Message from Program Chairs xvii
Organizing Committee xix
Program Committee xxi
Reviewers xxvi
Steering Committee xxvii
Sponsors xxviii

Research Track

Accurately Quantifying a Billion Instances per Second 1
Waqar Hassan (University of São Paulo), André Maletzke (Western Parana State University), and Gustavo Batista (University of New South Wales)

Discovering Maximal Periodic-Frequent Patterns in Very Large Temporal Databases 11
Uday Kiran Rage (The University of Aizu), Yutaka Watanobe (The University of Aizu), Bhaskar Chaudhury (Dhirubhai Ambani Institute of Information and Communications Technology), Koji Zettsu (NICT), Masashi Toyoda (The University of Aizu), and Masaru Kitsuregawa (The University of Tokyo)

Interpretability and Refinement of Clustering 21
Félix Iglesias (TU Wien, Austria), Tanja Zseby (TU Wien, Austria), and Arthur Zimek (SDU, Denmark)

Learning Fair and Transferable Representations with Theoretical Guarantees 30
Luca Oneto (University of Genoa), Michele Donini (Amazon), Massimmiliano Pontil (Istituto Italiano di Tecnologia & University College London), and Andreas Maurer (Self Employed)

Period Estimation for Incomplete Time Series 40
Lin Zhang (University at Albany--SUNY) and Petko Bogdanov (University at Albany--SUNY)

Ensemble of Hierarchical Temporal Memory for Anomaly Detection .50
Farzaneh Shoeleh (Canadian Institute for Cybersecurity, University of New Brunswick, Canada), Masoud Erfani (Canadian Institute for Cybersecurity, University of New Brunswick, Canada), Duc-Phong Le (Canadian Institute for Cybersecurity, University of New Brunswick, Canada), and Ali A. Ghorbani (Canadian Institute for Cybersecurity, University of New Brunswick, Canada)

Improving Product Placement in Retail with Generalized High-Utility Itemsets .60
Chinmay Bapna (International Institute of Information Technology Hyderabad, India), Polepalli Krishna Reddy (International Institute of Information Technology Hyderabad, India), and Anirban Mondal (Ashoka University, Haryana, India)

Block-Approximated Exponential Random Graphs .70
Florian Adriaens (KTH Royal Institute of Technology, Sweden), Alexandru Mara (Ghent University, Belgium), Jefrey Lijffijt (Ghent University, Belgium), and Tijl De Bie (Ghent University, Belgium)

Spatio-Temporal Functional Neural Networks .81
Aniruddha Rajendra Rao (Penn State University), Qiyao Wang (Industrial AI Lab, Hitachi America, Ltd. R&D), Haiyan Wang (Industrial AI Lab, Hitachi America, Ltd. R&D), Hamed Khorasgani (Industrial AI Lab, Hitachi America, Ltd. R&D), and Chetan Gupta (Industrial AI Lab, Hitachi America, Ltd. R&D)

AdvPL: Adversarial Personalized Learning .90
Wei Du (University of Arkansas) and Xintao Wu (University of Arkansas)

Coordinate Descent Method for Log-Linear Model on Posets .99
Shota Hayashi (The University of Tokyo, Japan), Mahito Sugiyama (National Institute of Informatics, Japan), and Shin Matsushima (The University of Tokyo, Japan)

Active Learning of SVDD Hyperparameter Values .109
Holger Trittenbach (Karlsruhe Institute of Technology), Klemens Böhm (Karlsruhe Institute of Technology), and Ira Assent (Aarhus University)

Mix2Vec: Unsupervised Mixed Data Representation .118
Chengzhang Zhu (University of Technology Sydney, Australia), Qi Zhang (University of Technology Sydney, Australia), Longbing Cao (University of Technology Sydney, Australia), and Arman Abrahamyan (Commonwealth Bank, Australia)

Sequence Learning with Side Dependencies .128
Zhiwei Wang (Michigan State University), Hui Liu (Michigan State University), Gale Yan Huang (TAL Education Group), and Zitao Liu (TAL Education Group)

Benchmarking Network Embedding Models for Link Prediction: Are We Making Progress? .138
Alexandru Cristian Mara (Ghent University, Belgium), Jefrey Lijffijt (Ghent University, Belgium), and Tijl De Bie (Ghent University, Belgium)

