**Volume 11558**

Proceedings of SPIE 0277-786X, V. 11558

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum and Nonlinear Optics VII*, edited by Kebin Shi, Dai-Sik Kim, Chuan-Feng Li, Proceedings of SPIE Vol. 11558 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

---

## NONLINEAR OPTICS I

---

- 11558 05 **Nonlinear conversion efficiency of random quasi-phase matching in polycrystal influenced by grain morphological properties** [11558-4]

---

## NONLINEAR OPTICS II

---

- 11558 0A **On perspectives of generating quasi-Fock state via resonant self-phase-modulation** [11558-9]
- 11558 0C **On-chip supercontinuum generation in  $\text{Ge}_{28}\text{Sb}_{12}\text{Se}_{60}$  chalcogenide waveguides and numerical investigation** [11558-30]

---

## QUANTUM OPTICS II

---

- 11558 0K **High-speed implementation of privacy amplification for continuous-variable quantum key distribution** [11558-19]

---

## POSTER SESSION

---

- 11558 0L **Effect of carrier envelope phase on propagation of femtosecond chirped Gaussian laser pulse in a dense three-level  $\Lambda$ -type atomic medium** [11558-20]
- 11558 0M **Interference resonant propagation of two-colour femtosecond Gaussian pulses in three-level  $\Lambda$ -type atomic medium** [11558-21]
- 11558 0N **Effect of the laser-induced forward rescattering on the low-energy photoelectron momentum spectra of hydrogen atoms** [11558-22]
- 11558 0O **A novel experimental preparation of Gaussian modulated coherent state based on dual-drive Mach-Zehnder modulator in continuous variable quantum key distribution** [11558-23]
- 11558 0P **Control of sub-pulse duration in noise-like structures** [11558-24]
- 11558 0Q **Mechanisms of conversion of noise-like laser pulses into coherent pulses** [11558-25]
- 11558 0R **High-throughput error correction for continuous-variable quantum key distribution systems based on shuffled iterative decoding** [11558-26]
- 11558 0S **Hybrid mode-locked fiber laser based on NALM and SWCNT saturable absorber** [11558-27]

- 11558 OT **Theoretical security analysis of two-way fiber time transfer technique based on picosecond resolution simulation model** [11558-28]
- 11558 OU **Investigation of PIN-PMN-PT single-crystal based whispering gallery mode resonator** [11558-29]
