

PROCEEDINGS OF SPIE

# *Optics Frontier Online 2020: Optics Imaging and Display*

Hannan Wang  
*Editor*

19–20 June 2020  
Virtual Event

*Organized by*  
Chinese Laser Press (China)

*Published by*  
SPIE

**Volume 11571**

Proceedings of SPIE 0277-786X, V. 11571

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optics Frontier Online 2020: Optics Imaging and Display*, edited by Hannan Wang, Proceedings of SPIE Vol. 11571 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

ISSN: 0277-786X

---

**Paper Numbering:** *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## OPTICS FRONTIERS ONLINE 2020: OPTICS IMAGING AND DISPLAY

---

- 11571 02     **Research on compact design and reduced structure analysis of a small camera for ocean remote sensing [11571-3]**
- 11571 03     **A super-resolution reconstruction algorithm based on improved superoscillation [11571-4]**
- 11571 04     **RestoreNet: a deep learning framework for image restoration in optical multi-aperture imaging system [11571-5]**
- 11571 05     **Fermat's principle in imaging in complex stratified media [11571-6]**
- 11571 06     **Colorful see-through near-eye display based on all-dielectric metasurface [11571-8]**
- 11571 07     **Experimental research on polarized LIDAR imaging based on GM-APD [11571-9]**
- 11571 08     **Blind deconvolution with automatic relevance determination model based on the kernel gradient [11571-10]**
- 11571 09     **Single-pixel video imaging based on dual-channel synthesis [11571-11]**
- 11571 0A     **Complex amplitude reconstruction based on the spatial carrier phase-shifting method in off-digital holography [11571-12]**
- 11571 0B     **An efficient matching method in adaptive fringe-pattern projection for surface measurement [11571-13]**
- 11571 0C     **Phase image detection of typical leukocytes for their feature analysis [11571-16]**
- 11571 0D     **Detecting orbital angular momentum in optical vortex based on ptychographic imaging [11571-17]**
- 11571 0E     **Statistical average method for phase extraction under two-step phase-shifting interferometry [11571-18]**
- 11571 0F     **Design of wide field of view pinhole lens for VR/AR image quality test [11571-19]**
- 11571 0G     **Non-line-of-sight object detection based on the orthogonal matching pursuit compressive sensing reconstruction [11571-20]**
- 11571 0H     **Design of a wide waveband parallel optical tube with large field of view [11571-21]**
- 11571 0I     **A high resolution and accuracy phase-only spatial light modulator [11571-22]**

- 11571 OJ **Non-motion multi-planar coherent diffraction imaging with multimode fiber source** [11571-25]
- 11571 OK **Analysis of the factors influencing the diffraction characteristics of volume holographic grating for 3D anti-counterfeiting** [11571-32]
- 11571 OL **Focusing light based on phase-controlled metasurface** [11571-37]
- 11571 OM **Learning-based absolute 3D shape measurement based on single fringe phase retrieval and speckle correlation** [11571-38]
- 11571 ON **Temporal phase unwrapping with a lightweight deep neural network** [11571-39]
- 11571 OO **Position correction algorithm combined with Fresnel CDI for ptychography** [11571-41]
- 11571 OP **3D resolution-enhanced intensity diffraction tomographic microscopy** [11571-45]
- 11571 OQ **Super resolution imaging method based on the synthetic aperture system** [11571-46]
- 11571 OR **Improved multi-slice Fourier ptychographic diffraction tomography based on high-numerical-aperture illuminations** [11571-47]
- 11571 OS **Wigner distribution function retrieval via three-dimensional intensity measurement** [11571-48]
- 11571 OT **Structural design of microscopic 3D measurement system based on dual-telecentric optical path** [11571-49]
- 11571 OU **Multi-view 3D light field video broadcast system** [11571-51]
- 11571 OV **Gamma correction by using deep learning** [11571-52]
- 11571 OW **On the ambiguities of phase retrieval problem in Fourier ptychographic microscopy** [11571-53]
- 11571 OX **Terahertz time-domain spectroscopic imaging of diverse shale** [11571-54]
- 11571 OY **Research on theoretical method of computational imaging astrometry** [11571-55]
- 11571 OZ **A trinocular vision measurement method of visible cameras with wide field of view** [11571-56]
- 11571 10 **Multi-view foreground segmentation based on spatial consistency constraints** [11571-61]
- 11571 11 **Holographic lensless quantitative phase imaging microscope** [11571-62]
- 11571 12 **Calibration of instrument line shape of wide-swath greenhouse gas monitor instrument** [11571-63]

- 11571 13 **Hologram with the enlarged depth of field captured by the commercial plenoptic camera**  
[11571-64]
- 11571 14 **Pixel-super-resolution lensfree microscopy based on multiple-wavelength scanning** [11571-65]
- 11571 15 **High-speed face measurement system based on near-infrared fringe projection** [11571-68]
- 11571 16 **Extraction of depth dimension information from spectral image** [11571-69]
- 11571 17 **Robust absolute 3D measurement using stereo cost-volume filtering for fringe orders** [11571-70]
- 11571 18 **Single-shot spatial frequency multiplex fringe pattern for phase unwrapping using deep learning** [11571-71]
- 11571 19 **Miniaturized multi-contrast quantitative phase imaging microscope** [11571-74]
- 11571 1A **Lensless super-resolution imaging based on multi-wavelength illumination** [11571-75]
- 11571 1B **An infrared image super-resolution imaging algorithm based on auxiliary convolution neural network** [11571-76]
- 11571 1C **A commercialized digital holographic microscope with complete software supporting**  
[11571-77]