CO2Vec: Embeddings of Co-Ordered Networks Based on Mutual Reinforcement .148
Meng-Fen Chiang (Living Analytics Research Centre, Singapore), Ee-Peng Lim (Singapore Management University, Singapore), Wang-Chien Lee (The Pennsylvania State University, USA), and Philips Kokoh Prasetyo (Living Analytics Research Centre, Singapore)

FONDUE: Framework for Node Disambiguation Using Network Embeddings .158
Ahmad Mel (Ghent University, Belgium), Bo Kang (Ghent University, Belgium), Jefrey Lijffijt (Ghent University, Belgium), and Tijl De Bie (Ghent University, Belgium)

OnlineBTD: Streaming Algorithms to Track the Block Term Decomposition of Large Tensors .168
Ekta Gujral (University of California, Riverside) and Evangelos E. Papalexakis (University of California, Riverside)

Shells within Minimum Enclosing Balls .178
Christian Bauckhage (Fraunhofer IAIS, Germany), Michael Bortz (Fraunhofer ITWM, germany), and Rafet Sifa (Fraunhofer IAIS, Germany)

Weakly Supervised Person Search .188
Lan Yan (CASIA, University of Chinese Academy of Sciences), Wenbo Zheng (Xi'an Jiaotong University, CASIA), Fei-Yue Wang (CASIA), and Chao Gou (Sun Yat-sen University)

Dimensionality-Adaptive K-Center in Sliding Windows .197
Paolo Pellizzoni (University of Padova, Padova Italy), Andrea Pietracaprina (University of Padova, Padova Italy), and Geppino Pucci (University of Padova, Padova Italy)

Body Pose and Deep Hand-Shape Feature Based American Sign Language Recognition .207
Al Amin Hosain (George Mason University), Panneer Selvam Santhalingam (George Mason University), Parth Pathak (George Mason University), Jana Košecká (George Mason University), and Huzefa Rangwala (George Mason University)

Estimating Countries' Peace Index through the Lens of the World News as Monitored by GDELT .216
Vasiliki Voukelatou (Scuola Normale Superiore and ISTI-CNR, Italy), Luca Pappalardo (ISTI-CNR, Italy), Ioanna Miliou (University of Pisa and ISTI-CNR, Italy), Lorenzo Gabrielli (ISTI-CNR, Italy), and Fosca Giannotti (ISTI-CNR, Italy)

Optimal Data Placement for Data-Centric Algorithms on NVM-Based Hybrid Memory .226
Yongping Luo (University of Science and Technology of China), Peiquan Jin (University of Science and Technology of China), and Shouhong Wan (University of Science and Technology of China)

Positive Influence Maximization and Negative Influence Minimization in Signed Networks under Competitive Independent Cascade Model .236
Cheng-En Sung (National Cheng Kung University), Hao-Shang Ma (National Cheng Kung University), and Jen-Wei Huang (National Cheng Kung University)

Simultaneous Link Prediction on Unaligned Networks Using Graph Embedding and Optimal Transport .245
Luu Huu Phuc (Kyoto University, Japan), Koh Takeuchi (Kyoto University, Japan), Makoto Yamada (Kyoto University, Japan), and Hisashi Kashima (Kyoto University, Japan)

Denoising of Magnetic Resonance Images with Deep Neural Regularizer Driven by Image Prior .255
Yazhou Zhu (Jiangnan University), Xiang Pan (Jiangnan University), Jing Zhu (Jiangnan University), Lihua Li (Hangzhou Dianzi University), and Yuan Liu (Jiangnan University)

Active Sampling for Learning Interpretable Surrogate Machine Learning Models .264
Amal Saadallah (TU Dortmund) and Katharina Morik (TU Dortmund)

Near-Duplicated Loss for Accurate Object Localization .273
He Liu (Tsinghua University), Xiaocheng Yang (Tsinghua University), Huaping Liu (Tsinghua University), Tao Kong (ByteDance AI Lab), and Fuchun Sun (Tsinghua University)

Information Exposure from Relational Background Knowledge on Social Media .282
Shuo Liu (Georgetown University, USA), Lisa Singh (Georgetown University, USA), and Kevin Tian (Georgetown University, USA)

