Volume 11544

Proceedings of SPIE 0277-786X, V. 11544

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *High-Power Lasers and Applications XI*, edited by Ruxin Li, Shibin Jiang, Ingmar Hartl, Proceedings of SPIE Vol. 11544 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

HIGH-POWER LASERS AND APPLICATIONS I

- 11544 05 **A passively Q-switched dual-wavelength laser based on the coaxial diode end-pumping configuration** [11544-3]
- 11544 06 **Raman mitigation in high-power fiber laser transmission by long period fiber grating for longer delivery distance** [11544-4]
- 11544 07 **Experimental study on CMOS and materials irradiated by hundred-picosecond pulse laser with high repetition rate** [11544-5]

HIGH-POWER LASERS AND APPLICATIONS II

- 11544 0A **Design of anti-drone laser weapon systems** [11544-8]
- 11544 0B **A broadband RF-intensity modulated 532 nm light source for underwater ranging** [11544-9]

POSTER SESSION

- 11544 0D **Optimum design for Yb:YAG disk laser with zero thermal load** [11544-11]
- 11544 0E **Experimental analyses on passive coherent combining of all-fiber feedback ring cavity based on diffractive optical element** [11544-12]
- 11544 0F **Fabrication of tilted fiber Bragg grating for stimulated Brillouin scattering suppression in fiber** [11544-13]
- 11544 0G **Dependence of laser output on discharge starting voltage in longitudinally excited CO₂ laser** [11544-14]
- 11544 0H **Effects of space environments on space laser system for spacecraft** [11544-15]
- 11544 0I **The research on the edge thermal effect of the thin disk crystal in thin disk lasers** [11544-16]
- 11544 0J **2 μm eye-safe solar-pumped laser** [11544-17]
- 11544 0K **Experimental contrast study on thermocouple test based on CO₂ laser** [11544-18]
