PROCEEDINGS OF SPIE

Real-time Photonic Measurements, Data Management, and Processing V

Ming Li
Bahram Jalali
Mohammad Hossein Asghari
Editors

11–16 October 2020
Online Only, China

Sponsored by
SPIE
COS—Chinese Optical Society

Cooperating Organizations
Tsinghua University (China) • Peking University (China) • University of Science and Technology of China (China) • Zhejiang University (China) • Tianjin University (China) • Beijing Institute of Technology (China)• Beijing University of Posts and Telecommunications (China) • Nankai University (China) • Changchun University of Science and Technology (China) University of Shanghai for Science and Technology (China) • Capital Normal University (China) • Huazhong University of Science and Technology (China) • Beijing Jiaotong University (China) • China Jiliang University (China) • Shanghai Institute of Optics and Fine Mechanics, CAS (China) • Changchun Institute of Optics, Fine Mechanics and Physics, CAS (China) Institute of Semiconductors, CAS (China) • Institute of Optics and Electronics, CAS (China) • Institute of Physics, CAS (China) Shanghai Institute of Technical Physics, CAS (China) • China Instrument and Control Society (China) • Japan Optical Society (Japan) • Korea Optical Society (Korea, Republic of) • Australia Optical Society (Australia) • Singapore Optical Society (Singapore) • European Optical Society

Supporting Organizations

Volume 11555

Proceedings of SPIE 0277-786X, V. 11555

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Real-time Photonic Measurements, Data Management, and Processing V*, edited by Ming Li, Bahram Jalali, Mohammad Hossein Asghari, Proceedings of SPIE Vol. 11555 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

SESSION 1 OPTOELECTRONICS DEVICES AND APPLICATIONS

11555 03 **Equivalently tilted Bragg waveguide grating and its applications to photonic devices (Invited Paper)** [11555-2]

11555 04 **Monolithically integrated multi-section semiconductor lasers: towards the future of integrated microwave photonics** [11555-3]

SESSION 2 OPTICAL FIBER MEASUREMENT

11555 08 **A tunable self-mixing chaotic laser with ultra-high bandwidth (Invited Paper)** [11555-8]

SESSION 3 MICROWAVE PHOTONICS MEASUREMENT

11555 0E **Photonic microwave frequency measurement based on harmonic down-conversion by using a semiconductor optical amplifier** [11555-14]

11555 0F **Simultaneous distance and velocity measurement based on a bidirectional chirped fiber Bragg grating (CFBG)** [11555-15]

SESSION 4 OPTICAL SIGNAL GENERATION AND CHARACTERIZATION

11555 0G **Parity-time-symmetric system in photonic parameter space for high-quality signal generation (Invited Paper)** [11555-16]

11555 0H **Effect of bandwidth of direct detection receiver on multiparameter optical performance monitoring (Invited Paper)** [11555-17]

SESSION 5 SINGLE-PHOTON DETECTION AND MEASUREMENT

11555 0K **A versatile single-photon spectrograph for the spectral measurement of the two-photon state (Invited Paper)** [11555-20]

POSTER SESSION

11555 0R **Simulation and analysis of single-mode beam splitter in lithium niobate thin film** [11555-4]

11555 0T **Rapid identification of microplastic using portable Raman system and extra trees algorithm** [11555-31]

11555 0W **High resolution methods on multiple configuration systems** [11555-34]

11555 11 **Real-time synchronous analysis for single aerosol based on polarization and fluorescence measurements** [11555-39]

11555 13 **Simulation and analysis of heterogeneous intensity modulator based on lithium niobate and silicon nitride** [11555-41]

11555 15 **The optical characteristic of Fabry-Perot cavity with chirped fiber gratings** [11555-43]

11555 17 **Simulation study of data transmission for equatorial Earth satellites** [11555-46]