MEE : An Automatic Metric for Evaluation Using Embeddings for Machine Translation .292
Ananya Mukherjee (International Institute of Information Technology Hyderabad, India), Hema Ala (International Institute of Information Technology Hyderabad, India), Manish Shrivastava (International Institute of Information Technology Hyderabad, India), and Dipti Misra Sharma (International Institute of Information Technology Hyderabad, India)

A Graph Convolutional Encoder and Decoder Model for Rumor Detection .300
Hongbin Lin (Shenzhen University, China), Xi Zhang (Shenzhen Technology University, China), and Xianghua Fu (Shenzhen Technology University, China)

Efficient Frequent Subgraph Mining in Transactional Databases .307
Pascal Welke (University of Bonn)

Joint Bayesian Variable Selection and Graph Estimation for Non-Linear SVM with Application to Genomics Data .315
Wenli Sun (University of Pennsylvania, USA), Changgee Chang (University of Pennsylvania, USA), and Qi Long (University of Pennsylvania, USA)

MRSweep: Distributed In-Memory Sweep-Line for Scalable Object Intersection Problems .324
Tilemachos Pechlivanoglou (York University, Canada), Mahmoud Alsaeed (York University, Canada), and Manos Papagelis (York University, Canada)

Attributed Network Embedding with Community Preservation .334
Tong Huang (Yunnan University), Lihua Zhou (Yunnan University), Lizhen Wang (Yunnan University), Guowang Du (Yunnan University), and Kevin Lü (Brunel University)

Economic Worth-Aware Word Embeddings .344
Yusan Lin (Visa Research), Peifeng Yin (Pinterest), and Wang-Chien Lee (The Pennsylvania State University)

Exploiting BERT with Global-Local Context and Label Dependency for Aspect Term Extraction .354
Qingxuan Zhang (Beijing Institute of Technology, China) and Chongyang Shi (Beijing Institute of Technology, China)

SesameBERT: Attention for Anywhere .363
Ta-Chun Su (Cathay Financial Holdings Lab) and Hsiang-Chih Cheng (Cathay Financial Holdings Lab)

Application Track

RIC-NN: A Robust Transferable Deep Learning Framework for Cross-Sectional Investment Strategy .370
Kei Nakagawa (Nomura Asset Management Co, .Ltd.), Masaya Abe (Nomura Asset Management Co, .Ltd.), and Junpei Komiyama (New York University)

Driving with Data in the Motor City: Understanding and Predicting Fleet Maintenance Patterns .380
Josh Gardner (University of Washington), Jawad Mroueh (University of Michigan), Natalia Jenuwine (University of Michigan), Noah Weaverdyck (University of Michigan), Samuel Krassenstein (City of Detroit - Operations and Infrastructure Group), Arya Farahi (University of Michigan), and Danai Koutra (University of Michigan)

Classification Benchmarks for Under-Resourced Bengali Language Based on Multichannel Convolutional-LSTM Network .390
Md. Rezaul Karim (Fraunhofer Institute for Applied Information Technology FIT, Germany), Bharathi Raja Chakravarthi (National University of Ireland Galway, Ireland), John P. McCrae (National University of Ireland Galway, Ireland), and Michael Cochez (Vrije Universiteit Amsterdam, the Netherlands)

Boosting Fashion Image Attributes Classification Performance with MT-GAN Training Technique .400
Qun Li (Microsoft, USA), Changbo Hu (Microsoft, USA), Keng-hao Chang (Microsoft, USA), and Ruofei Zhang (Microsoft, USA)

HANKE: Hierarchical Attention Networks for Knowledge Extraction in Political Science Domain .410
Erick Skorupa Parolin (The University of Texas at Dallas), Latifur Khan (The University of Texas at Dallas), Javier Osorio (University of Arizona), Vito D'Orazio (The University of Texas at Dallas), Patrick T. Brandt (The University of Texas at Dallas), and Jennifer Holmes (The University of Texas at Dallas)

Precision Coupon Targeting with Dynamic Customer Triage .420
Chuanren Liu (University of Tennessee) and Wenxiang Zhu (Alibaba Group)

Automating and Analyzing Whole-Farm Carbon Models .429
Aditi Maheshwari (Utah State University), Curtis Dyreson (Utah State University), Jennifer R. Reeve (Utah State University), Vishal Sharma (Utah State University), and Anthony Whaley (Utah State University)

Probability of Default Estimation, with a Reject Option .439
Lize Coenen (Vrije Universiteit Brussel), Ahmed K. A. Abdullah (Vrije Universiteit Brussel), and Tias Guns (Vrije Universiteit Brussel)

Profiling US Restaurants from Billions of Payment Card Transactions .449
Himel Dev (University of Illinois at Urbana-Champaign) and Hossein Hamooni (Facebook Inc.)

