

PROCEEDINGS OF SPIE

Fourth International Conference on Terahertz and Microwave Radiation: Generation, Detection, and Applications

Oleg A. Romanovskii

Yurii V. Kistenev

Editors

24–26 August 2020

Tomsk, Russian Federation

Organized by

National Research Tomsk State University (Russian Federation)

V.E. Zuev Institute of Atmospheric Optics SB RAS (Russian Federation)

Institute on Laser and Information Technologies RAS (Russian Federation)

Lomonosov Moscow State University (Russian Federation)

Sponsored by

Russian Foundation for Basic Research (Russian Federation)

TYDEX, Ltd. (Russian Federation)

Published by

SPIE

Volume 11582

Proceedings of SPIE 0277-786X, V. 11582

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Fourth International Conference on Terahertz and Microwave Radiation: Generation, Detection, and Applications*, edited by Oleg A. Romanovskii, Yurii V. Kistenev, Proceedings of SPIE Vol. 11582 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$21.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/20/\$21.00.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

FOURTH INTERNATIONAL CONFERENCE ON TERAHERTZ AND MICROWAVE RADIATION: GENERATION, DETECTION AND APPLICATIONS

- 11582 02 **Terahertz induced optical second harmonic generation in the centrosymmetric antiferromagnetic NiO** [11582-2]
- 11582 03 **Free-carrier dynamics in p-doped silicon induced by an intense terahertz field** [11582-3]
- 11582 04 **Double-strand DNA foci formation in human skin fibroblasts after high-power THz pulses exposure** [11582-4]
- 11582 05 **Jet spectroscopy of weakly bound complexes of astrophysical interest: NH₃-Ne and NH₃-H₂** [11582-7]
- 11582 06 **Near-field microwave diagnostics of the burn wounds** [11582-8]
- 11582 07 **Project of powerful long-pulse Bragg FEL of sub-THz to THz band: design, simulations and components testing** [11582-9]
- 11582 08 **Powerful Cherenkov masers with 2D slow-wave structures intended for powering systems of Compton-type FELs** [11582-10]
- 11582 09 **Terahertz laser with optical pumping for photoacoustic spectroscopy application in medicine** [11582-11]
- 11582 0A **Laser and matter properties effect on the enhancement of THz waves energy generated during liquid jets double-pulse excitation** [11582-12]
- 11582 0B **Comparison optical parametric oscillators based on PPKTA and PPKTP for gas analyzes** [11582-13]
- 11582 0C **Study of dielectric properties of biological samples under its modification with reactive oxygen species** [11582-14]
- 11582 0D **Tunable mid- and far-infrared pulses generation due to gas irradiated by a chirped two-color laser field** [11582-15]
- 11582 0E **Subwavelength photonic hook generated by shaped fiber tip with asymmetric terahertz radiation** [11582-18]
- 11582 0F **Dielectric properties of 3D-printing ASA/MWCNTs composites at the Sub-THz frequency range** [11582-19]
- 11582 0G **Novel schemes of trapping regime aimed on efficiency enhancement in free-electron devices** [11582-20]

- 11582 0H **High-harmonic large-orbit gyrotrons for physical applications** [11582-21]
- 11582 0I **Electron masers based on excitation of Talbot-type supermodes** [11582-22]
- 11582 0J **Tetraaminodiphenyl thin films optical and morphological characteristics investigations for high sensitive pyroelectric sensor with wide spectral range** [11582-25]
- 11582 0K **Irregular and non-symmetrical cavities for high-harmonic THz gyrotrons** [11582-26]
- 11582 0L **The difference in terahertz dielectric properties of DNA solutions in water and ethanol** [11582-27]
- 11582 0M **Influence of reflected or external signal on gyrotron operation** [11582-29]
- 11582 0N **Laser interferometry of terahertz discharge in N₂** [11582-30]
- 11582 0O **THz range gyrotron-based facility for material science and plasma physics research** [11582-31]
- 11582 0P **Prospects of the gas-discharge EUV source based on the plasma creation by powerful pulsed terahertz gyrotrons** [11582-32]
- 11582 0Q **Gas discharge sustained by the powerful radiation of 0.26 THz CW gyrotron** [11582-34]
- 11582 0R **Monitoring of the process of microwave heating of frostbite by the IR sensor in the beyond-limit waveguide** [11582-35]
- 11582 0S **Terahertz time-domain spectroscopic polarimetry of carbon nanomaterials-based structures** [11582-36]
- 11582 0T **Sub-THz absorption properties of black carbon containing composites for application in additive technology** [11582-37]
- 11582 0U **Improvement of power, efficiency and frequency stability of THz-range gyrotron at frequency locking regime** [11582-38]
- 11582 0V **Spatial and angular properties of megawatt flux of THz radiation generated at GOL-PET facility** [11582-41]
- 11582 0W **Machine learning methods for the in-vitro analysis of preimplantation embryo Raman micro-spectroscopy** [11582-42]
- 11582 0X **Fe and 5BDSR based composite fluoropolymer films for THz photonics applications** [11582-43]
- 11582 0Y **Mechanisms of stabilization and terahertz radiation of short dense electron bunches** [11582-44]
- 11582 0Z **Interaction of plasma flow heated by gyrotron radiation with magnetic fields of an arched configuration** [11582-45]

