) [11473-13]**

DEVICE PHYSICS I

- 11473 0N **Organic thin film morphology, electronic structure, and effect on optoelectronic device (Invited Paper) [11473-20]**

POSTER SESSION

- 11473 1N **Bright perovskite light-emitting electrochemical cell utilizing CNT sheets as a tunable charge injector [11473-55]**