Embedding for Anomaly Detection on Health Insurance Claims 459
Jiaqi Lu (McGill University), Benjamin C. M. Fung (McGill University), and William K. Cheung (Hong Kong Baptist University)

Cross-Layer Profiling of Encrypted Network Data for Anomaly Detection 469
Fares Meghdouri (TU Wien), Félix Iglesias (TU Wien), and Tanja Zseby (TU Wien)

Interactive Machine Learning Tool for Clustering in Visual Analytics 479
Miichael C. Thrun (Philipps-University of Marburg), Felix Pape (Philipps-University of Marburg), and Alfred Ultsch (Databionics Research Group Philipps-University of Marburg)

Stress Prediction from Head Motion 488
Hitoshi Kusano (Preferred Networks, inc), Yuji Horiguchi (Sony Corporation), Yukino Baba (University of Tsukuba), and Hisashi Kashima (Kyoto University)

Using Data Science to Improve the Identification of Plant Nutritional Status 496
David Condaminet (Normandie Univ, UNICAEN, ENSICAEN, CNRS UMR GREYC), Albrecht Zimmermann (Normandie Univ, UNICAEN, ENSICAEN, CNRS UMR GREYC), Bastien Billiot (Centre Mondial de l'Innovation Roullier Laboratoire de Nutrition Végétale), Bruno Crémilleux (Normandie Univ, UNICAEN, ENSICAEN, CNRS UMR GREYC), and Sylvain Pluchon (Centre Mondial de l'Innovation Roullier Laboratoire de Nutrition Végétale)

A Distance Metric for Sets of Events 506
Raphael Sahann (University of Vienna, Austria), Claudia Plant (University of Vienna, Austria), and Torsten Möller (University of Vienna, Austria)

Matching Research Publications to the United Nations' Sustainable Development Goals by Multi-Label-Learning with Hierarchical Categories 516
Rui Zhang (University of Southern Denmark, Denmark), Maéva Vignes (University of Southern Denmark, Denmark), Ulrich Steiner (Center for Research and Interdisciplinatity, France), and Arthur Zimek (University of Southern Denmark, Denmark)

Why Should I Trust This Item? Explaining the Recommendations of any Model 526
Corentin Lonjarret (INSA Lyon, France), Céline Robardet (INSA Lyon, France), Marc Plantevit (Université Claude Bernard Lyon 1, France), Roch Auburtin (Visiativ, France), and Martin Atzmueller (Tilburg University, The Netherlands)

Cardea: An Open Automated Machine Learning Framework for Electronic Health Records 536
Sarah Alnegheimish (MIT, USA), Najat Alrashed (The Center for Complex Engineering Systems at KACST and MIT, Saudi Arabia.), Faisal Aleissa (The Center for Complex Engineering Systems at KACST and MIT, Saudi Arabia.), Shahad Althobaiti (The Center for Complex Engineering Systems at KACST and MIT, Saudi Arabia.), Dongyu Liu (MIT, USA), Mansour Alsaleh (The Center for Complex Engineering Systems at KACST and MIT, Saudi Arabia.), and Kalyan Veeramachaneni (MIT, USA)

Special Sessions

Environmental and Geo-spatial Data Analytics

No Cloud on the Horizon: Probabilistic Gap Filling in Satellite Image Series .546
Raphael Fischer (TU Dortmund University, Germany), Nico Piatkowski (Fraunhofer IAIS ME, Germany), Charlotte Pelletier (Univ. Bretagne Sud / IRISA, France), Geoffrey I. Webb (Monash University, Australia), François Petitjean (Monash University, Australia), and Katharina Morik (TU Dortmund University, Germany)

Urban and Socio-Economic Correlates of Property Prices in Dublin's Area .556
Damien Dupré (Dublin City University)

Performance Evaluation of Low-Cost PurpleAir Sensors in Ambient Air .563
Kabseok Ko (Qualcomm Institute, USA), Seokheon Cho (Qualcomm Institute, USA), and Ramesh R. Rao (University of California, San Diego, USA)

