SPIE

Volume 11517

Proceedings of SPIE 0277-786X, V. 11517

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Extreme Ultraviolet Lithography 2020*, edited by Patrick P. Naulleau, Paolo A. Gargini, Toshiro Itani, Kurt G. Ronse, Proceedings of SPIE Vol. 11517 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

EUV MASK I: JOINT SESSION WITH CONFERENCES 11517 AND 11518

- 11517 08 Process optimization for performance improvement in Mo/Si multilayers for EUV mask blanks [11517-5]

EUV MASK PROTECTION AND REPAIR: JOINT SESSION WITH CONFERENCES 11517 AND 11518

- 11517 0B In-situ and real-time investigation of EUV pellicle mechanical stress within EUV inner pod [11517-8]

EUV RESIST

- 11517 0C Dissolution nonlinearity tail degradation with decreased reaction events impacts EUV stochastic defect generations [11517-9]
- 11517 0D A novel main chain scission type photoresists for EUV lithography [11517-10]

EUV PROCESS

- 11517 0O Accurate mapping of dose variations on EUV scanners using dose-to-clear exposures and optical ellipsometry [11517-21]

EUV SOURCE AND SUPPORT TOOLS

- 11517 0S Accuracy analysis of a stand-alone EUV spectrometer for the characterization of ultrathin films and nanoscale gratings (Best Student Paper Award) [11517-25]

EUV MASK INSPECTION REVIEW: JOINT SESSION WITH CONFERENCES 11517 AND 11518

- 11517 0U High sensitivity repeater detection with broadband plasma optical wafer inspection for mask defect qualification (Invited Paper) [11517-27]
- 11517 0W Effects of the illumination NA on EUV mask inspection with coherent diffraction imaging [11517-30]

11517 0X Quadriwave lateral shearing phase imaging of EUV masks [11517-31]

EUV MASK II: JOINT SESSION WITH CONFERENCES 11517 AND 11518

11517 11 Refinement strategies for optimal inclusion of prior information in ptychography [11517-34]

EUV HIGH NA AND EXTENSIONS

11517 14 Experimental verification of high-NA imaging simulations using SHARP [11517-37]

POSTER SESSION

11517 18 Alternative EUVL resist processes for stochastic defect reduction [11517-44]

11517 19 Development of extreme ultraviolet light sources and techniques for optical power meter calibration [11517-45]

11517 1B Analysis and mitigation of forbidden pitch effects for EUV lithography [11517-48]

11517 1D Mask contribution to OPC model accuracy [11517-51]

11517 1E Study on the multi layers for EUV pellicle [11517-52]

11517 1F Design and realization of an industrial stand-alone EUV resist qualification setup [11517-53]