- 11582 10 **Continuous atmospheric pressure discharges in terahertz and sub-terahertz focused beams** [11582-46]
- 11582 11 **Imaging of a high-power millimeter-wave beam using a microwave gas breakdown initiated by a metal-dielectric screen** [11582-47]
- 11582 12 **The project of a 2nd harmonic 0.78 THz gyrotron with a coaxial cavity** [11582-48]
- 11582 13 **The progress in high frequency, high power gyrotron development in Russia** [11582-49]
- 11582 14 **Frequency features of electromagnetic response of the ferrite containing PETG composites at EHF range** [11582-51]
- 11582 15 **Terahertz ghost imaging and surface plasmon resonance microscopy: analysis of factors affecting the image quality** [11582-54]
- 11582 16 **Gyrotron setup for ECR-heating system of T-15MD TOKAMAK** [11582-55]
- 11582 17 **Development of a millimeter-band traveling-wave tube with a meander-line microstrip slow wave structure** [11582-56]
- 11582 18 **Development of highly efficient technological medium-power multi-frequency gyrotrons for plasma applications based on magnetically-shielded solenoids** [11582-57]
- 11582 19 **Electromagnetic characteristics of light terahertz materials** [11582-58]
- 11582 1A **Study of two color THz generation with sub-and terawatt laser filament at low pressure gas** [11582-59]
- 11582 1B **Brief history of terahertz photonics and plasmonics at Tomsk Polytechnic University** [11582-60]
- 11582 1C **Improving low-resolution gas-mixture absorption spectra using neural networks** [11582-61]
- 11582 1D **Phase-shift keying for THz data channel** [11582-62]
- 11582 1E **Study of wound healing by terahertz spectroscopy** [11582-63]
- 11582 1F **Generation and detection of highly correlated optical-terahertz biphotons** [11582-64]
- 11582 1G **Possibilities for decomposing Raman spectra of amino acids mixture by Multivariate Curve Resolution (MCR) analysis** [11582-65]
- 11582 1H **Classification of exhaled air IR spectra using combination support vector machine, decision tree, and k-nearest neighbor** [11582-66]
- 11582 1I **Measurement and estimation of the structure of lymphedematous tissue on animal model** [11582-67]

- 11582 1J **Application of laser absorption spectroscopy and machine learning for component analysis of multicomponent gas media** [11582-68]
- 11582 1K **Optical biopsy of skin cancer based on Raman and fluorescence spectroscopy** [11582-69]
- 11582 1L **THz spectroscopy of skin pathologies associated with water migration and content** [11582-71]
- 11582 1M **Influence of ZnGeP₂ volumetric defects on the spectral characteristics in THz range** [11582-73]
- 11582 1N **Imitation of ultra-sharp light focusing within turbid tissue-like scattering medium by using time-independent Helmholtz equation and method Monte Carlo** [11582-74]
- 11582 1O **Extraction the diagonal and off-diagonal components of permittivity tensor using terahertz time-domain polarimetry** [11582-75]
- 11582 1P **Optical and electronic properties of thin bismuth-antimony films in the terahertz frequency range** [11582-76]
- 11582 1Q **Multilayer graphene: ion gel amplitude modulator for terahertz frequency range** [11582-77]
- 11582 1R **Investigation of normal and cancer gastric tissues by terahertz and infrared spectroscopic methods** [11582-78]
- 11582 1S **Phantom tissues from membrane biopolymer composite materials for terahertz applications** [11582-79]
- 11582 1T **Spectral analysis of a mixture of gasoline and diesel fuel using terahertz time-domain spectroscopy** [11582-81]
- 11582 1U **Terahertz optical properties of polymer composite based on electrospun PVC nanofibers** [11582-82]
- 11582 1V **Circular dichroism of metasurfaces based on resonators with different n-fold rotational symmetry** [11582-83]
- 11582 1W **Millimeter-wave astroclimate studies in the North Caucasus: expedition and first results** [11582-84]
- 11582 1X **Study of lymphedematous tissue by optical coherent elastography in small animals** [11582-85]
- 11582 1Y **Narrowband terahertz graphene metasurface synthesis based on equivalent circuit approach** [11582-86]
- 11582 1Z **THz-radiation in a ZGP2 singlecrystal pumped by dual-wavelength optical parametric oscillator based on the KTP singlecrystal** [11582-87]