On-Board Unit Big Data: Short-Term Traffic Forecasting in Urban Transportation Networks .569
Giovanni Buroni (Machine Learning Group, Université Libre de Bruxelles), Yann-Aël Le Borgne (Machine Learning Group, Université Libre de Bruxelles), Gianluca Bontempi (Machine Learning Group, Université Libre de Bruxelles), Daniele Raimondi (KU Leuven), and Karl Determe (Bruxelles Mobilite')

Traffic Flow Estimation Using Probe Vehicle Data .579
Olga Gkountouna (George Mason University), Dieter Pfoser (George Mason University), and Andreas Züefle (George Mason University)

Vehicle Relocation for Ride-Hailing .589
Joon-Seok Kim (George Mason University), Dieter Pfoser (George Mason University), and Andreas Züfle (George Mason University)

Fake News, Bots and Trolls

Detecting Fake News Spreaders on Twitter from a Multilingual Perspective .599
Inna Vogel (Fraunhofer Institute for Secure Information Technology) and Meghana Meghana (Fraunhofer Institute for Secure Information Technology)

Watch 'n' Check: Towards a Social Media Monitoring Tool to Assist Fact-Checking Experts .607
Assunta Cerone (Politecnico di Torino), Elham Naghizade (RMIT University), Falk Scholer (RMIT University), Devi Mallal (RMIT ABC Fact Check), Russell Skelton (RMIT ABC Fact Check), and Damiano Spina (RMIT University)

Simulation of Misinformation Spreading Processes in Social Networks: An Application with NetLogo .614
Emilio Sulis (Computer Science Department - University of Torino) and Marcella Tambuscio (Austrian Center for Digital Humanities - Austrian Academy of Sciences)

Using Markup Language to Differentiate between Reliable and Unreliable News .619
Caireann Kennedy (NUI Galway) and Josephine Griffith (NUI Galway)

Profiling Bots and Fake News Spreaders at PAN'19 and PAN'20 .626
Juan Pizarro (Independent Researcher)

Are You Human? Detecting Bots on Twitter Using BERT .631
David Dukić (University of Zagreb), Dominik Keča (University of Zagreb), and Dominik Stipić (University of Zagreb)

Modelling User Influence and Rumor Propagation on Twitter Using Hawkes Processes .637
H Ruda Nie (RMIT University, Australia; Tay Nguyen University, Vietnam;), Xiuzhen Zhang (RMIT University, Australia), Minyi Li (RMIT University, Australia), Anil Dolgun (RMIT University, Australia;), and James Baglin (RMIT University, Australia)

Multimodal Multi-Image Fake News Detection .647
Anastasia Giachanou (Universitat Politècnica de València), Guobiao Zhang (Wuhan University, Universitat Politècnica de València), and Paolo Rosso (Universitat Politècnica de València)

Privacy, Security and Trust in Computational Intelligence

Privacy-Aware Cold-Start Recommendation Based on Collaborative Filtering and Enhanced Trust .655
Fan Wang (Qufu Normal University), Weiyi Zhong (Qufu Normal University), Xiaolong Xu (Nanjing University of Information Science and Technology), Wajid Rafique (Nanjing University), Zhili Zhou (Nanjing University of Information Science and Technology), and Lianyong Qi (Qufu Normal University)

Reinforcement Learning Based Test Case Prioritization for Enhancing the Security of Software .663
Tingting Shi (Xiamen University of Technology), Lei Xiao (Xiamen University of Technology), and Keshou Wu (Xiamen University of Technology)

Towards Privacy-Preserving Deep Learning: Opportunities and Challenges .673
Sheraz Ali (University of Jinan, China), Muhammad Maaz Irfan (University of Jinan, China), Abubakar Bomai (University of Jinan, China), and Chuan Zhao (University of Jinan, China)

Privacy-Preserving GWAS Computation on Outsourced Data Encrypted under Multiple Keys through Hybrid System .683
Abubakar Bomai (University of Jinan, China), Mohammed Shujaa Aldeen (University of Jinan, China), and Chuan Zhao (University of Jinan, China)

Personalized Course Recommendation Based on Eye-Tracking Technology and Deep Learning .692
Qi Chen (Shandong Normal University, China), Xiaomei Yu (Shandong Normal University, China), Nan Liu (Shandong Normal University , China), Xiaoning Yuan (Shandong Normal University , China), and Zhaojie Wang (Qufu Normal University, China)

Practical Privacy Protection Scheme in WiFi Fingerprint-Based Localization .699
Wenxiang Wu (National University of Defense Technology), Shaojing Fu (National University of Defense Technology), and Yuchuan Luo (National University of Defense Technology)

Naive Bayes Classification under Local Differential Privacy .709
Emre Yilmaz (Case Western Reserve University), Mohammad Al-Rubaie (University of South Florida), and J. Morris Chang (University of South Florida)

Detecting Protected Health Information with an Incremental Learning Ensemble: A Case Study on New Zealand Clinical Text .719
Balkaran Singh (Orion Health), Quan Sun (Orion Health), Yun Sing Koh (Auckland University), Junjae Lee (Orion Health), and Edmond Zhang (Orion Health)

Fair Pairwise Learning to Rank .729
Mattia Cerrato (Università di Torino), Marius Köppel (Johannes Gutenberg-Universität Mainz), Alexander Segner (Johannes Gutenberg-Universität Mainz), Roberto Esposito (Università di Torino), and Stefan Kramer (Johannes Gutenberg-Universität Mainz)

Poster Papers

Classification between Machine Translated Text and Original Text by Part of Speech Tagging Representation .739
Nancirose Piazza (SAIL Lab - University of New Haven, United States)

An Adaptive Utilization of Convolutional Matrix Methods of Neuron Cell Segmentation with an Application Interface to Aid the Understanding of How Memory Recall Works .741
Ishan Jain (Stanford University) and Neeraj Rattehalli (Stanford University)

DermaDetect: A Novel Computer Vision Model for an Accurate Diagnosis of Skin Conditions and Rashes .743
Siddharth Sharma (Stanford University)

Improving Sentiment Analysis in Arabic and English Languages by Using Multi-Layer Perceptron Model (MLP). .745
Maram Almaghrabi (Umm Al-Qura University, Saudi Arabia) and Girija Chetty (University of Canberra, Australia)

Cluster Quality Analysis Using Silhouette Score .747
Ketan Rajshekhar Shahapure (UMBC) and Charles Nicholas (UMBC)

Bayesian Modeling Approach in Big Data Contexts: An Application in Spatial Epidemiology .749
Erick Orozco-Acosta (Public University of Navarre, Spain), Aritz Adin (Public University of Navarre, Spain), and María Dolores Ugarte (Public University of Navarre, Spain)

An Automatic Document Summarization Approach Based on Fuzzy Ontology and Machine Learning 751
Hongfei Liu (Qilu University of Technology, China) and Qian Gao (Qilu University of Technology, China)

Robust Multivariate Regression on Riemannian Manifolds .753
Sangyul Lee (Seoul National University) and Hee-Seok Oh (Seoul National University)

Adapting Established Text Representations for Predicting Review Sentiment in Turkish .755
İzel Çavuşoğlu (Fraunhofer IAIS, Germany), Pielka Maren (Fraunhofer IAIS, Germany), and Sifa Rafet (Fraunhofer IAIS, Germany)

Querying Influential Maximum Connected Community in Large Graphs .757
Yuehao Xu (Zhejiang Gongshang University, China), Renjie Sun (Zhejiang Gongshang University, China), Yanping Wu (Zhejiang Gongshang University, China), Chen Chen (Zhejiang Gongshang University, China), and Xiaoyang Wang (Zhejiang Gongshang University, China)

Building Multiclass Classification Baselines for Anomaly-Based Network Intrusion Detection Systems .759
Ajay Shah (Seton Hall University), Sophine Clachar (Seton Hall University), Manfred Minimair (Seton Hall University), and Davis Cook (Seton Hall University)

Building Up Explainability in Multi-Layer Perceptrons for Credit Risk Modeling .761
Rudrani Sharma (University of Luxembourg), Christoph Schommer (University of Luxembourg), and Nicolas Vivarelli (Post Luxembourg)

Predicting Workplace Injuries Using Machine Learning Algorithms .763
Divya Sukumar (The University of Southern Queensland, Australia), Ji Zhang (The University of Southern Queensland, Australia), Xiaohui Tao (The University of Southern Queensland, Australia), Xin Wang (Southwest Petroleum University, China), and Wenbin Zhang (Carnegie Mellon University, USA)

Towards an Empirical and Theoretical Evaluation of Gradient Based Approaches for Finding Kernel Minimum Enclosing Balls .765
Hanna Kondratiuk (Fraunhofer IAIS) and Rafet Sifa (Fraunhofer IAIS)

Measuring Indirect External Threat: A Time Series Sentiment Analysis of NATO Resolutions .767
Erik M. Fay (University of Kentucky)

The Directionality Function Defect of Performance Evaluation Method in Regression Neural Network for Stock Price Prediction .769
Yi Wei (University at Buffalo) and Vipin Chaudhary (University at Buffalo)

Improving Neural Networks Using Slice Models for Similar Classes .771
Jinwook Kim (Daegu Gyeongbuk Institute of Science and Technology, Republic of Korea) and Min-Soo Kim (Korea Advanced Institute of Science and Technology, Republic of Korea)

Landmarks-Based Blocking Method for Large-Scale Entity Resolution .773
Samudra Herath (University of Adelaide, ARC Centre of Excellence for Mathematical and Statistical Frontiers, Australia), Matthew Roughan (University of Adelaide, ARC Centre of Excellence for Mathematical and Statistical Frontiers, Australia), and Gary Glonek (University of Adelaide, Australia)

Fake News Detection Using Multilingual Evidence .775
Daryna Dementieva (Skolkovo Institute of Science and Technology, Russian Federation) and Alexander Panchenko (Skolkovo Institute of Science and Technology, Russian Federation)

Bayesian Estimation of the Effect of Television Advertising on Web Metrics .777
Ritwik Sinha (Adobe, USA), Shiv Saini (Adobe, India), Moumita Sinha (Adobe, USA), and David Arbour (Adobe, USA)

Data Profiling Method for Metadata Management .779
Kazuhide Aikoh (Hitachi America, USA), Yuya Isoda (Hitachi America, USA), and Ken Sugimoto (Hitachi, Japan)

Machine Learning for Evaluating Kaizens in Volkswagen Production System - an Industrial Case Study 781
Akshay Thakur (Volkswagen AG), Robert Beck (Volkswagen AG), Sanaz Mostaghim (Otto von Guericke University), and Daniel Großmann (Technische Hochschule Ingolstadt)

Journal Track Extended Abstracts

Using Network Features for Credit Scoring in MicroFinance: Extended Abstract 783
Paulo Paraíso (INESCTEC / Seedstars), Saulo Ruiz (Seedstars), Pedro Gomes (Seedstars), Luis Rodrigues (Seedstars), and João Gama (INESCTEC / Universidade do Porto)

Incremental Learning Strategies for Credit Cards Fraud Detection: Extended Abstract 785
Bertrand Lebichot (Universite Libre de Bruxelles, Belgium), Gian Marco Paldino (Universite Libre de Bruxelles, Belgium), Gianluca Bontempi (Universite Libre de Bruxelles, Belgium), Wissam Siblini (Worldline, France), Liyun He-Guelton (Worldline, France), and Frédéric Oblé (Worldline, France)

Linking Bank Clients Using Graph Neural Networks Powered by Rich Transactional Data: Extended Abstract 787
Valentina Shumovskaia (Risk Modeling & Research, Sberbank), Kirill Fedyanin (Skolkovo Institute of Science and Technology (Skoltech)), Ivan Sukharev (Risk Modeling & Research, Sberbank), Dmitry Berestnev (Risk Modeling & Research, Sberbank), and Maxim Panov (Skolkovo Institute of Science and Technology (Skoltech))

Cryptocurrencies Asset Pricing via Machine Learning: Extended Abstract 789
Qiyu Wang (Zhejiang University of Finance and Economics)

Big Data Quality Prediction on Banking Applications: Extended Abstract 791
Ka Yee Wong (University of New South Wales) and Raymond K Wong (University of New South Wales)

Generalized Isolation Forest: Some Theory and more Applications Extended Abstract 793
Sebastian Buschjäger (TU Dortmund University, Germany, Chair for Aritifical Intelligence), Philipp-Jan Honysz (TU Dortmund University, Germany, Chair for Aritifical Intelligence), and Katharina Morik (TU Dortmund University, Germany, Chair for Aritifical Intelligence)

Author Index 795
